

4TH ANNUAL
JARED WERNING CATTLE

P R O D U C T I O N S A L E

FEBUARY 13, 2026

Welcome TO THE FOURTH ANNUAL JWC PRODUCTION SALE

On behalf of my wife Kassi & myself, it's our privilege to welcome you to our 4th Annual JWC Production Sale. Yes, you read that right - she said yes & we were blessed with a perfect wedding surrounded by our favorite people this past October! Marriage is a blessing & we are so excited for what's yet to come! As I sit here, we can't help but pause & reflect on how humbled we are you're reading this & considering us as your seedstock destination. Nothing can replace or compare to the relationships we have with our customers. It's fun to work with you all as we strive to assist your programs efficiency & profitability with long term success in mind. 2025 has marked a record year for the beef industry & it has been fun seeing all your hard work, countless hours, & herd management practices pay off. With low cow numbers & high demand, the future is bright for American cattlemen! It has been fun seeing our customers sell this fall & winter with incredible weights & top-dollar premiums. Hats off to you - selecting seedstock with quality & performance is paying off like never before.

Here at Jared Werning Cattle we take pride in providing you with as much data & information on the animals as possible. We are adamant & diligent that each lot sells with GGP 100K GE DNA & Parent Verification. The 100K Genomics provide the most transparent, straight forward & accurate way to present EPD data. We live by the book & are proud to offer accurate weights, dates, DNA, & all records. Nothing is worth doing if you're not going to do it right. When the gavel drops on sale day, rest assured you've purchased a wholesome product. Integrity cannot be boughten & can easily be lost. We live by it.

Our herd's health is something we take great pride in. With a top tier vet staff in Sweetgrass Veterinary of Dimock, SD we wholeheartedly believe we carry out the industry's best health protocols - with a major focus on living environment, management practices & vigilance staying ahead of disease & illness rather than behind it. We hold our off site recip herds to the same standard as our own & place great attention to even the smallest details, knowing health and nutrition take form long before a calf is born.

Cattle with the JWC prefix come with another commonality; physical quality, look, & presence. Throughout my life, I've had the privilege to have friends & acquaintances with very keen eyes for cattle. Traveling the country on the SDSU Livestock judging team, watching videos & sales daily & interacting in all facets of this great beef business has taught me one thing - never sacrifice structural integrity or phenotypic quality. At the end of the day, phenotypic quality is the only constant that can't be taken away, rather physically seen & valued. No algorithm or a click of a button can change physical quality, weights, structural integrity, foot & udder quality, or disposition of your animal. Take pride in the animals you raise & put emphasis on their phenotype. It will reward you at the sale barn, longevity in your cowherd & herd bulls while paying off tenfold throughout the building & growth of your herd. Quality sells for a premium & longevity is part of the cattle business that often doesn't get talked about enough. A cow or bull that is structurally built to last 2-3 more years than the average, are the kind that pay bills. We are confident you will see standout phenotype in the cattle here.

Regarding the phenotype & movement of cattle; nutrition is a large factor. Each year we receive complements on how flexible our bulls are, how they aren't "stoved up" or stale. Partly because of their structural build & partly because of our feed program. The bulls are fed a 48 MegaCal diet shortly after weaning through delivery. We do not "push" or feed any harder; there is no benefit in that for the animal or a producer in our opinion. Yes, we could feed harder & try for record paper weights but that does not benefit the animal's longevity so therefore it does not benefit you or me. We strive to produce a bull that is genuine in his weight and frame - without sounding arrogant this set pushes the upper echelon, they're made to hold up, not fed for the extra dollar on sale day. We've all been to sales where bulls are too fat & fed too hard, we're confident you won't find that here.

The bull offering is deeper in numbers & quality than we've ever assembled. Dozens of proven & new matings from our donor battery. It's sure fun to see the consistency & power of these sons in volume. A few new sire groups are sure to excite & show our vision in the flesh of what we are producing at JWC. As always, this offering is saturated with progeny of legendary cows of influence. Our mainstay donors are coupled with fresh blood this year as we offer our first progeny out of the infamous \$190,000 WHF Delilah 45D, LCDR Londyn 20L, & JWC Karen 250K. This set of bulls will add pounds to their calves at sale time & dollars to your bottom line.

The bred heifer offering is as stacked as we've ever had. Years of compiling proven cow families atop one another has resulted in our most consistent array of powerhouse females. The opportunity to buy herd building females February 13th is in your hands in quantity. Each female selling was individually mated as if keeping in our own program. A lot of thought went into each individual & we will be excited to hear what that first calf does for its new owner.

The most rewarding part of this business is sharing it with you, our friends & customers. Some days are tough while others incredible, being able to connect & together - share our experiences, makes it all worthwhile. A short few years ago I never dreamed of being where we are today, we love the life of raising cattle & getting to do it alongside you all. What this community & you have done for us the past three & a half years brings tears to my eyes.

Nothing I can say will adequately express how grateful we are or how much more appreciation we have for the people in our lives. If it's possible for you to view these cattle before sale day we encourage you to do so - they're always available at your convenience. Again, thank you for considering us for your seedstock needs. The good Lord has blessed us with great people, great opportunity & the chance to make a positive impact on others. Feel free to reach out to us or Innovation Ag Marketing with questions. We are excited to see you, visit with you & show you this set of cattle!

Sincerely,

Jared & Kassi

Dont miss the

THE DETAILS

CATTLE WILL BE AVAILABLE FOR VIEWING PRIOR TO SALE WEEK.
27291 415th Ave, Parkston, SD 57366

SALE LOCATION

Dan & Patty Mogck Farm

IMMEDIATELY FOLLOWING CONCLUSION OF THE SALE

We invite you to stick around after the sale and enjoy appetizers, refreshments and an evening of fellowship to commemorate the year.

*I*NNOVATION

AgMarketing, LLC

First off, congratulations to Jared & Kassi on your marriage this past year! May the years ahead be filled with laughter, love, good Simmental Cattle and the kind of partnership that makes life even better together. What a time to be involved in the cattle business! As we get into the 2026 sale season we find the industry on strong footing, and that momentum mirrors the direction of Jared and Kassi's vision at JWC. Their forward-thinking approach, coupled with a relentless focus on customer success, continues to shape a program built for long-term impact. The reputation of the stock they stand behind may be the calling card for some to this lineup of breeding cattle, but it will be the relationships you forge with the pair in support of the product that you will be most thankful for in the end! Strategic investments in infrastructure and an expanding cow base have allowed JWC to concentrate fully on producing cattle that align with their goals and those of their customers. Anyone who has toured the operation understands there is no ceiling to the potential of what is being built. When elite-caliber genetics are combined with dedicated, high-quality people, the result is simple—customer success.

Profitability matters more now than ever, and we think you will notice an ever-strengthening theme of this program working towards adding genetics that are centered around customer success. The program remains focused around the fact that pound's drive dollars, and in an era of rising input costs and tightening margins, the value of highly consistent, powerful genetics are as valuable to a cowman as ever. This year's offering is designed with that reality in mind. With over 100 bulls selling, this set provides ample opportunity to find a herd sire that fits your program from a practical, economical, and pedigree-driven perspective. The offering is built on proven maternal power, featuring many of the Simmental breed's most influential cow families on the bottom side, paired with sire groups that represent the leading edge of genetic progress and performance. Whether your focus is registered or commercial production, JWC genetics are designed to add value, longevity, and return to your operation.

In reference to legendary cow families, the most powerful in the JWC battery have a strong influence throughout both the bull and female offering. Yet there are several new, and up and coming cow families that you will notice emulating an impressive impact, and some new matings and sire groups have us excited for your appraisal. There has been serious focus applied to being able to sift a bred heifer offering that offers elite options to stockmen from every walk of life, regardless of how you prioritize your selection pressures, we can assure you that there will be individuals that go under the hammer on February 13th that you will need to investigate. With each page flip you will find a female that has the genetic potential to provide profitability in the right marketing scenario, whether you are looking to add a next generation herd bull producer to the donor battery, or would like your programs prefix associated with raising purple banner winning show heifers in the nation's most competitive show rings, there are candidates that can project your program in the right direction.

Innovation AgMarketing is proud to stand alongside and represent such a progressive seedstock operation that has proven that they operate off of a strong 'the customer is always right' philosophy. Please feel free to contact any member of our team, or Jared Werning directly, with any questions or inquiries at any time leading up to February 13.

We look forward to hosting you in Parkston,

Graham Blagg, Jared Shipman & Tim Anderson

ONLINE BIDDING

We will offer online bidding through both DVAUCTION.COM and CCLIVE this year. Videos have already been posted and are ready for viewing. We recommend visiting the websites at least 24 hours in advance of the sale to register to bid.

BULL DEVELOPMENT & DELIVERY

All bulls selling can be left at Jared Werning Cattle at no additional cost through April 15th, 2026. At that point we will semen test, administer pre-breeding shots, worm, pour, and freeze brand your bull. Jared Werning cattle assumes full responsibility of injury or death loss while animals remain in our care.

TRUCKING

Jared Werning Cattle offers free trucking to customers in South Dakota and surrounding states. NEW IN 2026 for customers beyond these boundaries purchases of \$10,000 or more will be accompanied with free delivery. We will gladly assist in coordinating deliveries beyond these terms at the expense of the buyer.

With many of the bred heifers coming close to their due dates we urge trucking and/or pickup arrangements be made within a few days following the sale. We recommend the following trucking options that will provide a professional, cost effective, and reliable transportation of your new purchase(s). Dick Coleman (765) 461-0954 Craig Kaisand (641) 891-9666 Brandon Bertsche (815) 867-0547

INSURANCE

Martin-Trudeau Insurance
Representative Mandy Synhorst: (605) 730-4246

ANNOUNCEMENTS

A supplement sheet will be available sale day with updated information, corrections, and additional information. This sheet and any announcements made sale day from the auction block during the sale, will take precedence over printed material associated with the sale.

SIGHT UNSEEN GUARANTEE

If you are unable to make it to the sale, please feel free to reach out to anyone associated with Jared Werning Cattle or authorized sale representatives to help find the best fit for your operation. Please reach out to Jared Werning ahead of sale day to discuss the cattle in more depth. 100% customer satisfaction is guaranteed!

EVENT LIABILITY

All persons who attend this sale do so at their own risk. Jared Werning Cattle, facility owners or sale personnel assume no liability for accidents.

LODGING

Holiday Inn Express & Suites: (605) 292-9292
810 E Spruce St. - Mitchell, SD 57301

VIDEOS

The videos of sale cattle are ready to be viewed online. They can be accessed from either of the bidding platforms or INNOVATIONAGMARKETING.com.

VOLUME DISCOUNT

A volume discount can be applied if several bulls are purchased by one firm. The discount begins with your third bull and continues as follows:

3 bulls = 3% discount; 4 bulls 4% discount; 5 bulls = 5% discount; Etc.
10 or more bulls = 10% discount. There is no discount on bred heifers.

SALE CREDIT

Should sale credit be offered for any reason, it must be used within 12 months (one calendar year) from the date of purchase.

TERMS & CONDITIONS

All cattle will sell under the suggested terms and conditions of their respective breed associations. All registered Simmental cattle selling have been parent verified, DNA is on file and all have been tested via the GGP-100K qualifying them as AI sires and Donor Dams and supplying them with genetically enhanced EPD Data. Jared Werning Cattle also retains the right to the refusal of any/all bidders/buyers at any point during the conduction of the auction.

BULL GUARANTEE

We guarantee that all bulls sold through our sale are fertile. If a bull is injured anytime in the twelve months following the sale, that makes him functionally infertile, we will provide a replacement bull or issue a credit in following sales, equal to the purchase price minus the salvage value received for your bull. The sale credit can be used on bulls or bred heifers the following year. This is not an insurance policy. The guarantee is in addition to the sale terms and conditions of the American Simmental Association and American Angus Association which apply also. Jared Werning Cattle retains the option to clone all lots selling.

SEmen INTEREST

Jared Werning Cattle retains one-third semen interest on all bulls selling; meaning if Jared Werning Cattle should choose to collect semen on any sale bull, they would have the option to do so at the seller's expense. In addition, if semen is sold on any bulls that Jared Werning Cattle collects, revenue shall be split with seller retaining 1/3 of proceeds. Buyer will receive full possession and salvage value unless otherwise specified or announced.

BRED HEIFERS:

Bred heifers have been pregnancy checked by a licensed veterinarian and are guaranteed to calve within the catalog printed time-period. Jared Werning Cattle retains the option to clone all lots selling. JWC also retains the right to ONE successful flush (minimum of (6) transferable embryos) of all females selling unless otherwise noted in the catalog.

BRED HEIFER PARTNERSHIP DETAILS

Jared Werning Cattle will be offering 50% embryo interest in a select few bred heifers that are noted throughout the offering. The buyer is ONLY purchasing 50% embryo interest, with no possession. Buyer will receive 50% ownership of the first born natural calf that is being sold in utero. It will be decided between buyer and seller what the best marketing route is for the first born calf. The 50% embryo interest being purchased will be structured in one of two ways:

1) IVF cycle/conventional flushes will be split evenly between the two parties involved and all costs associated with embryo production will be divided evenly.

2) Alternate IVF cycle/conventional flushes if the sire choice is not able to be decided on between the buyer and seller. Costs will be distributed solely to the partner that the individual IVF cycle/conventional flush has been designated to.

For more details please feel free to reach out to Jared Werning at (605) 933-1661 to discuss the mating and marketing options that sell all-inclusive with this investment opportunity!

HERD HEALTH

The crew at Sweetgrass Veterinary Services and I are eager to welcome everyone to the Fourth Annual JWC Production Sale! We have enjoyed performing the herd health preparation that has gone into this exciting sale. The motto “anything worth doing, is worth doing well” is exactly what we have done with the health and vaccination protocols. Please find them listed below from birth to breeding. If you have any questions we will be readily available on sale day and can be reached by email at vet@sweetgrassvets.com or at (605) 928-8387 anytime. We will be issuing electronic official health papers for all sale lots.

Stay Healthy. Stay Happy. Stay Free!

BUYING the *Guarantee* JW

With hundreds of sales each year in which you can purchase your bulls and females - here's what you can expect doing business with us

New in 2025/2026 ALL ASA Natural Service Sires born on or after JANUARY 1st, 2025, must have **completed GGP-100K** genomic testing completed to register progeny. **All DNA work is already done for you.** All registered Lots, both male and female, have DNA on file with their respective breed associations and completed testing, including but not limited to:

- GGP-100K
- GE – Genetically Enhanced EPD Data
- Horn/Polled Gene Extractions
- Hide Color Extractions
- Red Charlie Gene Extractions on applicable animals

ALL REGISTERED ANIMALS ARE PREQUALIFIED AS DONOR DAMS & AI Sires

Yearly blood drawn **full Health Panel testing** on all in herd animals AS WELL AS all off-site Recipient Dams before embryo implantation.

Intensive Mineral Program with free choice and TMR force-fed minerals year-round.

Honest & Accurate record keeping and data recording. While genetically enhanced EPDs take many human errors and manipulation out of the equation, the data is only as accurate as those reporting it. Here you can expect 100% transparency and integrity.

ALL animals are accurately weighed on scales, no eyeballing, no guestimates. Weaning, yearling, and mature weights all recorded by licensed veterinary technicians.

Open line of communication between seller and buyer long after the gavel drops. We want to remain in contact with you, please share with us the good, the bad and everything in between we are here to serve you but most of all we truly enjoy your friendship!

Purchasing an AI sire or Embryo Interest in a female?

You instantly gain access to the JWC vault: Semen customer base/connections, advertising, brand recognition, marketing, knowledge and mating experience and ideas on females with assistance in marketing her progeny!

Docility is a must, from day one at the JWC cattle must pass a strict zero tolerance for ignorance evaluation – when you come walk through the pens you will be impressed with the disposition that accompanies the quality! Our cattle are accustomed to heavy foot traffic daily with quiet, easy going sorting and handling. Docile cattle gain weight quicker and more efficiently.

In an industry heavily influenced by EPD and Genetic Data we offer animals that meet the demands of operations in many different avenues of the business. We will not sacrifice real world physicality for paper - in a world where the two **MUST CO-EXIST!**

We know every operation is different and has individual breeding goals and directions in which they focus.

LOT 1 JWC TURNPIKE N685

There is no questioning the maternal powers of W/C JWC Angel 9005G, she has been an incredibly potent source of power and performance, and since the existence of the JWC brand she has led from the front of the pack. Again in 2026, the sons of 9005G will headline the bull offering, and her incredible versatility is on display through sons from multiple sires that all offer up quality to seed stock and commercial cattleman alike! JWC Turnpike N685 begins an impressive group of flush brothers from the highly proven Ruby's Turnpike 771E x W/C JWC Angel 9005G flush. He is a homozygous polled and homozygous black stud that sports a dynamic set of genomic predictors that will help propel him to the short lists of stockmen that are searching for a herd bull to add profits across the board. The Ruby's Turnpike 771E cattle have always been held in high regard when it comes to foot quality, structural ruggedness and dimensional phenotype and this stud would be a prime example. This purebred will be sure to inject some hybrid vigor and while he has matured with added shape and power, genetically he excels in regard to calving ease.

W/C JWC ANGEL 9005G – Dam of Lot 1-20

LOT 2 JWC TURNPIKE N475

The legacy of Ruby's Turnpike 771E has been built by success stories of stockmen that need cattle to work in the real world, and provide profitability through power, performance and longevity. Those who demand the basics of high-quality beef production will find themselves gravitating towards this sire group. For the most impressive additions of pay weight and performance from the Ruby's Turnpike 771E x W/C JWC Angel 9005G flush, then you will need to look into this beast. With a very impressive 836lbs. weaning weight, and growth traits that rank in the top third of the breed or better, you can trust that he has legitimate potential to add growth to a cowherd. This early maturing stud will be a great option to add power and performance to a cowherd that isn't afraid to make profits!

LOT 3 JWC TURNPIKE N605

This impressive purebred delivers a high-performance genomics package, along with an incredibly stout and rugged phenotype. He continues to mature into a standout of the offering, and delivers upon the expectations of high-quality build and power inducing capabilities that you would expect after seeing him in person. He has always been ahead of the pack from a pound's standpoint, and continues that trend towards sale day in an impressive fashion as he recorded a 1360lbs. yearling weight and has a large set of testicles. We believe he will sire cattle that have a quality structural build, along with real world performance that is evident on the paper and more importantly the scales.

The ET flush mate brothers from the Ruby's Turnpike 771E x W/C JWC Angel 9005G combination are consistent in the fact that they offer tremendous shape, dimension, and capacity additionally, we appreciate the added look and extension that each of these bulls possess. JWC Turnpike N405 comes with the advantages of testing homozygous black and homozygous polled. He is massive in terms of his hip and pin width, he is square built at the surface, and offers the presence of a true herd bull when on the move! The 9005G sons have been the go-to option for stockmen that value the power of genetics, and 2026 will be no different!

The combination of WHF Greater Good J45 and W/C JWC Angel 9005G has aligned the stars here, and delivered the goods. The meeting of some of the most powerful cows in the business has clicked impressively. W/C JWC Angel 9005G needs little introduction to followers of the program, the JS Sure Bet 4T daughter from W/C Miss Angel 2870Z has 19 sons selling in this bull sale, by 8 different sires, and there is one thing remains a constant, they are cattle that come built for the long haul, are cattle that are built extra massive in their muscle shape, round in their body shape and impressive in their design. Sired by the multiuse WHF Greater Good J45, these four bulls come with very versatile genomic packages that offer up a very well-rounded set of traits, and can offer up quality to stockmen with various goals. All four read with impressive calving ease numbers, and would make very suitable options for stockmen looking to utilize their purchases on heifers or younger cows, without sacrificing long term productivity and phenotypic quality.

We are very excited to introduce an incredible lineup of SimAngus bulls from the W/C JWC Angel 9005G donor that are sired by leaders of the Angus business. There are five sons sired by the profitability and registration leader Connealy Craftsman. JWC Craftsman N295 has been a leader of the class from early on, he has always been an impressive brute, hammering the scales every time he stepped onto them, and remains one of the heaviest and densest built bulls we will sell in 2026. With 837lbs. at weaning time, and recording a yearling weight of over 1400lbs. the proof is in the pudding. These five flush brothers all excel from a growth and performance standpoint, and offer weaning and yearling weight figures that suggest impressive added pounds come time to market. With this in mind take note of the sensible calving ease and birthweights that they still come with. Additionally their data sets offer profitability indexes that suggest their progeny will add more dollars to the bottom line of a balance sheet.

We think these Angus sired matings on W/C JWC Angel 9005G are going to be very popular, as they combine the best of both worlds, and are cattle that have plenty of power and stoutness, but come with a low maintenance, low input look and have a build that sets them up for a long career in production. JWC Craftsman N255 has the most impressive trends from appropriate calving ease towards extra heavy weaning weight of any from his flush. In person he is the kind that makes you stop and stare, his perfect markings, monster features and extra heavy muscle pattern are simply impressive.

THE BULLS THE BULLS

The combination of Angel 9005G and Connealy Craftsman has yielded some of the most consistent results from a 9005G flush yet. The five littermates offer some differences in regards to explosiveness of muscle shape, additions of chrome and birth weight but it's very evident that they are cattle that are going to consistently add immense quality from a phenotype, length of body, and reproductive standpoint. They too excel when it comes to adding some extra performance, and quality to a carcass, something particularly important for those that retain ownership and sell over the grid. If you are wanting to add a well-rounded, fool proof herdsire that can complement a range of traits across the cowherd then pay attention to this band of brothers.

LOT 15 JWC FAITHFUL 205N

JWC Faithful 205N has always been a favorite! All summer long he was one that was easy to find, and as the hype continues to build about the first progeny from the \$180,000 44 Faithful 2764 this breeding piece only gets more intriguing. You will find quality all the way across the ledger of 205N, as he fits the bill for both calving ease and growth, with true curve bending potential! His profitability indexes trend the same way too, denoting him to be the source of carcass quality and REA, and all-around herd improvement. His sire, 44 Faithful 2764 has quickly become a popular option for both phenotype and EPD fanatics as he blends both worlds into one dynamic package. His monster Adj. WW is one of the heaviest of the entire bull offering, and he will certainly stand out when you make it to town for sale day.

LOT 16 JWC CROSSFIRE N875

LOT 17 JWC CROSSFIRE N915

We debut the HRF Crossfire K12 sons from W/C JWC Angel 9005G with a pair of extra high growth, and burly built brothers. These purebred phenoms come extra heavy muscled, wide at their base and dimensional from end to end. These full brothers would mate up well on a group of British based cows to add immense amounts of muscle shape, carcass yield and growth. You won't have to search long to find these impressive beasts, as they stand out from the crowd when comparing bulkiness and herd bull look. These purebred studs will quickly add value to calf crop through added pounds at the scale and feeder cattle that appeal to buyers who appreciate muscle and red meat yield.

The dam of JWC Right Now 145N is quickly becoming a dominating source of excellence here in Parkston, and this stud is sure helping to prove her case. She is the result of the potent MR HOC Broker x W/C Miss Angel 2870Z flush that also resulted in the \$28,000, JWC Angel 126J female that was purchased by the Reimann Ranch in 2023, and is featured in their illusive donor pen for both show heifer and show steer production. This homozygous polled, purebred, baldy hasn't stepped a foot wrong, he came light and unassisted and then exploded towards weaning and yearling times, and this trend is reflected by his foolproof genomic ledger that ranks top quarter of the breed or better for CE, BW, WW, MCE, BF and REA. All around improvements will be the result of his service, and we think there will be serious value injected into progeny of either sex.

LOT 22 JWC JOURNEYMAN 975N

The only direct son of the legendary 7113E to sell in 2026! The OMF Journeyman J24 sons were met with high demand last year, and there is only a limited selection to sort through this year, so do not miss this one for inspection, JWC Journeyman 975N has quality written all the way across his phenotype, coming with a wide and square skeleton, good foot shape, heavy muscle pattern and good length of spine. The list of maternal siblings to 975N features several breed influencers of either sex, and has been one of the most trusted and proven genetic sources to ever work for JWC! You can trust that there are generations of maternal power and consistency built into the pedigree of this purebred growth inducer.

W/C ANGEL 7113E
Legendary Dam of Lot 22

LOT 23 JWC KAISER 375N

A big and rugged built baldy faced bull that delivers a very powerful phenotype with the powers of pedigree! His dam is JWC Roulette 224K a \$43,000 high seller from the 2024 Production Sale to Horstman Land & Cattle. She is a full sister to the legendary, \$192,500 high selling W/C Bet on Red 481H stud that continues to dominate the high sellers list, in particular with a pair of brothers that just commanded \$620,000 in the 20th Anniversary of Embryos on Snow. Even though 375N already comes with a pedigree that stirs plenty of attention, he is the type and kind that deserves attention just from his personal quality offering tremendous shape, dimension, and capacity.

W/C Angel 7114E is the full sister to W/C Angel 7113E that has quickly been working herself towards the top of the totem pole with her strong representations in the past couple of production sales. In fact she is proving to be one of the most consistent generating females in program history, producing with surefire reliability and impressing in production, regardless of sire choice. With the maternal powers that 7114E brings to the equation, we think that these sons offer quality well beyond just adding performance and payweight to their progeny. Note that this trio are full brothers in blood to the \$75,000, JWC 2/F Living Proof 283L that is now working for Wheatland Land & Cattle of Saskatchewan, Canada and has seen heavy use across the continent by progressive breeders. The homozygous polled and homozygous black JWC Journeyman 645N bull is genetically geared to add pounds to his progeny, and looks to be the kind that will inject quality of build and longevity to a set of replacement females.

LOT 27 JWC LIMITLESS 615N

On the search to locate the most potent profit building sires to help our customers brought us to the ES Five Star Limitless LJ39 sire. He was a \$35,000 highlight of the 2024 Oak Meadow Farms Bull Sale and is a son of LCDR Progressive 106G that comes with positive indicators for every aspect of high quality beef production, a trend that we see he has passed along to this trio of sons! With the maternal powers that the iconic W/C Angel 7114E delivers to the equation, there is no limit to the potential and opportunity that these sons offer up to improve quality and profitability. Both sons and daughters of these herd bulls will be the kind you are proud to market or breed from long into the future. You will notice that they offer the consistency of all being homozygous polled and homozygous black, and would certainly be an all-star lineup to turn out together in a multi-sire breeding unit.

The sons of W/C Red Bird 269J have made for many happy cowboys over the last couple of years, as regardless of color, they come built right for the times and offer up progression from a genomic, phenotype and maternal standpoint! JWC Red Bird 1415N certainly steps up to the hype, and carries the torch for the sire group, coming with predictions for calving ease, and comes built for the long haul with a structural integrity that rivals the best of them. We love the shape of his body cavity, packing a punch from behind, and carries his muscle in a forceful frame. The combination of phenotype, pedigree, and presence that comes from the 7114E influence has become quickly evident, and introducing her influence via one of these impressive sons could help push your cowherd into the future.

A trio of high-performance full brothers that are the results of the HRF Crossfire K12 flush on the incredible JWC 7114 Angel 114J. 114J was the \$43,000 half interest W/C Bankroll 811D daughter of W/C Angel 7114E that sold in the 2023 Production Sale to Harrell Cattle Company. She continues to set the standard of excellence from a type and kind standpoint and has quickly hit the ground running with both sons and daughters to feature through this sale over the past two years. This flush has delivered the highest performing, biggest growth and most powerful results yet! Check out the class leading weaning weight figures of JWC Crossfire N425, and you can trust that all three will be easy to spot on sale day! We think there is serious value to be placed on the consistent homozygous polled and black traits too.

LOT 34 JWC TRUST FUND 675N

JWC Trust Fund 675N is a highlight of the offering, and has been a favorite at every stage of development! He offers incredible shape, a wide and burly dimension, and a massive amount of capacity. We appreciate the added look and extension that this bull possesses and the power of his pedigree only adds more grit and fortitude about his potential in production. Either side of his pedigree aligns some of the best in the business. His sire, RJ Trust Fund 212K highlighted the 2023 edition of Embryos on Snow, commanding \$135,000 and since has become one of the most exciting and highly demanded Simmental and Composite Show Heifer sires across the business. The dam of 675N stems from the powerful WLE Copacetic E02 x W/C Angel 7114E mating that resulted in the incredible JWC Kelce 230K donor that is the dam of Lots 38-41. We dig this phenotypic standout, and think that he is the cowman's dream that will sire stock that carry a cowherd into the next generation.

The ultra-attractive JWC Living Proof 815N rounds out the sons of JWC Karen 250K with a bang! This son of the \$75,000 JWC 2/F Living Proof 283L is homozygous polled, extra bold bodied, and awesome at the ground. The legacy of the Angel cow family has been felt across the entire breed, and he carries two potent shots of the lineage with both 7113E and 7114E both appearing in his two-generation pedigree. The Angel cow family's influence and generating potential is timeless so we suggest getting your hands on it whenever the opportunity becomes available.

The sons of W/C JWC Mainstream 885J have been very impressive! He was the high selling bull from our inaugural 2023 Production Sale and is a proven herdsire that leaves nothing to the imagination about his ability to propagate quality. JWC Mainstream 625N comes both homozygous polled and homozygous black, and leads off the sons of the up-and-coming JWC Kelce 230K donor that will be a strong maternal force going forward. He trends towards adding growth and ribeye area genetically, and in person you will find him to be a husky brute that is sure to pack a punch and increase muscle in his progeny.

LOT 38 JWC MAINSTREAM 625N

W/C JWC MAINSTREAM 885J
Sire of Lot 38

Two sons of the W/C Fort Knox 609F flush on JWC Kelce 230K are featured in this offering, beginning with the cool brokled faced, JWC Fort Knox 1055N. We think this purebred stands out in terms of quality, shape, dimension, and performance! 1055N is a massive bodied, bold centered, big topped herd sire candidate that is backed by multiple generations of females that have made a significant impact in the beef business. Note his impressive combination of top 30% BW and top 35% YW, along with top 20% ADG.

The striking baldy face of N1035 is just the beginning of the quality he has been blessed with. His ultra-high quality hair coat, and masculine look of balance from the side are the major components that set this herd sire prospect apart! He is the second member of the W/C Fort Knox 609F x JWC Kelce 230K flush, one that has proven to be highly successful and very consistent. We appreciate the skeletal quality and flexibility that this homozygous polled purebred brings to the table. High quality stock with an elite maternal support system!

W/C FORT KNOX 609F
Sire of Lot 39 & 40

LOT 40 JWC FORT KNOX N1035

JWC Living Proof N1015 offers up calving ease predictions, along with the security of a powerful cow family, and a very impressive phenotypic build. Note his top third or better calving ease and birthweight figures, along with a large ribeye area prediction, just furthering his case as a versatile breeding piece that will provide improvements towards profitability for a cowherd.

Needless to say, the pedigree that supports this trio is founded upon multiple breed leading matrons that need little introduction to Simmental enthusiasts. They are direct sons of the highest revenue generating female known to the history of the Simmental breed, and maternal brothers to some of the most prominent and predictable AI sires ever utilized, and come embedded with endless amounts of maternal power and in turn production abilities. Most recently their maternal brother by MR HOC Broker was our \$230,000 high selling bull in 2025, JWC Engage 144M, a sire that has already gained legitimate momentum as go to sire for breeders across the nation. Something to note is the added calving ease that the genomics predicts with these brothers, particularly the Lot 43 & 44 brothers who both rank in the top 10% of the registry. If you are looking to add eye appeal, maternal function, replacement female quality and longevity to your operation, then mark these brothers as ones to find on sale day!

LOT 45 JWC SURE BET 1345N

A very interesting breeding piece here! JWC Sure Bet 1345N is the result of a mating we have been dreaming up for some time now, and we couldn't be more pleased with the results. This homozygous polled purebred is a 3/4 brother to the legendary, and prolific W/C JWC Angel 9005G donor that has been an anchor for this program since day one. He comes with predictions for calving ease, and ribeye area, and his pedigree suggests that his generating potential is immense regardless of your production goals.

W/C JWC ANGEL 9005G
3/4 Sister to Lot 45

LOT 46 JWC JOURNEYMAN 1125N

JWC SH Khloe 490K was the \$32,000 purchase of Evie Jones. She is a W/C Fort Knox 609F daughter of W/C Harrell Angel 7110E that has proven through her first to progeny that she is bound for an impressive career in production! Her first son, W/C JWC Trident 9727J was a very impressive calving ease option that sold for \$9,000 to Martin Weber. This next edition of the 490K story comes with more power and performance, and is sired by the popular OMF Journeyman J24 AI sire. Note the impressive real world growth trends this bull exhibited, and we excited about the fact that he is supported by multiple generations of females that have made a significant impact in the beef business.

JWC Right Now 865N is a very versatile breeding bull that offers up positive attributes across his genomic profile, delivering a performance package that reads for both calving ease and growth additions in the same scenario. He comes in a bold and heavy muscled build too, and is certainly an impressive specimen in person, and combining his genetic predictions, with his extra powerful build promotes him to strong herd bull candidacy.

JWC Angel 0108H
Full Sister to the Dam of Lot 47

LOT 47 JWC RIGHT NOW 865N

Stemming from a very productive daughter of MR SR 71 Right Now E1538, JWC Greater Good 945N joins his band of maternal brothers in providing high quality options to stockmen that demand increases in profitability. The maternal brothers who have gone before 945N have been sought after by cattleman that pay attention, JWC Night Watch 0113K sold in the inaugural sale for \$17,500 to Craig and Chad Muntefering and last year, JWC Mainstream 774M sold for \$9,500. This next edition to the family tree continues the tradition of excellence, coming with the promises of calving ease and low input fleshing abilities. These sons of WHF Greater Good J45 come with a structural design that is set to carry their impressive muscle pattern with ease.

LOT 49 JWC RESOURCE 305N

A pair of full brothers that are sure exciting additions to the sale. They are full brothers to the CK Cattle and Windy Creek Cattle Company sire of distinction, Bridle Bit Recharge K256 that commanded a \$100,000 valuation last year at "The One" Simmental Sale at the National Western Stock Show. He is the kind of sire that can significantly progress the genomic performances of a cowherd in a single generation, and has proven to do so without sacrificing phenotype. Again in 2026, the sons of Bridle Bit Recharge K256 stand out in Highmore, and have been impressive around the nation. Here is the opportunity to acquire either one or two full brothers to this industry standout, check out the incredible set of EPD tabulations that come all-inclusive with these profit builders, with elite rankings all the way across their ledgers. There are limited opportunities to dive right onto the frontline of the genetic pathway of profitability like this, so do not second guess the opportunity when it does arise.

We are very excited to offer up some elite genomic and profitability opportunities like never before, and on the journey towards bridging the gap between cattle that are impressive on foot, and breed leading on paper delivers us this high profitability promoter! JWC Recharge 105N checks literally every box, being both homozygous polled and homozygous black, and ranking in the top 10% or better of the breed for 10 traits! Truly a special creature that regardless as to whether you are inspecting him, phenotypically or by the genetic markers, he will impress. Pedigree wise he leaves little to the imagination as well, his dam was our selection out of the Lazy C Diamond program, and is a CDI Innovator 325D daughter of the iconic herd bull generator, WS Miss Sugar C4. C4 has built a legacy of excellence across the breed, she commanded \$210,000 just a couple of years ago to Forrest Lucas, and has a long, long list of sons and daughters that lead the business. Pedigree, phenotype, and EPD performance all wrapped up into one dynamic package here!

OMF TIME LESS B100
Legendary Dam of Lot 52 & 53

LOT 52 JWC RECHARGE N1805

Two full brothers from the incredible OMF Time Less B100 female. B100 has been an anchor for the OMF and CK programs, and generated several breed influencers including OMF Epic E27, the \$128,000 OMF Kristy K88, and the \$70,000 OMF Ludacris L17. We cannot forget that she generated the \$300,000 OMF Doc Lynn L92 that has breeders very excited after this first calf crop, and one of the first daughters commanded \$110,000 this past fall at the HCC Customer Appreciation Sale. In one of the most genetically geared matings ever assembled on B100, the results have produced a pair of brothers that position themselves in a spot where they offer cattleman a very exciting combination of calving ease, carcass quality and all-around profitability. Latch on here if you are serious about aggressively moving your cowherd into the future.

LOT 54 WHF/S-H RECHARGE N459

A high caliber, calving ease specialist that more than satisfies those who care about phenotypic quality, and want to keep their genomics in check. WHF/S-H Recharge N459 is an impressive specimen that has been an outlier from early on, and continues to mature with extreme quality. His dam made her way to South Dakota from the Wayward Hill Farms program of Kentucky and is a direct daughter of our WHF Delilah 45D donor, and instills a high level of maternal power in the pedigree here. We think progeny of WHF/S-H Recharge N459 will be extra valuable, regardless of sex, they are likely to come light and unassisted, yet explode towards weaning, just like the trend N459 displayed. The daughters will be the ones you quickly sort to the replacement pen, and will build a long legacy within the cowherd just like the females we are trusting from this cow family to build ours.

LOT 55 JWC RECHARGE 245N

We think stockmen and women will find a lot of value in these Bridle Bit Recharge K256 sons, as not only are they built with power and stoutness, but they follow an appropriate maturity pattern, and come with a genomics package that is hard to beat! He became an obvious choice for us to keep improving the scientific data embedded in our offering without sacrificing the phenotypic quality that we have worked so hard to build, and we think the results should appease the most progressive stockmen. From the maternal powers of WHF Delilah 45D, we present JWC Recharge 245N, a dynamic herd bull prospect that comes with improvements right the way across his genetic base. With both top 25% BW and top 30% YW figures, he is the do it all kind that offers value to stockmen with varying production goals with him impressive profitability indexes.

WHF GREATER GOOD J45 — Maternal Brother to Lot 55-58

LOT 56 JWC LIVING PROOF 775N

JWC Living Proof 775N comes with a combination of eye appeal with added shape, skeletal quality, base width, and length that it takes to produce cattle that demand an added premium. He is a direct son of the \$180,000 valued WHF Delilah 45D donor. A female that needs little introduction as her progeny are steaming towards the front of the business, and include the pair of KCC1 Exclusive 116E brothers WHF Greater Good J45 and WHF Entourage H450. Another son, WHF Point Proven H45, is the leading sire for Trennepohl Farms and her daughters are proving to be just as monumental to the breed, paving their own stories of success. WHF Delilah 450H, was a fan favorite the fall of 2022 when the Eggersman brothers showed in Louisville and she was purchased in the makeup arena by Boyert, Buck Creek Ranch & Schaeffer Show Cattle. She has quickly elevated her spot to the top of the totem pole for these programs, raising a high seller for the Schaeffer program this past fall. Another outstanding daughter of 45D would be the up and coming, WHF Delilah 459K donor that is the dam of the Lot 54 bull.

Two full brothers to Lot 56 that continue the reputation of excellence that this debut flush has created. We really see the WHF Delilah 45D donor taking a stronghold at the front of the donor pen, and we have big plans to build a formidable cow family around her influence. With the early reports of her performance here in Parkston, it seems as though we are headed in the right direction as her progeny come with the perfect balance of eye appeal, longevity, maternal quality and real-world performance.

LOT 59 JWC KINGPIN 935N

RJ JWC Sherri 0151H is certainly cementing her place among the females that are set to carry us on into the next generation. She is an exciting daughter of Profit that is a role model in her build and kind. To this point the 0151H donor has been represented by her mating with W/C Kaiser 240J where 8 sons have averaged \$8,575. While her sons to this point have been very well received, she proves again with several new matings that she consistently makes them stout and high performing! JWC Kingpin 935N is heavy structured, thick stifled and wide backed, and still comes designed upon a sound set of feet and legs and reads with longevity of build. This purebred, homozygous polled stud delivers a high growth data and genomics ledger and we think is bound to sire this same added growth and performance going forward.

RJ JWC SHERRI 0151H
Dam of Lot 59 & 60

The second of the RJ JWC Sherri 0151H sons is an absolutely elite option to sire massive additions of growth and pay weight! He is sired by HRF Crossfire K12 and ranks among the most elite 1% of the breed for WW & YW, and you will also find him among the top 10% or better for ADG, MWW, and REA. The last two crops of RJ JWC Sherri 0151H sons have been favorites of those who came and inspected the offering, as they come with an extra shot of shape and power, but still are balanced and eye appealing, this year will be no different. If high performance and the ultimate addition of pay weight and growth is what you're looking for then there may not be a better option in the entire offering than what you will find right here.

LOT 61 JWC LIVING PROOF 155N

The sons of HPF Victoria B396E are consistently super impressive in their confirmation, presence and structural kind. They too come with very moderate and acceptable birthweights, yet still offer value from a growth standpoint. The progeny of this maternal line has a look of quality that is accepted just as readily in the showing as it is by stockmen making money over the scale. Multiple daughters have won big banners on the chips of shows across the nation and in the same breath, the sons work for some of the best stockmen in the area. The versatility that this maternal line offers is impressive, and allows for cattlemen and women to not only add dollars to their pocket by marketing feeder cattle that weigh more, but they also get to retain high quality females that are built with maternal function and longevity. The homozygous polled, strip faced JWC Living Proof 155N has evolved into one of our all-time favorite sons of the legendary HPF Victoria B396E, and combines not just an incredible phenotype but comes with plenty of positives from a genomic standpoint as well. The JWC 2/F Living Proof 283L mating on HPF Victoria B396E is a new one, but has aligned perfectly, and combines two of the most potent and dominating cow families that we have relied on since the beginning of the JWC program, they haven't let us down, and we don't think they will let you down either!

LOT 65 JWC TAHOE 1045N

JWC Tahoe 1045N is an impressive specimen, and while he is the only representative of the Tehama Tahoe B767 influence, you can sign us up for more if this is what they all develop into. This half-blood stud comes homozygous for both black and polled traits, and delivered a genomic package that few in the offering could match, as across the board you will find little to discourage investment. He delivers impressive predictions for calving ease, weaning and yearling weight, milk, carcass quality and yield, and all-around beef business profitability. Certainly a have your cake and eat it to scenario comes with the genomic trends of 1045N, and in person his performances match up to the hype, as he has fit the bill of excellence at every stage of development, and will impress on sale day. A real-world beef bull that has a lot to offer stockmen that demand the best.

TEHAMA TAHOE B767
Sire of Lot 65

LOT 66 JWC RIGHT NOW N1525

JWC Right Now N1525 is a high-quality calving ease prospect that still supplies an impressive growth trend and phenotypic package. Those who know the program, know how dynamic these MR SR 71 Right Now E1538 sons are in the commercial beef sector, they appease cattleman and women that pay attention to quality and profitability, and offer a one-of-a-kind combination of real-world calving ease, performance, carcass quality and longevity, all factors to put a program on the positive side of the balance sheet.

LOT 69 JBSF JWC NAVIGATOR 578N

This will be the second son of the incredible HETN JBSF Nancy to be developed and marketed here in Parkston, and boy does this cow know how to raise herd bulls! JBSF JWC Navigator 578N is backed by a pedigree that is littered with several of the Simmental breeds most phenotypically impressive individuals, and we think the portion of his pedigree has delivered the goods here with an impressive beast! Sired by the National Champion and sire of National Champions, WLE Copacetic E02 and out of a very impressive full sister to the National Champion, America female that was campaigned by the Sullivan firm, it should come as no surprise that you are going to find an outlier in the flesh here. He sports a DNA package of being homozygous polled and homozygous black, and has answered any questions you may have about his potential to perform from his EPD package with very positive real-world stats. There is no science that could comprehend the impressive specimen that this purebred has matured into. JBSF JWC Navigator 578N is set to sail a program into the next generation by siring stock that are next level, whether that be feeder cattle, show heifers, or herd bulls.

LOT 72 JWC JUST CUZ 635N

LOT 73 M F ROSE JWC 5429N

JWC Just Cuz 635N is a big and bold brute that stems from the goods of the ZTGC Just Cuz 52K sire line. He himself has always been a heavy and dense built half blood, and with the genomic predictions that come from his DNA evolution, it looks as though the same type of cattle can be expected from his progeny. He reads with top 20% WW predictions, and tests homozygous for both polled and black traits, qualities that automatically help provide a consistent product.

TJSC COPING WITH DESTINY 9K
Sire of Lot 73

WHF Summer 365J stems from one of the most iconic females in the history of the Simmental breed. She is a direct daughter of the WHF Summer 365C female that has built an impressive legacy of excellence. From being a Supreme Champion Female at the American Royal herself, to generating both herd bulls and daughters that are both National Champions and trend setting producers, there has been no end to the impact she has or will have on this business. WHF Summer 365J herself has built quite the resume in production, she just recently was a feature of the 2026 Rosebud Cattle Company "The Resolution" Female Sale where a half interest sold for \$20,000 and maternal sisters to Lot 73 sold for \$15,500 and \$16,000. This TJSC Coping With Destiny 9K son is a stout featured, extra heavy-duty stud that comes with a hefty set of running gear, and big burly muscle design.

LOT 74 JWC SFD5 POINT PROVEN N1625T

We are excited to debut a new genetic source in the IR Ms Geneva X200 donor. Eric Sumption gets all the credit in finding and utilizing this outlier kind of female that combines the most elite genomic tabulations, with a phenotype and structural build that we pride ourselves on being able to offer to our friends and customers, and from this search emerged the outcross pedigree, IR Ms Geneva X200 female that fit the bill. 2026 sees two high quality sons by WHF Point Proven H45 sell. JWC SFD5 Point Proven N1625 is the kind that just keeps maturing with more power and performance, he has a longer maturity pattern, and has not let off the gas since his very appropriate 86lbs. birthweight. As time prevails, he just continues to grab gears, coming to the weaning pen with over 850lbs. of pay weight and continues that trend at yearling to record a very impressive 1440lbs. yearling weight. Couple all these real-world performance markers with his top third predictions for CE and BW, and we have a very versatile breeding piece on our hands.

IR MS GENEVA X200 — Dam of Lot 75 & 75

LOT 75 JWC SFD5 POINT PROVEN N1575

The full brothers selling as Lot 74 & 75 stem from a fresh genetic source in IR Ms Geneva X200. Her mating here with WHF Point Proven H45 offers up a pedigree that is outcross to a lot of the genetics that followers of the program have been investing into over the past 5 years, and so we think offers up an exciting opportunity to add sires to the herd bull battery that are built like the kind you expect from JWC, but come with a different twist to the pedigree. Pure pounds and additions of power are what you can expect from your cowherd's exposure to this impressive beast, we think his progeny's race to the weaning pen will be very advantageous and noticed immediately.

IR MS GENEVA X200 - red daughter — Maternal Sister to Lot 74 & 75

We think you will notice a push to add some genomic power to the equation through several highlight lots in this bull division, and JWC Point Proven M1515 is certainly one that leads the charge from the front! This purebred profit driver records positivity all the way across his ledger, with high markings for calving ease, birth weight, weaning weight, yearling weight, carcass quality and all-around profitability. His dam LCDR Ms Heirloom 92H was sourced from the Lazy C Diamond program of North Dakota, and stems back to one of the most legendary and recognizable herd bull generating females to ever grace the business, WS Miss Sugar C4. Maternal brothers to the dam of M1515 include a long list of breed influencing sons such as WS Proclamation E202, LCDR Favor 149F, KBHR Revolution H071, LCDR Progressive 106G, LCDR Impact 134F and KBHR High Road E283. We think this standout, multipurpose sire is just the beginning for this this up-and-coming donor going forward, as her impact looks as though it could be immense.

We are excited to include ROSE Point Proven 052N in the lineup as this stud comes with a diverse set of quality's that go well beyond the eye appealing, and powerful package that you will find in the pens on sale day! He is a direct son of the dam of distinction, TJ 22X, who is best recognized as the mother of the impactful, EGL Firesteel 103F, AI Sire that sold for \$85,000 and has blazed a trail in production and proven to sire cattle that are appealing on either side of the flesh. Most notable would be his son, WHF/JS/CCS Woodford J001 that has seen heavy demand recently from a wide spectrum of Simmental breeders. The calving ease predictions of 052N allocate him heifer bull candidacy, and the maternal power of his pedigree suggest he is going to be a female maker too!

Here we have a trio of full brothers from the HRF Crossfire K12 combination with the incredible ME Queen Of Crackerjack 202 donor that works for Sumption Farms. This combo has resulted in a powerful band of brothers that have excelled among the cohort with every day of development. These brothers are the kind that look to add growth and pay weight, and will sire cattle that are easy feeding and earlier maturing in their development. With the promises of homozygous polled and homozygous black status, you can feel comfort in the consistency of coat color and horn status that comes with their service, and they offer up the ideal situation for a rancher looking to turn out a group of bulls to deliver a uniform calf crop. The dam of these powerful studs comes with the backing of the immortal S A V Net Worth 4200, a legendary female maker from the Angus registry that was built on the foundations that made the Angus breed the "go to" option before we got carried away with making mating decisions with a calculator.

LOT 82 M F JWC GREATER GOOD 534N

LOT 83 M F JWC GREATER GOOD 540N

A pair of full brothers from an exciting young trailblazer, but beyond the first maternal generation you will find several of the most influential Simmental animals of the past two decades. STCC Lila 116J is a daughter of the \$109,000 JBSF Berwick 41F that sold through Embryos on Snow that was campaigned by Kai Thomsen to the Supreme Champion Female title at the 2022 South Dakota State Fair, and stems back to the iconic HF Serena 74Y donor that has been a monumental donor with well over \$3 million in lifetime earnings. A maternal brother to the granddam of this pair is the world record setting \$620,000 half interest AI Sire, STCC Tecumseh 058J, along with multiple six digit show heifers and females of relevance. These WHF Greater Good J45 sons offer up whole herd rewards, and will certainly increase the female retention and maternal quality of the cowherd.

LOT 84 JWC GREATER GOOD 1065N

JWC Greater Good 1065N is backed by the W/C Loaded Up 1119Y donor known as AHLB Fate 805F. She was bred in the Ahlberg Cattle Program of Nebraska and offers the signature "Loaded Up" look of maternal excellence that encompasses udder quality, fleshing ease, and fertility. This son of WHF Greater Good J45 is an eye appealing 3/4 blood that offers excellent shape down his top, with the added length and power necessary to sire cattle that hit the scales harder.

JWC FORESIGHT 173L
Maternal Brother to Lot 84

LOT 85 S-H JWC GREATER GOOD 125N

A calving ease prospect that comes from the very memorable, and incredible built Collision Forever Lady 145J that was purchased by Sutton Hohn for \$30,000 in the Inaugural JWC Production Sale. 145J is a daughter of W/C Bankroll 811D that makes us excited to be in the business, and stems from Angus royalty, as the Forever Lady cow family has been a pivotal building block to many of the National Champions that have been sashed in the past decade. S-H JWC Greater Good 125N came light and unassisted, and his top 10% CE, and top 20% BW figures predict he will sire the same trend. We think the females from this 3/4 blood will be very valuable breeding pieces.

Some of the most decorated genetics known to the Simmental breed sell here! The dam of this pair, JSUL Leaping Proud 0117H was Sara Sullivan's Fourth Overall Purebred Simmental Owned Female at the 2021 AJSA Classic, and while her time on the tanbark was limited but successful, her true value has been recognized as a female in production. She stems from the Sullivan Farms cornerstone JBSF Proud Mary female that has laid claim to just about every accolade made available. From the first set of embryo calves of 0117H came the \$200,000 high selling female in the 2023 Donors & Divas. This female, JBSF Lickity Split 325L is a full sister to both Lots 91 & 92. We think the hereditability of quality will be easy to notice when you find this pair in Parkston as they are built with a high value look. These herd bulls offer lots of versatility and should appeal to cattlemen with varying production goals through their pedigree that will supply genetic consistency.

ROSE MISS STAR F904 – Dam of Lot 93

LOT 94 HARRELL JWC BROKER N1505

There are no limitations to what is possible with the progeny of MR HOC Broker, as for the past decade these cattle have rose to the top across all facets of beef production. HARRELL JWC Broker N1505 leaves little to the imagination from a power and quality standpoint, and of course is a paternal brother to the \$230,000 high seller from last year! This time the maternal power comes from an incredible Angus female that stems from the Keymura Katy cow family that has been trusted by several of the most successful programs across the nation. Note the incredible growth trend of this stud as he motored towards an impressive 1417lbs. yearling weight.

MR HOC BROKER
Legendary Sire of Lot 94

LOT 95 JWC MR 175N

A son of the calving specialist and 2022-2023 ROV Angus Show Bull of the Year, Conley Ransom 1810. JWC Mr 175N comes with a super smooth and balanced build, and will sire the earlier maturing, easier feeding kind that hit the rail with extra profitability. He came to the weaning pen with over 800lbs!

A powerful purebred Angus stud that is sired by Styles Amendment Z55 and comes from the incredible S A V Net Worth 4200 donor, ME Queen of Crackerjack 202. If your selection is made by in person inspections then it will be easy to gravitate towards this stud because he comes with plenty of extra muscle and shape, particularly when compared to his breed contemporaries. The 202 donor has a strong presence in this sale, and you will note her consistent ability to generate sons that are bold and burly, and come with a very flexible and agile structural design.

We begin the red hided offering with a W/C Bet On Red 481H son of the RJ JWC Sherri 0151H donor that is built with a super high quality structural design, and look of longevity. JWC Bet On Red 665N is a purebred, homozygous polled stud that comes with the promises of adding growth and performance genomically, and will increase ribeye area with his top 15% EPD. We think he offers a lot of versatility to red hided enthusiasts, regardless of their breed preference, and would be particularly useful in a scenario to add shape and power to a set of Red Angus females. His dam, RJ JWC Sherri 0151H is also the dam of Lots 59 & 60, and over the past three years, both the sons and daughters of this Profit daughter have been favorites of those who came and inspected the offering. They come with an extra shot of shape and power, but still are balanced and eye appealing.

There is quality in every division of this sale, and JWC Trust Fund 195N leads it for the red hided division! This homozygous polled, purebred offers a full repertoire of quality traits that reach further than what you will find on paper. He is a son of the \$135,000 half interest RJ Trust Fund 212K, that was a feature of the 17th Annual Embryos on Snow, and comes from the genetic powers of the most identifiable and highest revenue generating female in the Simmental registry, Miss Werning KP 8543U. His pedigree combines several of the most productive, most acclaimed and highest revenue earning females in the Simmental breed into one pedigree, and has the phenotype that cattleman are demanding. He is an impressive creature, coming with added width, substance, and eye appeal, and we don't think it is going to matter if his progeny are headed to the feed yard, bull pen, replacement pen or showring, they are going to float to the top.

The meeting of two of the most progressive individuals in our breed repertoire occurs here with JWC 2/F Living Proof 283L and W/C JWC Angel 9005G. This resulting baldy faced purebred sure has us excited, as JWC Living Proof 925N is a long sided, hefty featured stud that delivers on the promises that the masses of maternal power in his pedigree would suggest. He comes with a very versatile genomics package as well, sporting top 20% or better calving ease and birthweight, and we think looks to be a sire that will generate incredible replacement females.

**LOT 100 JWC LIVING PROOF 925N**

LOT 102 ROSE SLIK JOHNNY CASH 802N

ROSE SLIK Johnny Cash 802N comes with a different twist to the pedigree, yet one that lines up with our goals to supply real world beef bulls that will add pounds and profit to a cowman's bottom line. He is a son of the highly anticipated, WD ROSE Johnny Cash 342 that was the Reserve Champion Red Angus Bull at the 2024 Cattlemen's Congress, and has stirred up plenty of interest across the breed with his exciting first calf crop. Maternally the pedigree traces back to the prolific, SJF Charlie lineage that has cemented its position as one of the most prominent Simmental cow families in the business, particularly when it comes to red hided stock. The EC Rebel 156F daughter in support of 342 is a prime example of why this sire has been held in such high regard for so long now, and he continues to appear in the pedigree of highly demand breeding pieces.

In the strongest division of red bulls we have ever offered comes the curve bending, JWC Captivte N1775 stud. His genomic package may appeal to the widest array of red hided enthusiasts, as he comes with predictions of siring both calving ease and added growth! You are likely to find positivity across his entire ledger, and maternally you will note the presence of the breed changing, EKHCC Red Jewel 760 female that has made a profound impact for the past two decades.

**LOT 106 JWC CAPTIVTE N1775**

LOT 107 JWC CODIGO 1530K

JWC Codigo 1530K is a herd bull that we have been very proud of from early on! Being a fall born, and a little different pedigreed, we decided to keep him around and utilize for ourselves for the past two breeding seasons. He has always been one of the most impressive specimens, coming with an unorthodox level of flexibility, and a look of elite quality and design that is hard to build in a purebred Simmental. He was one of the first born sons of the \$300,000 half interest TRCC Pandemic sire that highlighted Embryos on Snow in 2022, and has built a strong reputation for sire outlandish feature, and futuristic look. Maternally he sources his power from the leading, W/C Angel 7114E donor that only continues to build upon her resume of success, and lay claim to being the most versatile donor in our battery. Both phenotypically and genetically, we know there are big things ahead for JWC Codigo 1530K, as he is just a single mating form siring the highest valued Simgenetic animals in the business. His pedigree doesn't allow for wide spread use here at the JWC, and for that reason only will you find an elite, AI quality herdsire available for sale on February 13th!

Straight out of the herd bull battery comes this purebred Red Angus stud. 4SJJ El Rey M423 is sired by the National Champion, Red Diamond El Rey 102 who was the Supreme Champion and National Champion Red Angus Bull at the 2023 Cattlemen's Congress, and the Champion Red Angus Bull at both the 2022 National Western Stock Show the 2022 Fort Worth Stock Show. Red Diamond El Rey 102 has arrived as the replacement for the legendary MANN Red Box 55C sire that was a revolutionary in the breed. This son continues the tradition of excellence that you would expect from such a high-powered pedigree, and was our service sire to the red hided and colored stock this past year. We think he offers more long-term value to a cowherd than just his calving easy proficiency.

SELLS OPEN AND READY FOR EMBRYO PRODUCTION

There are no doubts about it, we owe a lot to the mating that supplies the genetic profile here! Daughters of the W/C Relentless 32C x W/C Miss Angel 2870Z mating have been a major component to putting our program on the map and continue to lead our program headed into the future. The phenotypic and maternal quality of these females has proven to withstand anything thrown their way, and we think their versatility is just about unmatched in the Simmental business. We are proud to present a full sister to the legendary trio of W/C Angel 7113E, W/C Angel 7114E and W/C Harrell Angel 7110E. Between these three females, there is well in excess of seven digits of profit, and they have most certainly helped build some infrastructure in Parkston. Just approaching the prime of her breeding career, W/C Angel 81F presents herself as one of the next prevailing, and breed leading daughters of the Angel matriarch. Herd bulls, donor females, and show heifers, there is truly no limit to the potential of this female and dependent on sire choice, she can be geared in just about any direction.

LOT 202 JWC 81 ANGEL 477M

JWC 81 Angel 477M is a direct daughter of the donor female that sells as Lot 201, and this mother daughter combo sum up why the "Angel" cow family has been our most trusted source of excellence for quite some time now. 477M adds grit to our claims about the potential of 81F to be a frontline donor female for a program that needs to add versatility and supreme maternal strength. She is a daughter of the high growth promoting, W/C JWC Mainstream 885J, and his presence injects a world of performance driven genetics. This 3/4 blood, homozygous polled female is one that offers up a perfect balance of power and poise, and will be a female that you can build a cow family around, and at the same time she looks to be the kind to generate pounds heavy, burly built male sexed progeny.

W/C JWC MAINSTREAM 885J — Sire of Lot 202

W/C HARRELL ANGEL 7110E — Full Sister to Dam of Lot 202

LOT 203 JWC ANGEL 405M

Female buyers will have access to buy into the most potent, and dominating cow family's that call home to Parkston, and this pair of females are full sisters to the most prolific and most represented female in this offering the past two as well. These full sisters to W/C JWC Angel 9005G prove that this offering is loaded with the most elite genetic opportunities that we have to offer here in Parkston, as they come with the genetic potential to reface a program, and generate serious returns on investment. Yet something to note with this pair, is that they both come with the genetic advantage of being both homozygous black & homozygous polled. Just to give you a grasp on the potential of these females, in 2025, their sister 9005G had 15 sons sell in the Production Sale, they averaged \$18,350, along with 5 daughters that averaged \$20,050. Needless to say, the opportunities for ROI are significant here. 9005G remains one of the highest selling females we have sold to date, receiving a \$120,000 valuation as a bred heifer. This momentous transaction has set the tone for an incredible career in production, and we get this same feeling about the pair of full sisters that will sell. In person we think this set of sisters leave little to be desired, and remind us of their intriguing sister when she was at this age, coming with an incredible look of quality, being super powerful in her shape, yet comes with an incredible balance and femininity. When it comes to the power of pedigree, these females may be unmatched, as generations deep on the maternal side aligns the good stuff and you can identify multiple million-dollar producers that have received nationwide recognition and acceptance. A fast track to the front of the business exists here, and we think these females will be ones we hear from for a long time to come.

In one of the most powerful and high performance matings ever experimented on W/C Miss Angel 2870Z comes a trio of full sisters by RFS Heavy Hitter H45. Boy did this synergy crank it up another notch, as the results have proven to be potent and impressive. As you would expect, there is a very evident injection of growth seen here, and both the genetic data and scale tells the tale of the high-performance genetics embedded. With impressively consistent tabulations for WW, YW, ADG, REA & MWW, these females are most definitely more than just an anomaly, but will serve as the consistent source of added performance. The daughters of 2870Z have led our program for more than a decade, they never cease to amaze.

With the most impressive spread from birth to weaning, JWC Angel 457M offers up a curve bending growth trend that every stockman can appreciate. Build and kind wise, she offers up a super powerful shape, with added pin width, rib shape and center mass. We love that these females offer up the perfect blend of power and maternal kind, and in turn are very versatile purebred breeding pieces.

LOT 207 JWC ANGEL 457M

Rounding out the daughters of W/C Miss Angel 2870Z comes a beautiful profiling WHF Greater Good J45 purebred that is both homozygous polled and black. We love the added maternal shape and build of this high density, bold ribbed, and extra captious matron. Aligning 2870Z with WHF Delilah 45D brings together two of our all-time favorites, and the results are all we could have hoped for. Note her big swing from very moderate birthweight, to super impressive weaning weight, she is the kind that will get it done in the real world! She comes bred up to her AI with ES Five Star Limitless LJ39, a mating that blends superior genomic and phenotypic quality with powerful pedigree.

LOT 209 JWC 9005 ANGEL 420M

Here we present the first sisters from the combination of the high indexing, and calving ease specialist, Rockin H Captivate J75, with the most prolific herd bull and donor female generator in the JWC battery, W/C JWC Angel 9005G. The results have out reached our expectations, as this trio of sisters come with serious quality, both through visual inspection, and when evaluating their dataset. Across the spectrum you will be able to note quality, as advantages for Calving Ease, Birthweight, Yearling Weight, Milk, BF, REA, API & TI can be found. For the calving ease predictions, we have been particularly impressed with the added shape and stoutness that these females have matured with. Make sure to find these daughters of the legendary 9005G when you get to Parkston, as they have donor quality written all over them, particularly the incredible red hided JWC 9005 Angel 420M, she is quite the sight to see!

Just like last year, the CLRS Guardian 317G mating on 9005G has supplied the goods, a full sister, and two brothers to Lot 212 highlighted the offering, selling to Meyring Cattle Company, Craig Bialas, and Garry Durham. They are the kind that offer positives to stockmen from a wide array of production scenarios, being phenotypically suited to thrive in a range of environments, and come with the genomic predictions to be profitable in just about every facet. With that in mind it certainly will not take a geneticist to digest her genomic profile and find out that she offers an incredible set of traits that suggest excellence, along with being homozygous black and homozygous polled! This daughter of the \$100,000 CLRS Guardian 317G fits the mold from both angles, as she excels just as readily on the hoof as she does on the paper. Genomically she ranks in the top third of the breed or better for 7 traits, and combines both calving ease and growth excellence. She fits several different production goals and ties together lots of unique pieces in one package.

LOT 213 JWC 9005 ANGEL 409M

A full sister to one of the highest performing flushes on 9005G to date! The combination with LCDR Favor 149F introduces the influence of the legendary, WS Miss Sugar C4 donor, that has to be one of the most prolific donor females the history of the breed through multiple AI sire sons that have been used by the most progressive cowboys and cowgirls. This purebred donor prospect leaves nothing to the imagination in regards to payweight and pounds. She herself has always maintained an advantage over the cohort, and remains a heavy, and stout featured matron in the making. This LCDR Favor 149F mating on 9005G has been successful over several seasons now in the bull division, and stockmen that realize the advantages of high growth cattle find them in a hurry.

JWC 9005 ANGEL 325L – Full Sister to Lot 213

LCDR FAVOR 149F – Sire of Lot 213

LOT 214 JWC 9005 ANGEL 469M

A mating that has been sought after from a phenotype standpoint by some of the most diligent eyes in the business. When we laid eyes on RP/BCR Eminence H005 for the first time at 605 Sires, there was no question about how incredible of a specimen he was, and we knew we needed to jump on board with the trend. He is a full brother to the National Champion, Rocking P Private Stock H010, and stems from the incredible RP/MP Built To Love A021 donor. Over the past three years he has become one of the go to sires for showing breeders, and has become even more popular as his potential to sire elite quality proves to be potent. A full sister to this mating was raised by the Reitzenstein family of Colorado from an embryo purchase, and was a high seller in their fall female sale at \$60,000. The genetic tree that supports these females is immense, and has seen many bountiful harvests, the Angel cow family has developed a reputation for consistently pushing the boundaries for elite phenotypic traits and we think the generating ability of these three females will follow in the footsteps of the reputation that are molded upon.

The two full sisters here align some of the stars of our program, combining the \$110,000 OMF Journeyman J24 and the legendary W/C JWC Angel 9005G and it has provided the outlandish results that we had hoped for! This pair have the high productivity look, and remind us a lot of their maternal sisters who have gone before her and are kicking goals in production. Latch onto these 9005G daughters while you can, they are proving to be some of the best investments you can make in the Simmental business. The full brothers to this duo were very sought after in last year's bull sale, leading off the offering, where 7 bulls averaged \$19,715 and included the \$42,000 JWC Western Feel 354M that was purchased by the Horizon View program. JWC 9005 Angel 412M has found many friends in those who have already visited the stock, as she is one impressive matron, being big ended, long spined and extra heavy duty in her structural design. She looks like the kind that would make her way to the donor pen in a hurry if she were to stick around here.

All three daughters of the OMF Journeyman J24 and W/C JWC Angel 9005G mating make for a very fun conversation about comparing the quality and prospect of generating power that each behold. These purebred females deliver a very versatile genomics package, note that 410M comes with even more advantages across the board genetically, while still being incredibly stout and rugged. She comes bred up to her AI service with the high selling, ES Maxx MK11. The homozygous black, JWC 9005 Angel 411M comes sporting all the extras in regard to shape and power, being super low in her underline, and curvy in her rib shape. The prospect of her AI sired calf by ES Maxx MK11 is exciting from both a phenotype and genomic matchup.

Here is a genetic opportunity that we promise you will not find every day! W/C Relentless 32C mated up with our go to girl, W/C JWC Angel 9005G has yielded the goods! This blaze faced stunner has some very neat pieces about her design, we love her high tying neck junction, flexibility on the move and width of structure. Being a direct daughter of Angel 9005G means that you know that the best is yet to come and the likelihood of her returning on investment is very probable. Her percentage mating to our new calving ease stud, MMR Big Iron 52L has us very excited, and you will notice that she is coming with a beautiful udder development.

LOT 220 JWC 9005 ANGEL 465M

Followers of the program realize the ultimate level of versatility that the MR SR 71 Right Now E1538 sired stock offer as they check a lot of boxes both genetically and phenotypically. With the maternal backing of W/C JWC Angel 9005G in support here and the 'Right Now' look of productivity, there is no limit to the potential that 421M has to offer a stockman that is looking to build their maternal base.

JWC 8543 Miss 479M stems from a mating that needs very little introduction, particularly after the stardom that JWC Engage 144M brought to it last year when he sold for \$230,000. He continues to be one of the most impressive specimens we have had the pleasure of breeding, and if he is not already on your breeding list for 2026, then perhaps this female will clear up any doubts you may have had. Sired by the legendary, triple crown winning, MR HOC Broker she is one that is incredibly impressive from a burliness, power and ruggedness standpoint. Every angle of inspection here finds an impressive view. From just a pedigree standpoint, 479M has enough quality to be a sale feature, yet her phenotype takes her to another level.

Not often, perhaps never again will the opportunity to purchase a full sister to the breed influencing, W/C Relentless 32C present itself, yet through the 4th Annual edition of the JWC Production Sale you will find such an opportunity. He has been one of the most influential sires in the Simmental showing over the past decade, with multiple daughters claiming the most coveted banners and accolades across the nation. His influence has been associated with siring extra feature, look and structural quality, and has been a very strong proponent towards progressing the phenotype of Simmental stock to what you will find winning banners today. Being a direct daughter of the breeds highest revenue generating female in history is another strong indicator that her potential in production is something that could change the face of a program.

W/C RELENTLESS 32C
Full Brother to Lot 223

You couldn't paint a much better picture than the one that JWC 8543 Miss 414M poses with. This homozygous polled daughter of WHF Greater Good J45 is built just how we like them, coming in a very cool built package, that is set upon a huge running gear, with a round body cavity, long spine and incredible look and presence. If you are looking to add eye appeal, maternal function, replacement female quality and longevity to your operation, then mark this female as one to make sure you find on sale day.

High end breeding pieces selling here, as this pair of OMF Journeyman J24 x W/C Angel 7113E daughters are full sisters to the \$75,000 high selling bull from the 2024 Production Sale, JWC 2/F Living Proof 283L. As their popular brother continues to become one of the most exciting new sires available to the Simmental breed, these two females become valuable breeding pieces from a pedigree standpoint alone, regardless of the elite quality that they also offer. Those who are serious about building a donor pen that is built upon cow family power, along with phenotype and genomic power need to allot some serious consideration here. These purebred females are both homozygous polled and homozygous black, and sport predictions for adding pay weight and pounds genetically. With generations of cow power stacked on either side of their pedigree, and multiple maternal and full siblings that stand on the cutting edge of the business, we think this duo are set for success in production.

JWC 7114 Angel 436M is a high powered, big outlined daughter of ZTGC Just Cuz 52K that is backed by the potent influence of W/C Angel 7114E, and boy do we think this is a match made in heaven. 436M just oozes quality and incredible presence, we aren't sure where you'd want to improve her from a phenotype standpoint, and think she offers up a build that will work in a wide area of mating scenarios depending on the direction you take her sire wise. Not only does she come with all you could ask for in regards to maternal body cavity and underline swoop, but she carries herself with a beautiful presence and ideal head carriage. She is built sleek and slender in the places you want her to be and powerful and robust everywhere else. We think the prospect of her Chestnut Jumbo 1514 sired calf is one not to be taken lightly, as he is one of the most impressive Angus herd bulls we have come across in the past couple of years, and we are so thankful to have had the opportunity to add him to the herd bull battery, he will be a sire that you hear from for a long time to come!

This pair of sisters from the 7114E matron are sired by the \$175,000, FRKG CKCC Platinum 009H ET stud that topped the 2021 CK Cattle Production Sale, and has since become an intriguing option to add expressive shape, undeniable look and a high-quality design. Those same descriptions can be used to describe the pair of full sisters that you will find selling here. Maternally they stem from a lineage of females that represent several of the most prolific females to ever be blessed with an ASA registration number. They too have the backing of the best cow lineages that have built the Effling & Wager family cowherds, where you will find the likes of WS Pilgrim H182U, WAGR Panama 204Z and 3C Melody M668 BZ in their paternal pedigree. This pedigree lineup ties them to just about every prolific producer in the breed.

We are loaded with quality throughout the female offering this year, and believe there is truly something for everyone! Even those searching for high quality red hided Simgenetic breeding pieces are bound to find something to tie too, and this pair right here should appeal to a wide audience. The homozygous polled daughters of TRCC Pandemic from the program leading W/C Angel 7114E donor lead off the best red hided division of bred heifers we have ever offered! These purebred females are built with all the fundamentals in check, and then come with some extra bells and whistles, from a look and feature standpoint. They both stuck to their AI with the incredible DUFF Rizz 22271, a Red Angus that has become a proven calving ease bull that can sire quality in the first generation.

JWC PANDEMIC 844M

Stacking up generations of the Angel cow family will never be a problem, and this extra robust KBHR Different Deal K150 daughter is one that has a very powerful muscle shape and ribcage design. It will not take a rocket scientist to realize that her genomic package is geared towards serious growth either! With the maternal powers of Angel 2870Z and therefore Miss Werning 8543U in her pedigree, you can trust both her longevity and production record will justify any level of investment.

W/C MISS ANGEL 280Z
Grand Dam of Lot 236

JWC Miss 419M is a homozygous black and homozygous polled purebred that is sired by the highest demanded sire we have used the past two years, OMF Journeyman J24 and comes from the maternal influence of W/C Harrell Angel 7110E through a picture-perfect W/C Bankroll 811D daughter. This stout featured female reads with extra substance and dimension, coming with a very high-quality brood cow look, that begins with her extra bold center body cavity. She comes with very appropriate calving ease predictions and looks to be the kind that will take very few inputs to always keep in good flesh.

We are very excited to present a trio of daughters from the Profit sired, RJ JWC Sherri 0151H donor for 2026! This donor female has been kicking it out of the park, and while she stems from a different pedigree then you may be used to finding here in Parkston we can promise you that she lines right up with the quality that we pride ourselves on generating. JWC Sherri 3517L starts the trio of sisters, she is a daughter of the \$110,000 OMF Journeyman J24, and is one that captivates your imagination from the moment you lay eyes on her! She represents the utmost quality and femininity that the donor dam is becoming synonymous with, while being very maternal and smooth in her overall build, elevated about her chest floor and front third and flawless when set in motion. She handles both sides of the phenotypic and genetic equation with grace and balance. Take note of her incredible growth trend that resulted in her record setting 935lbs. adj weaning weight, it is no wonder that she has been a favorite of ours from early on!

What a dynamite mating this combination of RJ JWC Sherri 0151H makes with W/C Red Bird 269J. This pair of purebred flush sisters are incredible in our mind and stem from the concoction of two elite phenotype producers. Last year a pair of full sisters to this mating warmed up our anticipation for the future, selling to Josh Terveen and the Bussell family, yet we feel that this pair really up the ante. RJ JWC Sherri 0151H is quickly becoming a leader of the donor pen, as she is proving to mesh the gap between high performance cattle and phenotypic excellence with both sons and daughters that have been sought by savvy cowboys. The same can be said about the \$90,000 high selling, W/C Red Bird 269J stud that still continues to gain momentum as one of the leading red hided AI sires available on the market.

Here is the black hided sister of the dynamic duo, we think these two offer a world of good to a program focusing on developing the quality of their cowherd regardless of color! Not only do they offer some freshness from a pedigree standpoint, but they certainly don't hurt the situation when it comes time to inspect the science either. The power of their pedigree is shining bright, and it's obvious by the powerful line up of maternal siblings that have been features of this sale the past couple of years that there is power in the blood! These sisters offer value to stockmen from a range of backgrounds, and can be mated in a range of different ways to fit multiple scenarios.

The story that K-LER/RC Miss Hoya Saxa and her daughters have wrote in the showing is nothing short of legendary. Both direct daughters and granddaughters of K-LER/RC Miss Hoya Saxa have been triple crown winners, and have laid claim to champion honors at several of the most competitive national stock shows. Many will recognize the iconic mother-daughter duo of Miss Hoya Hayleigh and UDE Hayleigh 5K that were absolutely dominant champions between 2019 through 2024. In turn several of the highest valued Simmental females of the past five years tie directly back to this influence and the next 12 months with surely see more dollars and accolades attributed to both the Hayleigh and 5K influence. This same powerful genetic source is found deeply embedded in these five daughters from the potent VCL Foresight mating on K-LER/RC Miss Hoya Saxa and we think prove the promises that come with such a star-studded pedigree in person. They will all get off to an exciting start to production with their matings to 2/F JWC Unassisted 675K and we know will be incredible mothers, just as their pedigrees foreshadow. The Udell program of Sioux City, Iowa have singlehandedly proven the power of this cow family, and there looks to be no end in sight, particularly when these five incredible flush sisters make their way into production.

JWC Phyllis 4120M is loaded to the gills with powerful pedigree and immense generating potential! Either side of the pedigree curates a story of excellence, and the results are what you would expect in person as this half-blood female is a special specimen. This W/C Bankroll 811D daughter stems from the Dameron First Class sired, FCF SCC Phyllis 602. 602 is a daughter of SCC Phyllis 051, one of the most dominant producing Angus females of all time. Maternal sisters to 602 include the Bayer family's 2018 Supreme Female at the World Beef Expo, FCF Phyllis 770, FCF Phyllis 840 who was the 3rd Overall Female at the Illinois State Fair, and the Udell family's million dollar producing, FCF Phyllis 532, the dam of the \$280,000 half interest UDE New Heights 62/87. The power of pedigree here is overwhelming and we think this female is set to add more accolades to the immense novel that has been already wrote. Terms to be announced sale day.

We are very excited to promote the tools of a young donor that we have been excited about since day one. JWC Lucy M469 is the first-born daughter of JWC Lucy 269K that is sired by the phenomenal ZTGC Just Cuz 52K. 269K is a maternal sister to Nords Lucy 8022, the Stagemeyer family's 2019 American Royal Grand Champion Angus and Supreme Champion Female, the 2019 NJAS Reserve Grand Champion Owned Female and the 2020 NWSS Reserve Grand Champion Junior and Open Angus Female. In production she is recognized as the dam of the Griswold promotional sire, STAG Fortunate Son 233 and Buck Creek Ranch's STAG Independence 110 ET. High quality beef with an even more intriguing pedigree here that is set up to be the cornerstone of a Simgenetic breeding masterclass!

Here is the 3/4 sister to the two high selling females that both sold last year for \$50,000 for 1/2 embryo interest a piece JWC Victoria's Secret 305L sold to Moke Farms, and was already a well-received debutant on the 2025 Embryos on Snow where she has already made a \$12,000 return on investment with just 6 embryos being sold. JWC Victoria's Charm 304L was purchased by Bo Bramlet and JCT Livestock and is set to build a new cow family for their nationally reputable seed stock and show heifer program that has raised some of the most notable champions of the past decade. This year's addition to the family tree JWC Vicki 440M is sired by RP/BCR Eminence H005, who is a full brother to the National Champion, Rocking P Private Stock H010 but who is breeding with even more appeal than his highly acclaimed brother. She comes with an insane set of proportions and we think there are few that could match her intriguing combination of body shape to feminine outline. Serious show heifer producers need to pay attention here as all the stars align for this impressive creature to be the next star of the show.

We love the added cow power and genuine shape that this daughter of the W/C Kaiser 240J x HPF Victoria B396E mating is blessed with. This purebred female combines dimensional build and body shape with a super chiseled look and eye-catching appeal. She's the perfect balance of true brood cow matron quality that still cocks off with show heifer look and pizzazz. The daughters of B396E have proven to be gold mines in production, with several already featuring in the donor pens of the sharpest cowboys, and the likes of our two high selling females last year that are just about to start their impressive tenures in production. We like the added advantages on paper that 407M offers, and this same trend will continue with her ES Five Star Limitless LJ39 calf that she has on board.

LOT 250 JWC MISS 456M

JWC Miss 456M stems from a full sister to the \$180,000 W/C Fort Knox 609F that is proving to be a trident in production. Here she has mated up perfectly to the past high selling, W/C Kaiser 240J and created a female that comes perfect in her combination of power and poise, she might be pretty headed and refined about her neck, chest and throat latch, but she certainly packs a punch with her rear two thirds. The W/C Kaiser 240J stock have been very popular through this sale, and just from a phenotype standpoint we think this female looks to be a one-way pass to success, let alone when you take into consideration the maternal backing and family history that comes along with her.

If genomic predictions lead your selection criteria then you are looking in the right place here! JWC Miss 476M is a KBHR Different Deal K150 daughter that is certainly impressive in what she can offer to beef business. This big ended, round ribbed female comes with a remarkable set of predictions on paper and offers a dataset that is multipurpose. She offers significant calving ease advantages, yet still comes with very favorable additions for growth and performance, along with incredible marbling and profitability indexes. In this next generation of seedstock you can have cattle that check all the boxes, and this female is one that will put you on the fast-track to those goals.

Here we have a pair of sisters from the National Champion HPF Quantum Leap Z952 out of the ROSE Miss Star F904 donor that is proving to be a potent source of quality, and these daughters look to be the kind that will follow her lead. The HPF Quantum Leap Z952 daughters have made many friends, as over time there has only been more validity made to the quality of his progeny, as they mature with longevity and are proving to be high production. These two daughters have the trademark quality foot shape, impressive length of body and maternal look that he has become synonymous with. A full brother to this pair sold for last year to the sharp stockmen at Harris Cattle Company, and two maternal sisters averaged \$9,500 to Hilltop Simmentals and the Wieseler family.

The third daughter of Rose Miss Star F904 is another that stands out from the crowd, as this incredible blaze faced female is one that catches attention with her awesome look of maternal power! The F904 donor has become a familiar face for those that come to the JWC to find stock that offer up legitimate quality on the hoof, as both maternal brothers and sisters have surfaced to be the choice of stockmen that take phenotype and feature seriously. This daughter of the \$109,000 JBSF Berwick 41F offers a stunning look of balance and symmetry from the side, and looks to have some high dollar show heifers in her future.

JWC Hero 416M is a genetic gem that is loaded with power from both a genomic and pedigree standpoint! This daughter of KBHR Different Deal K150 offers up a very dominant portfolio of growth and performance indications, sporting excellence across the board, but most notably for WW, YW, ADG, MWW, MARB, TI and API where she ranks in the top 10% or better. This female deserves serious consideration from both a genetic progression and investment standpoint, the marketability of her pedigree and build aligns with the trends of the business, being a female that flawlessly combines genomic and phenotypic excellence.

Here you will find the influence of the WHF Summer 365C matron that has proven that her quality is universal! The quality of 365C leaps beyond both the barb wire fences of production focused Simmental breeders and the white picket fence that encapsulates the showring Simmental enthusiasts, proving to be a source of excellence for stockmen from all walks of life. She herself would be one of the most dominant show heifers we have witnessed, and includes being a Division Champion at the NWSS, Reserve Supreme Champion Female at the Iowa Beef Expo, Champion Simmental Female at the Iowa State Fair Open Show, and perhaps most prestigious was her Supreme Champion Female title at the 2017 American Royal Livestock Show. She then went on to also be crowned the Champion Simmental Female in the NAILE Open Show. This show ring prowess has translated into success in the production realms too, as daughters of WHF Summer 365C have not only won the biggest shows in the nation, but multiple full and maternal sisters to 437M commanded the biggest price tags.

WHF SUMMER 365C

Dam of Lot 256

What an impressive blaze faced female that carries the credentials to enter any donor pen based on pedigree and physical presence alone. An absolute elite female from a balance standpoint, she offers a look of quality and balance that is second to none! She is the first daughter of our B C R Miss Time To Shine J236 female, who is one of the absolute best Y251 daughters to ever be offered by Buck Creek Ranch. She is exceptionally seamless in her transitions, with balance and symmetry as it's meant to be and when set in motion, she's simply impeccable at the surface. This one deserves serious attention by even the most critical of stockman as she defines elite.

Here we have a pair of full sisters to the Embryos on Snow phenom, the \$300,000 TRCC Pandemic. He took the business by storm right from the moment his picture was debuted in the EOS catalog, and ever since he has remained a sire of intrigue, proving to inject added look and feature in a potent fashion. Beyond being full sisters to the exciting AI sire, they are daughters of the legendary female maker, W/C Bankroll 811D who has built a gold standard reputation among both stockmen in the real world and the showring. They are built with that same outlier phenotype that you would expect from their pedigree, coming with an eccentric look yet being ultra-durable in their structural build, dense and robust in their middle third carrying themselves with undeniable presence.

J6RA Bada Bing 1602B was campaigned by Chesney Effing to countless victories during her show career including being the 2015 American Royal & NAILE Grand Champion Percentage Simmental Heifer. She then was the \$40,000 high selling female in the CK Cattle Proven Female Sale and has been a very potent source of quality in production. In the 2023 "The One" Simmental Sale, Jim Bowling selected a STCC Tecumseh 058J daughter out of the Freking Cattle Company NWSS Champion Pen of Three Percentage Females for \$64,000. Again in 2025, another set of 1602B sisters combined to be selected as the NWSS Grand Champion Pen Of Three Percentage Simmental Heifers and the choice of the pen sold for \$38,000. This TRCC Pandemic daughter sets the standard for outlier feature from the prolific maternal source, and is one that sorts to the front of the line both build and pedigree wise.

J6RA BADA BING 1602B
Dam of Lot 260

These first daughters of OMF Journeyman J24 are very impressive in production, and just like their brothers, are cattle that we think can set a program on a path towards profitability. JWC Miss 413M is set to be a leading source of growth and payweight, note her genomic slate that denotes her among the most elite of the breed when it comes to injection growth. High productivity is promised here, and with her high profitability mating with ES Five Star Limitless LJ39 there looks to be some early and impressive returns on investment.

A super powerful pedigree supports this impressive pair of sisters! Maternally there are multiple generations of elite females and success stories. The closest tie to notable excellence to this pair would be their maternal sister, the 2022 National Champion, BCII Annie 01J. Just a generation back reveals the incredible JS Flirt-A-Way 59Y, a monumental breeding piece for the Steenhoek program, and the dam of the iconic 'Boots' female that was a triple crown winning National Champion Female for Jake Bloomberg and Griswold Cattle. The story of 'Boots' is legendary, and can be traced throughout the industry, mainly through her impressive lineup of sons that have been promoted by the G-. The pedigree of this pair is littered with accolades and immense returns on investment, there is no question that there is power in the blood here!

LOT 264 JWC MISS 448M

Just like you would expect from the W/C JWC Mainstream 885J sire, JWC Miss 448M comes with all the extras in regard to broodiness, body shape and cow power. This homozygous polled female will be the source of growth and performance, and we project to be a long-term supplier of added pay weight and quality in the weaning pen.

W/C JWC MAINSTREAM 885J
Sire of Lot 264

LOT 265 JWC S-H JOJO 417M

We are proud to present the first progeny of the ultra-impressive Collision Forever Lady 145J in this sale, as she also has a son to feature in the bull division. She was the \$30,000 for half interest selection of Sutton Hohn, and will be a cornerstone of his budding Simmental program for a long time into the future. 145J is a daughter of W/C Bankroll 811D that stems from Angus royalty, as the Forever Lady cow family has been a pivotal building block to many of the National Champions that have been sashed in the past decade. We love the strong maternal build and impeccable look of quality that this powerful female exerts.

Harrell JWC Beyond 4116M is a daughter of the impressive Renegade sire that has multiple daughters feature through this sale over the past 3 years. Renegade is the \$120,000 maternal brother to the \$200,000 EC Rebel 156F. Rebel is a sire that numerous high selling females and champions can be attributed to. This female is impressively stout and heavy muscled, and you will find her to be the kind that are easy to tie too once you see her in person. She comes bred up to the impressive 2/F JWC Unassisted 675K stud to calve in the beginning of March.

RENEGADE
Sire of Lot 266

JWC Miss 428M would be a perfect addition for a program that is looking to add a breeding piece that is geared towards the low input, yet high output maintenance schedule. Pedigree wise she sports multiple individuals on either side of her pedigree that have proven themselves in the toughest environments. The shortly due, next generation will trend the same direction, as her calf by 2/F JWC Unassisted 675K will be built with that same easy keeping feedability.

JWC Miss 022M is a daughter of JWC Pandemic 6077K that comes with predictions for impressive calving ease and comes with a low maintenance type and kind, both through her own attributes on paper. She comes with a set of good shaped, big sized feet, a wide pin set and extra soft body cavity, and we think is the easy keeping kind that will always keep in good flesh. We are excited about these MMR Big Iron 52L sired cattle, and think he will continue the same low maintenance design of this female.

LOT 272 JWC JPT JALYNN'S MESA 497M ET

The name 'Jalynn Rose' resonates strongly with the show cattle crowd because of the track record that this cow family has recorded over the past decade plus. This lineage stems back to one of the original cow families responsible for a lot of the early success that built the Sullivan Farms program. Yet there is nothing traditional about the type and kind of stock that the JSUL Jalynn Rose 8249U donor continues to generate. JWC JPT Jalynn's Mesa 497M ET follows in the family tradition of excellence that has built the brand, and she offers up quality that will base a strong composite show heifer breeding program. Show heifer programs realize the opportunities that become possible with a shot of ASHW Who Da Man in the pedigree, and the 10% Chianina blood leaves plenty of breeding opportunities going forward.

LOT 273 JWC JPT JALYNN'S MIAMI 496M ET

Many will remember the incredible W/C Bankroll 811D daughter, JWC JPT Kylee Rose 249K that we sold two years ago to Griswold Cattle Company, Maple Lane Farms & Vanhove Cattle Company. She was an absolute outlier, and has a huge future ahead of her for those programs. This pair of Silveiras Forbes 8088 sired daughters carry themselves with that same intriguing look and aura, and will serve as the foundation of an incredible composite show heifer and steer breeding program. There is a reason we don't let many of these Jalynn Rose daughters go, as they come with rampant opportunities for ROI, and we believe there are big things in the future for these genetic gems.

LOT 275 KROUPA 7

We purchased this incredible bovine from the master breeder, Greg Kroupa. A show steer breeder that beats to his own drum, and no one can debate that he doesn't have one keenest eyes in the history of this business, as his track record speaks for itself. We purchased the Kroupa 7 donor in his last cow sale, and anyone that knows his program realizes that the magic potion to success lies within the cows. This Airhart Out There daughter is simply incredible, and comes with a pedigree that leaves the door wide open to the most popular sire options available. This donor comes ready for embryo production, and will be a perfect candidate for the likes of In God We Trust, How Great Thou Art and their sons.

JWC Miss 492M is a full brother to multiple champions! The first that comes to mind is the popular champion of the 2023-24 Texas show season was campaigned by Kaden Mason. He was the 2023 Texas Youth Expo Grand Champion Prospect Steer and the 2023 The Buff Branding Grand Champion Prospect Steer. He then went on to Fort Worth to win Class 11 and was a very strong candidate for accolades in the division; the two steers that did end up winning the division and then the entire show came out of Class 10. Speaking of Class 10, a full brother found himself a very respectable fourth place in Class 10. This calf was shown by Coleman Shields and was the 5th Overall Prospect Steer behind his brother at the 2023 The Buff Branding Steer and Heifer Show in Amarillo, Texas. Another full brother to 492M was Madelyn Schickedanz's Reserve Smoke and 5th Overall Champion Market Steer at the 2024 Arizona National. High sellers and champions, the stage is set for a big production career here!

The small but mighty club calf division comes loaded with extreme quality and proven matings! Here is the second In God We Trust daughter, this time stemming from the Grace 773 donor that has been a headlining act for show steer production at JWC. A full brother to this mating is the memorable champion that was campaigned to countless victories by Addie Potts and family. He gathered as many banners as any show steer in Texas for the 2022–2023 season, being selected as the 2022 State Fair of Texas Grand Champion Prospect Steer, 2022 Heart of Texas Grand Champion Prospect Steer, and Grand Champion Steer at several other jackpot shows across central and west Texas. With the number and quality of stock that attend these shows, you have to pay credit to how special a calf he was. The IGWT daughters are proving to be the next go to maternal source in the business, it has been proven that the power in the blood is strong here, and the one thing we do know is that there is no denying the sheer quality that this female can generate.

TERMS OF IVF CYCLES: Buyer will receive a minimum of six transferable embryos and two 60-day pregnancies. On all embryos produced above 10, buyer receives odd-numbered embryos, seller receives even-numbered embryos. Buyer pays IVF charges, semen cost and all freezing and/or transfer fees, with all freezing costs over 10 embryos being split odd/even between the buyer and seller.

THANK YOU.

We truly couldn't do what we do without the knowledgeable, passionate people who invest their time, effort, and resources into our operation year after year. We entrust these families with our livelihood, and we are endlessly grateful for the exceptional job they do in making every calf crop a success. It's an honor to work alongside individuals who share our values and uphold the same high standards of care and herd health management. Whether a calf is born on our ranch or just down the road, you can be confident it meets the JWC standard of excellence.
