TAKE PRECEDENCE OVER
INFORMATION IN THIS SALE BOOK**

AM EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

Bulls are available for viewing at the farm prior to sale day. Please contact us to set up an appointment. Videos will be available online. Check out **GeneticExcellence.com** for more information.

WELCOME

What a year 2025 has been for the cattle industry. This year we have seen record breaking prices in the grocery stores, the stock yards, and seedstock sales. No matter the reasons, this past year has been a testament to how important the beef industry is in our country. It has been great to be a part of as beef producers, and as beef consumers! The quality of beef that American farmers and ranchers are producing every day is truly unmatched and we are proud to help play a small part in that.

As we look forward to 2026, the changes that we see around us in our industry have not changed what happens on our farms, and they have not changed what you will see in this sale book. Our commitment to provide quality bulls that will perform for many years has remained the same since our first sale over 20 years ago. Whether your goal is to sell feeders at weaning, retain ownership on your calves through the feedlot, or to keep heifers back to rebuild your herd, we have worked hard to put together a set of bulls that will help you accomplish what you set out to do.

We are so grateful that we can say this is our 22nd annual sale. We would never have been able to do that without our customers, friends, and families. This year we lost one of our longtime friends and members of the Genetic Excellence family, Neal Richardson. His absence will be felt deeply, but it is a reminder that this business is one that is full of meaningful relationships. For that, and for our time with Neal, we are so thankful.

This is a great set of bulls. As you look through the catalog, videos, or come see them in person we hope that you can see the years of work we have put into each and every one of them. If you have any questions, please do not hesitate to reach out to us. We also have a fantastic group of heifers that will be offered alongside the bulls on January 3rd from longtime heifer consigners. These heifers are the result of years of working with the Genetic Excellence program and they will not disappoint.

On behalf of everyone involved with the Genetic Excellence Angus Bull Sale, it is our honor to invite you to join us January 3rd, 2026, at the Hyder-Burks Ag Pavilion in Cookeville, TN. We would love for you to join us!

Kent & David

THE BULLS

Officially entering the Genetic Excellence Program in July, these bulls have spent the last 7 months being developed into what you see laid out before you in this catalog. They are the product of intentional decision making when it comes to genetics, herd health, and nutrition. Every bull selling has been sorted for foot and leg integrity, docility, performance, and is ready to get to work the second they step off that trailer. Below you will find a list of common questions we are asked, but we are always available to answer any other questions you may have, walk through the bulls with you, or aid you in the selection process any way we can.

FREQUENTLY ASKED QUESTIONS

• HOW ARE BULLS SELECTED FOR THE SALE?

- Bull selection really begins at sire selection the previous breeding season. The sires selected to potentially have sons in the sale are carefully chosen based on what they are able to add to our cow herds. We want to ensure that the sires we select will be able to provide us with a great set of cows to produce future GE Bulls just as well as they are able to provide us with GE bulls in the immediate future. This decision making process comes down to much more than data and numbers, as our goal is to provide you with a high quality, sound, docile bull that is able to perform his job for many years.
- After the bulls are born, there are several selection points where a bull can either continue along in the program or head to the steer pen. The first is at weaning, the second is before the bulls officially enter the GE program in July where all bulls, including those that are consigned, are heavily screened for phenotype and genotype, and once they are in the program they can be removed at any time for soundness issues, injury, temperament issues, or poor performance.

• WHERE ARE THE BULLS DEVELOPED?

- The bulls are divided by owner into two groups at Holt Farms and JBS Angus. These farms are about 4 miles apart and easily accessible to anyone who wishes to come look through the cattle.

• WHAT DO THE BULLS EAT?

- The bulls are housed in large grass pastures with free choice grass hay. They are also supplemented with a balanced bull development ration created by Alyssa Clements of Purina Nutrition and Ag 1 Coop specifically for this program.

• ARE THESE BULLS "ON TEST"?

- The short answer is no. The bulls are limit hand fed their development ration because high ADG numbers are not our goal. Our goal is to develop these bulls in a way that ensures their fertility and structure is not compromised by over conditioning while they are still growing. We also know that when these bulls leave our farms they will not be in a "test" environment at their new homes and want to make that transition as easy for the bull and their new owner as possible. We are raising "what you see is what you get" bulls with their performance based in real world situations.

• DO YOU TRIM FEET?

- No. We want every buyer to feel confident in the bull they take home after the sale, and, to us, a big part of that is knowing what their feet look like.

• ARE THE BULLS DNA TESTED?

- Yes. All bulls have undergone DNA testing and have genomically enhanced EPD profiles.

• WHAT DATA IS COLLECTED ON THESE BULLS?

- Besides the performance data that we collect on our cattle before they enter the program (birth weights, weaning weights, etc.) these bulls also have ultrasound carcass measurements taken by Greg Parks of GSP Cattle Co. in late October along with their yearling weights.

HERD HEALTH PROGRAMS

All bulls entering the sale must receive two rounds of a modified live respiratory vaccine against IBR, BVD, BRSV, and PI3, a pasturella vaccine, as well as clostridial (blackleg) vaccines prior to or after weaning. Upon arrival at each lot in late July the bulls receive booster vaccinations for respiratory viruses and clostridial organisms while also being dewormed and vaccinated for pinkeye and Leptospirosis. All bulls must also have a negative test for BVD-PI, Johnes, Brucellosis, and Bovine Leukemia Virus prior to arrival.

In mid to late October, each bull will receive an ultrasound to collect actual carcass data, at that time the bulls will receive a second round of deworming with an injectable wormer and a dose of multi-min 90 trace mineral injection. Approximately a month later in late November the bulls will receive a breeding soundness exam. At that time each bull will be re-tested for Brucellosis, Johnes, and BLV to confirm no new infections have occurred/ developed since the original test. The bulls that pass their exams will receive a final booster of a modified live respiratory vaccine plus leptospirosis, as well as a final clostridial booster.

We go to great lengths and expense to protect the health and well being of these bulls with the intent of providing a sound reliable product to our customers. It is our goal to offer a healthy set of bulls that producers can take home and put right to work. Cattle diseases, vaccines, current research, and testing options are always changing. But our goal to provide the healthiest animals to our customers has not. So each year we reevaluate our vaccine program and testing requirements to ensure that we continue to meet that goal and exceed the industry standards when it comes to health requirements. As new diseases emerge or new vaccines come onto the marketplace we will remain diligent to change with the times and adapt as needed. But one thing will always remain steadfast with our programs, cattle health is priority number one.

COMMERCIAL ANGUS HEIFERS

This year our past bull customers have brought the buyers a top shelf group of replacement heifers. Many of these heifers run 6-7 generations deep with Genetic Excellence Bulls in their sire stack. The 2026 offering features a strong group of first calf heifer pairs, heavy bred heifers (bred to low birth weight Angus Bulls). All of these heifers will sell with a negative test for Bangs, Johnes, BLV, BVD PI, and will be sold in uniform groups of 3-5 head. The bred heifers will be pregnancy checked by a licensed veterinarian and sold in groups of like calving dates. A complete and detailed listing of the heifers selling will be available two weeks prior to the sale. To request further information on the heifers please contact Kent Brown, David Holt and/or the Owners listed below.

HEIFERS WILL SELL IMMEDIATELY FOLLOWING THE CONCLUSION OF THE BULL SALE

EXPECTED PROGENY DIFFERENCES

Genetic selection tools can go a long way in helping you choose your next bull. In an effort to help you streamline your search, we have pulled out several economically important, highly heritable traits that the majority of our customers find useful in bull selection. Full pedigrees and EPD profiles can be found on www.angus.org using the animals registration number. EPD definitions can also be found on the Angus website. And as always, if we can be of any assistance to you as you make your way through the catalog, we would love to help you any way we can.

In our search for a new calving ease sire to add to our bull battery, we landed on Bear Mtn North Star. His pedigree is full of time-tested cow makers such as True North, Rainfall, Justified, and the ever-productive Forever Lady cow family. The North Star calves come easy and pack on the pounds from day one! They stand on solid feet and legs, have great attitudes, and seem to shed off very well in a fescue-based system.

DELIVERY CREDIT

We offer free delivery, within 150 miles of the sale site, for any Bull buyer who makes purchases which total \$7000 or more. This offer is valid for Bulls only. We will be consolidating trips by location, so buyers must be able to receive the Bulls when delivery is being made to your area. Buyers who pick up their Bulls on the day of the sale will receive a \$50 credit per Bull, toward their purchase. We currently don't offer free delivery on females, but will be glad to help make arrangements for trucking if needed.

*In Loving Memory***NEAL RICHARDSON**

NOVEMBER 11, 1946 - NOVEMBER 5, 2025

Percy "Neal" Richardson of Richview Angus Farm was a devoted cattleman, community servant, and steady friend to agriculture in the Upper Cumberland for more than four decades. A lifelong Tennessean with deep roots in education and service, Neal spent his career as an architect before embracing the land he loved. Since establishing his Black Angus herd in 1980, he poured his heart into stewardship, good cattle, and strong relationships. For over 20 years, he faithfully consigned bulls to the Genetic Excellence Bull Sale, becoming one of its longest and most trusted supporters. His quiet kindness, easy smile, and genuine encouragement made him a friend to many across the cattle business.

Neal and his wife, Jeanne, built a life centered on hard work, learning, and giving back. Their scholarships, community projects, and annual distribution of dictionaries to local students reflect the same values Neal brought to the cattle industry—generosity, integrity, and a deep belief in lifting others up. He will be dearly missed by all who knew him, from fellow producers to the many families he touched through his service. Neal leaves behind a lasting legacy of goodness, community, and friendship that will continue to live on through his family, his farm, and the countless people who were blessed to walk alongside him.

B MONTANA JET 1271

Jet was brought into the sire line up as an outcross sire that reads with an impressive pedigree including Stellar, Tahoe, and Basin Joy 1036, the dam of the ever popular, Basin Rainmaker 4404. Jet is a heifer safe bull that sires moderate framed progeny with added length of body, very slick hair coats, impeccable feet and leg structure and good docility. The daughters of Jet should stay around a long time as he ranks at the top of proven sires for heifer pregnancy, teat and udder structure, and functional longevity.

Pacific was brought into our programs as a cow bull that would complement some of the more moderately framed, lower marbling females in our cowherd. The Pacific progeny offer tons of early growth and were some of the heaviest weaning calves in their contemporary groups. He offers exceptional docility, claw, and angle valuations with a top 10% marbling EPD. Whether you are looking to sell pounds at weaning, retain ownership, or keep replacement heifers, these Pacific cattle can get the job done!

While searching for the very best sons of the legendary sire, KG Justified 3023, we picked Justifier to carry on the Justified line, and we are sure glad we did. Justifier offers a very balanced tabulation and sires cattle that are very consistent in type and kind, with top phenotype, good feet and leg structure, docility, and hair shed. Adding to the maternal value of Justifier would be his widely admired dam, Bear Mtn Forever Lady 7833, that serves as Bear Mtn North Star's grand dam. Our friends Robert & Walt Stinson of Stinson Angus chose Justifier as the 2nd high selling bull of the record setting 2023 Bear Mountain Sale.

We were first drawn to Tradition by his stunning phenotype, and as we dug deeper into his no holes pedigree, we were hooked. The Tradition cattle are performance cattle with a load of maternal value, that stand on a good/big foot with added bone, extra length of body, depth, and spring of rib. Most importantly for us, the Bulls look like Bulls and the Heifers are the keeping kind. Tradition will be a high impact sire for Genetic Excellence well into the future. Tradition was bred by master breeder Randy Daniel of Partisover Ranch and this true breeding bull may be Randy's greatest masterpiece.
