Over 35 years in livestock marketing!

Welcome to the Sale

Welcome friends to the 2nd Annual McMurphy Farms Fall Production Sale. We have been selling a select group of females in the fall for the past few years online, but last year we felt it was time to bring folks in for a live fall sale to see what we have been working on over the past 2 decades. This second live fall event will include some elite females along with some exceptional age advantaged bulls that we would normally hold until the Trusted Performance Bull Sale in March. These are younger, spring-born bulls that we would have had to push too hard to market the first of March. We have a great track record with longevity in our bulls when we don't push them too hard, too early. We also feel like 18-month-old bulls are the sweet spot for most of our customers and we continue to get calls for bulls for fall calving herds. The females we have in the offering this year are too good to not come see in person. We truly believe if you make the trip to northwest Oklahoma you will not be disappointed. These females are from the best genetics we have generated over the past 20 years. Please do yourself a favor and come look!

Our family has worked extremely hard to provide you with what we think are as good and as deep a set of Red Angus cattle that you will find in the country. We hope you enjoy the offering as much as we do and are confident you will find something that will help you move your program forward. Cattle are available anytime for you to view and evaluate and we would love to visit with you about their genetics and how we think they will fit your goals. We want to make sure you know that we will help market or purchase your offspring out of our genetics because we want you to be successful in your business and we know our genetics value!

Thank you again for taking a look at what we have to offer and if there's not one for you this year please think of us again next year when considering a breeding piece or herd sire for your operation.

Sincerely,

The McMurphy Family

Sale Details & Information

AUCTIONEER

Col. Jered Shipman - (806) 983-7226

SALE DAY CONTACTS

Cody McMurphy - (405) 880-4587

Ryan Denton - Special Assignment - (918) 629-3004

VETERINARIANS

Buffalo Vet Clinic - (580) 735-2113

TERMS & CONDITIONS

All cattle are to be settled for sale day unless prior arrangements have been made. The cattle sell under the terms and conditions of the Red Angus Association of America, the American Angus Association and the American Simmental Association.

LIABILITY

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety or the behavior of animals. The owners assume no liability for property loss or accident that may occur.

UPDATES

A supplemental update sheet will be available sale day and all announcements made at the block take precedence over printed material in this sale book.

ACCOMMODATIONS IN ALVA

Holiday Inn Express - (580) 327-1400
Comfort Inn and Suites - (580) 327-0000

ONLINE BIDDING

Online bidding will be provided by CCI.live.

GUARANTEES

All bulls are guaranteed against breeding injury and are guaranteed to breed cows the first breeding season. The first breeding season ends August 1st of the year of purchase and any request for a replacement bull needs to be made by that date. If a bull fails to perform or becomes wild during the first breeding season and a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. Replacement bulls are not covered by this guarantee. Death loss is the buyer's risk and mortality insurance is available on all bulls at the sale. Normal care and adequate nutrition need to be provided. It is suggested that bulls receive supplemental feed after the breeding season until they reach maturity. Please contact Dr. Casey McMurphy (806) 679-0213 if you have questions regarding nutrition.

Sight Unseen Purchase: All bull purchases made on order or over the internet with Trusted Performance breeders are 100% satisfaction guaranteed upon delivery.

INCENTIVES

- Haul your own rebate: Buyers who haul their bulls home day of the sale will receive a \$100 rebate per **buyer**. If bulls cannot be taken sale day or arrangements have not been made with us within the first week for delivery, the seller can house bulls until pick up at a rate of \$4/day, however we will not be responsible for sickness or injury. If you anticipate any issues hauling bulls please call to make arrangements prior to sale day.
- Free delivery within 150 miles of the farm and free nation-wide delivery on purchases greater than \$20,000. This does not include heifers.

RETAINED INTEREST

McMurphy Farms will retain 1/3 semen interest in all bulls unless otherwise noted in the catalog.

Shannon Cook - (405) 714-5087

It's no secret what the Beef Economy has been for the past two years as we embark on the third consecutive year of industry greatness. The success of the business is 360 degrees as every sector of the entity is profitable. Never in our lifetime have we witnessed something as amazing as we have in terms of record demand, record prices, and low cost, abundant feed supplies. However, times like these have the good operators still on task as far as risk management, cost awareness, and climate preparedness. One of the keys for success is simply genetic improvement through bull and female acquisitions, the opportunity to step your program's game up is in successful times when cash is available.

The McMurphy Family operation is one of the very best seedstock suppliers of Red Angus and SimGenetic seedstock in Western Oklahoma. The cattle are built to withstand the volatile climate and rugged terrain of the arid, southwestern plains, but have successfully acclimated to the challenging adversities of the Fescue Belt as well. This family operation is involved in every business aspect of the industry from cow-calf, to buying and feeding customer cattle. Professionally, the brotherly duo is involved in financing, risk management, feedlot ownership, and nutrition for all classes of cattle. Because of their professional involvement, they have a broader, deeper, and educated understanding of what it takes an operation of any affiliation to tick and survive the market volatility.

This firm is involved in two seedstock marketing endeavors throughout the year as this marks the third year for this fall offering of females and age advantaged herd sires. Each year the quality improves exponentially, and we are more than certain that this is the best they have ever offered even through the Trusted Performance Bull Sale. When it comes to genetic acquisitions, the firm is aggressive when they find what they feel is the next step and that is evident for what sets in the pens for appraisal for this November event. The bulls offered are heavy duty in their build and diverse in their individual number profiles to fit any operation's needs and the females are, again, laced with the best cow families and maternal prowess as they carry the service to the very best bulls.

As a marketing team, we are very aware of the large selection of bulls and females out on the countryside and most come with a higher price point than previous years, but don't let that extra fiscal disbursement slow the progress of your operation. The only way to make money is to invest it into programs such as McMurphy Farms. They want to be your partner in success and that is why they invest so much of their time, effort, and sweat equity into what lies between the covers of this sale book.

We invite you to the fall marketing endeavor at McMurphy Farms. If you should need and assistance with absentee purchasing or additional information do not hesitate to reach out to any of the Innovation AgMarketing team as we will do our very best to assist you every step of the way towards your acquisition of genetic improvement.

Thank you for your time and interest in the McMurphy Farms program!

Graham Blagg Jared Shipman Tim Anderson

Genetic Selection Information

BELOW YOU WILL FIND DESCRIPTIONS OF THE EPD DATA LISTED IN THIS SALE CATALOG.

EXPECTED PROGENY DIFFERENCE (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

PROS, Profi tability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HERDBUILDER (HB), HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GRIDMASTER (GM), GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the postweaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CALVING EASE DIRECT (CED), predicts the probability of calves being born unassisted out of 2-year-old heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BIRTH WEIGHT EPD (BW), predicts the difference, in pounds, for birth weight, and is also used in the calculation of Calving Ease Direct (CED) EPD.

WEANING WEIGHT EPD (WW), predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT EPD (YW), predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

ADG, Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI, Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK EPD (MILK), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

ME, Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG, Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CALVING EASE MATERNAL (CEM), predicts the probability of a given animal's daughters calving unassisted at two years of age.

STAYABILITY (STAY), Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARBLING EPD (MARB), predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

RIBEYE AREA EPD (REA), predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

YG, Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW, Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

It is easy to see why this bull lands into the coveted Lot 1 position. If you walk by him and don't stop in your tracks to observe the sheer mass and presence that he projects, then we won't be on the same page in seeing quality livestock. This big footed, ground pounder needs to be on your list on sale day. 4923 has the growth numbers to back it up as well, with -.8 BW to 126 YW, ranking in the top 13% of the breed for growth. To top it all off, he is backed with maternal greatness stemming from a 4MC King of the Cowboys 706 daughter that we purchased from Werning a few years ago. A true sale feature that has the credentials to be a big-league herd sire!

The Bull Offering

LOT 2 - MF BUCCANEER 9690 496

These next three BIX MR PTO 399 sons are truly sale features. These bulls have huge feet and legs that will handle any terrain. If a program needs to add power and dimension to their calf crop, then flip a coin and take your pick! If it were me and I wanted all my calves to be consistent scale toppers, I would tie all three of these bulls together! 496 comes from a cow family that we feel is influenced by one of the best MF Poker Face 7862 females ever produced. If you need the added eye appeal to your calf crop and want to retain females, dig deep into your pockets and don't let this one go to your neighbor!

KJHT POWER TAKE OFF
PATERNAL GRANDSIRE OF LOTS 2-4

A powerful built, masculine bull that has the added look and ideal feet and legs. It doesn't matter if you live in the rough country like us or in flat easy traveling country, the feet and legs on this bull will hold up and stand the test of time. It is so hard to produce Red Angus that are built like this herd sire prospect. I think this dark red bull can be used to raise terminal calves or replacement females alike. Dig your heels in here!

The Bull Offering

LOT 5 - MF TYM HEAD GAMES 4132

Red U2Q Head Games 14H has made his mark around our place as the "go to" heifer bull that still adds a quality look and true production value to the calves that he sires. This Red U2Q Head Games 14H son is the real deal! He ties high at the top of his blade and is so strong topped, coming square out of his hip and has the ideal set to his hind leg. If your goal is to raise phenomenal replacement females, I think this herd bull prospect needs to be at the top of your list on sale day!

RED U2Q HEAD GAMES 14H
SIRE OF LOTS 5-8

LOT 6 - MF HEADGAMES 4119

A true calving ease dream! 4119 is out of a first calf heifer and should be deemed heifer friendly without sacrificing the growth numbers needed at weaning time. Everyone wants a dual-purpose bull that can be used on heifers and cows. Invest in the future of your program with this Red U2Q Head Games 14H son that offers curve bending genetics!

An impressive individual that is destined to be a favorite on sale day! I would challenge anyone to find a hole in this powerful herd sire prospect. Aside from his amazing balance and just overall presence that he demands from his profile, this bull is so smooth from front to rear and so stout with the correct amount of set to his heel to allow him to travel with ease.

Here is an impressive MF Poker Face 120 6332 son that is bold ribbed, big topped and loaded with red meat from end to end. A herd sire prospect that is going to add pounds to your calves at weaning. He is out of a very productive SLGN Wideload 920W daughter that is so maternal based, therefore allowing you to raise top notch replacement females. Keep your hand in the air for this stud, we are confident that you will be satisfied with the return on investment!

649 closes out the MF Poker Face 120 6332 sire group. 649 is very complete bull that has shape, style, and structural correctness that will appeal to most stockmen. A bull that has the skeletal quality under him to travel great distances if needed. One of the leaders in this year's offering with actual performance and is backed by great maternal traits on the bottom side of his pedigree. There is no doubt that he checks a lot of boxes!

MF JOKER 962
 SIRE OF LOTS 16-18

Starting off the MF Joker 962 sire group with a long bodied, growthy herd sire prospect that is full of red meat and power. This bull will definitely add the pounds needed to top the scales at weaning time. Even though he is red in color, if you dig deep into the bottom side of his pedigree his granddam is a purebred Black Angus, thus having the heterosis that we need in the commercial industry. He will sire heavy weaning cattle that command a big premium. If you want to be the topic of conversation at the coffee shop for selling the heaviest calves in town, then this bull should be at the top of your list!

This is the youngest bull in the offering, but this 15-month-old bull is plenty big and stout enough to cover 25+ head of females. I love the deep red pigment this bull possesses, and he should pass it down to his offspring. A bull that is very complete from top to bottom and should add value to any producer's bottom line. He will sire heavy weaning calves as he ranks in the top 6% of the breed for YW at 134.

One of the youngest bulls in the entire offering, however he is one that has all the pieces we are looking for in a herd sire. This guy is so complete and comes to us with so much dimension, shape and structural integrity. He is the front pasture kind... don't miss him on sale day!

The Bull Offering

LOT 21 - MR GPAR RED WAVE 4129M

We really like these two SWC Red Wave 376J sons to finish out the bull division. This motley faced SimAngus bull is so complete from end to end. He is a stout, moderate built bull that is big middled and good structured. This 3/4 Simmental can be used on heifers, posting a CED of 13 EPD and -0.9 BW, yet still offers heterosis for the high growth weaning weights we need. Personally, I would use him to make replacement females if I could.

SWC RED WAVE 376J
\$85,000 SIRE OF LOTS 21 & 22

LOT 22 - MR GPAR RED WAVE 2504M

This SWC Red Wave 376J son is 1/2 Simmental and 1/2 Angus. For all the producers that have Black Angus cows and are afraid to turn out Red Angus bulls, but still want the heterosis of the crossbreeding, then this stud will fit the bill. He is out of a red hided Purebred Simmental bull and a productive Angus cow. You can breed him to your Angus cows and still get black calves! He is so well balanced, ties high at the top part of his blade and is strong over his top line. In addition, he is very deep through his quarter and stands on big round feet. Buy with confidence!

FEMALES *The Female Offering*

LOT 26 - MF GPAR TRELBI 4262

Here at McMurphy Farms, we started crossing our Red Angus females with popular and proven Simmental AI sires a few years ago. The next two females are a prime example of what we are trying to raise with this genetic cross. This 4MC Franchise 1227 daughter is elite from every angle of evaluation. 4262 will fit in any operation, as her presence does not go unnoticed. She ties high at the top side of shoulder and has a huge sweep to her center body. Not to mention, her hip and hind leg design is ideal. This female will be paid for with her first calf... bid to own!

FEMALES *The Female Offering*

LOT 32 - MF HANNA 8263 4129

MF Hanna 8263 4129 is a beautifully made female that combines elite genetics with proven maternal excellence. She carries a show pedigree known for structural correctness, muscle expression and balanced performance. She ranks in the top 40% for weaning and yearling weight, reflecting her ability to produce growth oriented, high-performing progeny.

FEMALES

The Female Offering

LOT 34 - MF COWGIRL 4213

Here is the only TWG Tango 156D sired female in the offering and might I say she is a prime example of flash and function! MF Cowgirl 4213 stems from the RREDS Seneca 731C donor that the Rimpel Family of Texas purchased a few years ago. 4213 strikes an incredible pose, yet still comes with a bold rib cage, deep underline and feet that will fix many problems. Don't get me wrong, I love a show heifer, but if I must pick, I will go with cow power that has the possibility to produce the next herd sire. This female provides the phenotype and the genetic background to do so. A true sale feature that we are reluctant to offer!

LSF SRR TAKEOVER 5051C "BEARTOOTH"
SIRE OF LOT 40

Who doesn't like moderate framed, easy keeping, great uddered females?! Well, I guess if you don't... then don't look at this one. LSF SSR Takeover 5051C "Beartooth" has been around the Red Angus breed for several years and while some may say that his pedigree is showing some age, the cattle are still flat good! In addition, the dam of this cow is a 2013 model and was fifteen years of age before she quit producing. As breeders we need to take a hard look at what kind of cattle we are raising and not just get hung up on the newest trend setter. Her Red U2Q Head Games 14H heifer calf at side is a keeper. Don't miss out on this pair!

FEMALES

The Female Offering

LOT 41 - MF JULIE 3239

My family asks, "why are we selling these females?" ... The answer is simple... because that's what we do, and we love getting good stock into other people's hands. The work has been done for you on this one. Several years ago, we started looking into what we could breed MF Julie 0332 to, with the hope of creating a superior female. Andrew Chandler talked us into using one of his bulls, Red SSS Gravity 296E. We have four full sibs to this female in production, and I'd say we got it right. They are phenomenal mothers, great uddered and bred to raise good stock. This female's Red U2Q Head Games 14H bull calf is a stud and will pay for the cow in the first year, guaranteed!

RREDS SENECA 731C
MATERNAL GRANDSIRE OF LOT 41

LOT 42 - MF NANCY 3515

MF Nancy 3515 stems from our prolific donor cow MF Nancy 5153. These cattle are so easy keeping, big footed and so stout. I just love this female's profile, as she is so pretty headed and ties in high at the top of her shoulder. She is so bold ribbed and square out of her hip. It will be hard to find a better structured one than this female. The Red U2Q Head Games 14H bull calf at side is just an added bonus! If you are looking to start a herd, this would be an excellent place to start.

FEMALES

The Female Offering

LOT 43 - SEQUOIA 2061K

2061K is the oldest female in the offering, but don't let that hold you back. When we got into the Simmental breed, we knew we would have to integrate black hided cattle into some of our pedigrees, but at the same time our goal is to stay red hided. This W/C Night Watch 84E female is out of a red hided female that we got from Werning. With her being black we have decided that it is time to part with her while she is still very young and at the peak of her production career. 2061K will calve right after sale day to the very impressive BIX MR PTO 399 for a quick ROI!
