BULL SALE

376 Coming Two-Year-Old Bulls • 209 Yearling Bulls

Saturday • March 14, 2026 • 10 A.M.

2880 N 55 W • Idaho Falls, Idaho 83402

Welcome

Schedule of Events

Dear friends and neighbors,

Thank you for taking a look at our offering this spring. We always strive to improve over the previous year, but this year's offering is a step beyond my expectations. I am very proud of Rhett, Dale, Andrea, Chris, and the entire team. They have really outdone themselves this year. I hope you can find time in your schedule to visit us on sale day. If you are able to visit us, I think that you'll agree that I'm not exaggerating when I say this set of bulls are the best that we have ever had to offer.

We consider it a great honor that throughout the years, so many ranches have chosen Riverbend as their main source of Angus genetics. We are extremely grateful for your continued support!

In today's world of higher cattle prices, producers are finally being paid for their hard work and genetics are becoming increasingly important in the journey to increase profitability. We are grateful for the many operations who seek out Riverbend genetics each fall to fill their feedlots. They are looking for genetics that will produce profits for them in the feedlot. The fact that feedlots across the nation are willing to pay a premium for calves sired by Riverbend bulls is a tribute to the ranchers who skillfully pair those genetics and produce those calves.

We are also grateful for the efforts of the hundreds of purebred breeders who, over the years, have contributed to developing the outstanding Angus breed that now dominates the cattle landscape. It has been very exciting to see the progress that the Angus breed has made over the years. We respect the many great seedstock operations throughout the Western USA. And it is a rewarding experience for us to be a small part of this great industry.

There has never been a better time to be in the cattle business. In today's world, those who are serious about their health know the importance of protein in their diet! And beef is the tastiest protein on the menu! Health experts are now touting that beef is an extremely important part of a healthy diet. Beef is back in vogue. Supplies are down. And prices are up! These are fun times!

We look forward to seeing you on sale day. We hope you can join us!

Watch the Sale on CCI.live!

*The best, the fastest and most
comprehensive marketing & bidding tool!*

How to Bid Online...

- **As a buyer**, you DO NOT need to login to watch the sale but you must have a validated account to bid.

To **BID ONLINE** go to www.CCI.live in your Chrome, Firefox, Safari or other modern browser:

- 1) Click on the sale schedule page.
- 2) Click on the sale of interest.
- 3) Click on Bid Online- Register and then Get Buyer Number

- After you are logged in, you must proceed to the sale page for your auction and click Bid Online - Register, then **"Get Buyer Number."** Some auctions require valid credit card number on file to obtain a buyer number to bid.

- CCI.live will operate with ease on a modern **cellular device, laptop, desktop or tablet.**
- A **current browser** is important and will always make your experience better.

- **For successful bidding you must have good Internet service!** It is very important to be stationary if bidding. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen, it is real time, and refresh your browser if you feel like you have some lag.

- **Support line open during all sales. TEXT 405-400-9505** - Please alert the ranch for your hauling preferences.

Sale Information

SALE ORDER

Sale order will be catalog order unless otherwise announced from the block.

HERD HEALTH

All cattle are eligible for interstate shipment, although some states may require additional testing prior to shipping. All bulls are guaranteed virgin bulls unless noted in the catalog or announced from the auction block. All bulls were vaccinated January 2026 with Vista 5 VL5, Vision 8, wormed with Safeguard, and poured with Clean-up II.

BREEDING SOUNDNESS EXAM

All bulls passed a semen test and breeding soundness exam administered in January 2026 by Willowcreek Veterinary Clinic. A copy of the evaluation will be furnished upon request.

RETAINED INTEREST

Riverbend Ranch retains a 1/3 semen revenue sharing interest in each bull selling. Simply stated, should semen sales become possible, Riverbend will share in 1/3 of the proceeds. The bull will remain in your control and you will receive 100% of any salvage or resale value. If you sell the bull to another producer, Riverbend retains their 1/3 semen interest.

GUARANTEE - BEST IN THE BUSINESS!

All bulls sold in this sale sell with a satisfaction guarantee for the first year until January 1st of the following year. A suitable replacement, if available, will be provided, or if the buyer prefers, credit toward one bull in a following Riverbend Genetic Edge Bull Sale, less the salvage value and discounts. All credits must be reported to Dale Meek 208-681-9840 or Chris Howell 208-681-9821 by January 1st. Please notify Riverbend as soon as possible should injury occur and before the injured bull is sold for salvage. Replacement and private treaty bulls are not covered by this guarantee.

DELIVERY

Free delivery in continental United States on purchases of three bulls or more to centralized locations. Free delivery to Idaho and surrounding states to centralized locations. \$100 per bull for providing your own trucking by the Monday after the sale. Please inform the sales clerks of your intentions and detailed delivery directions.

REPEAT CUSTOMER DISCOUNTS

Customers who purchased Riverbend Bulls in either of the 2025 Genetic Edge Bull Sales will receive 5% off their bull purchase in the 2026 Genetic Edge Bull Sale. Repeat buyers can still qualify for volume discounts. Bulls must be paid in full within 60 days of the sale to receive this discount.

VOLUME DISCOUNTS

A 3% volume discount will be offered at 3 bulls. This discount will increase 1% for each additional bull up to a total of 10 bulls. If buyer qualified for repeat buyer discount, volume discount will start at the 6th bull, increasing by 1% with each additional bull until a total of 10%. Bulls must be paid in full within 60 days of the sale to receive this discount.

TOTAL DISCOUNTS AVAILABLE

All customers can qualify for up to 10% in total discounts. Discounts are calculated after all credits and delivery discounts have been deducted. Bull must be paid in full within 60 days of the sale to receive discounts.

TERMS & CONDITIONS

Terms of sale are check, cash, or credit card. Visa, Mastercard, Discover and American Express all accepted with a 3% convenience fee. All bulls sell under the Terms and Conditions of the American Angus Association. Announcements from the auction block take precedence over any printed material. Riverbend Ranch reserves the right to remove any animal not meeting our specifications prior to sale time.

SIGHT UNSEEN PURCHASE PROGRAM!

Can't make it to the sale, but would like to purchase cattle? Provide our staff with your specifications and let them evaluate the bulls for you. Then bid via sale day phone, CCI, live, or through buyer representatives.

PAP SCORING CHART

PAP	INTERPETATION
30-35	This score is considered excellent and highly reliable
36-39	This score is considered excellent for any animal over the age of 12 months. If the animal is less than 12 months of age, the score is still fairly reliable, but retesting before breeding is suggested
<41	Scores less than 41 are reliable measurements in all animals more than 12 months of age. It is recommended that yearling cattle have PAP measurements less than 41. The varaiaion in scores 41 and above are inconsistent and difficult to predict in some cattle as they age. Any animal measuring 41 and greater should always be retested before use.
41-45	This range is accepable for older animals (ie more than 16 months of age). Animals less than 16 months should be retested to predict the future PAP score of the animal accurately.
45-48	This range is acceptable only for older animals that have been in high elevations for an extended period of time. Animals with this score are more susceptible to environmental stresses leading to HMD and should be considered at some risk. Elevation of test site and where the animal lives must be evaluated closely for those in this PAP score range.
>50	Animals that score in this range must always be considered high risk canidates for developing HMD, not only for themselves but also their offspring. Many animals that have scored in this range have died of HMD. An option of these animals is to move to lower elevations.

BULLS TESTED NOVEMBER & DECEMBER 2025 IN DILLON, MT AT 5,200 FT

For more information about PAP scoring contact Dr. Ben Abbey, 406-660-1412.

RIVERBEND BULLS – MULTIPLE TRAIT EXCELLENCE

The average Riverbend bull versus the average bull in the Angus breed comparison:

Trait	CED	BW	WW	YW	YH	SC	DOC	CLAW	ANGLE	PAP	HP	CEM	MILK	MARB	RE	\$M	\$W	\$B	\$C
RIVERBEND FALL BULL AVERAGE	+7	+1.5	+78	+138	+6	+93	+21	+47	+45	+71	+11.2	+10	+28	+1.16	+93	+67	+78	+197	+323

ANGUS BREED AVERAGE BULL	+6	+1.2	+68	+120	+6	+89	+19	+48	+47	+1.16	+11.7	+8	+27	+7.8	+71	+66	+65	+155	+268

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Dockity (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockity in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Teat Size (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving dockity, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.
