

# *The Female Sale*

NOVEMBER 23, 2025 AT 5:00 PM SPENCER, SOUTH DAKOTA

# WINC

*Windy Creek*  
Cattle Company

# Foundation

(n) an underlying basis or principle.

When Jeremy bought his first Simmental female 20 years ago, I am not quite sure he thought he would be where he is today. At the time, he had a handful of registered Herefords, and the name “Windy Creek Cattle Company” had recently been dreamt up in the back of the judging team van. But something to do with a friendship resulted in 5 bred Simmental females a year later from the Wernings. Three years later, he purchased his first Simmental donor cow, WAGR Crickett 712T, from the Effling/Wager outfit. A cow or two more from Werning, Eichacker, Reimer, Kappes, and Thomas, and I guess you have a cowherd. As it turns out, he didn’t build just any cowherd, but one of consistency: stout, good looking, sound, and performance driven.

When trying to decide what our word for this sale would be, “foundation” kept coming to the top. Y302, one of the foundation donor cows of the program and most notably WINC All Right 213K’s grandmother, is no doubt a featured female in this offering. WINC Hollie, WINC All Right 213K’s mother, offers the opportunity to build your foundation with proven maternal excellence. A direct daughter of C50P, the foundation of our SimAngus program, is up for your appraisal as well. The bred heifer selection is deep and right off the top of the replacement pen with a sale highlight of selling choice from one of the most consistent flushes we have had. And we are holding nothing back with the open heifer calves as every 2025 born ET heifer calf is up for grabs!

As many of you know, the cattle are just one piece of the foundation. We live in the heart of some of the best Simmental genetics in the country, but most importantly, we live in a community that was ready to mentor a young cattleman from Epiphany, SD. They answered his questions as he learned more about the Simmental breed. They welcomed him onto their Association board and listened to his ideas. They even let him get on the microphone from time to time. The people, along with the cattle, are our foundation.

Somewhere in the mix of this, Jeremy met a Shorthorn girl (story for a different day), had two kids, and built a ranch in Spencer, SD from the ground up. We have a sign in our house that reads, “Dreams don’t work unless you do.” Not sure Jeremy sleeps hard enough to have dreams, but the amount of work that has gone into building this operation and the WINC brand in one generation is quite remarkable. We look forward to welcoming you to the ranch, this time in honor of the females, and hopefully adding an impactful line to your foundational story.

Over 35 years in livestock marketing!

The dynamics of the beef industry are constantly evolving. Every aspect of the business is under change or reconstruction to make the end product better, from genetics to processing and preparation. It is the mission to remain at the top of the food chain as the most desired and nutrient-dense form of consumable protein for the world's growing population. The U.S. Beef Industry is the world leader in terms of research, safety, palatability, and overall quality. As the current market trend continues, we firmly believe that our business will remain at the top of the spectrum for the years ahead.

The cow/calf operator remains in the driver's seat as the aggressive marketplace continues to prosper, with daily feeder cattle reaching record prices across all weight classes. In October, big steers and heifers nationwide saw per-head values consistently exceeding \$3000, while lighter counterparts-maintained values well into the mid to upper \$2,000's. Ranches that have been disciplined in retaining or acquiring females with excellent production records- such as pounds of calf weaned with the ability to breed back within the calving interval- are being rewarded for their strict culling practices and management. These forward-thinking operations are willing to invest more in their herd sires to promote genetic improvement and are exploring ways to expand, whether through land acquisitions or leases. When expansion occurs, the need for more production females arises, which makes shopping at operations like Windy Creek Cattle essential.

Jeremy Lehrman is a strong believer in performance. He knows, just like any young seed stock producer, that pounds make the difference regardless of the marketing phase. Bulls produced at Windy Creek Cattle Company are known for their ability to transmit growth and profits to their owners. The progressive customer base for the male progeny of the WINC prefix is also highly loyal, with multiple operations remaining committed to what the program has to offer. Deciding to offer an elite sort of females was not an easy one, as Jeremy would just as soon hoard them all, but he felt it was his obligation to the betterment of the general U.S. cowherd. The opportunity to select from the youth and the proven will be yours to take advantage of on November 23. One will have the privilege to invest in those that the progressive seed stock firm would otherwise retain to implement into the next generation of the program. We are sure that one will not want to miss the opportunity to witness this offering, as it could very well accelerate any breeding program to a whole other level of production and profitability.

Female offerings such as this don't happen often. The cow base of any beef entity is very sacred to those who own and breed them, and so one must be engaged when these situations present themselves. Jeremy Lehrman and his family represent integrity, initiative, ambition, vision, and selfless customer service. This set of females represents years of selection pressure placed on the quality of kind and hoof, udder integrity, pounds weaned, and fertility. Many in the offering would be from the same donor dams and cow families whose sons highlight the annual bull sale, the first Sunday of March. You too will have the opportunity to invest in every replacement female from the 2025 born ET crop, an opportunity that proves, Jeremy is truly opening the doors wide open to the heart of the cowherd. In times of success, it is our duty as stockmen to desire improvement and invest in the future, so we are prepared for the next obstacle or expectation from the volatile marketplace or the consuming public.

Make plans to attend the female offering of Windy Creek Cattle Company on November 23, 2025, at the ranch near Spencer, South Dakota. The facility and hospitality will be warm, and the cattle will not disappoint. If anyone on the Innovation AgMarketing team can assist you with additional information or sight-unseen purchases, do not hesitate to reach out. Also, feel free to contact Jeremy to schedule a ranch visit before sale day if you wish to do so. Thank you for your interest!

Enjoy the cattle!

Shannon Voegele - 605-750-0207 - Consultant  
Wyatt Durst - CCI.Live - 785-541-0904

## TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed. Sale will be available to registered bidders via the Internet at CCI.Live to accommodate both local and distant individuals who cannot attend in person. They provide a real-time internet broadcast during the sale. All absentee bidding will be done via internet to a ringside sale representative. Please register for bidder number at CCI.Live anytime prior to 12 Noon on the day before the sale to accommodate the approval process.

## TRUCKING

We will have a truck and trailer headed towards Stillwater, Oklahoma shortly after Thanksgiving. We also recommend the following Livestock Truckers;  
Dick Coleman - 765-461-0954  
Brandon Bertsche - 815-867-0547

## RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction.

## LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

## INSURANCE

Insurance will be available sale day. We suggest a mortality policy. Please visit with a Martin-Trudeau representative at the clerking desk if you have interest in insuring your purchase. Ray Trudeau - 605-770-5170.

## ANNOUNCEMENTS

Announcements from the auction block will precedence over statements in catalog. Disclaimer: The information in this catalog is subject to change.

## HERD HEALTH

Our herd health program has been developed and upheld with the help of Dr Erik Holum of Sweetgrass Vet Services - 605-928-8387.

## NUTRITION

Nutrition Services Associates  
Melroe Farms Nutrition - Tyler Melroe - 605-695-3295

## ADVERTISING AND CATALOG PRODUCTION

## PHOTOGRAPHY & VIDEOGRAPHY

John Reasor - 423-290-6002

## ONLINE BIDDING

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through CCI.Live. If you are unable to attend for any reason, you may bid online at CCI.Live. Please register for bidder number at CCI.Live anytime prior to 12 Noon on the day before the sale to accommodate the approval process. After this date/time, bidder approval may be delayed. Approved bidders will be issued bidder number and access prior to the sale.

# A GUIDE TO EXPECTED PROGENY DIFFERENCES

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

- **Calving Ease (CE):** Percent of unassisted births when used on heifers.
- **Birth Weight (BW):** Pounds of birth weight. Calving Ease (CE): Percent of unassisted births when used on heifers.
- **Weaning Weight (WW):** Pounds of weaning weight.
- **Yearling Weight (YW):** Pounds of yearling weight.
- **Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.
- **Milk (MLK):** Pounds of weaning weight due to milk.
- **Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.
- **Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.
- **Carcass Weight (CW):** Pounds of carcass weight.
- **Yield Grade (YG):** Yield grade score.
- **Marbling (MRB):** Marbling score.
- **Back Fat (BF):** Inches of backfat.
- **Ribeye Area (REA):** Square inches of ribeye.
- **All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)
- **Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

**\$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well- conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes: All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield. Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

The offering of WINC Hollie 0125H in her entirety is a decision that has not come easily, she is a female that has had a monumental effect on the position that Windy Creek Cattle Company sits, as her first born son, the \$147,500 WINC All Right 213K certainly turned the spotlight in the direction of Spencer, South Dakota. The first sons of WINC All Right 213K graced the offering in 2025, we couldn't be more grateful for the interest that Simmental breeders across the nation paid to him before selling in the 2023 "Profit Through Performance", but now that his influence is proving to be as potent as we expected, we couldn't be more excited. His influence has already found legit success through a \$185,000 daughter that sold in the 2024 Sandeen's Buildin' a Brand Sale. This is a genetic line that comes with generations of potency though, as she is a direct daughter of the herd matriarch, Kappes Sadie T635 Y302. The mating of W/C Fort Knox 609F and Y302 has fired with serious consistency, and full siblings to WINC Hollie having been sale highlights over the past couple of years. We are excited to share the maternal powers of this history making dam through the opportunity to purchase her in the prime of her life, with a very long breeding and production career ahead, she certainly offers up an opportunity to seriously elevate the trajectory of a cowherd.

Service Sire: ECC CKCC Roosevelt 4903M (ASA# 4395859)  
PE: R&R Homeland M477 (ASA# 4427220) 6/6/25-7/5/25. Too close to call.

Power and performance buyers gather round, as this offering is saturated with opportunities to purchase females that sell with the genetic potential to add performance. Yet WINC 565N, a daughter of the RFS Heavy Hitter H45 x WINC Hollie 0125H combination presents her case with the best of them. Combining top third of the breed Calving Ease, with top 5% of the breed WW & YW, this curve bender reads with quality in every aspect. Additionally her pedigree is stacked with generations of the best cows to work for WINC, and therefore the expectations of her production career can be very high.

**WINC SURELOCK 71L**  
Son of Lot 5

Kappes Sadie T635 Y302 is certainly a female that we owe a lot to, she has stood at the heart of the cowherd for a long time, and has been able to witness plenty of infrastructure be built around her at Windy Creek, because of the dominant run she has made as a producer. Sons of many differing matings have highlighted the pages of the "Profit through Performance", and it's now her daughters that are in production that carry on the family name with their incredible generating potential. She is one of those females that has formed a base that clicks to anything we throw her way. She is the mother of the WINC Hollie donor, who sells as Lot 1, along with the WINC Fortress 170J sire that stands at the front of the herd bull pen, and has daughters in this sale, the \$65,000 WINC Next Generation 0111H and the WINC 064H donor that works for Griswold Cattle Company. She offers the most formidable source of reliable quality, futuristic look and incredible longevity we have ever been apart of. No claims need to be made about her longevity either, as this power cow is still one that will impress in the sale pens, and has proven herself with her production records.

*Sells open & ready for embryo production.*

# THE KAPPES SADIE COW FAMILY

## LOT 6

You are going to find immense quality all the way through this book, and there is absolutely no exception with the pair of RFS Heavy Hitter H45 x Kappes Sadie T635 Y302 daughters selling here. When it comes to sorting the offering for potential to generate high performance offspring, then both of these sisters will be ones on the top of the list. This homozygous polled and black purebred female ranks top 10% for both WW & YW, along with top 2% for REA.

**RFS HEAVY HITTER H45**  
Sire of Lots 6 & 7

## LOT 7

The second of the flush sisters is baldy faced and comes extra heavy and burly in her design, she is powerful in her muscle shape and spring of rib, and has donor cow potential written all over her. She covers her track with ease, and looks to share that same principle of longevity that her has made her mother's tenure so long and potent for the WINC brand.

**WINC FT KNOX 170J**  
Maternal Brother to Lots 6 & 7, Son of Lot 5

# THE KAPPES SADIE COW FAMILY

## LOT 8

The next four females are what we envision when trying to breed for the next generation of females to carry the brand. These WINC Matter Of Time 249K flush sisters from the legendary Kappes Sadie T635 Y302 are the kind that carry the torch in our minds! WINC Matter Of Time 249K looks like he is going to sire incredible daughters, they are bold bodied, easy keeping and super cowy in their look. He is a son of the dominant, W/C Miss Werning 638D donor female, and was purchased for \$37,500 in the 2023 "Profit through Performance" by Diamond M Cattle Company and Werning Cattle Company, with both programs continuing to utilize him heavily in their breeding programs.

**WINC MATTER OF TIME 249K**  
Sire of Lots 8-11

## LOT 9

A prime example of the strong maternal function and longevity that this set of ET flushmate sisters possess. Bold and powerful in regards to her muscle pattern and shape, being round ribbed, big hiped, and square from end to end. She is due to calve early to our newest calving ease specialist, ES Stronghold LA110-14, for a quick return on investment!

# THE KAPPES SADIE COW FAMILY

## LOT 10

WINC 806M is a female that offers extra power and substance, without sacrificing quality and femininity. Compared to her sisters, she comes with some extra extension from her shoulder forward, and yet still offers a superior level of body mass and shape! The thoughts of the Bridle Bit Recharge K256 bull calf she is carrying has us scratching our heads, as to why she is being offered up for appraisal.

## LOT 11

These four daughters of Kappes Sadie T635 Y302 add just another element of achievement from this legendary donor dam, she has proven that regardless of sire choice, she has the ability to generate cattle with added value. We think this combination with WINC Matter Of Time 249K may be just one of her most impressive matings yet, these four bred heifers are the kind you can build the cowherd around.

This young matron hits us as the kind that has legitimate capabilities of generating high value seedstock. Her purebred status, homozygous polled and black results, and EPD profile all point towards her having the ability to generate a herd bull that can change the face of a program. The influence of Kappes Sadie T635 Y302 has been truly remarkable, both sons and daughters have been highlights of the "Profit through Performance" for almost a decade, this is a cow family that is built with timeless quality. Adding descendants to your cowherd will likely pay dividends.

# THE KAPPES SADIE COW FAMILY

## LOT 13

Here you will find a CKCC Relevant 0639H daughter of the Lot 12 female, WINC 177J. WINC 5106N is set out for an exciting career in the breeding pen, and it would be amiss of us not to bring attention to her incredible EPD profile, as she sports top 2% WW, ADG, CW & REA, along with top 1% YW & MWW. This high powered, double homozygous, purebred donor candidate will be one that is hard to load on someone else's trailer.

**CKCC RELEVANT 0639H**  
Sire of Lot 13

## LOT 14

WINC 5117N is the first-born daughter of the high selling female in the 2023 "Profit through Performance", WINC 100K, that was the \$17,500 choice of Austin & Paislee Moeller of Minnesota. 100K is a CKCC Relevant 0639H daughter of the legendary Kappes Sadie T635 Y302, she has an awesome set of bull calves slated for this spring, this is a division of the Y302 lineage that is set for big things!

## LOT 15

**WINC/TCM MATTER OF TIME 4114M**  
Son of Lot 15

**WINC/TCM STUNNER 288K**  
Maternal Brother to Lot 16 & Son of Lot 15

CHEZ Bobbi 0623H ET is a direct daughter of Ruby's Currency 7134E and out of the legendary J6RA Bada Bing 1602B or "Bobbi" as she's affectionately become known as. 0623H is a full sister to the \$40,000 CHEZ KRIC Limit Up 9656G ET and is one of the biggest centered, largest scaled, flexible spined, incredible looking specimens we have seen. With her first exposure she yielded the goods with WINC/TCM Stunner 288K a herd bull prospect that sold the Plagmann family, and this past year her son, WINC/TCM Matter Of Time 4114M was a feature of the bull offering selling to Jeff Sauvage. This young donor is on the cusps of big things, and only in an attempt to showcase the best we have to offer, and truly make this a momentous event, do you find young donor females like this up for offer. To top it off she comes carrying an early due bull calf pregnancy, for an instant return on investment, also allowing her to get to the donor pen early to allow for next year's transplants.

## LOT 16

**WINC/TCM DABO 4172M**  
Son of Lot 15

WINC 5164N is perhaps the most impressive offspring of CHEZ Bobbi 0623H ET we have ever raised, this CKCC Relevant 0639H daughter is designed with both functionality and performance in mind. Her running gear is laid back and flexible, her feet are big and square, and her body cavity is extra maternal and soft, she is the kind we would take 100 of. This female combines two of the most influential cow families and genetic programs in the industry, yet her mating flexibility is broad!

This trio of daughters from RFS Heavy Hitter H45 and CKCC Ms Eagle 1612J are the kind that need inspected by stockmen that are searching for the next purebred weapon to use for increasing the performance and growth potential of their cowherd. We purchased their dam out of the 2023 CK Cattle Production Sale, and needless to say she has done an incredible job during her short tenure, as her first calf was the \$11,000 bull purchase of the Grocott's and this past spring three sons by W/C Dabo 703J were fought after by progressive stockmen. Talk about consistency, all three of these sisters rank in the top 1% of the breed for WW, YW, ADG, MWW, and 10% or better for YG, BF, REA, and TI. It comes without doubt, these flush sisters come with immense power in their genome!

**REMINGTON LOCK N LOAD54U**  
 Sire of Lot 20

WINC Miss 614D has become an absolute force in production, this donor stands on the cutting edge of a sorority of full sisters has shaped the cowherd you will find by Spencer, South Dakota. She hails from the potency of the Remington Lock N Load 54U and ALC Treasure C50P mating. ALC Treasure C50P was a foundation forming, cornerstone for our breeding program, and her legacy will long be felt through her female descendants such as 614D and her full sister, WINC 115D that sells as Lot 33. The sons of 614D have been in heavy demand, in 2024, Steve Strom selected WINC Dabo 329L for \$19,500, and several other loyal WINC bull buyers such as Brad Greenway, Jeff Huss, Balmore Farms LTD, and Eric Grocott also employ progeny of this powerhouse female. This offering alone proves the potency that 614D breeds with, as she will be followed by 12 direct daughters in this offering, every single one of these 614D daughters is homozygous polled and homozygous polled. This female is one that deserves serious consideration from a program that has plans to quickly progress their program towards building a cowherd, and bull crop that is power and production focused.

*Sells open & ready for embryo production.*

# THE C50P COW FAMILY

Gather around here! This is a set of full sisters that are simply incredible, this quartet comes straight from the heart of the Windy Creek Cattle Company embryo transfer program! These SimGenetic daughters of WINC Matter Of Time 249K set the standard when it comes to body mass, dimension, and overall power. They come with an ultra-rugged and durable build, and this combined with a structural makeup that is designed to outlast any breeding tenure, they are ready to generate some serious ROI for their new homes. Make sure to mark this set of sisters for inspection, we are certain that they will be easy to find as you sort through the quality offered in this set of cattle. They certainly won't disappoint on a data sort either, as they read with profitability and quality across the board, setting the scene for a very marketable production story.

# THE C50P COW FAMILY

## LOT 25

The combination of W/C Revolution 65G and WINC Miss 614D has been proven in the bull sale several times, with two very impressive sons selling to Jeff Huss and Brad Greenway. With the lineage that comes from 614D and therefore the potency of the Remington Lock N Load 54U and ALC Treasure C50P combination, there is no telling the potential ahead here. Generations of productive cows' line the pedigree here. 907N puts together everything we set our selection criteria around, true growth in her own right, homozygous polled and homozygous black status, and then ranking impressively for WW, YW, ADG, Milk and MWW.

**WINC REVOLUTION 300L**  
Full Brother to Lots 25 & 26, Son of Lot 20

## LOT 26

You best look into the data package that comes with this second daughter of the W/C Revolution 65G x WINC Miss 614D mating, because her DNA results truly elevated her status toward being one of the most elite in the offering when it comes to growth potential. She ranks among the top 1% of the breed for both WW & YW, and is supported by individuals on either side of her pedigree that add grit to the science, as both maternal and paternal linages are reputable sources of impressive pay weight.

**WINC REVOLUTION 275K**

# THE C50P COW FAMILY

You can get a peek into the future ahead for these four full sisters by looking at their older two sisters selling as Lots 31 & 22. These four add proof to the claims of genetic consistency that comes with the 614D influence. They come with an impressive design, being very sound and agile, yet impressively dimensional and powerful in their shape. Again, longevity in production equals profitability in the commercial sector of the industry, and it certainly matters in the seedstock business as well! Tie these full sisters together to inject some serious cow power and genetic consistency into the future of your cowherd.

This coming second calver offers a prime opportunity to buy into the 614D legacy, just as she is entering the prime of her production career. Her first daughter has been retained, yet the scene has been set, and all the hard work has been done, WINC 307L is just knocking on the doorstep of her most impressive days. She stems from a cow family that has built a reputation for producing cattle with look, power, and presence. Don't come up short on sale day and miss this great breeding piece!

Service Sire: ES Stronghold LA110-14 (ASA# 4258025)

PE: WINC/WAGR Relevant 461M (ASA# 4424463) 6/28/25-7/30/25. Too close to call.

The embedded growth potential of WINC 324L is among the best in the breed, her elite data profile positions her among the top 10% of the registry for WW, YW, ADG, CW, YG, BF & REA. This young female has a long tenure of profit return ahead, and she is bound to yield progeny that come heavy and impressive to the weaning pen every year. Her homozygous polled and homozygous black status only add another layer of consistency to the equation, and she comes carrying a bull calf pregnancy by our exciting new herd bull, W/C Journeyman 371M.

Service Sire: W/C Journeyman 371M (ASA# 4442189) Bull Calf

WINC 115D is the second opportunity to secure a female from the potency of the Remington Lock N Load 54U and ALC Treasure C50P mating. ALC Treasure C50P is a cow family that should be recognizable to friends of the program, as her daughters still form the backbone of the cowherd today, this is a lineage that stamps their offspring with incredible shape, performance and real world, beef business quality. WINC 115D has never missed an opportunity to deliver the goods, with every year she has brought back an impressive calf to the weaning pen. Her son, WINC Surelock 447M was certainly a highlight of this year's "Profit through Performance" and was purchased by George Seward of Colorado. The year before, the Plagmann family found her CKCC Relevant 0639H son to fit their demands for high performance herd bulls. Jeremy Moege purchased her 2022 born son, and the Goldammer Ranch trusted in a W/C Revolution 65G x 115D daughter to help build their Simmental program. She truly has been a low input, high output cow that has quietly been an absolute weapon in production.

# LOT 34

F17 has a lot to offer a program that is looking for an outcross pedigreed, red hided, purebred donor female! She is a powerful beast in her body cavity, but one that remains so neat and refined about her front third. We love how bold her ribcage is, how wide her stifle and pin set sit, and how flawless she remains on her feet and legs. Several progeny of F17 have been highlights of the "Profit through Performance" over the years, with a daughter selling to Addison Cattle, and a son selling to Johnke Farms. Elegance, depth, volume, and production are all inclusive in this proven female. Regardless of the service sire in this situation, it reads as a recipe for success in our minds.

**WINC MISS 2129K**

Daughter of Lot 34 & Maternal Sister to Lot 35

# LOT 35

WINC 3139L is the CKCC Relevant 0639H daughter of the incredible, ES F17 that you find on the top half of this page. This black hided version of the impressive matron reads with the same functional body type, perfectly hinged structural design, and high generating potential as her dam, yet she reads with some advantages from an EPD perspective. We have found the CKCC Relevant 0639H daughters to be consistently deep, sound, smooth, feminine, and maternal. These fundamental traits combined with consistency in production, is why we think is he a cowherd changer!

# LOT 36

When you walk through the pens on sale day, SHCO Glenda 373G is certainly a female that will jump out and grab your attention because she is a big scaled, heavy duty, power cow! Raised on the northern plains, and built for the northern plains, she gets the job done. While those who come searching for a female that reads with performance on paper may look past this female, those who value ruggedness, dimension and burliness will certainly appreciate what they find in the flesh here. Her son WINC Fortress 4171M found lots of friends this past spring, and sold to Emeri Gottlob.

**WINC FORTRESS 4171M**  
\$15,000 Son of Lot 36

# LOT 37

We love the added look and extension of the blaze faced, WINC 5141N. The R&R Testament J155 daughter from the SHCO Glenda 373G power cow is one that reads with a very bright, and high performing future. We think the versatility of pedigree and body type offers up a very exciting future here, particularly if she develops along the pathway her mother has, like we believe she will.

**R&R TESTAMENT J155**  
Sire of Lot 37

## LOT 38

A young and productive Simgenetic breeding piece that comes from our good friends in western Nebraska, at Western Cattle Source. They live in cow country, where cattle aren't babysat, and are forced to prove themselves with efficiency and longevity, and those are two descriptions that certainly fit the bill here. WCS Ms Rest Easy 2441K is built for the long haul, and also keeps in good flesh, while weaning a big calf. Her sire, W/C Rest Easy 752G is a past high seller from Werning's that was selected by Western Cattle Source and Select Sires.

W/C REST EASY 752G  
Sire of Lot 38

## LOT 39

Following her mother, WINC 5152N is the beautiful blaze faced, Mr W/C Trifecta 975J heifer calf that strikes an awesome pose with every opportunity that she gets! We love the balance and symmetry that this female has been blessed with, she is super maternal in her shape and pattern, and projects to be a sensational cow prospect. She came to the weaning pen heavy, with almost 800lbs. of adjusted weaning weight, that ratioed a 119 against her contemporary group.

# LOT 40

The utility value of females in their prime of production like WINC 880F is priceless, this proven matron has been a very impressive member of the cowherd. Her first born son sold the Brad Greenway, her and her second son to Brandon Riedel, she has more than certainly paid her way through her tenure this far, and has the aptitude to be a valuable breeding piece for her new program. Many customers of ours have purchased ES Surelock ZW15 sons over the years, but our best kept secret is the potency of his daughters!

**WINC BEACON 014H**  
Son of Lot 40 & Maternal Brother to Lot 41

# LOT 41

We are opening the door wide into the heart of the cowherd with the opportunity to keep these mother daughter combos together, and this R&R Testament J155 daughter of the Lot 40 female strikes us as the baldy making kind that stockmen near and far would love. Generations of proven, predictable, and profitable matrons line the pedigree that stands behind this pair of pounds heavy, high production females. Bid with confidence, these genetics will never go out of style!

Service Sire: R&R Testament J155 (ASA# 3951245)  
Due: 1/24/26

On November 22nd you will have access to all of the most dominate cow family's that work for Windy Creek, and it would be amiss if Miss Werning 638D was not involved. She was the high selling bred heifer out of the 2018 Werning Cattle Production sale at \$45,000. It was sure a steep investment to begin with, but we thought she was one of the most incredible females we had laid our eyes on to that point and just knew that she had to relocate to our program, whatever it may take. That significant investment to begin with has evolved into one of our leading pieces of genetic power, as regardless of the mating we expose this W/C Executive Order 8543B daughter too, she has sourced us with leading herd sire prospects and jaw dropping females. Most notably she is the dam of the trending, WINC Matter Of Time 249K that has a significant influence on the open heifer division of this sale. Here you will find a very valuable breeding piece in a OMF Journeyman J24 daughter of 638D. This homozygous black and homozygous polled matron checks all the boxes of evaluation that it would take to make the donor pen for WINC. We love her blend of power and poise, and the aura of quality she exudes. She comes bred up early with a pregnancy sired by R&R Testament J155, the success story begins on sale day!

# THE BRED FEMALES

## LOT 43

WINC 4144M is a beautiful baldy faced female that comes with an extra shot of power, all while offering superior fleshing ease and real world performance. She offers a functional skeletal design with more than enough power and substance, and in turn we love the genuine turn and shape that she offers to the center portion of their rib cage. She comes bred up to her first service, Bridle Bit Recharge K256.

CKCC RELEVANT 0639H  
Sire of Lot 43

## LOT 44

This 3/4 blood Simgenetic gem stems back to the maternal power of the GAF Blackbird Lady 1159 donor that has been stirring a storm up for the JWC brand. In their 2024 production sale, two daughters of 1159, one being a full sister to the dam of WINC 419M were sought after by the most serious of stockmen. The W/C Bankroll 811D daughter sold to Beitelspacher Ranches. We love the way that this female is constructed, her movement is fluid and effortless, and her capacious center third perfectly balances with either end of her skeleton. To top it off she sports a beautiful blaze face!

JWC BLACKBIRD LADY 264K  
Maternal Sister to Dam of Lot 44

## LOT 45

Here you will find something a little different speed, but just trust that this ChiAngus female stems from one of the breeds most powerful cow families. The mother of MEFC Jolene 4033M ET, MEFC Jolene 618D was the 2017-18 National Champion ChiAngus Female for the Becking & Melroe families, and has taken her promotion very seriously once entering the donor pen. This eye catching female comes from the industry respected, PVF Blacklist 7077 sire, and is a full sister to the Holt family's very successful ChiAngus female from the 2024 show season.

**MEFC BLACKLIST 4693 ET**  
Full Brother to Lot 45

**MEFC JOLENE 618D**  
Dam of Lot 45

## LOT 46

There is a lot to like about this second ChiAngus female also, we admire her moderate frame, bold rib shape, deep flank, and ultra-complete makeup that offers tremendous fleshing ease and maternal function. When scaling her EPD profile against her contemporaries, there may not be a more profitable female in the breed, as she ranks among the most elite of the registry. There is no denying that this Musgrave 316 Stunner granddaughter will be a role model brood cow in production!

WINC Miss 302A has become a familiar face to bull buyers of Windy Creek over the years, her legacy has been long and successful, and both sons and daughters have been sought by stockmen that pay attention to the details. Her first born daughter, WINC Miss 507C now stands in the donor pen, and has followed in the path of her dam, becoming a herd bull generating machine. While she obviously has some age, it goes without saying that her quality and genetic potential is timeless. We think that through both natural service and ET, she still has a lot to offer a program that is searching for a cow family that is built from a foundation that fits the needs of the performance Simmental business.

We continue the open heifer division with three incredible granddaughters of Winc Miss 624D. 624D is a W/C United 956Y daughter that has almost 30 registered progenies to her name, a list that includes both rancher approved herd bulls, and daughters that build the heart of the herd, such as the mothers of lots 59 through 61. This is a genetic line that proves it has an added degree of performance, time and time again. Pounds pay more than ever before; these sisters will be a wise investment towards fast tracking your cowherd to its maximum level of profitability.

This 624D granddaughter is another standout sired by Winc Fortress 170J! A purebred female that is bold bodied, stout featured, and big topped. She offers a textbook set to her hip and hind leg, while maintaining an easy fleshing and productive look of quality. On the paper she excels for calving ease and milk.

Winc 5109N is the CKCC Relevant 0639H sired granddaughter of the 624D lineage. She is bold centered, deep flanked, and portrays a very functional body style. We love the extra stoutness and dimension that she also brings to the equation. Her calving ease maternal brother, was selected by Jeremy Moege in this past year's "Profit through Performance".

**WINC TESTAMENT 4153M**  
\$9,000 Maternal Brother to Lot 61

## LOT 62

Stemming from a young and productive, W/C Night Watch 84E daughter, this homozygous polled and homozygous black, ¾ blood female comes is a very balanced and productive package. She joins the lineup of CKCC Relevant 0639H daughters that continue to impress, and now that we have several in production, we are all in, and believe that they have potential to be some of the best mature cows we have bred on.

**WINC GENERAL 03L**  
Maternal Brother to Lot 62

## LOT 63

WINC 5121N is a beautiful blaze faced R&R Testament J155 daughter from a super practical and low maintenance female we purchased from Western Cattle Source. We appreciate the added efficiency and hardiness that this maternal lineage brings to the table, and think this female fits the bill for a program that operates with less inputs, but demands high outputs!

The Blagg family have dug deep into the replacement pen to offer a direct daughter of their Wiregrass Barbie 705F donor, a female that has become an absolute herd bull generating force. The resume of sons she has raised is impressive, maternal brothers have been very well received by buyers, they include but isn't limited to a Bullseye son at \$9000 to Ron Gilliland of California, a Revolution son at \$15,000 to Balamore Farms Nova Scotia, and of cause the memorable BLAG Mr Husker 2J that sold to Kevin Noonan in the 2022 "Profit through Performance". This will be the first daughter of 705F made available to the public, and what a debut it should be! This donor prospect is cut from the same mold as her impressive mother, certainly a cow family builder here.

Those looking to add a female that is backed by a high powered, heavy performance genetic package will need to pay attention when WINC 5118N goes under the hammer. This direct daughter of WINC Beacon 018H sports a number profile that screams growth and high yields. Her raw data suggests the same, as she was impressive coming to the weaning pen, with over 750lbs. of pay weight. We think you will appreciate the length of side, width of pin set and ruggedness of structure she comes built with too.

# THE OPEN FEMALES

## LOT 66

We couldn't be more excited about the prospect of getting these WINC Matter Of Time 249K daughters into production, not only are they the kind we gravitate to on foot, but they come with an impressive data package and a pedigree that aligns some of our favorite individuals. WINC 569N is loose structured, round ribbed, and high growth, the future reads of profit and performance in our mind.

## LOT 67

The WINC All Right 213K is on fire, and again in 2025 the demand for his genetics was rampant, Griswold Cattle have sung the praises of this bull, and as a mature bull, you may not find a more impressive specimen. This daughter stems from the influences of the legendary, TR Ms Katinka 3208N, a female that worked for the Thomas Ranch past her 20th birthday, and has been a strong foundation to the astute cowherd you will find north of Harrold, South Dakota. We love her pattern, she projects a super feminine look, but still packs a punch through her rear two thirds, if family tradition is anything to go by, then profits can be expected annually with her procurement.

The result of an embryo purchase, here you will find a FULL SISTER to the \$100,000 W/C Dabo 703J, that has proven to be a potent source of scale, performance and pounds for Windy Creek and our customers. The W/C Miss Werning 6175D donor has been a very aggressive source of quality for the Werning program over the past couple of years, with both sons and grandsons being the choice of the most progressive stockmen in the country. Adding a direct daughter to your arsenal could be a slingshot move towards the cutting edge of the business.
