BULL SALE

DECEMBER 13, 2025 • 1 PM CST

GRAND SALINE • TEXAS

GABRIEL *g* RANCH

Welcome

Gabriel Ranch is excited to extend an invitation to you for our fall bull sale. The cattle market is thriving with feeder calves at an all-time high. It is more important now than ever to build your program around bulls that will produce calves with high marbling and growth. Our goal is to support you by offering Gabriel Ranch genetics that will enhance your program with this bull offering. This offering will benefit the registered and commercial cattlemen.

Lana and I are thankful to have a family that loves ranching and cattle. Not only do our kids Brad and Dara and Dedra and Tommy love it, but our grandchildren are involved. In addition, Andy and Brandy are family, and this combination results in building a Legacy! Gabriel Ranch is here for you now and in the future.

Please join us for lunch on sale day, catered by our restaurant Q & Brew.

Ron and Lana Gabriel

SALE LOCATION:

8575 FM 1255 • Grand Saline, TX 75140

ACCOMMODATIONS:

Fairfield Inn & Suites

3064 Interstate 20, Van, TX 75790
903-963-1037

Best Western Canton Inn

2251 N Trade Days Blvd., Canton, TX 75103
903-567-6591

AIR TRAVEL:

Tyler Pounds Regional Airport, full service FBO, 6000 ft. airstrip (903-531-2343) is 30 minutes from Ranch.

DFW Airport serving Dallas-Ft. Worth area is serviced by all major airlines and is 1 1/2 hrs. from the Ranch.

Shreveport (SHV) is 1 hour 45 minutes from the Ranch. Shreveport and DFW offer connecting flights into the Tyler airport.

Love Field is serviced by Southwest Airlines in Dallas and is 1 1/2 hrs. from the Ranch.

Call Lana for travel and accommodation assistance at 903-245-9563.

INSPECTION OF CATTLE:

Cattle will be available Saturday morning before sale, or anytime by contacting Andrew Maupin at 903-497-4307.

HERD HEALTH:

Cattle will be accompanied with proper health certificates for immediate shipment. An updated breeding and calving report will be available sale day and announcements from the auction block will take precedence over all printed material.

TERMS AND CONDITIONS:

The cattle will sell under the standard terms and conditions of the American Angus Association. All announcements from the auction block take precedence over printed materials.

LIABILITY:

All persons attending the sale and related functions do so at their own risk. Gabriel Ranch and the sale management and staff assume no liability, legal or otherwise, for any accidents or injuries that may occur. The sale manager is only an agent for the seller and has no responsibilities other than that involved in conducting the sale.

SALE SETTLEMENT:

All cattle are to be settled for prior to load out unless prior arrangement has been made with Gabriel Ranch. Terms are cash or check. Scramble certificates welcome.

For records or billing questions, please contact Brandy Maupin (859)339-0128 or email at Brandy@GabrielRanch.com

TOP 20%

EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink®, CAB®, Pathfinder®.

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PRODUCTION EPDS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MANAGEMENT EPDS

Dolility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle

score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire’s progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

Hair Shed EPD (HS), is expressed in units of hair shed score, with a lower EPD being more favorable indicating a sire should produce progeny who shed their winter coat earlier in the spring. Selection for this trait should improve the genetic potential for a sire’s progeny to shed off earlier increasing the environmental adaptability of cattle living in heat stressed areas and producers grazing endophyte-infected (hot) fescue.

MATERNAL EPDS

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

Teat Size EPD (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension EPD (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity EPD (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS EPDs

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Group/progeny (C Grp/ Pg and U Grp/Pg) reflects the number of contemporary groups and the number of carcass and ultrasound progeny included in the analysis.

\$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Gabriel Ranch Bull Guarantee

All bulls have passed a breeding soundness exam prior to the sale and are guaranteed to be sound breeders for the first breeding season, which is defined as the 90-day period following the first turnout of the bulls. If a problem arises, please notify Gabriel Ranch as soon as possible should an injury or problem occur and prior to the injured bull being sold for salvage. In this circumstance, Gabriel Ranch will provide a replacement bull if available, or if the buyer prefers, a credit toward a bull will be given in the upcoming sale, less the salvage value of the injured bull. No claims will be accepted after six months.

One of only two non-parent sires in the breed sired by the legendary Double Barrel and Encore Cattle herd sire Nobility with his unique combination of CED, Marb and RE who is a direct son of the \$40,000 DBA Blackbird 2801. This stud delivers an elite combination of calving ease, explosive growth, elite maternal traits, great foot scores and elite carcass merit. This stud delivers on every front.
