# Welcome!

On behalf of everyone here at CK Cattle and Wager Cattle, I'd like to personally invite you and yours to our 9th Annual Production Sale.

2025 will forever go down as one of the most memorable years around our places and I'd imagine around yours as well. The most obvious of highlights for 2025 has been the record-breaking prices and profits seen by the American Cattleman. The common question with producers is "How long will this last?" Fundamentally, it looks as if we have legs for a bit. Demand is still as high as it has ever been and we are the only animal protein that has a quality standard for our consumers. That's what sets us apart. Another question has been, "Will the consumer continue to buy our product at a high level?" I'm going to steel an analogy by Charles Mogck last spring at his sale, "As long as consumers continue to buy \$8 coffee, we should be OK." I haven't heard it put any better than that. All I can say is that looking at the fundamentals of the business, the cow/calf producer holds the hammer.

Another highlight of 2025 was the acquisition of the R&R Cattle Company herd. This is something that has us as excited as anything we've done. You will notice the bull calves from their operation within the book and they fit right in.

With the highs, 2025 was one of monumental losses for our family. We lost some very close friends, but they were more than friends... they were family! There isn't a day that goes by that I don't have some sort of thought about them. They are sorely missed, but more important, we think of their families. Life moves on, and it's definitely different without them.

Our philosophy has not changed with our program. We are trying to build cattle for the commercial cattleman. As always, they must breed, raise a calf, have a good udder, good feet, and do all this with minimal inputs. We refuse to trim feet, strip udders or propagate open cows.

We are very proud of this set of cattle. We continually work at bringing the best cattle to you that we believe will add profit to your programs. There is a high percentage of homo black bulls and solid black individuals. The bulls will be genomic enhanced on their EPD profiles. The scan data, adjusted yearling weights, and scrotal measurements will be on a supplement sheet. Bulls will be semen tested and given foot rot, pinkeye and breeding shots prior to delivery around April 15, 2026. We will offer free delivery on the bulls within South Dakota and the surrounding states. Delivery on the heifers will be the buyer's responsibility. The bred heifers will be re-pregged and have shots up to date.

Once again, we will have Prime Rib and refreshments during and after the sale. Feel free to call or stop by anytime. The coffee is always hot and the beer cold. Thank you for your continued support, and welcome to our new customers!

We appreciate your support and look forward to working with you. We hope to see you Saturday, February 14, 2026, at 2 PM!

Sincerely,

*Chris Effling*

In today's progressive marketplace, each participant needs to take full advantage of any opportunity to gain an edge on the competition. Marketing live cattle is an art and a process, regardless of market type, and so experience plays a major role, just as it does in anything else in life. Chris Effling has been a master at developing and strengthening relationships he has built over the past three decades in the beef industry. He has always made himself available to the beef public through association, media employment, or work as a seedstock supplier. Over the past four to five years, he has become very aggressive in the commercial sector, making feeder cattle placements, filling heifer replacement orders, or simply putting loads of cows together to assist loyal customers and the friends of those loyal customers, strengthening the bond with a bit more torque with each transaction.

Marketing is a relationship business, and the loyalty built through those relationships can lead to a generational bond that keeps both entities striving to do and be better year after year. Chris is always on the hunt for the next genetic contributor or contributors from a bull-power standpoint. If the ideal female comes within reach of his path, that's sure to be an acquisition as well, but his experience tells him that diversity in number and consistency in kind spread through the program faster when the right bull power is acquired. The bull battery and the history of the herd sire arsenal at CK and Wager are nothing short of impressive and historic. The pedigree ledgers between the pages of this catalog tell the story and shed light on how this impactful program started years ago.

The firm's latest acquisition would be the purchase of the entire working cow herd and donor arsenal of the famed R&R Cattle Company of Chamberlain, SD. Chris and Steve have always maintained a mutual relationship of respect and trust, so when Steve decided to hang up his spurs, the phone call was made. Several months later, the agreement was reached, and the transaction finalized. This set of cattle will feature the 2025 calf crop from the Reimer operation and will offer a bit more purchasing flexibility for those devout, long-time CK and Wager customers from a genetic standpoint without sacrificing the performance and maternal longevity that the current customer base is so familiar with.

CK Cattle hosted their initial commercial bred heifer and young cow sale at Mitchell Livestock Auction. Most of the females carried the direct influence of CK and Wager sires with the AI service of in-house sires like Woodhill Abraham F838-K680. The product was very well received the second Monday of December as the entire set of 600 plus head averaged nearly \$4,300 per head. This is just another example of how Chris and his family aim to help you and your family when you become a loyal bull customer.

We invite you to join us for the 9th Annual CK Cattle & Wager Cattle Production Sale in Highmore, SD on Saturday, February 14, 2026. The cattle will be on display for your appraisal, and the hospitality will be first class! We encourage you to bring your entire family, as dinner will be served following the sale. If you have any questions about the offering, please feel free to reach out to any member of the Innovation AgMarketing team, we would love to visit with you about the cattle. We will see you all on Valentine's Day in Highmore!

Enjoy the cattle,

*Jered Shipman, Graham Blagg, Tim Anderson*

## TERMS

Terms of sale are cash or check payable immediately upon conclusion of the sale and before animals will be removed.

## NUTRITION

Jordan Holt: 605.380.1209

## HEALTH & WINTERING

Bulls can stay until mid-April when they will have a breeding soundness exam, along with leptospirosis, pinkeye, and hoof rot vaccine. Bred females will need to leave as soon as possible after the sale due to close proximity of calving. Any female left and calved at CK/ Wager facilities will not be guaranteed a live calf.  
Prairie View Vet Clinic: 605.695.4086

## RISK

Each animal becomes the risk of the purchaser as soon as sold. Animals purchased are at the purchaser's risk as to loss or injury, and will be loaded according to purchaser's direction. Insurance will be available sale day.

## ANNOUNCEMENTS

Announcements made sale day and from the auction block during the sale take precedence over printed material in the catalog or other printed material associated with this sale. Anyone attending this sale, attends at their own risk. Breeders or any of the sale force will not be held responsible for any injury while attending this sale.

## LIABILITY

Neither owners nor sale management assume any liability for any accidents that may occur to the animal after it is sold. All persons who attend the sale do so at their own risk and owners or sale personnel assume no liability for accidents.

## INSURANCE

Insurance will be available sale day. We suggest a mortality policy, especially if you plan to leave your bull(s) to be wintered until mid-April. We will pay 1/2 of the insurance premium on bulls if you wish to purchase a policy. Please visit with Ray Trudeau at the clerking desk if you have interest in insuring your purchase.  
Ray Trudeau – Martin-Trudeau Insurance 605.770.5170.

## ADDITIONAL INFORMATION

Ultrasound data, yearling weights, gain test results, scrotal circumference measurements and Homo Black/Homo Polled testing results will be available sale day. Many of the donor dams to the cattle selling will be available for viewing sale day.

## AD & CATALOG PRODUCTION

## ONLINE BIDDING

We will offer online bidding at BOTH DVAuction.com and CCI.live this year. Visit the websites to register and bid.

## CK AND WAGER SIRED CALVES TOP THE MARKET!

*"We have been purchasing Simmental and SimAngus bulls from CK Cattle and Wager Cattle to capitalize on the added heterosis that SimGenetics can bring to the table. The improved carcass data, real world performance, and ability to consistently grade is what these bulls have contributed to our operation. The Simmental influenced cattle not only perform in the feedlot, but the female contemporaries offer a strong maternal foundation that will benefit the cowherd for years to come. We have been very impressed with the ability that these bulls have to cover large country and maintain flesh during breeding season."*

*-Darren Ridley*

# THE BULLS

## BULL GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to pick up/delivery. In addition to the standard Terms and Conditions of the American Simmental Association, we will provide the first breeding season (the 90-day period immediately following turn out) guarantee on all yearling and older bulls. This guarantee is not an insurance or mortality policy, but a guarantee on functional fertility. It is not a substitute or replacement for poor management. Buyer assumes all risks for injury due to running bulls together or management decisions outside genetic control. For the guarantee to apply, we ask that you contact us as soon as a condition is observed and before the animal is sold. We will work with you to determine whether the animal is returned or sold for slaughter. We will attempt to provide a suitable replacement. If one cannot be provided of equal or greater value, we will issue a sale credit to be used in a future sale for the full purchase price less the salvage value of the animal.

## BULL BUYER VOLUME DISCOUNTS

3% off total purchase price of 3 Bulls

4% off total purchase price of 4 Bulls

5% off total purchase price of 5-9 Bulls

10% off your total purchase price of 10+ Bulls

## DELIVERY

Free delivery within 300 miles on all bulls and we will assist in finding delivery options to other parts of the country!

## EMBRYO TRANSFER PROGENY

Bulls without a WW Ratio are the result of embryo transfer. Their respective breed associations do not recognize them as having a contemporary group so they do not have a WW Ratio.

## SEMEN INTEREST

Seller retains 1/3 semen interest in all bulls selling unless otherwise noted or announced from the auction block.

## DATA

Each pedigree includes an Actual Birth Weight and all bull pedigrees include an Adjusted Weaning Weight and Ratios for Birth and Weaning.

# Thank You...

The acquisition of the R&R Cattle Company herd is something we are very excited about. Steve and Elaine wrote the book when it comes to people of honor, integrity, trust and downright good stockmen. Steve is one of the people I would call frequently over the years for advice and direction. This is a once in a lifetime opportunity on a set of cattle like this. This herd is a lifetime of work that had heavy and strict culling pressures put on them. Kristi asked one night how we were so lucky to be given this opportunity and my response was "I have no idea!" It's definitely an honor to have this chance to work with this set of cows and people. We would like to extend a huge THANK YOU to Steve and Elaine Reimer for believing in and trusting us with their legacy.

# THE PATRIOT SIRE GROUP

## LOT 1 - CKCC MR PATRIOT 5671N

- The WAGR Patriot 1008J sire group continues to rise year after year. ECC CKCC Roosevelt 4903M was the 2025 high selling sale feature that was selected by Windy Creek Cattle Company to the tune of \$100,000. We feel like there are multiple paternal brothers that could come very close to rivaling 4903M within the lineup for 2026.
- There is no better way to initiate this year's offering than a son of "Patriot" from a dam that was bred in the program of our late, great friend, Troy Thomas. There is no concluded value to TR's mentorship and friendship, but his legacy will live on through this program and many others.
- The famed "Katinka" cow family is unrivaled for udder quality, longevity, and overall build. Their innate ability to produce cattle like this son of 1008J consistently, year after year is unmatched.
- We certainly admire this stud on the hoof as he offers a balanced look with suitable power, but it was his value on paper and recorded data that pushed him across the goal line. His commercial value is that he comes with the credentials to sire cattle that should feed, convert, and perform with the absolute best of them, while his seed stock value is just as significant, if not more.
- He ranks in the top 3% for CW, the top 5% for REA, the top 10% for WW, the top 15% for YW and TI, and the top 25% for Marb and ADG.

- A purebred specimen with added performance and muscle shape from end to end. His rib design is deep and bold, flank soft, and forerib bold. He's very genuine from the surface up and sets to down with a significant amount of foot and durability that will play into his overall longevity as a herd sire.
- He impressed the masses at the weaning pen as he adjusted to 825 pounds of payweight to ratio 120.
- His genomic data places him among the top 3% of the business for WW, with an EPD value of over 101.8. He also ranks among the top 10% for YW, the top 15% for MWW, and the top 20% for ADG and TI.

- This stud has a maternal sister in the bred heifer lineup that should grab the attention of many. The cattle from the productive running dam are true for density and center body shape with plenty of muscle and substance of skeleton.
- We appreciate the overall mass and circumference of surface area this herd sire prospect brings to the equation. He mashed the scales down at weaning time to ratio 106 as the number one individual of his contemporary group.
- He is very suitable on his genomic data as he ranks among the top 10% for WW, YG, and REA, the top 15% for YW, the top 25% for ADG and MWW, and within the top third for \$GN, DOC, and TI.

- For those who might be new to the program or the breed, as you browse this book, one should note the positive impact that the sire referred to as Profit has had on the industry. Sure, his sons were laced with performance and end product yield, but his daughters and granddaughters are phenomenal in production. The genetics are worthy of introduction to any operation, seedstock or commercial.
- This three-quarter blood stud ratioed 104 at weaning and posts expected data markers that will put your next calf crop in the profit column. He ranks in the top 15% for REA, the top 20% for YG, and the top 25% for WW.

- It is with great pleasure that we introduce one of the greatest breeding achievements in the history of the CK Cattle and Wager Cattle breeding programs! CKCC MR Patriot 5662N is a dynamic son of the impressive WAGR Patriot 1008J that is further supported by the strong and everlasting influence on the maternal side of his pedigree by the iconic WAGR Driver 706T. 5662N is a homozygous black and polled stud that checks all the boxes from a phenotype and genotype standpoint.
- Offering a bit of a different twist on the maternal side of the genetic ledger with the presence of the sire by Ruby's Turnpike 771E, WBF Significant B132.
- This prospect is long sided with a pinch more frame that assisted his weaning ratio of 102. His expected data places him in the upper 10% for CW, the top 15% for REA and DOC, and the top 20% for WW.
- 5662N is as a burly made, wide based, square built, and genuine as any herd sire prospect in the offering. He is a true beef bull that embodies the fundamental principals in which the CK Cattle and Wager Cattle breeding programs were established. In our mind 5662N has the credentials to move any progressive breeding establishment into the future!

## THE PATRIOT SIRE GROUP

**LOT 9 - TDSC CKCC MR PATRIOT 531N ET**

**LOT 10 - TDSC CKCC MR PATRIOT 537N ET**

- This son of 1008J is a maternal brother to the senior herd sire for Roller Ranch of Hewitt, MN known as CKCC Backcountry 1623J.
- The Profit sired dam is relentless when it comes to shelling out the quality stock year after year that are the right kind and mold to make the annual marketing event for CK and Wager.
- This stud packs on the weight and power while offering advantages for carcass merit within the upper third. Those grid premiums have never been more significant in terms of generating the extra dollars per head than now and into the future.

**TDSC CKCC MR EPIC 329L ET**  
Maternal Brother to Lots 9 & 10

**TDSC CKCC MR EPIC 328L ET**  
Maternal Brother to Lots 9 & 10

- Here is the second of a pair of flush mate brothers by the Wagonhammer senior SimGenetic herd sire from the very productive and dollar generating TENA Gracie 912G.
- Not much splits the brother duo, but this one does have a slight performance advantage regarding his growth, as he charts in the top 25% for WW, with carcass advantages in the upper end of the business.
- CKCC Backcountry 1623J continues to blaze a trail for the Roller family. His male progeny are consistently performance features for the operation, and his first daughters will enter production this spring. Invest in the proven goods and the cows that bring them every year.

- Here is a herd sire prospect from a full sister to the proven sire and past sale feature, CKCC Lincoln 0631H. Most who follow the program know of the direct and positive impact 0631H has had on the program and on those who have invested in his progeny.
- Besides quality and proof by pedigree, this prospect offers so many advantages to any operation. Not only will his male progeny set the bar, but the daughters that you could retain from his service should be quite valuable. Both sides of his genetic equation are laced with some of the most proven and popular donor dams throughout the entire Simmental breed.
- After his DNA was submitted, his EPD profile allows him to rank in the top 10% for REA, the top 15% for TI, the top 20% for API, CE, BW, MCE, and Marb with growth and CW figures that place him well within the upper third of the business. Invest with confidence, east or west of the river, he will contribute!

LOT 12 - CKCC MR PATRIOT 5675N

- A traditional SimAngus stud laced with maternal greatness through the TR prefix with the famed and proven "Katinka" cow family on board!
- "Patriot" consistently contributes the extra ump and substance of skeleton when introduced to any Angus lineage. We admire the sire for the amount of side and flank that his reputation indicates as well.
- At weaning, he adjusted to 769 pounds with a ratio of 105, and genomics puts this stud in the top 10% for WW, the top 15% YW and CW, the top 25% for TI, ADG, and the top 30% for \$GN.
- His contribution to any operation should be laced with loads of profit and retention potential.

72.1	12.4	13.5	49.2	-0.57	0.3	-0.102	1.5	135.4	95.8		

- This purebred son of WAGR Patriot 1008J will flat out impress on video and especially for those who make the trip in person. His extended skeleton and sheer shape should draw attention to those that need to inject some red meat into their beef business.
- One of the more moderate birth weight sons of 1008J with a weaning ratio of 104.
- His expected data is awfully impressive as he ranks in the top 1% for REA, the top 3% for WW and YG, the top 5% for YW, the top 10% for CW, the top 15% for TI, and the top 20% for ADG with Marb and DOC figures in the upper 30% as well.
- Well rounded, well suited, and certainly well done!

# THE PATRIOT SIRE GROUP

LOT 14 - CKCC MR PATRIOT 5606N

- There's a maternal sister by FRKG CKCC Platinum 009H in the bred female division of this sale offering. Both represent a cow bred in the Thomas Ranch program that was intended to be the hard working, big calf raisin matron that she is today.
- This is one of the lowest birth weight sire prospects of 1008J and his EPDs indicate that he is potentially safe for use on a set of heifers as he charts in the top 5% for CE with over 16 with a BW number that places him in the top third.
- We would expect his progeny to be ideal for retained ownership through the end product phase as he reads with the ability to perform, convert efficiently, and hang with them in the cooler. He is in the top 4% for REA, the top 10% \$GN, the top 15% for STAY and DMI, the top 20% for YG, and the top 25% for API with growth drivers and a terminal index in the upper 40% of the business.

- Everything that's good beef cattle in South Dakota is within the genetic ledger of this standout specimen!
- A son of the \$100,000 curve bender, Bridle Bit Recharge K256, from a direct daughter of WAGR Patriot 1008J with further maternal influences like WAGR Panorama 204Z and TR Ms Katinka 3208N!
- This performance bound creature crossed the scales at weaning time to adjust to 804 pounds of payweight, ranking second among his contemporaries to ratio 110!
- The genomically enhanced profit drivers to his record land him in the top 1% for CW, the top 2% for WW and REA, the top 3% for YW and MWW, the top 4% for TI, top 20% for Marb, the top 25% for Milk and Doc, and the top 30% for API.
- A truly incredible beef bull, both on the hoof and on paper. He represents the future of our breeding program and will see heavy service here!

69.1	11.9	16.1	49.6	-0.24	0.73	-0.03	1.04	162.1	100.8		

- As we engage the presence of the \$100,000 Bridle Bit Recharge K256 sire group, the quality continues through a deep set of these direct sons from some of the very best females of the program.
- This one's dam is of serious note as she is a rising star in the donor lineup. Her maternal lineup is potent and proven for generations as it comes with a double dose of the timeless MR NLC Upgrade U8676.
- This prospect is balanced for a low birth weight blend with performance, carcass, and industry leading profit indexes that are essential for successful beef production experiences.
- He ranks in the top 3% for Marb, the better 5% for TI, the top 10% for BW, Doc, and CW, the top 15% for API and MCE, and the top 25% for REA, MWW, and Milk.

## THE RECHARGE SIRE GROUP

**LOT 25 - WAGR MR RECHARGE 5046N ET**

- This herd sire prospect ranks in the top 15% Milk and CW, the top 20% for \$GN, the top 25% for BW, and maintains a TI value along with multiple other important economic drivers in the top third of the breed.
- This is the kind that should sire a set of daughters worthy of retention when one factors in the strong presence of his donor dam. However, his male progeny should be premium bound regardless of your program's marketing strategies.

**LOT 26 - WAGR MR RECHARGE 5058N ET**

- A full brother to Lot 25 in the lineup from the "599" Angus donor dam! It's simple cowboy logic to keep full brothers together because of the significant advantages in program uniformity down the production line. The strategy opens many doors for those programs that stay hitched to the idea.
- Genomics may have put this brother closer to the top of the heap as he charts in the top 4% for \$GN, the top 15% for Milk and CW, top 20% for ADG, and the top 25% for YW, MWW, Marb, and TI, with a top third driver for WW.
- This may be the one that ties it all together when maturity takes hold!

## THE RECHARGE SIRE GROUP

**LOT 30 - TDSC CKCC MR RECHARGE 540N ET**

- TENA Gracie 912G is a very potent donor dam that is no stranger to quality. She is the dam of the Roller Ranch herd sire CKCC Backcountry and the mother of lots 9 and 10 in the WAGR Patriot 1008J sire group.
- This stud is easy to find in a competitive pen of seedstock. He is a long sided, smooth patterned stud with extra punch to his hip and back, while tying high and proud from his blade with a discerning herd sire presence.
- He ranks in the top 25% for CW, Marb, and REA, the top third for BW and Doc, while keeping all three index values and multiple other traits in the upper half of the breed.

**TDSC CKCC MR EPIC 329L ET**  
Maternal Brother to Lots 30 & 31

**LOT 31 - TDSC CKCC MR RECHARGE 534N ET**

- The 912G donor dam lit the weaning pen up with quality in numbers this year! Expect the same year after year while she remains in production. She is one of the many told stories of the Profit daughters in production.
- 534N's DNA suggests he is the calving ease option among the brothers by the K256 sire. He ranks in the top 20% for CE and the top 25% for BW and Marb. There has never been a time when every live calf born is worth more than they are today, and when those live calves have the significant potential to be premium bound on the rail, why wouldn't this bull be on your acquisition short list?

**TDSC CKCC MR EPIC 328L ET**

- There is no secret about the production value and the industry impact that Deer Valley Growth Fund has had on the beef business. He has proved to be a sire of performance and genomic front runners while his daughters impress those who employ them as well, regardless of industry affiliation. The cattle do a lot of things right for the business.
- Both Deer Valley Growth Fund and Basin Excitement lend a hand to the EC Rebel 156F influence that laid the foundation for this son of "Recharge". His two-year-old dam solidified her place in the CK program with tenure as he came across the scale to adjust with nearly 780 pounds of adjusted weaning weight.
- This prospect comes with heifer safe credentials with explosive growth equating to end product yield. He ranks in the top 2% for CW, the top 10% for ADG, MCE, Milk, MWW and TI, the top 15% for CE, BW, YW, and Marb, the top 20% for API, and the top 25% for WW.

- This son of Bridle Bit Recharge K256 reads and offers a little more punch from a true performance aspect and sacrifices some calving merit on paper, but he will impress the "true ranching republic" with his significant presence of power and mass.
- His dam is a very impressive, productive female with the substance and capacity that most cattlemen envy.
- 5100N charts in the top 15% for WW, YW, MWW, and CW, the top 20% for TI, and the top 25% for Marb with index values for \$GN and API in the upper third! Quite impressive for those who sell at any given time in the marketplace.

- This creature should get your adrenaline engaged if you love beef production! He's a load that is incredible in his skeleton, flexibly hinged, huge in his rib cage, deep in his underline from heart to flank, level and wide pinned, big in his upper rib, and masculine about his front third.
- He represents the kind, volume, and capacity that is trademark to his sire and typical to the influence of his maternal grandsire as well. His kind is desired, and his quality is readily noticed.
- We appreciate his performance drivers with a moderate birth weight and ranks number one in his contemporary group for weaning with 821 pounds to ratio 113. Cowboy logic says you should own this one!

## THE RIGHT TIME SIRE GROUP

**LOT 46 - CKCC MR RIGHT TIME 5802N**

- Cattlemen should step up and take note on this set of sons by ES Right Time FA110-4! We think they are as good as we have ever assembled for your appraisal.
- This purebred mashed the scales down at weaning with an impressive 827 pounds!
- His impressive, expected data allows him to rank in the top 4% for \$GN, WW, and YW, the top 5% for CW and DOC, the top 10% for WW, the top 15% for MWW and TI, the top 20% for Marb, and the top 25% for REA.
- A maternal brother by Musgrave Jumbo, CKCC MR Jumbo 4612M, commanded a \$9,000 hammer price further proving the investment and quality status of this son of FA110-4.

**LOT 47 - CKCC MR RIGHT TIME 5840N**

- The scale pounding doesn't cease as we introduce another ES Right Time FA110-4 son that weighed in with over 800 pounds of adjusted weaning weight to ratio 110.
- The rugged design, length, and weight per day of age of this powerful herd sire prospect will not go unnoticed!
- He is from a very wet and productive daughter of DL Sonic 2086 that plays a major role in his data across the scale and on paper.
- This prospect ranks among the top 10% for WW, YW, ADG, and \$GN, the top 15% for TI, the top 20% for API and MWW, and the top 25% for DOC

- For those that are in search of a herd bull that could be used on cows and heifers alike, with the influence of FA110-4 on board, here's another for that short list.
- He is from a daughter of the past National Western Stock Show Grand Champion Percentage Bull, CKCC Edge 7692E, with the industry influence of Hook's Yellowstone 97Y.
- This individual boasts a calving ease numeric profile with profit drivers that are indicative of the premiums that should be attached to his cattle at any phase of marketing. He is a top 4% for \$GN, the top 10% for CE, the top third for important traits like WW, ADG, MCE, Marb, and both API and TI.

## THE RIGHT TIME SIRE GROUP

LOT 53 - ADSC CKCC RIGHT TIME N92

- This rugged, dense, stout featured stud should get some cowboys' attention on video and in person. So much surface area is consumed by this outstanding son of ES Right Time FA110-4!
- We admire his measured performance that was assisted by a powerfully constructed, wide built, heavy structured dam.
- This stud ranks in the top 10% for Marb, the top 15% for \$GN, the top 25% for API, TI, and CW, and the top 35% for YW, MCE, and YG.

**OUTLAW**  
Maternal Grandsire of Lot 53

LOT 54 - ADSC CKCC RIGHT TIME N82

- As we conclude the FA110-4 sire group, we may have saved the best looking, smoothest individual to close.
- He is from a royally bred female for phenotype with the impactful influence of MR HOC Broker and the legendary WAG Hairietta 9145J. This genetic combination would be responsible for some of the highest dollar generating stock in the SimGenetic business. They are noted for their unique advantages for look and presence with a significant amount of bone and hair quality.
- Please notice that he does rank in the upper 15% for CW, the top 20% for \$GN, the top 25% for ADG, with growth drivers in the top half of the business.

## THE RELEVANT SIRE GROUP

**LOT 55 - WAGR MR RELEVANT 5047N**

- This lead off son of the past sale feature, CKCC Relevant 0639H, is worthy of rancher consideration. He is a powerful individual that's chucked full of end product yield and maternal merit.
- His dam couldn't be more ideal in her pedigree blend. It's one of a complimentary nature with a double shot of muscle shape, proven production, and superb udder quality.
- He's a leader for several traits and an index that absolutely matters in terms of insuring maximized performance and profitability. He charts in the top 15% for \$GN and ranks in the top 20% for WW, YW, CW, and REA, the top 25% for MWW, the top 30% for ADG.

- A three-quarter maternal brother to this prospect sired by ES Right Time FA110-4 commanded a \$10,000 gavel price in the 2025 CK and Wager Production Sale.
- His dam did it again on this burly son of the Windy Creek senior herd sire. This stud is laced with as much industry power as any in the lineup and we are certain he will land on many of the "must own" sale day lists.
- He powered across the scales at weaning closing in on nearly 800 pounds. His expected performance ledger places him in the top 5% for MCE and the top 25% for CE. The balance of his economic drivers and index values falls within the margin of acceptance for most interested operations.

68.6	8.2	14.1	56.4	-0.21	0.39	-0.046	0.9	117.8	88.7		

- We fully expected his genomic data to come back a bit better for calving ease as he entered the world at 79 pounds to ratio a 93, but his adjusted weaning weight may push him out of contention. Who really knows at the end of the day, as everything still falls in line for those progressive minded outfits that actually manage their investment.
- His dam is one of the impressive, young females sired by EC Rebel 156F within the program. We feel that the impactful influence of the Angus patriarch, S AV Bismarck 5682 plays a major role as well.
- A powerful maternal sister, CKCC Ms Patriot 3612L, was the \$35,000 selection of the Parker firm of Idaho a year ago.
- His growth and CW drivers rank in the top 10% of the breed, he too charts in the top 15% for ADG and REA. We expect his cattle to be substantial in end product yield with the weight to achieve the very most dollars at their preferred end point.

- The "Relevant" sire group doesn't slack off anywhere in this set of cattle nor have they in Spencer, SD on an annual basis!
- 5029N comes with as much heifer safe potential as his sire group contemporaries as he recorded a very modest 74 pounds at birth and ranks numerically in the top 20% for CE and the better end of the top half for BW as well.
- He ranks in the top 20% for WW with traits like YW, MCE, and TI in the better third of the breed.

- The daughters of the CK Cattle and Chestnut Angus owned stud, R5 Solution E111, have proved their worth over the years. Udder quality, teat size, teat spacing, and attachments are textbook with milk volume that leads to impressive weaning data for those that are born to them.
- This stud records two doses of the senior herd sire, ES Right Time FA110-4, only solidifying the value of the daughters you will retain or market for replacements.
- Solid performance with enhanced maternal and carcass on board.

- The CK Cattle and Wager Cattle programs had strong interest in KCC1 Countertime 872H when he sold. The firms sampled the bull early and retained a powerful set of daughters, one of which was responsible for producing last year's \$100,000 high seller, ECC CKCC Roosevelt 4903M.
- This offering of 872H sons isn't large in numbers but they are rich in quality and industry merit.
- 8669G, the dam of Lot 60, is a direct daughter of the \$400,000 Profit from a very maternally driven daughter of JMB Traction 292 that allows her to double down on her ability to consistently wean cattle like this talented prospect.
- Moderate at birth, explosive to the weaning pen, this stud charts in the top 15% for CW, the top 20% for WW, YW, and REA, and the top 25% for ADG.

67.4	17.3	11.5	42.8	-0.18	0.28	-0.04	0.68	126.8	80.9		

- One of the very best things about ES Right Time FA110-4 is the age and experience of his pedigree. His dam was certainly not among the most recent genetic blends at the Eichacker ranch, but she was one of the very best cows on the place, fundamentally. His sire was born in 2007 and left a ton of good daughters around the country with the highest population in the southeastern tier of the U.S. His pedigree was proven long before Steve made the mating, and that's what makes the bull so appealing from a breeder standpoint.
- Leachman Right Time has been a mainstay for years as he impacts the Angus breed in a bigger way than he is credited for. Again, he has daughters that are proven for milk production and pounds of calf weaned, with substantial longevity.
- The pedigree ledger of this CKCC MR Dutton 1606J son is laced with both sire and cow power that are substantial. We do expect his daughters to be in high demand for retention or to be marketed as replacements for a price point equal to their feeding value!

## THE DUTTON SIRE GROUP

**LOT 66 - CKCC MR DUTTON 5809N**

- A bull with rancher credentials for use on cows that could use a little more punch of shape and performance. His dam is a huge asset to the cause as she is draped and proven with maternal prowess and productivity with three great pedigree influences that have been discussed time and again throughout this entire sale book.
- Another son of "Dutton" that comes dense and wide with genuine shape and mass.
- He's entrenched in everything that CK is disciplined in with the look to carry his cattle over the finish line. 5809N ranks in the top 20% for marbling, the top 25% for WW and MWW, the top 30% for TI, and the top 35% for YW and Milk. Ideal balance physically and genomically.

**CKCC MS RIGHT TIME 2793K**

*Dam of Lot 66*

**LOT 67 - CKCC MR DUTTON 5765N**

- A big centered, burly built son of 1606J with a tremendous maternal influence with the power of both Musgrave 316 Stunner and Jindra Acclaim.
- He's one of the very good, standout SimAngus bulls of the offering as he lines it up on his scale credentials with a moderate birth weight that spreads to 751 pounds of the good stuff at weaning.
- He hits the mark in the top 20% for \$GN, Milk, MWW, and CW with a top 30% value at weaning. We expect his daughters to be of high priority, but those steer calves should feed and harvest with premiums attached.

- As we embark on a new sire group, we thought it only fitting to initiate it with a maternal brother to "Platinum"!
- This son of OMF Epic E27 is bolder through his center body, bigger ended, with a bit more shape to his back and hip than 009H, but he is also smooth and seamless in his transitions like his older brother.
- He is a performance bound son of E27 that offers more growth with balance for maternal and carcass. 2N ranks in the top 10% for WW, the top 20% for YW, the top 25% for CW, the top 30% for TI and MWW, with expectations for ADG, Marb, and REA in the upper half of the business.

- 3N is another son of OMF Epic E27 from the dam who produced FRKG CKCC Platinum 009H and has left a trail of daughters in the program that crank out quality stock with beef business value.
- We like several things about this bull's build, body shape, and running gear.
- His measured performance is more than competitive with the rest of the pen, but it's his dam that can set him apart from some.
- He's a bull that offers balance without extremes across his production record with one important index of note as he ranks in the top 4% for \$GN.

- The outfit appreciates the cattle by KTE Icon 3616L as the son of "Epic" traces back to the 2018 AJSA National Classic Champion Percentage Female, SJF Emerald. Several sons from the proven donor family were offered a year ago and her influence is gaining ground within the program year after year through her daughters retained.
- This stud offers plenty of shape and power while posting a sensible EPD profile. He does rank in the top 4% for DMI, the top 25% for REA, the top 30% for CW, and the top 35% for WW.

- This final son of 3616L is from a powerhouse maternal machine that traces back to a cow bred in the Chris Christiansen program.
- His story is told through the great "Crocus" cow family as they are known to be incredibly productive, hardy cattle that hustle, and raise big stout calves consistently.
- We expect his cattle to come with size and real-world performance with extra carcass merit and rancher value.

## THE LINCOLN SIRE GROUP

LOT 75 - CKCC MR LINCOLN 5810N

- We appreciate this elite son of CKCC Lincoln 0631H for his balance, structure, and his ability to deliver significant power through every square inch of surface area he covers.
- His dam is a very stout, broody designed female from a great cow family.
- We appreciate his EPD values for growth as he ranks in the top 15% for WW and came across the scales to adjust to 796 pounds!

CKCC LINCOLN 0631H ET  
Sire of Lots 75-81

LOT 76 - CKCC MR LINCOLN 5828N

- This is a proven, tried and true mating for the third consecutive breeding season! Each of the three bull calves have been well received by the loyal customer base of CK Cattle and Wager Cattle.
- We have yet to ultrasound these bulls, but we would expect the carcass data on this stud to improve when blended with the genomic data just as his brother before him did.
- 5828N ranks in the top 4% for \$GN with balanced performance, intake, and end product yield expectations.

- WCS MR Razor 1044Y is the stud that Steve Reimer selected from Western Cattle Source that left a tremendous impression maternally on the respected program.
- It's hard to be humble when you have cattle that are built as good as this one is with the performance and EPD profile he has to offer.
- 586N crossed the scales at weaning to adjust to 761 pounds to ratio 109.
- He ranks among the top 5% for Marb, the top 10% for API, TI, STAY, and CW, the top 15% for WW, and the top 20% for YW and REA data markers.

- The disciplined pattern of breeding stock is an art based on trial and error; experience tells us everything about anything we do. The R&R program was one of the investing partners who acquired the impressive son of WS Pilgrim H182U from the Kearns and Rockin J Ranch owned Ford RJ Dolly Y83 donor dam referred to as TKCC Carver 65C. 65C is another sire of maternal prevalence for the history of the Chamberlain based operation.
- This G69 son is just a pinch sharper featured but as stout and extended as one would prefer.
- He ratios impressively at weaning with a 109 and ranks in the top 1% for CW, the top 3% for WW, the top 4% for YW and the best 10% for TI and ADG.

- One of the more intriguing individuals of the offering from every aspect of herd sire consideration! Besides his industry friendly pedigree, his data is one of the two drawing cards as his genetic profile couldn't be more ideal in terms of balance and common sense.
- We expect his cattle to maintain profitability at every turn regardless of sex. His \$GN index is in the top 2%, Milk is in the top 3%, he charts values for CE and MWW in the top 10%, while ranking in the top 15% for API, and the top 20% for BW and TI. The ultimate balance of the profile is the fact that his growth, conversion, and carcass drivers don't go to extremes but land in the zone of logical inputs with acceptable outcome.
- There is a ton of beef production merit inclusive to his pedigree that assisted him to be the number one individual for birth weight in his contemporary group as he ratioed 85, yet he maintained a performance pattern of efficient gains to adjust with 791 pounds at weaning to ratio 113 ranking sixth among his group.

- Strategy and experience back the stock with the R&R prefix as the years in the business give insight into the genetic lineup featured in 540N. His power, width, and density are a result of years of building cattle to thrive in the environment they were born to.
- His weaning ratio is an impressive 109 as his EPD values for performance drivers put him in the top 5% for WW and the top 10% for YW.
- He is a trait leader across multiple facets, ranking in the top 2% for REA, the top 10% for \$GN, TI, YW, ADG, Milk, and CW, and in the upper third for API, CE, MCE, YG, and Marb. Again, we expect his feeding cattle to be profitable and for the retention value of his daughters to be desired.

- Hook's Falcon 19F worked very well with the phenotype strengths of the TKCC Carver 65C daughters. The cattle are consistent for udder quality, milk volume, with the ability to breed back quickly while maintaining an ideal body condition.
- MAF Garrison 2119 offers an EPD ledger that indicates balance in beef production when introduced to the ASA database, with no extremes for any one trait.
- This prospect has the equipment and credentials to keep any ranch entity in the black. His weaning ratio of 112 with 785 pounds places him eighth among his contemporaries, and it allowed him to put himself in the top 15% of the breed for WW and \$GN. He also charts in the top 10% for CW, REA, and MWW, the top 25% for YW, with a top 30% value for TI.

- For those who prefer a lower percent Simmental option we think that you will find this bull to be very interesting upon evaluation. He's not as punchy shaped as the purebreds but he will be stouter and more robust than most Angus bulls you would sort through in a sale season.
- The Tehama Patriarch F028 cattle have been consistent across the country. A sire group that's utilized for well-rounded beef production. The cattle are smooth designed, deep sided with calving ease, suitable performance, maternal merit, and generally have a boost for Marb.
- This prospect weaned with 745 pounds, keeping him in the upper half of his contemporary group and we find his birth weight to be of acceptable consideration for use on heifers or cows.
- He posts an EPD profile with top 10% values for ADG and MWW, he ranks in the top 15% for YW, the top 20% for SGN, TI, and CW, the top 25% for CE, WW, and DOC, and the top 30% for BW and Marb.

## YEARLING BULLS

**LOT 100 - SCHC CKCC ICONIC 5738N**

**LOT 101 - R&R CKCC MR FINAL STRAW 511N**

- We will be seeing more from this sire group in the future. NG Iconic L014 is one of the very best sons of DB Iconic G95 in terms of substance and hoof quality. The "Iconic" cattle are known to be consistent for body, muscle, genuine skeletal width, with advantages in look and balance, and that's exactly what this prospect represents.
- 5738N set the pace from a performance aspect as he chased 800 pounds to get close with 789 at weaning, which played into his top 2% value for WW.
- His EPD ledger puts him in the top 4% for MWW, the top 5% for YW, the top 10% for TI and CW, the top 15% for REA, and the top 20% for ADG.
- His resume is loaded with feedlot bound and retained ownership advantages suitable for any progressive cattle feeder like Todd Klockgetter.

**DB ICONIC G95**  
Paternal  
Grandsire of  
Lot 100

**CKCC MR  
EPIC 1626J**  
Maternal Brother  
to Dam of Lot 100

- The standouts from the R&R program consistently come with the influence of a Hook's Falcon 19F bred dam.
- This lone son of the Ruby's Turnpike 771E x TKCC Carver 65C bred R&R Final Straw K242 herd sire blew the doors off when we processed cattle and took weights at weaning. He crushed the scales with 819 pounds to ratio 117 with a moderate 80 pound birth weight from the starting blocks!
- This prospect would be prime for NIL money in the college football portal as he charts in the top 10% for \$GN, YW, and ADG, the top 15% for WW with a top 25% TI.

- Brad Aust, a loyal Kansas customer, selected a full brother to this stud a year ago. Brad is a very good friend of the program who has experienced tremendous success over the years feeding cattle sired by CK and Wager bulls.
- WAGR Ms Outlaw 7112E is a consistent producer of quality and industry merit. Her cattle have the necessary goods to perform and convert each and every time.
- This stud ranks in the top 4% for DMI, the top 15% for YG, and the top 20% for Marb.

- We expect the cattle by this son of "Platinum" to offer better weaning performance with affordable conversion factors, with high probability carcass premiums attached. His pedigree and data fits the mold of so many of the feed to harvest success stories of the CK and Wager annual offering.
- A maternal brother by Bridle Bit Recharge K256 scanned with the very best a year ago with IMF and REA ratios both at 107. We haven't scanned these just yet but that should establish some guess parameters with a little more certainty!

- Many should appreciate the better performance figures with cutability from this sire prospect, especially for those who sell their product in the beef!
- He is from the Angus matriarch of the program, Chestnut Georgina 599. The direct daughter of VA First Round has placed bulls in this offering for several years, and they have been very well received. She worked tremendously well with S A V America 8018 on a consistent basis, as noted in the youthful dam of lot 108.
- 5075N ranks in the top 3% for REA, the top 15% for YG, the top 20% for \$GN, and the better third for WW and DMI.

58.7	17.1	9.1	27.7	-0.08	0.28	-0.015	0.39	138.9	79.3		

- Here is the lone son of the full brother to FRKG CKCC Platinum 009H ET, FRKG CKCC Undisputed 005H ET. 005H was the bigger framed, longer sided brother of the flush mate sires but offered similar skeletal quality with look and balance.
- 5823N is very impressive in his recorded data with a ratio of 79 at birth that spreads to 106 at weaning as he adjusted to 777 pounds. The adjustment alone should point to him as a "go to" sire prospect for any outfit.
- He charts in the upper 15% for CE, the top 20% for MCE, and the better 30% for BW and STAY.
- His dam's lineage tells the story of his EPD profile as it is saturated with sires that were used to improve calving merit and maternal quality for several years with heavy commercial focus.

- A powerhouse of a direct son of KRJ Dakota Outlaw G974 from a potent and productive Reimer bred female that sports Sitz Dash 10277 and Welshs Dew It Right 067T.
- The pedigree box is loaded with proven sires of both breeds with reputations of performance and maternal balance.
- 549N's data portfolio is one of balance as he is in the top 15% for YG and the better third for WW, YW, MWW, and REA. He too was very impressive at weaning as he scaled 782 pounds to ratio 112!
- If you're on the prowl for a bull that can cover the bases with scale crushing feeder cattle that you will be able to retain some maternally powerful daughters from, set your satchel down.

- We introduce the first of five sons of the rising star in the Angus breed, Mohnen Hollywood!
- He is from one of the very best cows ever acquired from Troy Thomas. The youthful daughter of Ruby's Currency 7134E is from the MR HOC Broker x Ms Rosie Driver 735Y blend that has been proven to be very advanced in phenotype with incredible quality.
- 5732N pounded the scale with 713 pounds of weaning weight and maintains the throttle for performance with sensible expectations and index values.

- The maternal presence of Ruby's Currency 7134E surfaces once again in another high-profile son of the iconic Mohnen Hollywood! WAGR Lullaby 703T is the matriarch on the bottom of the pedigree ledger only enhancing the value that this prospect's daughters will have in production as well!
- He comes to us within the top 15% for CW and ADG, the top 20% for YW, the top 25% for WW, and top 35% for MWW.
- We like his prospects of becoming the multi-purpose sire that most are in search of.

LOT 128 - WAGR HOLLYWOOD 5027N

- You want an Angus herd sire with some look and presence about him? Would you prefer one with some industry merit too?
- This stunning son of Mohnen Hollywood from the Chestnut Georgina 599 donor dam will deliver for quality in build and offer herd improving data points that cover most all bases of production.
- We expect this prospect to sire females with retention value. His feedlot-bound progeny will perform, convert, and harvest competitively with their contemporaries. In today's female shortage, we need to be conscious of retention without sacrificing cattle that don't meet that standard from an industry standpoint.

- Power on power mating with the pedigree blend of "Dutton" on the impactful J6RA Bada Bing 1602B "Bobbi" donor dam through her proven son CHEZ KRIC Limit Up 9656G.
- It's no secret that "Bobbi" was one of the most robust, genuinely wide, and flexible creatures of her time. Her influence is widespread and well-known throughout the CK and Wager programs, and her cattle continue to thrive for the Freking outfit as well.
- 4666M is definitely a product of her gene pool, and a proven fact that it's tough to outrun genetics, both good and bad. In this case it's certainly a good thing that she is a dense, productive breeding piece worthy of acquisition.

OBCC CMFM DEPLORABULL D148

\$100,000 Maternal Grand sire of Lot 205

LOT 206 - CKCC MS EPIC 4611M

- When Chris caught wind of an industry-leading herd sire just down the road at the 3C Ranch, he went and found the stud that the entire industry knows today as MR NLC Upgrade U8676. Semen sales were astounding, both through private treaty and at public auction, before the investing group leased the bull to Genex. "Upgrade" was introduced to thousands of cows, both Simmental and commercial, with consistent results for quality, body shape, and muscle.
- Troy Thomas used the sire as much as anyone and was still using him within the past couple of years. The females, like the maternal grandam of this bred heifer, are known for longevity and substantial milk production. Like any other sire, he had his fair share of critics, but for the most part the sire worked well, filling a void for the times.
- This female comes with production value with moderate recorded performance measurements that should allow for her to adapt and succeed in any environment with 11 trait values in the top half of the industry with a top 15% \$GN index.
- *AI BRED 5/7/25 TO BRIDLE BIT RECHARGE K256 (ASA: 4058272)*

## THE BRED FEMALES

LOT 207 - CKCC MS EPIC 4601M

LOT 208 - CKCC MS EPIC 4846M

- This dense bodied, conventional built, three-dimensional female comes with maternal strength and quality.
- The cattle from OMF Epic E27 have been consistent and true for a number of years as well as descendants of the full sister to WLE Uno Mas, WLE Missy U409.
- Udder quality and production merit are certain to be on board this great breeding piece as she should calve to her A.I. date to the top 1% multi trait leader in the Simmental data base, Poss Pursuit.

**POSS PURSUIT**

Service sire to several females selling!

**CKCC MS LARA 3669L**

Maternal Sister to Dam of Lot 208

- OMF Epic E27 is why CK Cattle decided to make the investment in half of his decorated and proven dam, OMF Time Less B100. Not only were the cattle by E27 a drawing card, but the sisters to the ST Genetics stud is what they wrote the check for. Several maternal sisters to "Epic" run within the barbed wire confines for the progressive operation and serve as a vital part in the continued constructions of their expanding seed stock operation.
- The impact of "Lincoln" has been noted over the years as evident in her dam that traces to SFI Enough Said D3 as well.
- Her genetic profile indicates that she ranks among the top 15% for CW, the top 20% for REA, and the top 25% for WW, DMI, and STAY.

## THE BRED FEMALES

LOT 209 - CKCC MS MADONNA 4739M

- Investing in the daughters of the proven Bridle Bit Recharge K256 should prove to be as good as investing in gold! Females with maternal backing of the longevity sire WINC Surelock 634D and tried and true generational Angus cow families like the Thomas Ranch "Katinka Kay" line are certainly valuable property.
- 4739M ranks among the top 4% for REA, the top 10% for CW, the top 15% for DOC, the top 25% for YG, and the top third of the business for ADG, Milk, BW, and API.
- This female has the substance, shape, and skeletal quality to go the distance!

- The SimAngus female excels in all areas of ranching! It is the ideal blend of maternal prowess, power, and end product merit. The resulting stock are the closest thing to a purebred Angus matron, but they have the cheapest tool for ranching on board regarding heterosis.
- This daughter of CKCC MR Dutton 1606J is saturated with the goods in terms of visual performance and weight per day of age. Her South Dakota bred Angus dam with the influence of Connealy Capitalist 028 and Benfield Substance is recognized through her feminine presence, her ultra smooth pattern, and her overall skeletal integrity.
- Big things on the way with her service to the exciting Poss Pursuit!

- TR MS Katinka 3208N is one of the very influential dams of the Thomas Ranch program. It's no secret the impact she made in her extended tenure in the donor pen of the Harrold, SD ranch. The longevity of the cow family is unrivaled as the years of production are long, profitable, and saturated with replacement qualities in fertility, udder quality, and milk production.
- The MSTR Pandora 2770Z donor is a direct daughter of 3208N by WAGR Driver 706T whose dam also experienced many years in productivity. 2770Z is the most storied and decorated of the SimAngus females from the proven 3208N and continues to thrive within the fence lines of the CK and Wager operations.
- This daughter of "Right Time" is quite impressive amongst the females of the offering from multiple aspects. Her performance record is notable as she posted a yearling ratio of 105 from a birth ratio of 97. She ranks within the top third of the breed for multiple traits including WW, YW, ADG, \$GN, DOC, CW, Marb, REA, and TI.

- Here is a maternal sister to one of the top sellers at the 2022 CK and Wager Production Sale, CKCC Backcountry 1623J. The impressive son of OMF Epic E27 was selected by a longtime friend and customer, the Roller family of Hewitt, MN. 1623J continues his service to the youthful program. He consistently sires both sons and daughters who excel in performance and maternal merit, as the first daughters entered production with success during the 2025 calving season.
- Not only is this future dam proven on the maternal side, but the paternal side of her ledger features another productive dam from the famed R&R program of Chamberlain, SD, as the mother of the Windy Creek sire, CKCC Relevant 0639H. The rant about the quality of the 0639H females is legit and documented elsewhere, not just here.
- Invest in those females from dams of reputation, and the rest will fall in line!

- One of the very feminine, extended, bred females in the offering that maintains advantages for balance and poise.
- Certainly, a candidate for low birth weight herdsire production, especially with the service to the resident herd sire, ES Titan LJ44.
- The daughters of the \$170,000 FRKG CKCC Platinum 009H are proven to be wet in production with ideal milk volume and outstanding udder quality, so invest with confidence.

- Troy Thomas is regarded as one of the very best stockmen and evaluators of his time, but his friendship and ability to mentor those who were close will be valued as priceless.
- Four generations removed on the maternal side there's a female that Troy selected from a production sale hosted by Circle M Farms of Texas. Once CMFM Hottie 207B entered production, he introduced sires that were laced with industry merit and maternal strength that lines the pedigree lines of this high-quality direct daughter of FRKG CKCC Platinum 009H.
- This female's contribution to any progressive outfit will be noticed early and replicated for generations just as TR laid the foundation.

- The presence of the Chestnut and CK owned Angus patriarch, R5 Solution E111 was acquired as a calving ease herd sire for the aggressive partnership. The stud left a string of daughters in both programs and crossed very well with the Simmental female base in Highmore. Chris is very high on the direct daughters and their ability to wean big calves with quality to fit the mold for all marketing events affiliated with the outfit.
- Outlaw was also initially acquired as a heifer bull. His cattle are a pinch more moderate in their size but come with a discerning look and presence enhanced with pin width, back shape, rib, and extra substance of bone.
- With the sire power of "Platinum", there's little to question about the quality and balance demonstrated by one of the very good females of the bred offering.
- This breeding dynamic ranks in the top 1% for YG and the top 10% for REA.
- PE 5/29/25-7/21/25 TO NG ICONIC L014 (AAA: 20731705)

## THE BRED FEMALES

**LOT 228 - MISS DUXS MABLE 414M**

- This would be the only descendant of SO Remedy 7F in the bred female offering for 2026. The sire has consistently sired cattle that are good bodied with great skeletal quality, and the daughters are very ideal in production for milk volume and udder quality.
- 414M ties back to a very productive daughter of Profit with the upfront influence of the "Copper Lass" cow family known for maternal excellence within the Red Angus circles.
- You will find this female on sale day to be a standout for length, frame size, and volume. She would be one of the pounds heavier females within the group that comes with extras in bone, body, and muscle. There's certainly a herd sire in her future regardless of how she's mated.

**SO REMEDY 7F**  
\$530,000  
Paternal Grandsire  
of Lot 228

**LOT 229 - CKCC MS LINCOLN 4819M**

- Representing the M2C Assurance 16F investment is progeny of the first born daughter, CHEZ KTE FRKG Dora 0677H. The daughter of CKCC Lincoln 0631H is most impressive in person but her recorded data will meet the approval of most progressive stockmen and women alike.
- She boasts a weaning ratio of 108 and a yearling ratio of 110. On her EPD profile she ranks among the top 5% for CW, the top 15% for WW, the top 20% at a year, and the top 25% for REA.
- Her genetic blend is no doubt saturated with real world merit and performance. The substance, the sheer power, and genuine center body is unmatched.
- The exciting part of this particular investment equation is the on board A.I. service to Poss Pursuit. Big things are on the horizon.

## THE BRED FEMALES

**LOT 233 - CKCC MS DUTTON 4810M**

- CKCC MR Dutton 1606J continues to prove that his daughters are premium maternal assets as they enter production!
- 4810M posted a 110 weaning ratio and ranks among the upper 15% for her WW EPD driver.
- Her dam is an extremely productive and fertile daughter of Profit with the potent Angus influence of JMB Traction 292 on board as well.
- Awesome performance with superior maternal instinct and function.

**LOT 234 - WAGER MS CURRENT AFFAIR 4114M**

- This lead off daughter of the WAGER Current Affair 9042G sire group is quite intriguing.
- She sets to the surface with a huge set of paws that come with extra depth of heel. Her bone is stout, her flexibility is impeccable, and she is one of the longer sided females of the offering without sacrificing center rib design and overall capacity.
- 4114M ties to everything maternally strong and proven at the Gettysburg division.

- HOLT Night Vision 457H was selected as a bull for use on heifers by CK Cattle. 457H proved himself to be one of value for calving ease and for excellence in build and presence. The sons have been accepted over the years of his tenure and his daughters proved to be in demand as breds through the annual marketing event as well. Those retained continue to impress the outfit in pounds of calf weaned, excellence in udder quality, and their ability to breed back within the acceptable calving window.
- Longevity is a major strength of the operation and this female compounds that with the maternal presence of Profit, Barstow Cash, and CKCC Lincoln 0631H on the maternal side of her pedigree ledger.
- More investment intrigue is on board with the service to the Style Angus owned Musgrave Jumbo!
- AI BRED 5/8/25 TO MUSGRAVE JUMBO (AAA: 19436794)

- This daughter of STCC Tecumseh 058J traces back to the most potent and promoted sister to WAGR Driver 706T, WAGR Lullaby 703T. 703T left a set of daughters that were heavily utilized in the building stages for the Wager and CK programs. Their impact is noted and evident throughout the offering.
- A beast that leads the group for conversion as she posts a top 3% value for DMI in combination with a marbling expectation in the top third of the breed. The service to Bridle Bit Recharge K256 will only assist in improving the next generation for those traits that are profit drivers for the end product on the rail.

- The modern design and unconventional build of EC Rebel 156F meshed very well with the extra length and frame associated with the cattle from the foundation matriarch, "Melody". When blended with the other excellent herd sires that graze the Wager pastures of Gettysburg, quality only exudes from the ranch program.
- 4087M is a big bodied, dense constructed, genuine breeding option from a direct daughter of the resident son of "Hammer", 8965F, with assistance from the quintessential WAGR Dream Catcher 03R.
- Rich in quality and pedigree is how one concludes this critter evaluation.

- Females under the influence of the Freking owned EC Rebel 156F have been well received and praised by those who employ them as production females. Not only are they attractive cattle with muscle and robust body shape, but they are loose and sound in their build and good to the surface like 4128M.
- The dam of this female is sired by the late outcross herdsire, Hart Eclipse 510Y, who would be the maternal grandsire of FRKG CKCC Platinum 009H ET. "Eclipse" left a very productive set of daughters for both Wager and CK in the early stages of each operation, and their influence continues to be noticed.
- There's much to look forward to with this investment opportunity with the early service to the fresh, ES Titan LJ44, herd sire.
- *AI BRED 2/20/25 TO ES TITAN LJ44 (ASA: 4186967)*

## THE BRED FEMALES

**LOT 245 - WAGR MS 1092 REBEL 4097M**

**LOT 246 - WAGR MS 8965 HAMMER 4127M**

- One of the more popular sons of MR NLC Upgrade U8676 was bred in the R&R program, R&R Chamberlain X744. During his tenure, he sired several valuable bulls and females. His daughters were dynamic in production and experienced a high level of retention and longevity within the programs they were employed by. One of his very best sons was selected by Mohnen Angus, WAGR Earthquake 236Z. The daughters of 236Z were proven to be incredible in production and had a bit more power for muscle and body shape.
- This EC Rebel 156F influenced bred female traces back to the "Earthquake" sire. The mating to the NG iconic L014 herdsire will be something to look forward to and worthy of investing.

**CKCC LD DIMENSION 8965**  
Full Brother to Sire of Lots 246-248

- The firm is very impressed with the cattle sired by the latest ES acquisition, ES Titan LJ44. His extended, smooth build complements the robust build, substance, and shape of the cattle that carry the CK and WAGR prefixes.
- His service on this granddaughter of "Hammer" will be successful in yielding stock that come with enhanced industry merit without sacrificing quality in phenotype or skeletal integrity.
- 4127M is from a very productive daughter of WAGR Dream Catcher 03R that allows her to chart in the top 5% for YG, the top 10% for DMI, and the top 15% for REA.

# Watch the Sale on CCI.live!

*The best, the fastest and most  
comprehensive marketing & bidding tool!*

## *How to Bid Online...*

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
  - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
  - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

## *Viewed around the world!*

**SALE CATALOG, VIDEOS,  
and LIVE BROADCAST...**

all at your fingertips from the sale page at  
[www.CCI.live](http://www.CCI.live)! Watch live sales weekly!
