

BAKER ANGUS RANCH

Selling 150 Bulls

ANGUS ADVANTAGE BULL SALE

SATURDAY Lunch 11:30 A.M. • SALE 1 P.M.

FEBRUARY 28
2026

2175 Bench Road
Vale, Oregon

Welcome to **BAKER** ANGUS RANCH

Dear Friends and Neighbors,

Welcome to the 2026 Baker Angus Advantage Bull Sale. Judy and I are very excited about the set of bulls we have brought to you this year. Samuel Mahler and his crew have worked tirelessly to breed, manage, and develop these bulls to work in the real world. They are grown out in the same manner that our customers and the rest of the industry do, with low inputs and earning their way. Their diets are forage based from birth to sale time, and they are never pushed to extremes. They have plenty of rocky and steep terrain to climb to make sure they are sound and good footed. We have used sires in our AI program and herd bull battery that are current and exceptional in terms of calving ease, performance, maternal, carcass quality and soundness. We are culling ruthlessly throughout the year for those that do not meet our standards. We hope you are as pleased with them as we are. If you have any questions, please do not hesitate to reach out to me or any of the crew.

Thank you and see you February 28, 2026!

Jerry and Judy Baker

Transportation: Upon request, with sufficient time, planes will be met at the Ontario, Vale or Boise airports.

Terms & Conditions: Cattle will sell under the Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). Except for those stated terms and conditions, there are no warranties, either expressed or implied, as to the merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties and guarantees set forth in the "Terms and Conditions" are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the buyer (or any claiming through buyer) for any breach of warranty or guarantee therein provided and all other obligations available at the clerk's office sale day.

Retaining Interest: Unless stated otherwise, Baker Angus and Mahler Cattle Co. will be retaining a 1/3 semen interest in every bull selling. Buyer shall have full possession and full salvage value of the bull.

Health: All Baker and Mahler bulls selling are official calfhood vaccinated, semen tested and have passed a negative BVD test.

Updated scrotal measurements will be available sale day.

Livestock Mortality Insurance: Mortality insurance on your purchases can be obtained through American Live Stock Insurance Co. at the time of settlement.

Delivery: Free delivery on bulls, up to 150-mile radius of Vale, OR. Free delivery up to 300-mile radius of Vale, OR, on the purchase of five or more bulls.

BAKER ANGUS RANCH

2175 Bench Rd.

Vale, OR 97918

Jerry Baker (208) 739-3449

Samuel Mahler, Herdsman (208) 739-0475

Feeding of Bulls: Bulls may be left at the ranch at no charge up to April 1, 2026. After April 1, 2026, a feeding charge of \$2.50 per head per day will be assessed. All bulls left at the ranch must be insured.

Lot Numbers: Lot numbers on the cattle will correspond to the sale book.

Inspection of Cattle: Cattle will be available for inspection at the ranch anytime prior to the sale.

Online Bidding: J.C. Niesen, WVM/CCI Live (530) 218-8523

Food & Refreshments: Complimentary lunch will be available sale day beginning at 11:30 a.m.

Liability: All persons attending the sale do so at their own risk. Baker Angus assumes no liability, legal or otherwise, for any accidents that may occur on or about the premises.

Guarantee: Bulls selling for \$4,000 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

If a replacement bull is available, he will be provided, or if the buyer prefers, credit toward one bull will be given in the following year's sale, less salvage value of the injured bull. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage.

Replacement bulls are not covered by this guarantee.

Volume Discount: We will offer a volume discount. If you purchase 3 or more bulls, you will receive 5% off of your total purchase.

ANGUSMEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

A Tribute

TO OUR LONGTIME CUSTOMER, BUT MORE IMPORTANTLY LONGTIME FRIEND, MR HARRY BETTIS!

On June 4, 2025, Harry Little Bettis died at home on the Aikman Ranch, of old age. Harry was an outdoor man, who, despite a Stanford education and notable Idaho ancestry, preferred a life wearing Levis and a Pendleton shirt, packing a shovel, and riding a tall horse followed by a cow dog. Harry was, first and foremost, a rancher.

Harry was born on October 21, 1934, to Agnes Little Bettis, daughter of Andrew Little, the nation's biggest sheepman in the 1920s and 30s, and to Laurence Moore Bettis, grandson of C. W. Moore, co-founder of the Idaho First National Bank. Harry was named after his paternal grandfather, Dr. Harry Sylvester Bettis, one of Boise's first dentists.

Harry lived on his family's ranch near Bellevue on the Wood River where he attended school until the fall when he turned twelve. He attended the California Preparatory School in the Ojai Valley, followed by Fountain Valley School in Colorado, where he graduated from high school in 1952. Math was easy for Harry, who hated writing papers, so he majored in accounting at Stanford University where he graduated in 1956. He said his best economic lessons were learned in the big red barn where he lived and worked on campus, and he chose his classes based on the finals schedule so he could get home days earlier and help with haying. Harry could do math in his head quicker than most people could write it down, a skill that served him well when weighing cattle and calculating cattle prices. Harry served with the U. S. Army Reserve in Fort Benning, Georgia.

Upon returning home from college, Harry worked on the family ranch on the Wood River, which he got control over at age 24. He responded with an avid work ethic, feeding his cattle from a hay wagon stacked high with bales and pulled by a team of draft horses in the winter, putting up some hay in the summer, and enjoying the company of "Little Joe", who worked with him. He told his kids that one winter, we never went to town in over 40 days.

In 1965, Harry married Ann Devereaux, a photographer living in Sun Valley. Ann and Harry lived on the ranch at Bellevue with Ann's daughter Farleigh, who enjoyed spending time with Harry, the horses and the dogs. After their divorce, Harry bought United Oil Company based in Twin Falls, which he operated several years, while living in the Rogerson Hotel above the hardware store.

In 1969, he bought Grove Miller's Ranch on

Big Willow Creek near Emmett. Shortly after moving to his new ranch, Harry met Carol MacGregor, who was teaching at Emmett High School and living with his Aunt Myrn. The couple married in 1970. Carol's son, J. G., was two when they moved to Big Willow to Harry's ranch. Harry and Carol had three daughters together; Laura, Catherine, and Janelle. The children all got to experience Harry's school of old-fashioned discipline learning horsemanship, driving a team, irrigating, milking a cow, fencing, making sourdough biscuits, and keeping their elbows off the table.

Harry married Sheila Sayles in 1987. She recounted their first date once, saying he picked her up in his ranch truck, and her pink dress was soon dusty rose. After his 1991 divorce, Harry never remarried, but enjoyed the company of accomplished, attractive, and goodhearted women.

Harry worked hard on the ranch, driving back and forth between Willow Creek and Long Valley. He always said he "hired out to be tough" and put in long days starting before dawn, with few if any breaks, telling his children, "There's plenty of time to sleep when you're dead!"

Harry served as a Director of the Idaho First National Bank and its successors most of his adult life. His intelligence served the bank well. He saw it through its evolution from Idaho First National Bank to Moore Financial Group to West One Bank to U. S. Bancorp. At home, he read reports of the bank, made telephone calls, and studied bank policy. He regularly put on a suit to go to Boise to attend the Director's and Loan Committee Meetings. Harry really cared about people having a chance to get and keep their businesses going, but he held them to a high standard of thrift. He was frugal and miserly himself, teaching his children, "'The only thing in life that won't give you trouble is a savings account."

Harry was a Director of the Laura Moore Cunningham Foundation from 1968 to 2024, serving longer than any other family member. When he started, he expanded its reach by making contacts in lots of smaller rural communities and finding out what they needed. Harry also served on the Boards of the College of Idaho and The Peregrine Fund. He was a strong advocate and supporter of Maurice Hornocker's big cat research at the University of Idaho and other institutions. Harry traveled to Greenland, Dubai, Siberia, Argentina and other places to see the research projects and attend meetings in his nonprofit service.

Harry loved horse racing, and had horses at Les Bois Park, in New Mexico, and California during different eras of his life. Horses that didn't make it on the track were repurposed to cow horses, which made for some wild rides. Harry was really sad to see horse racing leave the Treasure Valley, but he continued to have and breed horses and enjoyed watching the horse racing channel.

Through all the changes in his life, Harry continued riding horses, caring for his cattle, and telling stories. As years progressed and he acquired more ranches, he spent more time riding around in his pickup, overseeing his ranches throughout southern Idaho and eastern Oregon and chatting with his neighbors. He was a man "on the road" a good deal of the time.

Harry was the most long-standing member of the Arid Club at the time of his death. He was a member of the Bohemian Club and Rancheros Visitadores, both in California. He really enjoyed the camaraderie of other likeminded men and the opportunity to meet new people and learn about them and the world.

In 2007, he moved to his Aikman Ranch south of Emmett. There his cattle graze in the creek bottom and on the hills north of Eagle on the ranch that his grandfather, Andrew Little, had first come to from Scotland in 1896 to work for Robert Aikman. As he convalesced over the past year and a half, Harry had a nice view of his red corral, barnyard, and horses out his window. He so appreciated the visits of friends and family during this time, and became fast friends with his caregivers.

THE *B*AKER *A*NGUS *A*DVANTAGE

Our age-advantaged bulls are available in volume! These bulls, out of top sires, can increase consistency and marketability in your calf crops.

As the second-largest registered Angus cow herd in Oregon calving out 600-plus females a year, you get the *Advantage* of only the cream-of-the-crop! The top 50% of our bulls have extremely large contemporary groups to increase predictability, consistency and quality for our customers, and are from a cow herd that has been around for nearly 40 years.

Ruthless culling for feet and legs plus structure gives you the *Advantage* when it comes to bull selection. Our bulls are extremely athletic. They run in big pastures over the summer after weaning. They are developed in extremely large lots that require them to travel up and down hills over rocky, hard ground every day between a high-roughage feed source and water to ensure soundness and longevity.

Our intense AI program utilizes the most current and sought-after genetics in the Angus breed. Herd sires infused and utilized rival the most popular AI sires in the breed for genetic value and potency.

Volume and repeat discounts are available, and delivery is free. Bulls are backed by a Zoetis HD50K DNA evaluation, ultrasounded with complete performance and fertility evaluation, and backed by an industry-best guarantee. Many bulls qualify for the CAB Targeting the Brand™ Program.

Call Jerry Baker or Samuel Mahler to discuss the Baker Angus Advantage.

We have had a ton of success with Identified. The only reason we haven't used him harder is he has been infused into our program for years, and we have plenty of daughters in production. He sired our top-selling sire group the last three years. This year's set of sons and grandsons are some of our best. He adds pounds and performance, ranking in the top 20% for WW, top 10% for YW, and top 1% for \$F. From a carcass standpoint, there is lots of added value with a top 2% CW, top 10% MARB, and top 35% RE. What he also brings to the table is elite convenience traits with DOC in the top 2%, Claw in the top 25%, and Angle in the top 15%. His \$Value Indexes are elite and his sons are uniform, moderate, heavy-made bulls with power and look.

He is a low-birth bull with added performance and his sons are consistent in their high-quality phenotype. He is an outcross pedigree with tremendous look and presence. His Pathfinder mother is a tremendous producer with six head at 103 on weaning and a calving interval of 347 on six head. She stems from a long line of productive Georgina females that have longevity.

This set of BAR Dynamic calves is impressive in person and on paper. BAR Dynamic has a physical presence that starts with impressive muscle, base width and internal dimension wrapped up in an attractive, eye-catching package. They are as sound, comfortable and confident on the move as any sire we have used, and their foot and heel shape are ideal. They offer elite CED and BW and tremendous performance for Weaning and Yearling growth. Take a look at this sire group; they are as complete as any in the sale.

Architect is a gem of a sire from the same herd and cow family as the great Chisum! Anchored by four Pathfinder cows in six generations on the maternal side of his pedigree, Architect is a tremendous option for cattlemen seeking a bull with EPD balance and maternal excellence. The female side should be phenomenal. He has seen heavy use and success across the country as he has been GENEX's Number 1 seller.

Montana record-setter and highest-performing bull ever from Basin Angus. He is absolutely unequalled in the breed today for combined performance, foot quality and end-product value. Exceptionally long bodied, strong topped, deep in the fore rib, and correct in his foot and leg structure. His sons continue to light up the sale reports and the first wet daughters are doing the right things from the start. Top-end \$Maternal genetics backed by the proven and time-tested Basin Joy cow family that has also produced Basin Rainmaker 4044 and Basin Safe Deposit.

This bull was selected for the complete balance and numbers package he presents, and we are extremely excited about the impact he has had at Baker Angus. Consistent Calving ease, carcass quality and performance. He has 18 major traits in the top 25% or better and his son's rival the A.I.-sired calves.

Stokrose Legendary G564

Welcome from

M3 Marketing!

Welcome to the 2026 edition of the Baker Angus Advantage Bull Sale! For the last 13 years, I have had the honor and privilege to work for Jerry and Judy Baker. I have seen the genetic progress and customer expansion due to the fact that they have continually improved genetic selection, culled rigorously and only brought you the cream of the crop from their over 600-head cow herd. Samuel Mahler and his crew have worked tirelessly to try and bring a set of bulls to you that not only fall into the top EPD rankings for all traits (not just a few) but also work to bring you bulls that hold up, create longevity, and produce profitability at every segment of the industry. These bulls have complete performance, ultrasound, DNA and fertility evaluation. Couple that with the fact that they cull ruthlessly throughout the process from birth to sale day, and you are truly getting only their best. I have been through the bulls and have evaluated them thoroughly. If you have any questions, please reach out to Jerry, Sam, or me. We look forward to seeing you on sale day.

WATCH AND BID ONLINE FOR FREE! WWW.CCI.LIVE • (405) 400-9505 TEXT OR CALL • SCHEDULE@CCI.LIVE

- As a buyer, you do not need an account or to login to watch the sale but you must have a validated account to bid.
- After you are logged in, you must proceed to the sale page for any and every auction and click "Get Buyer Number." Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
- CCI.live will operate with ease on a cellular device, laptop, desktop or tablet.
- A modern or current browser is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- For successful bidding you must have good Internet service! It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. EPDs are updated weekly. To see the most current EPDs, look up the registration number on angus.org.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Teat Size (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

FASTER PROGRESS, GREATER RETURNS

Targeting the Brand™ identifies registered Angus bulls with the genetic potential to sire calves more likely to meet all 10 *Certified Angus Beef*® brand specifications.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
---------------------	-------

Grid Value (\$G)	+55.0
