12:00 P.M. CST - SMITH FARMS SALE FACILITY - 127 HADEN ROAD - PURVIS, MS 39475

## SELLING 140 LOTS!

70 Fall Long Yearling Angus & Balancer Bulls

70 Angus Females including Pairs, Bred Heifers, and Open Heifers

# Hello Friends

We are looking forward to seeing you and your Valentine for our 13th Annual Production Sale. We are so thankful for the relationships we have built with our customers and look forward to making new and lasting friendships this year.

We are proud to be offering over 140 lots including 65 Angus Bulls, 5 Gelbvieh/ Balancer Bulls, a host of Angus first calf heifers, fall bred heifers, young pairs ready to breed, spring bred cows, open heifers and fall bred Balancer heifers.

All bulls and females have been Genomic (DNA) tested to improve EPD accuracy. We strive to raise our bulls with the commercial breeder in mind, but quality that can also be used with your registered herd. This group of bulls are structurally sound, thick and moderately framed with strong maternal traits. The bulls are kept together as a large group with lots of space and plenty of grass with limited grain. Here in south Mississippi our weather is somewhat unpredictable, but our bulls and females have adjusted well in the ever-changing weather conditions.

Our dear friend Will McMillan with McMillan Angus Farm will be joining in our sale again this year. We are happy to have him as a partner and encourage you to check out the great heifers he is offering this year.

We would like to invite you to come out on Friday evening, February 13, 2026, for food and fellowship starting 6:00pm. Cattle will be available for viewing after 12:00 pm if you would like to come early to visit before supper. On Saturday, we will start serving lunch at 11:00 am. Looking forward to seeing you all there.

Best wishes to you and yours in 2026!

Friends and Fellow Cattlemen,

On behalf of the Smith Family, welcome to their 13th Annual Production Sale! I would like to thank Lane and Karla for giving me the opportunity to assist in the marketing of their program.

This annual event has become one of the best places in the southeast to acquire some of the strongest Angus genetics to improve your bottom line. The offering this year is as deep as they have ever put together with great herd sire prospects, and females that are the front pasture kind. Progeny from some of the breeds top AI sires including Commerce, Craftsman, Republic and Rise Above will be highlighted at the start of each group.

The bulls continue to get better every year. As you walk the bull pens you will find performance-oriented bulls that excel for being slick-haired and good-footed with plenty of muscle. Numerically, there is a large number of calving ease bulls that do not sacrifice growth, marbling and maternal traits.

The female offering begins on page 22 and it starts with the bred heifers Lane let me pick out with no restrictions. They are complemented by another strong group of bred heifers from their friend Will McMillan of McMillan Angus Farms in Newton, MS. They are followed by a really nice set of young fall pairs, spring calving cows and open heifers.

We hope you can join us in Purvis, MS on Valentines Day. If you are unable to attend the sale, but would like to bid from afar, do not hesitate to contact myself, or feel free to bid online through [www.CCI.live](http://www.CCI.live). See you at the sale!

Sincerely,

Mark C. Sims

## BREEDING GUARANTEE

Smith Farms guarantees all bulls to be fertile and structurally sound through the first breeding season. In the event a bull becomes unable to breed cows for either of these reasons during the first breeding season, Smith Farms will provide a replacement bull or issue credit, minus the salvage value of the bull, for purchase of another bull. Breeding season is defined as the 90-day period following the first turn out of the bull. The fertility guarantee does not cover the bull's ability to produce freezable, high quality semen suitable for artificial insemination. This is not a life insurance policy-this is a "failure-to-perform" guarantee. Smith Farms must be notified prior to the culling or selling of the bull and may require a veterinarian examination of the animal. Please contact Smith Farms with any questions.

## HERD HEALTH

All cattle will have interstate health charts required for shipping into other sections of the United States. Bulls have been fertility tested and have passed a breeding soundness exam.

## REGISTRATION CERTIFICATES

Bulls will be transferred to the buyer at the seller's expense. Buyer must be sure to give the clerk the proper name and address for making transfers. A transferred certificate of registration will be mailed to the new owner at a later date.

## SEMEN INTEREST

Smith Farms will retain one-third semen interest on all the bulls in the sale.

## BULL DEVELOPMENT

A note about our bull development...from birth to weaning the bulls in this sale were not creep fed as calves. Once they are weaned, we sort them into two large groups where they run in open pastures. Each pasture is sloped; with hills they must climb to go water. The bulls have been developed on silage we grow right here in south Mississippi.

A top calving ease Broadview 280 son produced by a first calf heifer. He ranks high for RE EPD and \$M. Recommended for use on heifers.

# Balancer Bulls & Ultrablack Bull

## Balancer Cattle

Balancer cattle offer a simple and powerful way to maintain hybrid vigor and a profitable blend of British and Continental genetics without a complicated crossbreeding system. These cattle fit well into all aspects of the beef industry including commercial cow/calf operations and on the rail. Balancer cattle are registered hybrid seedstock that have documented pedigrees and expected progeny differences (EPDs). Balancer animals are 25 to 75 percent Gelbvieh with the balance of Angus or Red Angus. Balancer cattle combine the Gelbvieh growth, muscle, leanness, fertility, longevity and low yield grading ability with the carcass qualities of Angus. Gelbvieh and Balancer cattle are well known throughout the beef industry for their maternal strengths and superior growth. With attributes such as more pounds of calf weaned, added fertility, greater cow herd longevity and heavier carcass weights, just to name a few, Gelbvieh and Balancer offer genetics that work for the commercial cattle business.

## A WORD FROM McMILLAN ANGUS FARM

### Welcome

I want to invite all of you to view the cattle on Friday the 13th and stay for supper and entertainment. Then be ready for the sale on February 14th. I want to give a very big thanks to Lane and Karla Smith for allowing me once again the opportunity to be part of such a special event.

The 2026 Smith bulls are a powerful set of bulls. The outlook for the cattle business in the future is very bright. You will have an opportunity to add high quality females to go way into the future.

At this point I want to say thanks to all of those who have done business with McMillan Angus in the past. As we get ready for the sale on February 14th, we have put together females from open heifers, bred heifer's to pairs. While you evaluated the females hopefully you find something that will work for your program. As in the past know that McMillan Angus is there to stand behind our cattle. McMillan Angus was started in 1976 by my father, marking fifty years in the Angus business. I look forward to us carrying it further into the future. On a personal note 2026 will be the year that I put my name on the ballot for the American Angus Board of Directors. I would ask for your support in this venture going forward.

If you have any questions, please give me a call.

Thanks,

Will McMillan

™ & ® Trademarks and service marks of Corteva Agriscience and its affiliated companies.

GrazonPD3™ is a Restricted Use Pesticide.

Under normal field conditions, DuraCor® is nonvolatile. DuraCor has no grazing or haying restrictions for any class of livestock, including lactating dairy cows, horses (including lactating mares) and meat animals prior to slaughter. Label precautions apply to forage treated with DuraCor and to manure and urine from animals that have consumed treated forage. White clover and Annual lespedeza exhibit some initial injury (such as lodging and loss of vigor) with NovaGraz application but recover. Not all products are registered for sale or use in all states. Consult the label for full details. GrazonPD3 is not for sale, distribution or use in Nassau and Suffolk Counties in New York State. Always read and follow label directions. © 2024 Corteva. # Cleaner hay is all in the timing

**Rezilon® herbicide is the preemergence with timing options that give you more control over the annual grassy weeds in your hayfields. You can target either summer or winter annuals by adjusting your application timing and maximize effectiveness by making a second application at the appropriate time. Just two applications a year will provide season-long control of labeled species, giving you the clean hay you want – and a solid reputation that endures for the long haul.**
