Special Guest

We are truly pleased to include Fort Logan Ranch, great friends and customer, as part of this spring sale offering.

The Berg family has been ranching at Fort Logan since 1945. George and Ellen Berg took over management in 1975, followed by Sam and Chennell in 2010. We have been utilizing AI since 1978 and started an ET program in 2020. Our focus has been on making the "right" mother cow. Our cows are run out in the hills around Meagher County and have to work in our environment. We believe in having cattle with good temperament, structure, fertility, and take a balanced approach when choosing our genetics.
When it comes to ranching, genetics are the cornerstone of producing high-quality cattle that meet the demands of both producers and consumers. A strong genetic program focuses on selecting animals with desirable traits-whether that's fertility, temperament, carcass quality, growth rate, or environmental adaptability.

A well-thought-out breeding strategy ensures consistent improvement across generations, creating a herd that thrives in its environment and maximizes productivity. Incorporating modern genetic tools, such as EPDs (Expected Progeny Differences) or DNA testing, helps make data-driven decisions, reducing guesswork and accelerating progress.

Ultimately, investing in superior genetics elevates herd performance, reputation, reliability, and commitment to excellence.

Kevin Murnin ..... Western Livestock Journal

Sight Unseen Purchase Guarantee
Sale Day Phone - (406) 423-7500. Buyers unable to attend the sale may call or send their bids to any of the Representatives listed or directly to Stevenson Angus. We provide a complete satisfaction guarantee for cattle purchased in this manner. When cattle purchased "sight unseen" are delivered, the buyer can inspect the cattle. If they are not as represented, simply put them back on our truck.

Announcements
Announcements from the auction block take precedence over any printed material.

Herd Health
All cattle sell with proper interstate shipment health papers.

Delivery
See our bull delivery policy on page 6. For all cattle purchased over the phone, through LiveAg, CCi or Frontier, Stevenson Angus will be in contact following the sale to arrange delivery. Full payment required before delivery of cattle.

Accommodations
Call sooner than later, as rooms book up fast in White Sulphur Springs, Montana.
The Edith Hotel 406-547-8888
Spa Hot Springs Hotel 406-547-3366

Terms & Conditions
The cattle sell under the suggested terms and conditions of the American Angus Association.

Payment
Payment is due at time of sale and no livestock shall be delivered until payment is received in full or other arrangements are made in writing. In the event Seller incurs attorney fees and costs for collection of payment, Purchaser shall pay the purchase price, interest at the statutory rate and all costs and attorney fees for collection. Past due accounts will be subject to 2% interest per month.

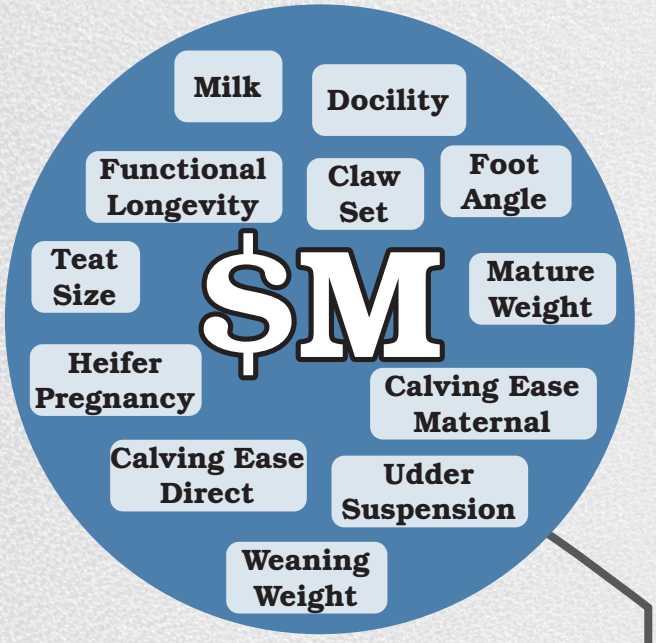
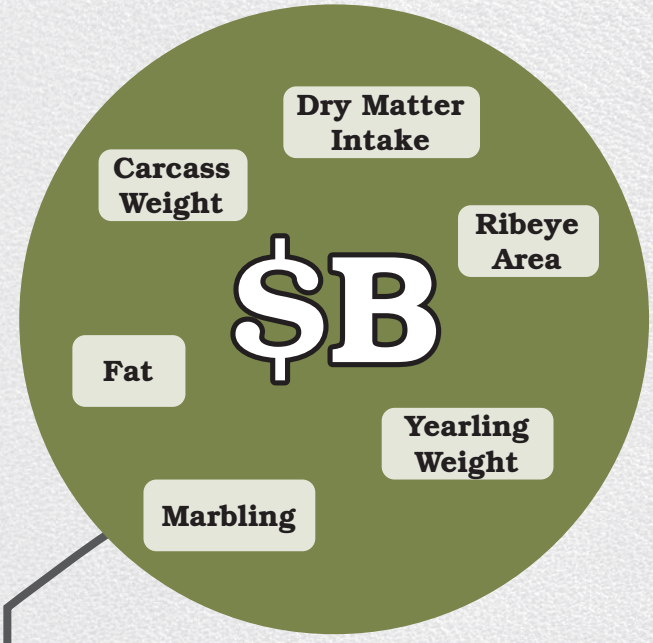
Let's Talk $Values





If you retain your own replacements, $M is a crucial figure to consider. It serves as a comprehensive metric for evaluating cowherd longevity, efficiency, and maternal strength.

A higher $M means a bull's daughters are more likely to:

- Breed up on time
- Raise a good calf each year
- Stay sound and functional longer
- Cost less to maintain (reduced cow size, fewer issues)

Over time, this translates to more profitable, lower-maintenance cows in your herd.

If you retain ownership, sell calves on the grid, or market reputation feeder cattle, $B is a powerful terminal tool. It summarizes how your calves perform where it really counts — on the scale and on the rail.

A higher $B means that, on average, a bull's calves will:

- Gain faster in the feedlot
- Eat less per pound of gain
- Grade better (more Choice and Prime)
- Yield more usable pounds of beef

That means more post-weaning value per calf — particularly if you retain ownership to the rail.

$C is the most balanced, big-picture index Angus provides. Use it to find bulls that deliver maternal dependability and terminal value — especially if your operation spans multiple segments of the supply chain.

A high $C bull is likely to sire:

- Daughters that breed early, raise good calves, and last longer
- Steers that gain well, convert feed, and hang valuable carcasses

In other words, $C helps identify bulls that do it all — and help your operation make money in both the pasture and feedyard.

How to Read the Sale Lot Information

Expected Progeny Difference (EPD) is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. EPD is expressed in pounds, either plus or minus. For example, when used on the same cows, calves sired by a bull with a +60 weaning EPD should average 10 pounds more than those sired by a bull with a +50 weaning EPD. EPDs are current as of catalog printing. Updated EPDs can be viewed at www.Angus.org

Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet specifications of the Certified Angus Beef ® brand.

Teat	Udder	Doc	Claw	Angle	Marb	RE	PAP Score
+.62	+.52	+33	+.37	+.27	+1.13	+1.10	39

Calving Ease Direct (CED) EPD is expressed in percentage of unassisted births, predicting the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth (BW) EPD is a predictor of progeny birth weight attributed to the parent.

Weaning (WW) and **Yearling (YW) EPDS** are predictors of the animal's ability to transmit weaning growth and yearling growth to its progeny.

Scrotal Circumference (SC) EPD, expressed in cm., is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Heifer Pregnancy (HP) EPD is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first–calf heifers during a normal breeding season. A higher EPD is more favorable.

Milk EPD is a predictor of an animal's genetic merit for milk and mothering ability.

Pulmonary Arterial Pressure (PAP) EPD, is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet.

PAP Score
Pulmonary Arterial Pressure Test Score

Teat Size EPD (Teat) expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension EPD (Udder) expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Docility (Doc) EPD is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility.

Claw Set (Claw) EPD is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle) EPD is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Marbling (Marb) EPD is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE) EPD,expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Index values are expressed in dollars per head

Maternal Weaned Calf Value ($M) predicts profitability differences from conception to weaning. Traits included: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Feedlot Value ($F) an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value ($G) an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value ($B) is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

Combined Value ($C) is an index which includes all traits that make up both $M and $B. EPDs directly influencing a combined index: CED, CEM, WW, YW, Milk, HP (Heifer Pregnancy), DOC, MW, Angle (Foot Angle), Claw (Claw Set), DMI (dry matter intake), Marb, CW, RE, Fat.

Calving Ease Rating (CE)

★★★★ Excellent calving ease, use with confidence on any type of heifers.

★★★ Superior calving ease, should work with most heifers and most situations.

★★ Moderate calving ease, most people will use these bulls on cows, but they can be used on heifers if calving ease is of less concern.

★ We recommend these bulls just for use on cows.

Cattle Delivery

We encourage all of you to stop by and coordinate delivery plans before leaving the Sale. If you are buying off-site, please let us know of any special instructions as soon as you can. Otherwise, we will contact you regarding date of delivery. Your cooperation in taking delivery is greatly appreciated.

Bull Delivery

In order to better service our customers, we offer FREE NATIONWIDE BULL DELIVERY. For the western states we will make every effort to deliver the bulls to your doorstep. For our customers East of the Mississippi River, we ask your cooperation with potential drops at Central Delivery Points.

To our neighbors to the north, we are happy to bring you your bulls, however due to increasing scrutiny at the border, having the Canadian resident present, eases the process. If meeting at the border is not possible, we ask to share in a portion of crossing fees. Thank you for your understanding.

We will continue to offer a pickup credit of $100 per head for all bulls picked up within 7 days of the sale.

FIRST YEAR BREEDING GUARANTEE

In lieu of a commercial "loss of use" policy, we would like to offer our own First Breeding-year Guarantee. For bulls selling for $6000 or more, and does not complete a full breeding season, we will share in the replacement cost up to 50% of the value of the injured bull. Breeding season is defined as 90 days after turning out the bulls.

50% of the value of the injured bull, minus salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2026.

Example 1: A $10,000 bull is injured, a credit of $5,000 minus any salvage value will be given to the buyer.

Example 2: A $8,000 bull is injured, a credit of $4,000 minus any salvage value will be given to the buyer.

Example 3: A $5,000 bull is injured, no credit is given. Buyer retains all salvage value.

Applicable credits honored from our Breeding Guarantee are to be used within one year of submission.

Stevenson Angus Ranch

REWARDS

LOYALTY REWARD

We honor our customer's loyalty with a 5% discount on every bull purchased by any single customer that has purchased bulls in TWO consecutive sales prior to this offering. In order to qualify, purchases need to have been made from both our Spring 2025 and Fall 2025 offerings.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Registered Females

Commercial Heifers

Bulls

Commercial Replacement Heifers

Checkerboard Cattle Company is offering their top 80 head of heifers, hand-selected by Darrell, from 400 head. These heifers are ranch raised from a herd nestled between the Little Belt and Castle Mountain ranges. Meagher County can be challenging with rough conditions. We select for calving ease, fleshing ability, carcass, and general balance of EPDs for our cattle to best perform. Moderate frame, easier keeping cattle keep us going in the right direction. These heifers are primed to enhance your herd with their robust genetics and exceptional health.

Vaccination and Health Protocol:

- Branding, pre weaning, weaning and post weaning shots and worming.
- Bangs vaccinated and given Bovi shield Gold FP 5
- First round of Spirovac VL5 and Vision 7
- Poured with Cylence and Oral Valbazen as of February 4th.
- Year-around mineral program provided

For more information contact Bart Story, Checkerboard Cattle Company Manager, 406-600-3192 or bstory@checkerboadcc.com

P

80 Yearling Heifers

- *EVEN GROUP of HEIFERS … Estimate sale day March 1, 2026 weight of 730 lbs*
- Top cut from 400 head, nothing held back. Rarely do you get the chance to cream a crop … take advantage of the opportunity!
- From a cow herd that emphasizes fertility, fleshing ability and structural soundness
- Moderate frame, efficient kind that will go out build a future program
- MATERNAL focus … this cow herd is low input, expected to work for you, not you for them. Surround yourself with this kind!
- One 60,000 lbs load … buyer has the option of five head up to the entire group

VIDEO

Price_____ Buyer_____

Driving the science of better breeding

There's little room for error in the cattle business. You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI®) provides it through genomically-enhanced expected progeny differences (GE-EPDs). GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

> Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
>
> Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
>
> The ability to make more rapid progress for traits that are important to you, due to:
> - more accurate selection
> - easier identification of genetic outliers
> - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they had recorded 9-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Heifer Pregnancy	28
Calving Ease Maternal	18	Maternal Milk	33
Birth Weight	22	Mature Weight	14
Weaning Weight	25	Mature Height	9
Yearling Weight	20	Carcass Weight	13
Yearling Height	15	Marbling Score	10
Dry Matter Intake	12	Ribeye Area	11
Scrotal Circumference	12	Backfat Thickness	11
Docility	10	Teat Size	12
Foot Claw Set	13	Udder Suspension	13
Foot Angle	12	Pulmonary Arterial Pressure	7
		Hair Shed Score	10

How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50K by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

Older Bull Trait Leaders in this offering

Industry Leading Genetics...

EPDs as of 1/27/26

Older Bulls

- Never been picked over
- Predominately AI sired and embryo transfer
- Developed specifically for this sale offering
- Born and raised on the White Sulphur Springs ranches
- PAP TESTED

After more than 60 years of selling older bulls only in our fall sale, we have committed to improving our spring offering with a select group of age advantaged bulls. We have continual demand for these older bulls and feel this spring sale offers an incredible opportunity for your selection.

PAP TESTED … the bulls raised at the White Sulphur Springs ranch were managed at altitude and PAP tested for this offering by Dr Nick Johnson of Sorenson Intermountain Vet. PAP scores are notated for those bulls. For additional information contact Darrell.

In our experience, these age advantage bulls have proven to cover more country and cover more cows. Feedback from our customers is true testimony to their breeding vigor and ability to hold up better.

With the expansion of the White Sulphur Springs unit for Darrell and Sara, they have committed to raising specifically these older age bulls. They are put into contemporary groups at weaning based upon their ranch origin and the conditions they were raised under. These contemporaries remain the same through their yearling performance test. Understand, because the bulls are in different contemporary groups, a ratio of 100 will not necessarily correlate to the same weight between the different groups. These bulls are then slow grown, fully concerned with their long-term ability to hold up. They are sound, athletic and not over conditioned.

These bulls are guaranteed breeders. They have all passed a breeding soundness evaluation including a semen test.

RETAINED INTEREST – we are selling FULL POSSESSION and 2/3 REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining 1/3 revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

High Mountain Disease, or commonly known as Brisket Disease, is a common condition seen in cattle raised in regions greater than 5,000 ft of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure. Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be “sub-clinical”, meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal’s potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the Angus breed, we can evaluate that animal’s potential to pass on genetic traits that can greatly influence the performance of that animal’s offspring. The PAP test can be influenced by several factors other than genetics but because it is an actual measurement, it is far more accurate and reliable than the current EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.

- Dr. Nick Johnson

- Proud to offer our BEST … the highlight of our 2024 calf crop LOT 501 embodies the OPTIMUM balance we so diligently seek

HD 50K VIDEO

- PROMISING herd sire with a unique pedigree poised to improve a multitude of production, maternal, management and carcass traits
- Aptly named VENERATE; verb … to regard or treat with reverence, revere … since calfhood, he was every visitor's favorite
- LOT 501 is an ET that recorded 81 BW, 104 WR, 106 YR
- His dam is a third generation donor cow that records 2 WWR 108 with 1 YWR 102. Her son and full brother to LOT 501 topped our Fall 2025 Sale at $33,000
- Grandam posted an outstanding progeny record of 9 WWR 102, 7 YR 105 with 6 IMF 116 and 6 REA 111. She also has 17 daughters in production combining for 37 WWR 101. She is a full sister to the dam of the long-time Genex calving-ease super star, STEVENSON TURNING POINT, as well as STEVENSON CATALYST and STEVENSON PREMIUM 60374 (ORIgen). In addition, she is also a maternal sister to STEVENSON ROCKMOUNT RX933 (ABS), STEVENSON CE DELUXE 1914 (ABS) and STEVENSON HERO I216U (ORIgen)
- A very fertile bull … LOT 501 collected high quality semen every attempt as a yearling
- We used LOT 501 extensively through AI and natural service and intend to continue heavy use moving forward
- 200 units of high quality semen sell along with the bull
- Australian and Canadian semen rights have been spoken for if the buyer so chooses to exercise those offers
- Selling 50% semen interest and 50% natural service rights. The high bidder has the option to double the bid for 100% semen interest, with 50% natural service rights still retained.

EPDs as of 1/27/26

Yearling Bulls

These yearling Angus bulls represent our most progressive genetics born and are primarily out of first-calf-heifers. We have tried to put together a large selection of calving-ease bulls for your next year's calf crop.

Weaning weights were taken in September and yearling weights were taken the last week of January. EPDs are accurate to the day of sale book production.

These bulls are guaranteed breeders. They have all passed a breeding soundness evaluation including a semen test.

Retained Interest - we are selling Full Possession and 2/3 revenue-sharing interest in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining 1/3 revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Realistically, we will collect semen on a very small percentage of the bulls selling. It will be an even smaller number of bulls that will market semen. However, we realize that many promising bulls are identified after they have proven themselves in natural service. If you have any questions or concerns about our retained interest policy, please contact Stevenson Angus.

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating our cattle with AngusLink℠ programs: the Genetic Merit Scorecard℠ and AngusVerified℠.

ANGUSLINK GENETIC MERIT SCORECARD℠

The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

ANGUS VERIFIED℠

AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day.

Users of AngusLink programs earn **$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

ANGUSLINK℠ VALUE ADDED PROGRAMS

ANGUSLINK.COM | 816-383-5100

The Genetic Merit Scorecard and AngusVerified are administered by IMI Global.

STEVENSON

WORLD CLASS BEEF

Five generations of family ranching producing the **highest quality beef**.

Angus cattle originated in Scotland, as did our family roots. For more than eight decades, our family has believed in our ability to make a living in the beautiful, but often harsh ranch land of central Montana. Carrying on the tradition, each new generation of family adds invaluable experiences that improve your family dining experience.

Why us?

For generations, our sole livelihood has been from providing seedstock Angus cattle and genetics from our family ranch to the world. We love the beef industry and are excited to offer our world class cuts of beef to the market.

Over 100 years ago

The Stevenson family moved from Missouri to the small town of Hobson, Montana to discover our legacy as Angus ranchers.

Originally, crops, cream, eggs, custom harvest work and a flock of turkeys were our main source of income. By the mid-40s, we introduced bigger livestock into the mix and purchased cattle. Ultimately, we found our true calling after purchasing four registered Angus heifers from the Airyland Ranch, Montana's pioneer Angus herds in nearby Lewistown. Five generations later, we sell our seedstock cattle and genetics all over the world producing the highest quality of beef worldwide.

For your dining experience at home . . .
