

**8TH ANNUAL**

# **BASIN BULLFEST**

PRESENTED BY KING OF THE RING SPONSORS:

ANGUS BULLS  
BALANCER BULLS  
ANGUS HEIFERS  
MICRO MINI HIGHLANDS

**March 28, 2026**

3531 S 6TH STREET  
KLAMATH FALLS, OREGON

OPEN 9:30 / LUNCH 11:30 / SALE 1:00

# OUR 8TH YEAR IS MOVING TO THE KLAMATH COUNTY FAIRGROUNDS - STILWELL ARENA!

Saddle up with us for the 8th Annual BASIN BULLFEST — where powerful Angus genetics, serious cattlemen and women, and big-time Basin hospitality come together in one unforgettable day.

Presented by **KING OF THE RING** sponsors ON140 Feed & Seed and PAYBACK Nutrition. Top-notch Angus and balancer bulls, registered Angus heifers, and fun for everyone – including pics with Chuck, the world’s cutest Micro Mini Highland! Enjoy live music, auction action, enticing vendor booths, and mouthwatering BBQ from Skyline Brewing and Lost River FFA. Bring your crew for a full day of AG excitement! Pre Register at BasinBullfest.com.

*We appreciate our sponsors!*

# 8TH ANNUAL BASIN BULLFEST

**OPEN 9:30 / LUNCH 11:30 / SALE 1:00**

ANGUS BULLS, BALANCER BULLS, REGISTERED ANGUS  
HEIFERS and MICRO MINI HIGHLANDS

## SALE DAY CONTACTS:

Ty Kliewer .....	541-891-2528
Todd Koch .....	503-705-2550
Brady Sweat .....	541-591-0463
Curtis Sweat .....	541-892-3656
Thomas White .....	541-941-8241
Randy White .....	541-601-7897

## Micro Mini Cattle Contacts

Andrew King .....	360-981-3801
Bill Heliker .....	360-689-1399

## AUCTIONEER:

Eric Duarte ..... 541-891-7863

## SALE LOCATION:

The sale will be held at  
Klamath County Fairgrounds - Stilwell Arena  
3531 S 6th Street, Klamath Falls, Oregon.  
Please note the map on the back cover.

## SALE STAFF:

Rod Wesselman - Special Assignment Ringman ..... 509-750-2185  
Jared Patterson - Special Assignment Ringman ..... 208-312-2386  
Western Livestock Journal

## TERMS & CONDITIONS:

Cattle will sell under the suggested Terms and Conditions of the American Angus Association ([http://www.angus.org/Pub/suggested\\_sale\\_terms.pdf](http://www.angus.org/Pub/suggested_sale_terms.pdf)). All bulls are to be settled for on sale day prior to load out.

## BULL GUARANTEE:

Bulls selling for \$6,000 or more are guaranteed through their first breeding season. If a problem occurs that renders your bull unsound, please contact us to provide a replacement of equal value, if available, or extend credit toward our next sale, less salvage value.

The breeding season is defined as 90 days after turnout, and any guarantee claims must be made by September 1, 2026.

## HERD HEALTH:

The Basin Bullfest breeders cattle will be accompanied by proper health certificates for immediate shipment.

## SEMEN INTEREST:

The Basin Bullfest breeders reserve a one-third semen interest in every bull selling. 100% possession and salvage value is the buyer's.

## ANNOUNCEMENTS:

A supplemental update sheet will be available sale day. All announcements made from the auction block take precedence over printed matter in this sale book.

## TRUCKING/DELIVERY:

Free delivery for the first 250 miles on purchases totaling \$10,000 or more, to surrounding states. Delivery beyond 250 miles is charged at cost. Transport for all other bull and heifer purchases are a buyer's expense.

## FOOD AND REFRESHMENTS:

Complimentary lunch and beverages for registered buyers only. Scan the QR Code or visit [basinbullfest.com](http://basinbullfest.com) to pre-register and claim your bidder number and lunch tickets.

## VIDEOS/SALE INFORMATION:

View videos and updates at [basinbullfest.com](http://basinbullfest.com).  
Join the Basin Bullfest group on Facebook!

## HOTEL ACCOMMODATIONS:

Running Y Resort is proud to serve as the exclusive lodging partner for Basin Bullfest and we can't wait to welcome you. Running Y is the perfect place to kick off your boots after a full day of good food, great company and outstanding cattle. **Scan the QR to book your stay with this exclusive rate.**

RUNNING Y RESORT

# BASIN BULLFEST

## BULL SALE DESIGNATION KEY

### Calving Ease Qualified (CE)

#### Why It Benefits Buyers:

- More sleep during calving season
- Ideal for heifers
- Reduces dystocia risk
- Maintains performance without sacrificing growth
- **Bottom Line:** Confidence breeding heifers without giving up pounds.

### Growth Qualified (GQ)

#### Why It Benefits Buyers:

- Heavier calves at weaning
- Increased pay weight
- Strong feedlot performance
- Balanced, performance-driven genetics
- **Bottom Line:** More pounds = more profit.

### Carcass Merit Qualified (CMQ) - (CAB Focused)

#### Why It Benefits Buyers:

- Grid premium potential
- Added value on the rail
- Strong marbling genetics
- Improved carcass consistency
- **Bottom Line:** Captures value beyond the scale.

### CALVING EASE QUALIFIED:

Ranks in the top 35% of the Angus breed for CED with a Birth Weight EPD of 1.0 or less — built for confidence on heifers without sacrificing performance.

### GROWTH QUALIFIED:

Ranks in the top 35% of the Angus breed for both Weaning Weight (WW) and Yearling Weight (YW)— delivering balanced, performance-driven growth

### CAB QUALIFIED:

Genetics designed to excel in carcass weight, ribeye, and marbling — with qualifications aligned toward Certified Angus Beef® targets. Represents top-tier carcass potential with genetics designed to capture added value on the rail.

# HALTER

### HALTER READY:

These purebred Angus heifers are halter broke, quiet, and responsive — ideal for junior exhibitors or breeders wanting cattle that are enjoyable to work with and built for long-term production.

### These are bulls that:

- Solve problems
- Increase profitability
- Add consistency to their cowherd
- Work in real-world commercial programs

### This designation makes it simple:

Calving Ease = Risk Management

Growth = Payweight

Carcass = Premium Capture

# AMERICAN ANGUS ASSOCIATION EXPECTED PROGENY DIFFERENCES

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## PRODUCTION

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## MATERNAL

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

**Combined Value (\$C)**, expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. EPDs directly influencing a combined index are: CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, DMI, Marb, CW, RE and Fat.
