**Elite Balance, Built for Profit.**

CREED is the dominant calving-ease son of Salvation in the breed today with a very unique combination of functional growth and elite potential for end-product merit. Creed offers a practical calving profile with Top 30% CED and controlled birth weight, followed by steady, efficient performance that includes a top 30% rank for RADG and Top 20% DMI. This should provide excellent feed efficiency to his offspring, and when combined with his breed ranks of top 35% for MW and 85% for MH, we would expect his daughters to be productive, easy-keeping females in the pasture. To complement this, his management traits also feature top 15% Claw and top 25% rank for Docility.

His index rankings show the same potential with top 1% \$Beef, top 10% \$Feedlot, top 1% \$Grid, and Top 2% \$Combined, confirming elite terminal profitability without sacrificing maternal balance. Early progeny data validates the profile, with his first calf crop posting a 102 weaning weight ratio, proving his ability to transmit growth and value.
