

BUCHANAN ANGUS RANCH
— BULL SALE —

BA

— SUNDAY, FEBRUARY 22, 2026 —

Noon at the Klamath County Fairgrounds, Klamath Falls, OR

Living an ANGUS *Legacy*

Welcome

Our bulls spent the summer on native pasture and their mothers' milk. We don't creep feed our calves so that we get an accurate picture of their genetic efficiency

While we carefully select the AI sires to breed our cows to, the thing that sets us apart from the rest is our powerful cow herd. It has been built by stacking many generations of the best AI sires in the Angus breed and selecting the most productive, problem free females to build our herd. This allows us to provide our customers with genetic packages that will sire reasonable birth weights, explosive early growth, maternal traits and end product value to take advantage of the great market conditions that we currently have.

After a "BRUTAL" late winter, we had good summer pasture, once we got all of the water pumped off of our fields. Thunderstorms were well spaced to keep the grasses green and growing in our summer pastures.

On October 22nd, our bulls were weaned (average weight 926 lbs.) and put on a steep, rocky, Juniper covered hillside to be conditioned for the 2026 breeding season. They are then developed on a high roughage ration through the winter while "On the Hill." We monitor their progress, which has been good, at least to this point, as we have had nice fall weather, but we will see what winter will throw our way.

Bulls will be vaccinated, ultrasounded for carcass traits and semen tested prior to the sale. They have already been DNA tested and tested negative for BVD-PI. These bulls are athletes, not over fed feedlot bulls. The hillside gives them a better place to be in bad weather, as well as making them get exercise and harden up. **THEY ARE FIT AS RANGE BULLS AND ARE READY TO WORK NOW!**

The sale will be held, again, at the Klamath County Fairgrounds, with our invited friends and customers who have purchased females or embryos from our program. This will be an opportunity for progressive cattlemen to buy some of the best Angus genetics available. Mark your calendar and bring your family for a fun weekend and a chance to buy genetics for your herd from a proven program that is committed to the betterment of the Angus breed and the beef industry.

The 2026 sale will once again feature a select group of show and donor prospect yearling heifers.

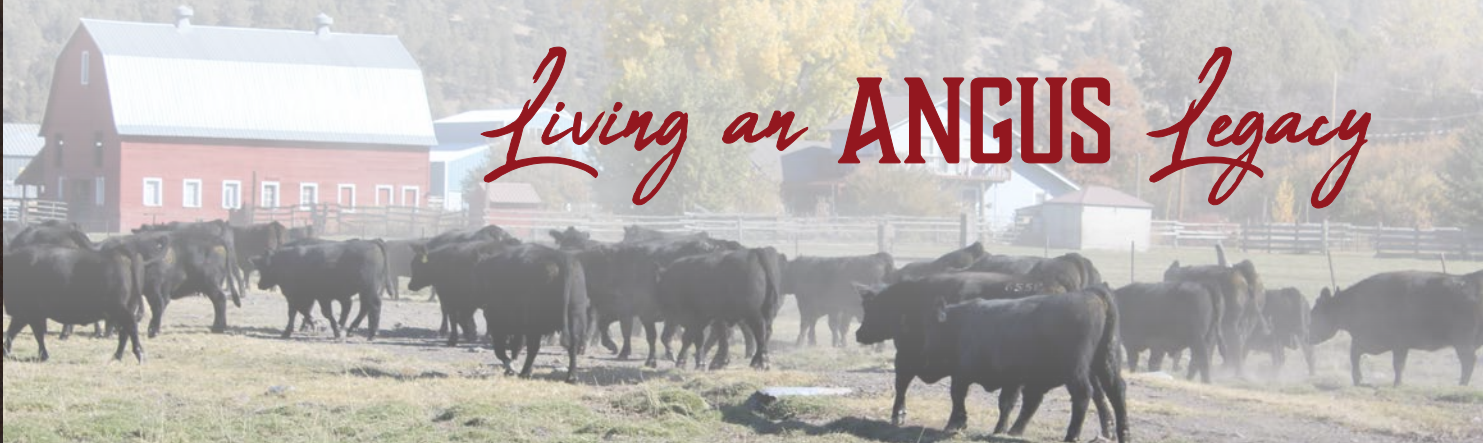

As always, we look forward to seeing you. If you have any questions, please contact us.

Thank you,

Bob, Kathleen and Family

2627 South 6th Street, Klamath Falls, OR

TERMS AND CONDITIONS

Sale is conducted under the standard terms and conditions of the American Angus Association.

FREE DELIVERY

Buchanan Angus Ranch offers free delivery within 500 miles on total purchases of \$4,000 or more. Contact other consignors for their delivery arrangements.

INSPECTION OF BULLS

Bulls will be available for viewing at their respective ranches through Friday, February 20. They will be available for viewing from noon on Saturday, February 21, at the Klamath County Fairgrounds. Buchanan Angus Ranch bulls have a freeze brand ID on their left hip.

HEALTH AND INFORMATION

The bulls, if they are of age, will be ultrasounded for carcass traits. Information will be available on sale day. If you need this information prior to the sale, call Buchanan Angus at 541-281-3557. The bulls will also be tested Negative for BVD PI, DNA tested, semen tested and vaccinated. All bulls will have appropriate health papers for immediate shipment, unless the state requires additional tests. In this case, these will be done prior to shipment.

There is a first year breeding season guarantee on all of the bulls in this sale.

All consignors will retain 1/3 semen interest on all of their bulls. Buyers will have full possession and salvage value.

FEEDING OF THE BULLS

Continued feeding of Buchanan Angus Ranch bulls until turn out time is available, at our expense and the BUYER'S RISK. Arrangements should be made with the individual consignors for this service prior to the sale.

HOSPITALITY

Saturday, February 21, at 6:00 pm at the Blue Building, there will be a hosted cocktail hour, followed by a Tri-Tip dinner sponsored by the consignors and Artois Feed. Sunday, prior to the sale at 10:00 am, a brunch with Kathleen's cinnamon rolls is sponsored by On 140 Feed and the consignors.

SALE BOOK ORDER

Bulls are lotted in age order from oldest to youngest.

An ORigen sales volume leader in 2024 and 2025, he sired the \$70,000 top-selling lead bull of the record-setting 2024 Baldridge Sale, Baldridge Working Class. This sire group of 47 Blue Collar sons sold for an average of \$11,149 in the same sale, with 46 sons featured as the largest sire group again in 2025 where they commanded an average of \$13,446 with his \$80,000 son Baldridge Blue You topping the sale. As of the start of 2025, there have been 509 progeny of Blue Collar genomic tested and 139 calves born from first calf heifers with an average calving ease score of 1.0 with 448 calves in 20 herds recording an average birth ratio with 346 calves recording an average weaning ratio of 101. 241 yearlings also have an average ratio of 101, and 221 head scanned have an average URE ratio of 102.

Basin Jameson is the \$600,000 Montana record-setting sire who balanced a 70 lbs. birth weight as his dam's first calf with an adjusted 205-day weight of 834 lbs. and an adjusted 365-day weight of 1,352 lbs. The dam of Basin Jameson was a \$110,000 featured donor of the 2024 Big Event at Express, and a heifer pregnancy from her sold for \$40,000 in the 2022 Big Event at Express with her son Basin Keystone selling two-thirds interest for \$135,000 to top the 2023 Basin bull offering. His sons have topped sales across the country and have been extremely sought after by the commercial industry.

Basin True Grit 1021 was the third high-selling bull of the record-setting 2022 Basin Angus bull offering that is an outcross calving ease option for many popular sire lines. He was produced as the first calf from a young cow by Basin Rainmaker 4404 that is widely regarded as the greatest daughter of her famous sire. The progeny of True Grit are reinforcing his EPD index predictions with 332 head in 45 herds recording an average birth ratio of 98, and his first 30 progeny scanned record an average %IMF ratio of 108 and an average URE of 107.

An elite performance sire that also excels in terms of carcass value and is a breed leader in PAP. This \$175,000 sire has been ORigen's top-seller the past couple of years, and his first calf crops are extremely marketable and customer friendly. The cattle have extra scale, power and performance in a very attractive package.

Craftsman has built an impressive sales record. His progeny are powerfully made, have expressive muscle, and are long bodied with explosive growth and tremendous balance and correctness. One of the most unique and adaptable maternal bulls in the breed when you consider he ranks in the top 25% of the breed for Heifer Pregnancy, Milk, Marbling, Claw and Angle, and Hair Shed.

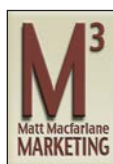

Connealy Craftsman

A Note From the Sale Manager

Welcome to the Annual Buchanan Angus Ranch Bull and Female Sale with some special guest consignors and customers of the Buchanan program. I am again very excited to work with Bob and Kathleen again with one of the long standing and iconic bull sales and programs in the Northwest. I have had the opportunity to work with Bob, Kathleen and Bill for over 30 years and have admired the evolution of their high-quality cow herd that is as functional as you will find.

They have bred a hard-working and productive sets of cows that rival any in the region. In the last three decades, I have witnessed the maternal value, udder quality, productivity and performance of their operation and the tremendous influence they have had on the commercial programs utilizing their genetics. But it does not stop there. With the use of powerful and proven AI sires, the added growth, carcass quality and numeric value have continued to be pushed as well without sacrificing the modern Angus female that has kept them at the forefront for generations. It has continued through today and will into the future based on the proper management and outstanding breeding decisions that the Buchanan family continue to make year after year. But, better than the quality of their cattle are the people behind them. I hope at some point everyone has met and talked with Bob and Kathleen. There aren't more honest, humble and straight-shooting people in the business. The many repeat customers as well as the new ones that come to Klamath Falls the fourth Sunday in February every year leave happy and satisfied.

Please do not hesitate to call me if I can be of any assistance. New this year we are broadcasting on CCI.Live in conjunction with Western Video Market. If you cannot make the sale in person, please get online and buy with confidence. I look forward to seeing you sale day.

Don't miss this attractive son of the \$500,000 "Craftsman." Pay attention to his style, performance, Carcass quality and ultimately his \$ Values. Don't miss Lot 7.

Lot 8

Lot 8

Lot 9

Lot 9

A black cow with 'B A' markings on its side, standing in a field with a fence and mountains in the background. The cow is facing left. The background shows a wooden fence, a grassy field, and distant mountains under a blue sky. The text 'Lot 10' is visible in the bottom right corner of the image.

We want to say thank you to the Buchanan's for once again asking us be a part of their annual bull sale. It's always a pleasure to be asked to take part in their incredible sale. We all know that the summer and fall of 2025 was very dry, and luckily we had good grass from spring rains and these calves came of summer pasture stronger than the past few years with good weaning weights. Their growth exploded this fall on a heavy roughage diet.

We appreciate your interest in our bulls and for all your support at this sale for the past 20 years! We feel this is our most complete set of bulls we've ever produced.

This bull has been catching visitors' eyes at the ranch this fall. He's out of our herd bull that had an impressive third calf crop. We will be keeping many sisters out of this sire group. He's a moderate birth bull that you will want to keep his heifers for your herd. With a top 15% of breed for \$M at +84. He will also be an easy keeper at -8 \$EN.

**Made with pride in the USA.
Always have been. Always will be.**

Y-TEX® ID ear tags give you American quality at its very best.

At Y-TEX®, we don't believe in off-shoring production of our All-American® two-piece tags or Y-Tags™ one-piece visual identification ear tags. After all, why risk shipping bottlenecks and other supply chain problems just to save a few pennies per tag in production costs?

Every American-made Y-TEX® ID tag features advanced polyurethane construction for unmatched flexibility and durability. State-of-the-art 100% PureLaser™ imprinting for superior legibility that's guaranteed for the life of the animal. Minimally invasive tips for faster healing and maximum tag retention. And, easy-to-use taggers for time-saving convenience.

If you take pride in a job well done and believe in American quality, ask your livestock products supplier for Y-TEX® ID ear tags or go to www.y-tex.com to learn more.

Always read and follow label directions. Y-TEX® and All-American® are registered trademarks of Y-TEX Corporation. Y-Tags™ and PureLaser™ are trademarks of Y-TEX Corporation. © 2022 Y-TEX Corporation.

Y-TEX®
EXCELLENCE IN ANIMAL HEALTH™

Don't buy an **imposter.**

Not all "Angus" bulls are **REGISTERED** Angus bulls.

If you see this logo in conjunction with an individual animal or group of animals, you know that that animal is registered with the American Angus Association and backed by the power of **data, programs** and **pedigrees** of the Association.

Invest wisely in those that carry the **Powered By Angus** logo.

Look for the **REGISTRATION NUMBER.**

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. Accuracy will range from 0 to 1 with an accuracy closer to 1.0 indicating higher reliability. Accuracy is impacted by the amount of information that is included in the analysis including individual genotype and performance records as well as number of progeny and ancestral records.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Dockity (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockity in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure EPD (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed EPD (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

SVALUE INDEXES

SValue Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The SValue is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (SM), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving dockity, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (SW), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (SEN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (SF), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (SG), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (SB), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (SC), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (SM) and Beef Value (SB) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

Rooted in Agriculture. Your Trusted Local Feed Store

ON 140 Feed & Seed
Klamath Falls, OR

FEED SMARTER. NOT HARDER.

Nutritionally engineered lick tubs that deliver consistent self-fed livestock supplements.

PAYBACK

MINERALS FOR YOUR HERD.

Support herd health, reproduction, and performance with Payback Loose Minerals - formulated to help cattle reach their full genetic potential.

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating our cattle with AngusLinkSM programs: the Genetic Merit ScorecardSM and AngusVerifiedSM.

The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day.

Users of AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

ANGUSLINK.COM | 816-383-5100

The Genetic Merit Scorecard and AngusVerified are administered by IMI Global.
