SOARING EAGLE OF THE OZARKS
FEBRUARY 19, 2026 | 6 PM CST | LIVEONLINE EVENT

Welcome

TO THE SOARING EAGLE OF THE OZARKS

FROZEN GENETICS

LIVE ONLINE EVENT

SALE DATE & TIME

Thursday, February 19 @ 6 PM CST

SALE LOCATION

Courtyard Marriott Fort Worth
3300 Championship Parkway
Fort Worth, Texas 76177

This is a LiveOnline event. Though, if you should wish to attend in person, the auction will be open to buyer attendance in Fort Worth, Texas.

AUCTIONEER

Steve Doran • 760-972-7736

SALE TERMS & CONDITIONS

Cattle will be sold under the standard terms & conditions issued by the American Angus Association. Announcements made from the block will take precedence over printed material.

SHIPPING

Arrangements for shipment of pregnancies is expected to be made by the purchaser; please let sale management know if you need assistance. All embryos/semen/genetic material shipment is responsibility of purchaser.

GUARANTEE

All embryo lots of 3 are guaranteed 1 pregnancy if performed by a certified ET Technician. Any other lots are specific to the number of embryos in the offering, and will be set forth on lot description.

THIS IS A

EVENT

All bidding will take place
on CCI.live.

SALE MANAGEMENT POWERED BY

The Judge Source LLC

Joel Judge - 805.234.7191

Kourtney Judge - 480.322.1583

www.judgesource.com

Lots must be paid in-full prior to release of genetic material, and/or transfer of registration. If invoiced, payment is expected within 30 days. Anything past 60 days from the invoicing date, and the sale may be forfeited at the seller's discretion. Finance charges will apply after 60 days.

THIS SALE BOOK IS POWERED BY AUDIO FOOTNOTES.®

Welcome to the latest marketplace innovation brought to you exclusively by The Judge Source – audio footnotes and sale book audio content.

This proprietary feature gives our clients, buyers, and interested parties a convenient way to listen to us walk through the sale as we highlight and discuss sale features, lots, and the client's program. Differing from printed footnotes, this gives you the benefit of hearing the details on a lot, or lot grouping, while you look over the photos, pedigrees, and genomic data provided. The audio content arrives to you in an easy and suitable fashion, in which you can download and listen to over again, and at your convenience. Doing chores, traveling, or on the move? No problem, listen in as you work and move! Also, it gives you a fun insight into our discussions around the sale and offering...you never know what you might hear!

Simply scan the code with your phone's camera whenever you see it available and follow the link that pops up on your screen – will work on both printed sale books and digital versions. Each QR code gives you a different set of content.

This feature is exclusive to, and will be legally protected by, The Judge Source and all entities under the company umbrella. Infringements on this intellectual property will be prosecuted and pursued by legal counsel. Any effort to reproduce requires written permission on file from The Judge Source.

UNDERSTANDING PRGMOGEN®

what is promogen™ genetic evaluation?

Promogen™ genetic evaluation is another method for establishing genomic probabilities. The purpose of the test is to identify and quantify, using a simple numerical scoring system, the presence of three key proteins that medical science has labeled collectively “Defensins.” A twenty-year research project involving several universities in the United States and Europe has proven that physiologic performance, whether it is measured as disease resistance, fertility, productivity, or athletic ability, are directly related to the concentration of these proteins in the body.

what is promogen™ important?

It provides a “road map” for developing management strategies that maximize herd profitability.

It helps you identify animals who are most likely naturally inclined to herd longevity, reproductive efficiency, and naturally able to maximize environment and express Expected Progeny Differences (EPDs) to the best of their ability.

Allows for early identification of animals that may prove to incur more input costs than their counterparts.

how does promogen™ equate to profitability?

Genetic progress in beef cattle comes with challenges. The major issue is industry segmentation. Utilizing the Promogen™ assay can add value throughout the production cycle. The ideal cow for a cow/calf operation is one that successfully weans a feedlot-ready calf at six to seven months of age and does so with minimum added expense associated with feed supplementation, medication, and labor. At the same time, that cow is expected to breed back within 40 to 90 days post-calving to repeat the cycle; she is expected to do this year after year. Promogen™ assays will predict value-added cows that will raise healthy calves.

Then there is the challenge of sire selection. Current EPDs, even when supported by genomics testing, can become little more than a good guess with so many traits being selected simultaneously. Promogen™ testing accurately identifies bulls who are more feed efficient, more disease resistant, more fertile and appear to be able to pass the ability to produce high levels of Defensins and their associated proteins to their offspring.

promogen scoring

1. The system uses a numerical score of 1 to 6.5.
 2. Animals with scores of less than 4 are not producing the three marker proteins we are measuring at physiologically effective levels.
 3. Animals between 4 to 4.5 are producing the three marker proteins at levels that are physiologically average.
 4. Animals scoring between 4.5 and 5.0 are in the Top 15% of the tested populations.
 5. Animals scoring between 5.0 and 5.5 are within the Top 10%.
 6. Animals scoring between 5.5 to 6.0 are within the Top 5%.
 7. The outliers lie within the range of 6.0 to 6.5, and find themselves within the Top 1% of the tested population.
- > Immunologically superior animals are proven to return higher significant gains across all traits: overall wellness, fertility, and feed efficiency.
 - > Profits on overall wellness are realized through an increase response to vaccines and antiparasitic treatments, drastically reducing the incidence of morbidity and antibiotic use.
 - > Fertility is reflected in higher conception rates, reduced risk in early embryonic death, weaning calves at higher weight ratios, and overall retention and longevity in replacement females.
 - > Feed efficiency is directly affected by the body's ability to ward off inflammation due to environmental stress factors.
 - > Cattle on feed who possess this natural ability have higher conversion rates than their counterparts who are immunologically inferior - all without commanding additional medicine costs and higher overall expenses.
 - > Immunologically superior animals who possess specific Defensin predictive biomarkers are proven to be more profitable and aid in economic gains through these highly heritable traits for generations to follow.

PROMOGEN™ CONTINUES TO *progress* AND *develop*.
THE LATEST ADVANCEMENT IN OUR GENETIC TECHNOLOGY...

THE P&S INDEX

THE PROFITABLE AND SUSTAINABLE INDEX

Promogen measures the concentration of three previously unknown proteins that are indicators of an individual's metabolic efficiency. The greater the concentration of these proteins, the more energy is available at the cell level. In beef cattle, cellular energy concentrations positively impact every bodily function, from feed and reproductive efficiency to disease resistance and even carcass quality. Promogen testing accurately identifies those individuals that are inherently more feed efficient, more disease resistant and most likely to economically produce a high-quality consumer acceptable product. Promogen testing has only been available for industry use in the last 4 years or so, and it is already making a positive impact, but the research has continued as to how to make its application even better. One outcome of this effort is the development and introduction of the *Promogen Profitable and Sustainable Index, P\$S for short.*

what is the p&s index?

The P&S Index was developed as a tool to enhance field applications of the Promogen technology. Promogen measures the concentration of three proteins that are indicators of metabolic efficiency. These proteins are biomarkers for mitochondrial DNA activity, the primary source of cellular energy and its utilization. Unlike nuclear DNA, which is inherited from both the sire and dam, the dam is the only source for mitochondrial DNA. Researchers at Anova BioSciences developed an algorithm that predicts the rate of transmissibility of this metabolic efficiency, through analysis of multigenerational maternal inheritance.

- 1) *The P&S Index indicates the efficiency of utilization of the mitochondrial derived cellular energy.*
- 2) *The P&S Index indicates the consistency of generational transfer of this ability.*
- 3) *The P&S Index predicts the likelihood that the metabolic efficiency of the dam and/or sire, as measured by Promogen, will be inherited in the offspring.*
- 4) *The P&S Index of a bull, heifer, or cow (depending on the score) indicates his/her ability to improve the metabolic efficiency of his/her gut.*
- 5) *The combined P&S Index of a planned mating is strongly predictive of the metabolic efficiency that is the result of that mating.*
- 6) *The P&S Index is based upon assessment of multigenerational maternal histories and the relationship between the three Promogen proteins and certain hormones.*

how does it work?

- 1) *A P&S Index of less than 500 indicates an average rate of transmittance.*
- 2) *A P&S Index above 500 reflects the consistency of that inheritance through maternal lines. It indicates the genetic importance of a cow family.*
- 3) *The higher the P&S Index, of an individual or planned mating, the less variance in metabolic response.*
