BAYOU CREEK RANCH
— RED ANGUS —

We would like to welcome you to our 7th Annual Bull Sale at Bayou Creek Ranch. Our goal at Bayou Creek Ranch is to produce the best Red Angus bulls possible to offer to our friends and neighbors. The desire of every successful cattleman and rancher is to develop the best overall cattle – created through a commitment to hard work, dedication and superior genetics. It is our belief that we at Bayou Creek Ranch have done just that. We would like to share our success with you. At Bayou Creek Ranch, we take great pride in producing what we believe are the best Red Angus cattle offered anywhere in the market today. We are confident that you will find exactly what you are looking for in purchasing Red Angus cattle from Bayou Creek Ranch. We appreciate each and every one of you and look forward to meeting your needs for quality Red Angus cattle.

Please join us on Thursday, October 2, 2025 at the ranch in Lone Grove, Oklahoma for our 7th Annual Production Sale. We look forward to seeing you on sale day!

Sincerely,

Ken and Becky Swan

Bayou Creek Ranch

The beef cattle industry continues to set new records each week! The marketplace has certainly surged and maintained a pace and price point to rewrite the history of the American cattle market. The need for the absolute best protein source, safe for human consumption is certainly in demand not only domestically, but abroad as well. Innovation in technology and genetics continue to keep the United States' beef producers on the forefront of success and with the dominant infrastructure in place, we feel very strongly about the future of the business!

Bayou Creek Ranch continues to forge their place within the business by producing Red Angus cattle with rancher approved performance, substance, and shape. This set of bulls will be the very best offered by Ken and Becky Swan to date. With the experienced guidance and management of Kent Shankles, this set of bulls have been grown and developed to thrive like no set marketed by the program before. Mr. Shankles comes from a very well-educated background about ranch management with an intense knowledge of pasture and forage care and production that is readily noticed in this set of cattle.

Past and potential customers will notice improved performance measurements with improved quality in phenotype. As in the past the bulls have been stringently sorted on disposition, hoof quality, skeletal integrity, and above all, fertility. The cow herd that backs these herd sire prospects was also sorted and selected with the leadership of Kent Shankles, so one should be certain that they are bred to take your program to the next level and maintain the forward progress that every good cattleman or cattle woman desires.

NEW in 2025, the team at Bayou Creek Ranch has elected to offer a hand selected group of SimAngus™ bulls in addition to the Red Angus bulls. These SimAngus™ bulls are loaded with power, performance, and profit earning potential. If you're in the business of selling your cattle by the pound, then this is a set of bulls that are worthy of serious consideration. Also, we will be selling a select group of SimAngus™ bred heifers and Red Angus bred cows, many of which have produced bulls in this year's sale or previous sales at Bayou Creek Ranch. Opportunity knocks like never before!

In any business, annual growth and improvement is desired and as a marketing firm, we believe that your beef business is no different. We are more than confident in the gene pool that built this set of bulls and know that the management and development of the cattle to be nothing short of right. The Bayou Creek program has dispersed hundreds of bulls into the commercial sector and has maintained a long term, repeat customer base with some of the industry's finest commercial programs. The bulls with the Bayou Creek brand have graced pastures from the gulf coast region to the western range of Colorado, the Sand Hill region of Nebraska, and all points in between with much customer approval and success. If you're serious about keeping your program in the upper echelon with quality red hided stock, rest assured that you are studying the right sale book. We hope to see each of you at the Bayou Creek Ranch 7th Annual Bull Sale at the ranch in Lone Grove, Oklahoma. We will be broadcasting the sale online at CCI.Live if you are unable to attend the sale in person.

Thank you for you interest, and please enjoy the stock.

SALE ORDER

Cattle will not sell in catalog order. A sale order will be available the week of the sale.

DNA

All Bayou Creek Ranch herd sires have had DNA submitted to the Red Angus Association of America.

EPDs

The EPDs in this sale catalog were pulled from the Red Angus Association of America on August 20, 2025. For updated EPDs please visit RedAngus.org

SALE LOCATION & DIRECTIONS

91 Fox Creek Rd - Lone Grove, OK 73443

- From US Hwy 70 turn south onto Cheek Road just west of Lone Grove, OK
- Travel 5 miles south on Cheek Road, turn right onto Rio Grande Road
- Travel 1.1 miles west on Rio Grande Road, turn left onto Fox Creek Road
- Travel 0.5 miles to Bayou Creek Ranch entrance on the right side of the road
- Once entering the ranch's overhead entrance follow the sale signs to the auction facility (approx. 2 miles from the entrance).

TERMS & CONDITIONS

Cattle will sell under the standard Terms & Conditions as recommended by the Red Angus Association of America. All sales are final, and the cattle will become the property of the buyer when the auctioneer says "SOLD".

HERD HEALTH

All animals in the sale are on a complete herd health program. The bulls have received Vista 5 (VL5), Vision 7, Dectomax in the spring of 2025, Safeguard in the fall of 2025, and Multimin. All cattle will be accompanied by proper health certificates for immediate interstate shipment.

BREEDING SOUNDNESS EXAM

All bulls will be fertility tested and trichomoniasis tested prior to the sale and guaranteed to be breeders.

SEMEN INTEREST

Bayou Creek Ranch will retain 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block. The buyer will receive 100% of the salvage value of their purchase.

LIVESTOCK TRANSPORTATION

Load out will be available at the sale facility following the sale. We will assist customers with trucking arrangements as needed. Our facility has a loading chute to accommodate semi-trucks. We will be offering FREE trucking to buyers who purchase 5 or more bulls. We will do our best to assist you in transporting your bulls following the sale. Below are a list of recommended professional trucking options:

Randy Lathrop: (847) 910-4673
Dick Coleman: (765) 461-0954

SUPPLEMENTAL INFORMATION

A supplement sheet will be provided the week of the sale with updated breeding information, corrections, and addition information. All announcements made from the auction block will take precedence over printed materials associated with this sale.

LIABILITY

By participating in any event planned and controlled by Bayou Creek Ranch, you agree to the following:

- Bayou Creek Ranch events are provided with no special warranty either express or implied. The Organizers, including but not limited to Bayou Creek Ranch, its employees, Ken and Becky Swan, and Innovation AgMarketing, LLC assume no liability for any loss, theft, damage, or injury to property or persons, including death, whether arising in contract, negligence, equity, or otherwise.
- You assume all risks when participating in Bayou Creek Ranch events. All participants must obey all rules and regulations of Bayou Creek Ranch and the laws of the State of Oklahoma. Participants must comply with all requests made by employees and agents of Bayou Creek Ranch. Bayou Creek Ranch reserves the right to eject any participant who does not comply with this section, and further, refuse entry to any participant. Refunds for any reason are at the discretion of Bayou Creek Ranch.
- All participants agree to indemnify and hold harmless Bayou Creek Ranch and The Organizers listed without limitation for any and all legal action arising from or related to a Bayou Creek Ranch event.
- All participants expressly give Bayou Creek Ranch authorization to use and post any photographs, videotapes, recordings, or any other record of our events, including full names of any participants, before, during, or after the event for promotional use reporting to the media, and to publish on our website or blog. Participants are not entitled to compensation for Bayou Creek Ranch's use of their name or image.
- We are not responsible for any typographical errors.

A Guide to EPDs

- HB** HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the postweaning period. (Pounds/Low Value)
- MILK** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Genetics Backed by GGP

The GeneSeek Genomic Profiler (GGP) products and services empower decisions in selecting, raising and selling elite cattle, enhancing profit and protecting your reputation for high-quality seedstock. Beef genomics is evolving fast. GGP provides advanced, wide range DNA testing for the real world of cattle production.

Using genomic-enhanced EPDs for selection of young breeding stock provides a level of precision and reliability that's never been available to producers before.

Bob Weaber
Kansas State University

Efficient selection of seedstock replacement heifers

Never before has such power been so practical. As breed associations add the GGP uLD to their DNA services, you can genomically screen and select replacements for your herd while adding value to heifers you sell.

- **Profile replacement heifers** – Use genomics to select the best and sell the rest
- **Raise elite cows** – Superior nucleus cows are the source of superior bulls
- **Market quality heifers** – Sell heifers with GE-EPDs helpful to commercial cattle producers
- **Verify parentage** – Confirm parentage of heifers for registration and marketing

The best 50K ever – Effective, affordable power to select, manage and market sale bulls

An ideal tool to test a crop of bull calves, the new GGP 50K is the most advanced 50K ever. Highly accurate. Highly affordable. Very versatile with built-in parentage and genetic-health screening. Nearly all major breed associations offer the GGP 50K as their workhorse profiler for routine use.

- **Genomic-assisted selection** – Identify the best bull calves for sire development or AI studs
- **Profiling bull calves for sale** – Affordable accuracy with GE-EPDs adds value in the sale ring
- **Reputation builder** – Verify quality for local customers and distant buyers
- **Fits modern methods** – Uses markers enhancing new “single-step” GE-EPD calculations

Setting a gold standard for the best of the breeds

The most powerful commercial seedstock profiler, the GGP HD150K is ideal for AI studs, donor dams and elite bloodlines. With its strategically chosen content, running the GGP HD150K on elite bloodlines improves imputation accuracy of pedigree genotypes.

- **Smart Design** – Contains 150,000 markers, filling in genetic details other tests miss
- **Modern** – Works synergistically with other GGP products in the “single-step” system
- **Imputation standard** – GGP HD150K data on parent and grandparent animals can sharpen GE-EPDs on their progeny
- **Unique content** – Impactful new markers for cattle performance, reproduction and quality

Watch the Sale on CCI.live!

The best, the fastest and most comprehensive marketing & bidding tool!

How to Bid Online...

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
 - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
 - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

Bull Development

The bulls were developed at the ranch in Lone Grove, Oklahoma on rye winter pastures and supplemented with a bull ration that was formulated by Martindale Feed Mill. They have been maintained on a soy based pellet at a rate not to exceed 1.5% of their body weight to prevent structure and foot issues. By maintaining a slower and more precise development, these bulls are true athletes that are ready for heavy service. These bulls have never set foot in a feedlot. We confidently say that these bulls will endure more seasons in the breeding pasture.

The bulls have been handled both on foot and horseback. Bulls have been strictly culled based on performance, structural integrity, fleshing ease, fertility, and disposition. The bulls have had DNA submitted and will sell with genetically enhanced EPDs to facilitate you in making a more educated decision during the buying process. The bulls that carry the Bayou Creek Ranch brand will add terminal value to your calf crop and in turn contribute to your bottom line!

Bull Guarantee

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard terms and conditions of the Red Angus Association of America, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

Please contact Kent Shankles: (580) 276-7715 for further questions about how Bayou Creek Ranch can add value to your operation.

Welcome to the Sale!

- When a bull combines phenotypic quality, genotypic merit, performance, and pedigree into a single package like BYU Tycoon 4309, it is easy to see why he lands himself with the lot 1 designation.
- You will be hard pressed to find a herd sire prospect with as much natural shape and muscle dimension as what 4309 carries. Additionally, he's smooth made and plenty eye appealing to garner the attention of even the most discriminating cattlemen.
- A performance powerhouse, weighing in at 859 lbs. at weaning to ratio a 112 among his contemporaries. His genetic data validates the potential he should bring to the next generation.
- Raised by a first calf heifer that is sired by the impressive WEBR Red Revival 78H and backed by the powerful BYU Janet 9014 ET. 9014 is a daughter of PIE Janet 1065, the dam of PIE Stockman 4051. Tremendous maternal strength supports his pedigree.

- It's hard to poke a phenotypic hole in 4336. He makes the grade for eye appeal, depth of body, structure, muscle, and substance. One of the most complete bulls in this year's class.
- His explosion from birth to weaning is unmatched in this sale offering, starting with a 64 lb. birth weight and spreading to an impressive 876 lb. weaning weight that ratios at 115.
- The influence of PIE Fullback 7005 will be noticed all over the maternal side of these bull pedigrees, and with good reason.
- His top 20% HB ranking indicates he will carry on the legacy of raising elite replacement females that are productive and long lasting.
- Top 8% STAY, top 20% HB, BW, top 35% CEM.

- A leading candidate for siring a top end group of replacement heifers.
- The influence PIE Fayette 9026 on the maternal side will only add consistency and longevity to the progeny that 4301 sires.
- A maternal brother to 4301, BYU Fullback 3385, was purchased in last year's sale by the Nichols Ranch of Jacksboro, Texas.
- 4301 weighed in at a modest 69 lbs. at birth. Recommended for use on heifers.
- Top 3% FAT, STAY, top 25% HB, top 35% DMI.

THE SENECA SIRE GROUP

LOT 44 - BYU SENECA 4331

- An own son of the breed legend RREDS Seneca 731C that stacks up at the top of the class. BYU Seneca 4331 is one of the stoutest bulls in the offering with pure muscle shape.
- He weighed in at 755 lbs. at weaning and 1,306 lbs. at a year. The growth genetic potential he carries will make him a fan favorite.
- Several maternal brothers to 4331 have been past sale features at Bayou Creek Ranch. Last year, Double C Cattle Company purchased BYU King Of The Cowboys 3303. Don McCauley of Texas also has a son of PIE Pan Ann 7554 working in his program.
- Don't miss out on a high quality individual with an outcross pedigree to most of our breeding program.
- Top 15% WW, CW, top 25% YW, top 35% REA.

- 4402 is a powerhouse beast any way you want to look at him. In the flesh, he is a pure power bull loaded with muscle shape, stoutness of feature, and plenty of bone.
- Here is the NUMBER 1 bull for weaning weight AND yearling weight in the sale, tipping the scales at 1,029 lb. and 1,458 lbs. respectively!
- Offers a noteworthy EPD profile for those wanting growth and performance. The maternal side of his pedigree traces to the famed PIE Ms JR 0323, the dam of the \$31,000 BYU Red Baron 1333 ET, one of the greatest breeding achievements ever produced at Bayou Creek Ranch.
- If you sell your cattle by the pound, then 4402 needs to be on your short list come sale day! Top 1% FAT, top 3% WW, top 5% REA, top 7% YW, top 15% CW, top 20% ADG.

- BYU Countertime 4403 brings presence and style together with performance.
- This blaze faced stud looks the part, while still carrying plenty of muscle shape and dimension on a sound base and structure.
- His 815 lb. weaning weight puts him at the top of the class for individual performance.
- Ranks as the NUMBER 5 bull in the sale for HerdBuilder index.
- The maternal side of his pedigree is supported by the incredible PIE Stormy 541, the dam of PIE Code Red 9058. A full brother to the dam of 4403, BYU Fullback 9338 ET, is working for McEntire Red Angus of Sweetwater, Oklahoma.
- You will like his heavy weaning sons and love his production oriented daughters.
- Top 1% FAT, top 20% WW, top 25% HB, top 30% YW, REA.

Pasture Exposure

In the following section of females, you will find information regarding specific AI breeding dates and the pregnancy status of that female, as well as her estimated due date based on veterinarian preg check. We also wanted to provide information about the pasture exposure of these females here for your reference. All females that are carrying the service of a PE sire will need to have DNA submitted on the resulting calf to be registered with the RAAA. All PE sires have had DNA submitted by Bayou Creek Ranch.

PARAMOUNT

Elevate to a more valuable female.

For over a decade, Red Angus females have commanded more at auction than all other breeds, including Angus. According to Superior Livestock data, Red Angus heifers brought nearly \$17/cwt more – **that equates to a \$92/head premium on a weaned replacement female.**
