**[blake@lundgrenangusranch.com](mailto:blake@lundgrenangusranch.com)**

Dear Friends and Fellow Cattle Producers,

We would like to welcome you to our annual production sale. This marks a quarter of a century that Lundgren Angus Ranch has been providing Angus seedstock to the industry. We are humbled and excited to have reached this milestone, but we know that without our loyal repeat customers, along with the continued support and encouragement by so many of you over the years, this accomplishment for our family would not be possible. A sincere THANK YOU to all who have helped us over the years.

What an exciting time to be in the cattle business. 2025 saw record prices in all categories and classes of cattle and it appears that producers can expect strong markets for the foreseeable future. This in part has to do with 70-year low cowherd inventory numbers. Although there may be initial signs of some heifer retention, the resulting impact on growing the nation's cowherd appears to be minimal and therefore, should continue to be supportive of a strong market. We must acknowledge that the other side of the coin is demand for high quality US beef – and it has never been stronger than it is today. The Angus breed has played a significant role in producing high quality, consistent, highly marbled beef that has been the driving force behind the consumer demand we see today. Maintaining and continuing to improve our beef product will be paramount to sustained demand, so your continued use of Angus genetics plays a key role in that.

We are really excited to offer this set of bulls and females to you as we feel like they are representative of the breeding goals we have set for ourselves, recognizing that we have YOU, the commercial cattlemen's, best interest in mind. This year's offering represents a couple of new sires both on the Angus and Red Angus side. As you study the information in this catalog and appraise the cattle via videos and in person, we think you will be impressed with this set of cattle. We are striving to have cattle that not only "look good" on paper but are uniform in their type and kind across the different sire lines and breeds. We continue to receive very positive feed back from customers on their satisfaction with LAR genetics and we take great pride in continuing to advance our program to meet the needs of your operations. From the collection of data, to new sire selection and introduction, to developing relationships to help you realize and capture the value in your calf crop, we are continually working to be your trusted source in Angus genetics.

This past August, we hosted a Lunch & Learn event at our place where we had an opportunity to showcase part of the LAR cowherd and share information on some of the things we are doing to help our customers market their cattle. We are proud to be founding members of the Rancher's Sustainable Angus Alliance (RSAA – see more on page 7). RSAA is a group of like-minded seedstock producers from across the country who are working together to aid their customers in marketing their cattle and who are helping ensure that the consumer continues to be able to enjoy the best beef we can raise. In addition, Blake is also buying fat cattle for the new packing plant that was built in North Platte, NE and opened in May of 2025. So, please reach out to him when the time comes to market your LAR influenced feeder cattle.

Again, on behalf of our entire family, we say "thank you" for your interest in our program and your continued support. Always remember, it makes "Sense" to invest YOUR "Dollars" in LAR genetics. Hope to see you on Friday, February 20th at the sale. If you can't make it, we will be broadcasting it live on CCI.Live. Please call or email with any questions. God's blessings to you and yours in 2026.

**25TH ANNUAL**  
**“Dollars” & “Sense” Production Sale**

**Friday, February 20, 2026**

**12:30 PM CST at the Ranch**  
**10 miles S. & 3.5 W. of Gove, KS**

**Sale Offering Includes:**

**56 Yearling Angus Bulls • 24 Yearling Red Angus Bulls**  
**29 Yearling Angus Heifers • 7 Yearling Red Angus Heifers**

**AUCTIONEER:**

Jerry Lehmann  
Lake Ozark, MO  
573-999-4759

**SALE REPRESENTATIVES:**

Jeff Mafi, <i>American Angus Association</i>	816-344-4266
Stephen Russell, <i>Kansas Stockman</i>	785-458-2650
Guy Peverley, <i>The Stock Exchange</i>	785-456-4390
Jason Schneider, <i>Schneider Auction</i>	785-650-2433
Anne Lampe, <i>Kansas Angus News</i>	620-872-3915

This sale will be broadcast live on CCI.Live, so any buyer unable to attend the sale can participate by using CCI.Live Auction (see **instructions on top of page 4**) or by working through any of the above listed representatives. Videos of all sale animals can be viewed online by visiting [www.LundgrenAngusRanch.com](http://www.LundgrenAngusRanch.com) or [www.cci.live](http://www.cci.live).

**TERMS AND CONDITIONS:**

Terms of the sale are cash and settlement must be made at close of the sale. Cattle will sell under the suggested Terms and Conditions of the American Angus Association ([http://www.angus.org/Pub/suggested\\_sale\\_terms.pdf](http://www.angus.org/Pub/suggested_sale_terms.pdf)).

**SALE DAY UPDATES:**

A supplement sheet will be made available on sale day with updated information. All data on supplement sheet, as well as any announcements made sale day, will take precedence over information in this sale book.

Any and all potential carriers of genetic defects have been tested and results of their status will be available in this sale catalog, on supplement sheet or by announcement.

**SALE ORDER:**

Cattle sell in catalog order unless otherwise announced.

**HERD HEALTH:**

A complete herd health program has been developed by Dr. Curt Vogel, Heritage Veterinary Service of Utica, KS. The cowherd is vaccinated each fall at preg checking. The calves all receive two rounds of modified live vaccines while on the ranch, with the first administered in the spring along with Vision 7. The calves received pre-weaning shots and are boosted at weaning along with injectable Ivomec. All calves have been genomics tested. All bulls in the sale will have been semen checked and passed a fertility and soundness exam by Dr. Curt Vogel. Health certificates can be issued by Heritage Veterinary Services on any animal in the sale making them all eligible for interstate shipment. Dr. Jeremy VanBoening of Republican Valley Genetics works with us on the synchronization of all our donor cows and the collection and placement of all our embryos. He also assist us with the artificial insemination of the main cowherd. The cowherd is on a custom made mineral produced by Suther Feeds year around. In 2020, we began working with John Ney, Nutrition Solutions on our cowherd nutrition and ration formulations.

**GUARANTEE:**

Each animal becomes the risk of the buyer as soon as sold. LAR will guarantee all bulls selling for \$4,500 or more against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of said bull. Breeding injury is defined as injury to penis or preputial tear with inability to extend. This guarantee does NOT cover non breeding injuries resulting from accident or gross negligence. If a replacement bull is available, he will be provided or if the buyer prefers, credit toward one bull will be given in the following years sale, less salvage value of the injured bull, less \$10 per day the bull has been in use since first turnout. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. Guarantee ends 8/31/26.

#### **DELIVERY:**

Free delivery on 1) all purchases within 100 miles, 2) single purchases over \$4,000 or 2 or more bulls within 250 miles, 3) all bulls over \$7,000 within the continental United States. All deliveries will be made prior to April 1. Bring your trailer and receive a \$25 per head discount on all bulls taken home sale day.

#### **VIEWING OF SALE ANIMALS:**

All sale bulls are being developed within 2 miles of our sale headquarters, so viewing arrangements can be made at any time with advanced notice. The heifers are being developed at Jim Coberly's yard, which is about 10 miles from headquarters, so viewing arrangements can also be made to see females with advanced notice.

#### **YEARLING BULL DEVELOPMENT:**

The bulls were sent to Lincoln County Feed Yard, Stapleton, Nebraska where we collected individual feed intake and efficiency data. The bulls returned home in mid-December and have been developed since then until sale day on a roughage based ration allowing them to express their growth potential while maintaining long term soundness. The bulls have been handled on foot, on horseback, and with ATVs, so they should be able to adapt to your operation very easily.

#### **ANGUS GS GENOMICS TESTING:**

*Powered by Neogen GeneSeek* All of the animals in this year's sale offering have been genomics tested. The results are incorporated into the EPD calculations of each individual, which results in increased accuracies on these young animals with no offspring.

#### **SEmen INTEREST:**

LAR will be **Retaining 1/2 Revenue Sharing Semen Interest** in every bull sold in this year's sale. The buyer will receive the remaining interest in the bull, full possession

and full salvage value on the bull, unless otherwise referenced. LAR is reserving the right to collect semen on these bulls at the buyers convenience and the sellers expense for the purpose of in herd use or potential semen sales, which the buyer could also benefit from.

#### **LIVESTOCK INSURANCE:**

Mortality insurance can be obtained by contacting Jensen Livestock Agency, Shelia Jensen (785) 262-1116 who is an agent for American Livestock, Inc.

#### **LIABILITY:**

All persons attending the sale do so at their own risk. The owners, host and sales staff assume no liability, legal or otherwise, for injury, loss or damages of any kind.

#### **LUNCH:**

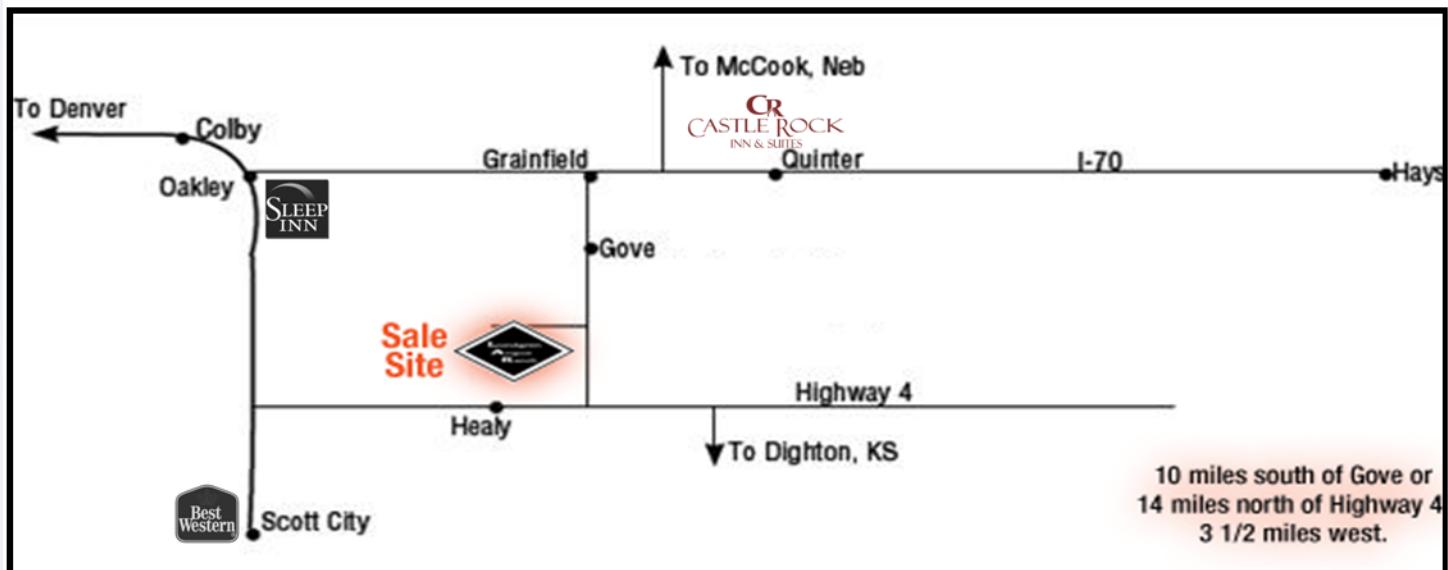

Complimentary lunch will be served starting at 11:00 AM. Coffee will be on early for those who want to come sort through the sale cattle on sale morning.

#### **LODGING:**

Castle Rock Inn & Suites - Quinter, KS

## Watch the Sale on CCI.live!

*The best, the fastest and most comprehensive marketing & bidding tool!*

### How to Bid Online...

- **As a buyer**, you DO NOT need to login to watch the sale but you must have a validated account to bid.

**To BID ONLINE** go to [www.CCI.live](http://www.CCI.live) in your Chrome, Firefox, Safari or other modern browser:

- 1) Click on the sale schedule page.
- 2) Click on the sale of interest.
- 3) Click on Bid Online- Register and then Get Buyer Number

- After you are logged in, you must proceed to the sale page for your auction and click Bid Online - Register, then **Get Buyer Number.** Some auctions require valid credit card number on file to obtain a buyer number to bid.

- CCI.live will operate with ease on a modern **cellular device, laptop, desktop or tablet.**

- A **current browser** is important and will always make your experience better.

- **For successful bidding you must have good Internet service!** It is very important to be stationary if bidding. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen, it is real time, and refresh your browser if you feel like you have some lag.

- **Support line open during all sales. TEXT 405-400-9505** - Please alert the ranch for your hauling preferences.

## THE BULLS IN THIS SALE OFFERING QUALIFY FOR SUPERIOR PROGRESSIVE GENETICS

Superior Progressive Genetics (SPG) is a value-added program by Superior Livestock Auction that helps market cattle with top-tier genetics. This program highlights qualifying lots by displaying the seedstock producer's logo on-screen during Superior Livestock Video Auctions. These lots are also labeled as SPG in Superior Livestock Auction's print and online sale catalogs.

By purchasing bulls from this offering, you can showcase your cattle's superior genetics and earn a proven value-added premium—at no extra cost—through Superior Livestock Auction.

For more information or to connect with a Superior representative in your area, call (800) 422-2117 or visit [www.SuperiorLivestock.com](http://www.SuperiorLivestock.com).

# We can help make sense of all the data AND...

**...maybe even help you be more profitable!**

WITH ALL THE TRAITS AND ALL THE DATA - WHAT IF YOU COULD SIMPLY LOOK AT ONE NUMBER AND GET AN ANSWER!!

In today's cattle business, it's easy for producers to get overwhelmed with the large volumes of data. But for the average commercial producer, there has to be an easier way - and we think we found it in \$Profit.

## How \$Profit™ Works:

The \$Profit model takes into account the effects of both income and expenses to help determine the ultimate value contribution an individual animal can make to an operation. The results are published in multiple indexes, including **\$Profit (overall profitability)**, **\$Ranch (cowherd efficiency)**, **F:G (feed to gain)** and **Fertility**, all of which are printed in this catalog. The model assumes the average commercial bull will sire 100 progeny in his lifetime. The model also assumes 30% of the heifers will be kept as replacements and the balance of the calf crop the producer will retain ownership on to harvest and market on a value based grid. Even though many producers sell calves at weaning, cattle with predictable post-weaning performance and carcass quality can see increased value even when being sold as calves. Because this is a multi-breed analysis, it allows for any two bulls to be made comparable to one another (unlike comparing same traits published by different breed associations). Here is how \$Profit differences can impact your bottom-line:

### Good Bull

\$10,000 \$Profit

Top 50% of Angus breed

### Better Bull

\$15,000 \$Profit

Top 25% of Angus breed

### Top Tier Bull

\$22,500 \$Profit

Top 5% of Angus breed

Top Tier Bull exceeds Good Bull by \$12,500 (\$125/head over 100 calves)

Top Tier Bull exceeds Better Bull by \$7,500 (\$75/head over 100 calves)

Better Bull exceeds Good Bull by \$5,000 (\$50/head over 100 calves)

Pictured to the left are the individual feed intake bunks where feed efficiency data is collected. This data is then computed through the \$Profit system and generates a **F:G index**. This index is reported in a range from -0.50 to +0.50, with negative being most efficient to positive being least efficient. This data will assist in managing the largest expense in the beef business - feed!

At Lundgren Angus Ranch, we want to be an asset to our customers and aide them in not only meeting their breeding goals, but to help provide the tools to do so in a profitable manner. We are committing our resources to collect information such as genomics data, performance data and individual feed intake and efficiency data - all because we believe this data will help assist in making good genetic selections for your herd. If we can assist in any way, please contact us.

**We believe this information can assist our customers in getting on the right path - the path to profitability!**

# ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

*Aim High*

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

*Minimum Genetic Requirements*

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit [CABcattle.com](http://CABcattle.com).

## RED ANGUS FCCP MARKETING PROGRAMS

The Red Angus Feeder Calf Certification Program is the first step in differentiating your cattle to buyers, feedlots and packers.

Experience industry-leading return on investment for just the cost of an ear tag  
— with no enrollment fees.

The Red Angus Association of America  
Marketing Team offers assistance to  
Red Angus bull customers at no charge.

### Feeder Calf Certification Program

- Traceability to at least 50% Red Angus genetics
- Source verified to ranch of origin
- Group age verified

*No enrollment fee.*

\$ 6 \$

*Our Mission is to develop a proprietary, genetic-driven supply chain and management system designed to fulfill demand for high-quality Angus beef.*

We believe that Great Customers, investing in **Great Genetics**, backed by **Proven Performance**, create **Production Power** — and our goal is to help you maximize your **Profit** opportunities.

RSAA is committed to **continuous improvement**, helping producers stay ahead of the curve through innovation, data, and collaboration. We are building a cattle **feeding partnership** that shares **50% of its profits on your cattle**—purchased directly from you through our RSAA member network.

Our **RSAA Members** are also working to develop a **comprehensive performance** database capturing the full story of your cattle—from **ranch**, **feedlot**, **health** and carcass data to **genetic and management** metrics. All collected data will be compiled into a report for you and your **RSAA seedstock supplier**, providing insights and guidance to help you make informed, profitable decisions.

Finally, RSAA is actively engaging with **targeted end** users to build relationships, share knowledge, and represent the values of the ranching community. We aim to be a **trusted source** for transparent communication—educating consumers about our **management practices**, **animal husbandry**, and **commitment to stewardship** that ensures success for the **ranch**, the **animals**, and the **people** who care for them.

# LUNDGREN ANGUS RANCH \$ YEARLING BULLS

*Lot 1*

We are excited to kick off our 25th anniversary sale with a tremendous prospect. Flagship is a new sire for us and boy has he lived up to the expectations we had for him and more. As the industry looks to rebuild the cowherd and breed more heifers, it is bulls like this that will be in high demand. The days of sacrificing performance to ensure calving ease are a thing of the past. This bull ranks in the top 2% of the breed for calving ease and yet still achieves top 20% of the breed for growth. Combine that with top 15% for marbling and you can see how he obtains a top 3.4% \$Profit index as an all-around genetic package.

*Lot 2*

This Bottomline son is an absolute stud and is the natural calf out of a new donor cow here at LAR. A full sister to this bull made our replacement pen last year, settled to AI breeding and appears to be off to a great start. There is no doubt that phenotypically this bull will get your attention, but as you study his data his genetic merit only increases his value. From 68 pounds at birth to nearly 700 lbs at weaning, this is bred in calving ease and growth that will work in anyone's herd. His FERT index of 2.38 is one of the highest in the entire offering. The combination of very strong maternal value as well as the growth and carcass traits, results in a \$Profit index over \$26,000 that places him in the top 2.6% of all Angus bulls in the database.

Gratitude is another new sire at LAR in 2026, but as a son of Tahoe we knew a little about what we were getting ourselves into. This bull is a true powerhouse. Not often do you find a bull with this much muscle and dimension that is safe to use on heifers, but this one will fit the bill. This cow continues to put bulls in the front end of our sale. We were blessed with a tremendous summer of moisture and plenty of grass, but it still takes strong growth and maternal genetics to achieve a weaning weight in the mid-700s in western Kansas. All indications are that the steers will be showstoppers at the auction and you will want to keep every female as a replacement.

Eisenhower – a true hero not only in the eyes of Kansans, but also in the eyes of people across the country and around the world. We believe this is the best bull we have raised at LAR and a name like Eisenhower seemed appropriate! When we first identified Yon Flagship as a potential sire to introduce into our program, I contacted his owner Paul Bennett of Knoll Crest Farms in Virginia. The endorsement from this well respected, top Angus breeder was the launch point that got us to where we are today. You will see a number of Flagship sons throughout this sale offering, including 3 full ET flush brothers to this bull, but none will compare as you study this bull in person and on paper. The third generation donor dam of this bull is our top donor and her influence on our herd long term will be immeasurable. In addition to the 3 full brothers to this bull, you will also find 4 additional ET sons of the 0538 cow out of the Bottomline bull starting with lot 5. Phenotypically this bull is impressive – he has tremendous depth of body and rib shape and when you get behind him you will be impressed with the dimension over his top. Even with this much muscle, he moves like a cat as well as being absolutely dog gentle as indicated by his top 1% DOC EPD. As you begin to evaluate this bull on paper, you have to start with the adjusted weaning weight over 800 lbs and a weaning ratio of 133, resulting in a top 5% WW EPD while still maintaining a double digit CED EPD. With a moderate Milk EPD, a FERT index of 2.05 and the known maternal history behind this bull, his daughters are sure to be top prospects for replacements in both commercial and registered breeding herds. This bull ranks in the top 3% of the Angus breed for Marbling as well as tabulating a \$Profit index over \$25,000 to also be in the top 3% of all Angus bulls in the database. We think the genetic breeding value this bull offers and the potential impact he could have on the Angus breed is significant.

\$11\$

# LUNDGREN ANGUS RANCH \$ YEARLING BULLS

The 0538 donor cow strikes again in this outstanding ET calf out of Bottomline. You will really appreciate the overall dimension and power this bull offers. This is a bull to turn out on the mature cows and wait for the genetic explosion to occur. Top growth and carcass traits propel this bull to a \$Profit index over \$24,000 and a ranking in the top 4.6% of all Angus bulls in the database. We are blessed with a tremendous cattle market and strong demand for high quality Angus beef – this is the type of bull that will produce feeder cattle that the market is seeking and placing the highest value on.

You want POWER and PERFORMANCE...then do we have a bull for you! This is the heaviest adjusted weaning weight bull in the entire herd at 836 lbs and achieved that from a mere 78 lbs at birth. Study the WW and YW EPDs on this bull and you will find he is off the charts in the top 1% of the entire Angus breed for growth. Sired by the infamous Tehama Tahoe, who has had such a positive influence in our cowherd, and out of a Basin Payweight 1682 daughter, it is no wonder why this bull was a crowd favorite at our Lunch & Learn field day held at the ranch in August of last year. With calf prices at these levels, pounds at marketing time are king. Think of the value his offspring will have come sale day.

Here is another outstanding Bottomline son. In addition to strong growth traits and a high FERT index, this bull also records a top 4% on efficiency after the feed intake data was evaluated. Out of one of our top Tahoe daughters, who also entered our donor program this past year, this bull provides exceptional genetic merit as well as a very strong phenotype. Double digit calving ease, 70 lb birth weight and a WR of 108 allows for lots of mating opportunities with this bull – bred to heifers or cows, you will like what comes to the weaning pen. A full brother to this bull sold for \$9,000 in last year's sale to a longtime customer of LAR.

This is the second Gratitude son to be offered today and he stays true to form with his half brother offered as lot 3. These Gratitude sons have tremendous depth of body and overall capacity which should translate into easy keeping, deep body and broody cows. On the easy keeping front, notice this bull ranks in the top 0.6% of all Angus bulls in the database on feed to gain (F:G) index. Here is a bull that will allow you to moderate your milk on your cowherd without sacrificing any growth potential on the calf crop. This bull was another favorite of those who attended the Lunch & Learn event.

This Gratitude son is a maternal brother to the lot 1 bull in our 2025 sale that brought \$8,500 and went to a top-notch commercial cowherd in Kansas. This bull is a strong candidate to be used for breeding heifers and the resulting heifer calves will be one's that you will want to strongly consider keeping and putting back into the cowherd. Double digit calving ease and negative BW EPD combined with a 107 WR and this bull excels at both ends of the spectrum.

*Lot 8*

*Lot 9*

*Lot 10*

# LUNDGREN ANGUS RANCH \$ YEARLING BULLS

*Lot 11*

This is another flush brother out of Flagship and the 0538 cow. Although the recipient dam can have some influence on the performance of the calf prior to weaning, the DNA does not lie. So when all the data is evaluated, this bull actually records the highest \$C value of all 4 of the flush brothers at 346. Take advantage of our embryo transfer work and see what utilizing full brothers can do in your operation. The last of these 4 flush brothers will sell as lot 35.

*Lot 12*

This bull is another result of our ET program and is a full brother to lot 5. Another standout son of the 0538 cow and Bottomline. We believe the Bottomline females are going to make great cows as we are calving out our first daughters, which would include some full sisters to the mating on this bull. Moderate birth, good growth and strong carcass data all contribute to another bull in the top 5% of all Angus bulls in the \$Profit database.

*Lot 13*

We still have a few Harley daughters in production here at LAR, and this Gratitude son is a reason why. The E&B Harley bull was our senior herd sire for a number of years and produced some outstanding bulls that went through this sale and many daughters that we retained as replacements. This mating worked as we expected – moderate birth, adequate growth and maternal value that should provide for really productive females for future years.

Bottomline will add depth of body and overall capacity to any calf crop. As you study this bull phenotypically, this is what you can expect to see from his progeny. We like the Bottomline sire on both the bull and female side of the equation.

One thing the Gratitude bull does as well as any bull in the Angus breed is on the front of efficiency. Feed costs will always be the largest expense item for the cattle industry. So, to be able to utilize genetics that will allow for more efficient use of our feed resources and still obtain desired growth and performance is a win-win situation. As you study the data, this Gratitude son does it as well as any with a F:G index of -0.37 which ranks him as an elite Angus bull in the entire database.

\$ 15 \$

# LUNDGREN ANGUS RANCH \$ YEARLING BULLS

We are kicking off the Red Angus division of our 25th anniversary sale with a true herd bull candidate. ALC Remedy is a new sire for us at LAR this year and we could not be more pleased with what we see out of this sire group. This calf we named RESOLVE as he quickly rose to the top when all his data was compiled. It is always exciting when the data lines up with the bulls you select phenotypically. As you evaluate his data set, you will find he tabulates the top 1% for HB and ProS indexes in Red Angus. This bull also registers a \$Profit over 28,000 which ranks him in the top 0.3% of all Red Angus bulls in the database. Overall breeding value is what we are striving for, and this bull is one that has accomplished it. This is a bull we intend to sample in our own herd.

What an opportunity you have starting here – this is the first of 7 flush brothers selling today out of the full sister to the LARR Paycheck 0728 bull that was purchased by Bieber Red Angus as our top selling bull in 2021. This was the standout of the bunch from early on. This bull exhibits tremendous length and depth of body. As you study his data on paper, it is hard to find a flaw. Recording multiple EPDs in the top 5% of the breed is impressive, especially when they are the traits that generate dollars on sale day.

This is the second of the 7 flush brothers out of Bieber Blue Chip and the full sister to LARR Paycheck. Another powerfully made son, when compared to his full brother in lot 18 comes with just a little more growth and marbling, including top 4% for WW, top 3% for YW and 1% of the breed for marbling. In a market where pounds and choice grading carcasses are in high demand and high value, consider this bull to help you achieve a big pay day.

If you are looking to generate dollars through the feedlot and packing plant, how about considering a bull that ranks in the top 1% in WW, YW and marbling! The mating of Blue Chip and the full sister to Paycheck generated some outstanding individuals. This is the third of the flush brothers, so you still have an opportunity to put together a group of full brothers and capitalize on this genetic masterpiece. Get ready, because the other 4 full brothers are coming right up as lots 23 thru 26!

## 2025 Lunch & Learn Field Day

We had a great turnout for our Lunch & Learn event held at the ranch on August 13, 2025.

Those who attended had a chance to view a portion of the LAR cowherd with top bull calf prospects at side. In addition, there were presentations on programs LAR is involved in and marketing opportunities available to customers using LAR genetics. It was a great day of idea sharing and networking. Thanks to all who attended and supported!

# DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

## DEDICATED TO DATA.

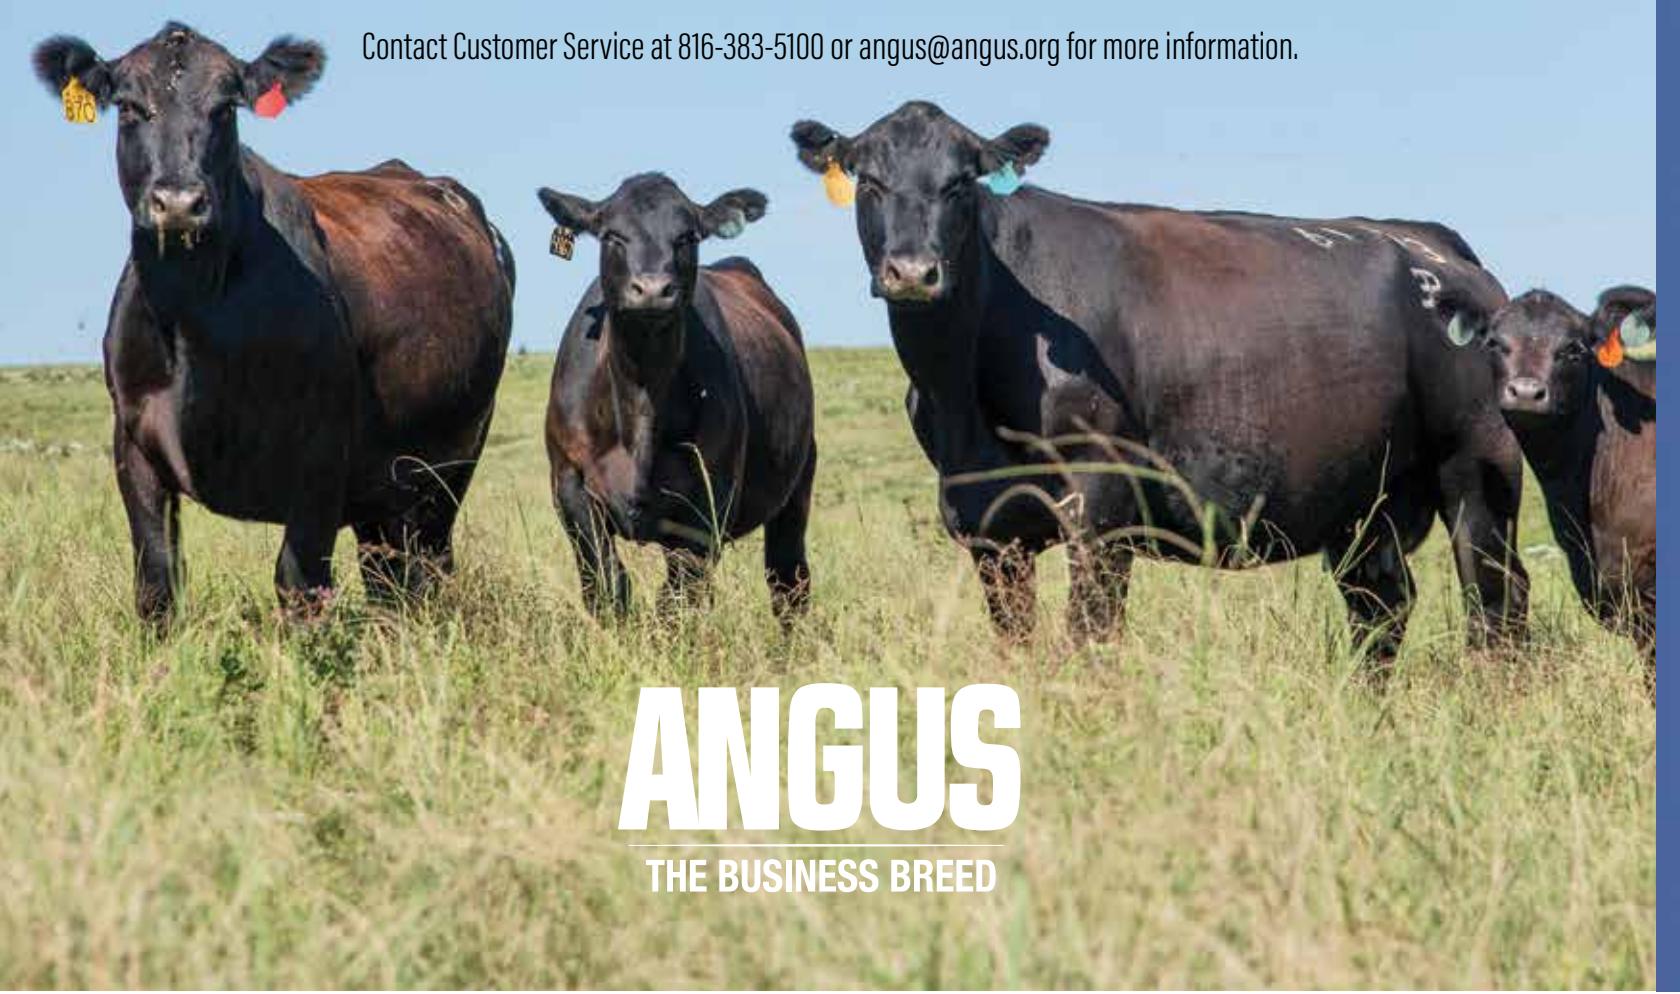

We devote extra time to collect maternal traits beyond those required to target greater performance and predictability. Our goal is to not only improve today's genetics, but also prepare for the future of the Angus breed.

## COMMITTED TO IMPROVEMENT.

Raising quality registered Angus cattle takes commitment and as your genetic supplier, we take that commitment seriously. That is why we believe a commitment to improvement starts with the female.

Commit to the female — commit to MaternalPlus®.

Contact Customer Service at 816-383-5100 or [angus@angus.org](mailto:angus@angus.org) for more information.

A large photograph of several Angus cattle in a green pasture under a clear blue sky. In the foreground, a dark brown cow with a yellow ear tag is looking towards the camera. Behind her, a large black bull with a blue ear tag is also looking forward. Other cattle are visible in the background, some with red ear tags. The grass is tall and green.

## AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

### PRODUCTION

**Calving Ease Direct (CED)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Dry Matter Intake (DMI)**, expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

**Yearling Height (YH)**, expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

### MANAGEMENT

**Claw Set (Claw)**, expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

**Foot Angle (Angle)**, expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

**Docility (DOC)**, expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

**Pulmonary Arterial Pressure EPD (PAP)**, expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

**Hair Shed EPD (HS)**, expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

### MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

### CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

### VALUE INDEXES

**Value Indexes**, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (SM)**, expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (SW)**, expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

**Energy Value (SEN)**, expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

**Feedlot Value (SF)**, expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

**Grid Value (SG)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (SB)**, expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

**Combined Value (SC)**, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (SM) and Beef Value (SB) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cul offifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

## RED ANGUS GUIDE TO EPDS

[RedAngus.org](http://RedAngus.org)

**ProS.....** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB.....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED.....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW.....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW.....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW.....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG.....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI.....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK.....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME.....** Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG.....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM.....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY.....** Stayability predicts differences in the ability of an animal's retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG.....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW.....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA.....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT.....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
