Cows with Age Advantaged Bulls

**135 COMING
YEARLING BULLS**

Our Most Progressive Genetics,
Trait Leading Sire Groups

Charter Member of the Montana Angus Association

Fellow Cattlemen,

Finally, our time is here! The production sector is well positioned moving into the next phase of marketplace. This market is and will be supply driven for a couple of years. The facts are indisputable, there are simply less cows in production, less cattle on feed and a tighter selection of replacement females moving forward. Overwhelming consensus agrees that all classes of cattle will continue to experience increased value.

This is the time to surround yourself with inventory. This is the time to improve genetics! Two reasons ... more than ever, there is a distinct difference in value to those cattle that can make the grade or not. Generic black cattle and off colored breeds are being discounted. Why? Two premiums, either cattle grade Prime or be accepted for CAB. Second reason and more important out in the country is maternal prepotency. The national cow herd is built from the Angus cow. In a period and a need for regrowth, the strength of better Angus maternal genetics is in more demand than ever before. The industry will need more, better cows and the Angus female will unquestionably be that choice.

This is absolutely supported by the fact that for the first time in history more than 74% of all harvested cattle were black hided. Although not all Angus, this proves further demand for the predictability of registered Angus genetics. This in turn was further emphasized that for the tenth year in a row, more than a billion pounds of CAB has been marketed. That's more than 3 million pounds a day!

This doesn't happen by accident. Years of careful, selective mating decisions have tremendously improved carcass potential. Our program aims to improve every generation. We have customers reporting 70% CAB acceptance, nearly double the industry average. That's impressive AND profitable! Among the sea of black cattle, tie yourself to a program that creates value. Let's, together help create you more value.

With this invitation, we proudly present our best set of bulls to date. These two-year-olds were developed specifically for this offering and the coming yearling bulls represent our foremost genetics. Please note that the bulls raised on the White Sulphur Springs ranch were managed at altitude and PAP tested for this offering. In addition, we are for the first time offering a set of fall-born long yearlings as another option for age advantaged breeding bulls.

We're extremely confident with this offering and certain you will be as well! We truly welcome your visit and appreciate your continued support and interest. Consider this your personal invitation to join us on December 2.

The family and crew of Stevenson Angus Ranch

Welcome to **STEVENSON ANGUS**

Sight Unseen Purchase Guarantee

Sale Day Phone - (406) 423-7500. Buyers unable to attend the sale may call or send their bids to any of the Representatives listed or directly to Stevenson Angus. We provide a complete satisfaction guarantee for cattle purchased in this manner. When cattle purchased "sight unseen" are delivered, the buyer can inspect the cattle. If they are not as represented, simply put them back on our truck.

Announcements

Announcements from the auction block take precedence over any printed material.

Herd Health

All cattle sell with proper interstate shipment health papers.

Delivery

See our bull delivery policy on page 8. For all cattle purchased over the phone, or via the internet, Stevenson Angus will be in contact following the sale to arrange delivery. Full payment required before delivery of cattle.

Accommodations

The following motels are located in nearby Lewistown. For reservations, contact either the Stevensons or the motel of choice.

Yogo Inn 406-535-8721
Calvert Motel 406-535-5411
Super 8 Motel 406-538-2581
B & B Motel 406-535-5496
The Stumble Inn, Hobson 406-600-8079

Inspection of Cattle

Our cattle are available for inspection at the Ranch any time.

Terms & Conditions

The cattle sell under the suggested terms and conditions of the American Angus Association.

Payment

Payment is due at time of sale and no livestock shall be delivered until payment is received in full or other arrangements are made in writing. In the event Seller incurs attorney fees and costs for collection of payment, Purchaser shall pay the purchase price, interest at the statutory rate and all costs and attorney fees for collection. Past due accounts will be subject to 2% interest per month.

LiveAg

Go to **www.LIVE-AG.com**, click on the purebred tab at the top of the screen.

Select **Log in or create an account to bid**. An account is NOT necessary to watch the auction. Select **Register to bid**. Call **817.533.6699** for support.

CCi.Live

View and bid at **CCi.live** or download the app for mobile devices from the App Store or Google Play. You do not need an account to watch the sale.

To bid online, login and click **Get Buyer Number** Call **405-400-9505** for support.

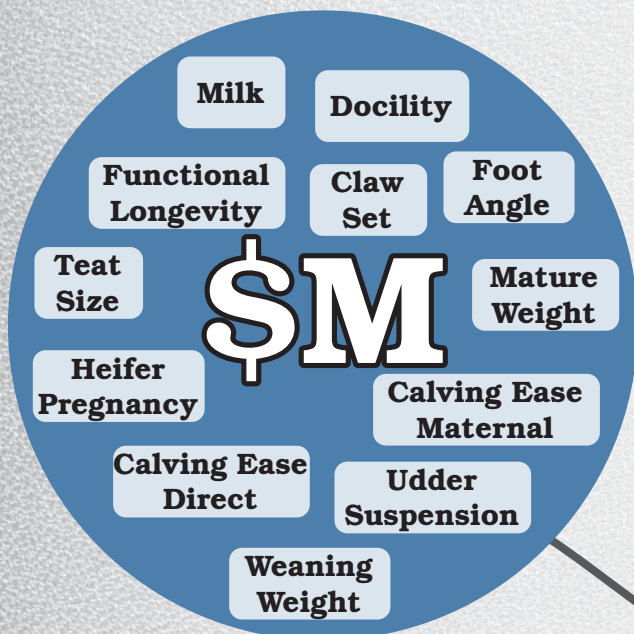

Frontier Live Sale

This sale will be broadcast live on **www.FrontierLiveSale.com**

1. Register and create an account at **www.FrontierLiveSale.com** by clicking on **Registration** in the upper right corner. You will receive an email to activate your account.
 2. Select the Stevenson auction and click **Get Approved to Bid** for absentee and live bidding. Follow instructions.
 3. Login on sale day with credentials provided at registration.
- Call **866-313-0123** for tech help.

Let's Talk \$Values

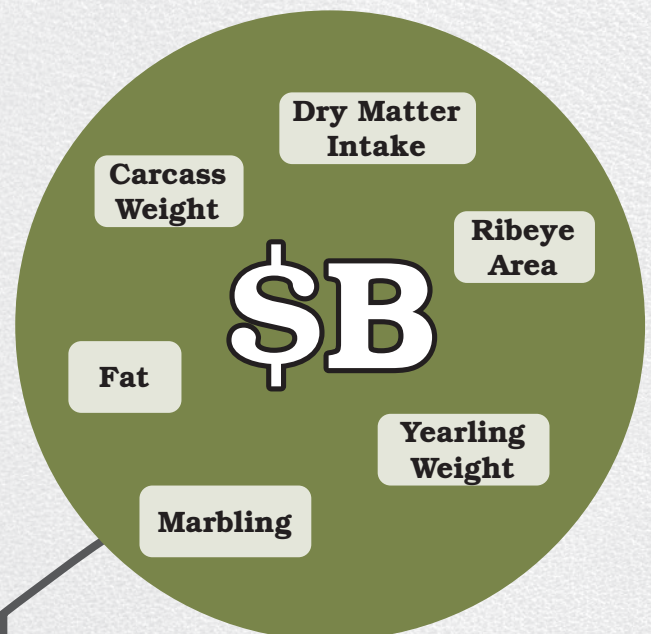

If you retain your own replacements, \$M is a crucial figure to consider.

It serves as a comprehensive metric for evaluating cowherd longevity, efficiency, and maternal strength.

A higher \$M means a bull's daughters are more likely to:

- Breed up on time
- Raise a good calf each year
- Stay sound and functional longer
- Cost less to maintain (reduced cow size, fewer issues)

Over time, this translates to more profitable, lower-maintenance cows in your herd.

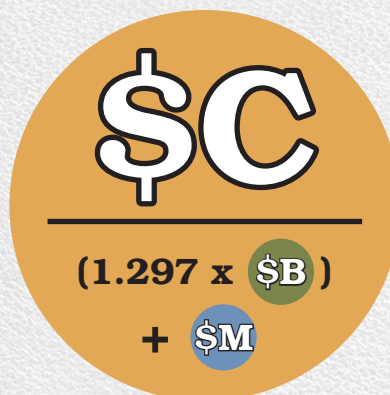

If you retain ownership, sell calves on the grid, or market reputation feeder cattle, \$B is a powerful terminal tool. It summarizes how your calves perform where it really counts — on the scale and on the rail.

A higher \$B means that, on average, a bull's calves will:

- Gain faster in the feedlot
- Eat less per pound of gain
- Grade better (more Choice and Prime)
- Yield more usable pounds of beef

That means more post-weaning value per calf — particularly if you retain ownership to the rail.

\$C is the most balanced, big-picture index Angus provides. Use it to find bulls that deliver maternal dependability and terminal value — especially if your operation spans multiple segments of the supply chain.

A high \$C bull is likely to sire:

- Daughters that breed early, raise good calves, and last longer
- Steers that gain well, convert feed, and hang valuable carcasses

In other words, \$C helps identify bulls that do it all — and help your operation make money in both the pasture and feedyard.

How to Read the Sale Lot Information

Expected Progeny Difference (EPD) is the estimate of how future progeny of each sire are expected to perform in each of the traits listed. EPD is expressed in pounds, either plus or minus. For example, when used on the same cows, calves sired by a bull with a +60 weaning EPD should average 10 pounds more than those sired by a bull with a +50 weaning EPD. EPDs are current as of catalog printing. Updated EPDs can be viewed at www.Angus.org

Targeting the Brand™

Angus bulls with greater genetic potential to produce calves that meet specifications of the Certified Angus Beef® brand.

Calving Ease Direct (CED) EPD

is expressed in percentage of unassisted births, predicting the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth (BW) EPD

is a predictor of progeny birth weight attributed to the parent.

Weaning (WW) and Yearling (YW) EPDs are predictors of the animal's ability to transmit weaning growth and yearling growth to its progeny.

Scrotal Circumference (SC) EPD, expressed in cm., is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Milk EPD is a predictor of an animal's genetic merit for milk and mothering ability.

HP +11.6	CEM +8	\$M +90	\$W +96
		\$B +185	SC +330
			Milk +31
			PAP +1.32

Heifer Pregnancy (HP) EPD

is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM) EPD

is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Index values are expressed in dollars per head

Maternal Weaned Calf Value (\$M) predicts profitability differences from conception to weaning. Traits included: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W) is the expected average difference in future progeny performance for preweaning merit and includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Beef Value (\$B) is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

Combined Value (\$C) is an index which includes all traits that make up both \$M and \$B. EPDs directly influencing a combined index: CED, CEM, WW, YW, Milk, HP (Heifer Pregnancy), DOC, MW, Angle (Foot Angle), Claw (Claw Set), DMI (dry matter intake), Marb, CW, RE, Fat.

PAP Score

Pulmonary Arterial Pressure Test Score

Docility (Doc) EPD

is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility.

Claw Set (Claw) EPD

is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle) EPD

is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Marbling (Marb) EPD

is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE) EPD

expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Pulmonary Arterial Pressure (PAP) EPD

is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet.

Calving Ease Rating (CE)

- ★★★★ Excellent calving ease, use with confidence on any type of heifers.
- ★★★ Superior calving ease, should work with most heifers and most situations.
- ★★ Moderate calving ease, most people will use these bulls on cows, but they can be used on heifers if calving ease is of less concern.
- ★ We recommend these bulls just for use on cows.

Driving the science of better breeding

There's little room for error in the cattle business. You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI[®]) provides it through genomically-enhanced expected progeny differences (GE-EPDs). GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association[®], home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits
(such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they had recorded 7-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	24	Heifer Pregnancy	28
Calving Ease Maternal	18	Maternal Milk	33
Birth Weight	22	Mature Weight	14
Weaning Weight	25	Mature Height	9
Yearling Weight	20	Carcass Weight	13
Yearling Height	15	Marbling Score	10
Dry Matter Intake	12	Ribeye Area	11
Scrotal Circumference	12	Backfat Thickness	11
Docility	10	Teat Size	12
Foot Claw Set	13	Udder Suspension	13
Foot Angle	12	Pulmonary Arterial Pressure	7
		Hair Shed Score	10

How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS[™] powered by partner Neogen GeneSeek or the HD50K by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.

Angus.org/AGI

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating our cattle with AngusLinkSM programs: the Genetic Merit ScorecardSM and AngusVerifiedSM.

ANGUSLINKSM
**GENETIC
MERIT**
SCORECARDSM

The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

**ANGUS
VERIFIED**SM

AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day.

Users of AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

ANGUSLINKSM
VALUE ADDED PROGRAMS

ANGUSLINK.COM | 816-383-5100

Cattle Delivery

We encourage all of you to stop by and coordinate delivery plans before leaving the Sale. If you are buying off-site, please let us know of any special instructions as soon as you can. Otherwise, we will contact you regarding date of delivery. Your cooperation in taking delivery is greatly appreciated.

Bull Delivery

In order to better service our customers, we offer FREE NATIONWIDE BULL DELIVERY. For the western states we will make every effort to deliver the bulls to your doorstep. For our customers East of the Mississippi River, we ask your cooperation with potential drops at Central Delivery Points.

To our neighbors to the north, we are happy to bring you your bulls, however due to increasing scrutiny at the border, having the Canadian resident present, eases the process. If meeting at the border is not possible, we ask to share in a portion of crossing fees. Thank you for your understanding.

We will continue to offer a pickup credit of \$100 per head for all bulls picked up within 7 days of the sale.

FIRST YEAR BREEDING GUARANTEE

In lieu of a commercial "loss of use" policy, we would like to offer our own First Breeding-year Guarantee. For bulls selling for \$6000 or more, and does not complete a full breeding season, we will share in the replacement cost up to 50% of the value of the injured bull. Breeding season is defined as 90 days after turning out the bulls.

50% of the value of the injured bull, minus salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2026.

Example 1: A \$10,000 bull is injured, a credit of \$5,000 minus any salvage value will be given to the buyer.

Example 2: A \$8,000 bull is injured, a credit of \$4,000 minus any salvage value will be given to the buyer.

Example 3: A \$5,000 bull is injured, no credit is given. Buyer retains all salvage value.

Applicable credits honored from our Breeding Guarantee are to be used within one year of submission.

STEVENSON ANGUS RANCH

REWARDS

LOYALTY REWARD

We honor our customer's loyalty with a 5% discount on every bull purchased by any single customer that has purchased bulls in TWO consecutive sales prior to this offering. In order to qualify, purchases need to have been made from both of our sales in Hobson from the Spring 2025 and Fall 2024 offerings.

DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

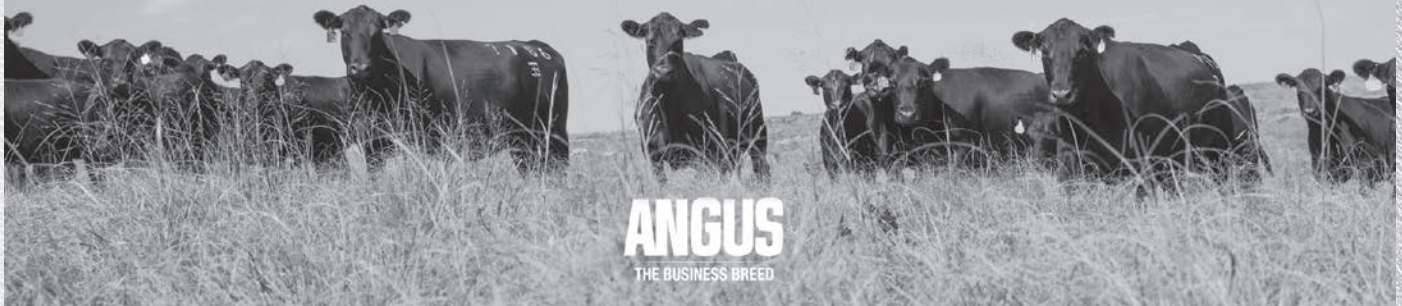

Raising quality registered Angus cattle takes **COMMITMENT**.

As your genetic supplier, we are **DEDICATED** to not only improve today's genetics, but also prepare for the future of the Angus breed. We believe a commitment to improvement starts with the female.

Commit to the female — commit to MaternalPlus®.

Contact Customer Service at 816-383-5100 or angus@angus.org for more information.

Older Bulls

- Never been picked over
- Predominately AI sired and embryo transfer
- Developed specifically for this sale offering
- PAP TESTED

In our experience, these age advantage bulls have proven to cover more country and cover more cows. Feedback from our customers is true testimony to their breeding vigor and ability to hold up better.

PAP TESTED ... the bulls raised at the White Sulphur Springs ranch were managed at altitude and PAP tested for this offering by Dr Nick Johnson of Sorenson Intermountain Vet. PAP scores are notated for those bulls. For additional information contact Darrell.

They are put into contemporary groups at weaning based upon their ranch origin and the conditions they were raised under. These contemporaries remain the same through their yearling performance test. Understand, because the bulls are in different contemporary groups, a ratio of 100 will not necessarily correlate to the same weight between the different groups. These bulls are then slow grown, fully concerned with their long-term ability to hold up. They are sound, athletic and not over conditioned.

These bulls are guaranteed breeders. They have all passed a breeding soundness evaluation including a semen test.

RETAINED INTEREST – we are selling FULL POSSESSION and 2/3 REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining 1/3 revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

High Mountain Disease, or commonly known as Brisket Disease, is a common condition seen in cattle raised in regions greater than 5,000 ft of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure. Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be "sub-clinical", meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal's potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the Angus breed, we can evaluate that animal's potential to pass on genetic traits that can greatly influence the performance of that animal's offspring. The PAP test can be influenced by several factors other than genetics but because it is an actual measurement, it is far more accurate and reliable than the current EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.

- Dr. Nick Johnson

Fall Bulls

Our commitment to offering age advantaged bulls has been unwavering for 65 years. To complement our older coming two-year-olds, we chose to develop a smaller group of fall born long yearlings. In our experience, a little extra age has proven these bulls to cover more country and cover more cows. Customer demand and feedback for these older bulls has been tremendous.

These fall born bulls are all born, raised and developed in Hobson. They have all passed a breeding soundness evaluation including a semen test.

RETAINED INTEREST – we are selling FULL POSSESSION and 2/3 REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining 1/3 revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Fall Bulls

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the Certified Angus Beef® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Bull Calves

The bull calves offered in this Fall Sale are the top end of the natural and embryo calves out of mature cows born at Stevenson Angus in January and February.

These calves were all born and raised in Central Montana near Hobson. The calves in this offering were raised from birth to weaning with no creep. After weaning, the calves are fed a high roughage growing ration. These bull calves were weaned and weighed from September 4th - 8th.

These bulls are members of large contemporary groups within the Stevenson Angus herd. Because they are grouped by growing conditions, a ratio of 100 will not necessarily correlate to the same weight between the different groups.

While these bulls are guaranteed breeders, we recommend that bulls not wintered at Stevenson Angus be fertility tested by a certified veterinarian prior to use next summer.

RETAINED INTEREST – we are selling FULL POSSESSION and 2/3 REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining 1/3 revenue-sharing semen interest simply allows Stevenson Angus the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Realistically, we will collect semen on a very small percentage of the bulls selling. It will be an even smaller number of bulls that will market semen. However, we realize that many promising bulls are identified after they have proven themselves in natural service. If you have any questions or concerns about our retained interest policy, please contact Stevenson Angus.

Wintering Arrangements

Wintering arrangements are available on bull calves purchased in the sale. For \$400 per head, they will be wintered and delivered after our March bull sale. Wintered bulls will have yearling data collected and recorded to AHIR. They will also pass a complete breeding soundness evaluation, including semen test, prior to delivery in the spring.

STEVENSON

WORLD CLASS BEEF

**Five generations of family ranching
producing the highest quality beef.**

Angus cattle originated in Scotland, as did our family roots. For more than eight decades, our family has believed in our ability to make a living in the beautiful, but often harsh ranch land of central Montana. Carrying on the tradition, each new generation of family adds invaluable experiences that improve your family dining experience.

Why us?

For generations, our sole livelihood has been from providing seedstock Angus cattle and genetics from our family ranch to the world. We love the beef industry and are excited to offer our world class cuts of beef to the market.

Over 100 years ago

The Stevenson family moved from Missouri to the small town of Hobson, Montana to discover our legacy as Angus ranchers.

Originally, crops, cream, eggs, custom harvest work and a flock of turkeys were our main source of income. By the mid-40s, we introduced bigger livestock into the mix and purchased cattle. Ultimately, we found our true calling after purchasing four registered Angus heifers from the Airyland Ranch, Montana's pioneer Angus herds in nearby Lewistown. Five generations later, we sell our seedstock cattle and genetics all over the world producing the highest quality of beef worldwide.

For your dining experience at home . . .
