Welcome to Allen Brothers Cattle

On behalf of the entire crew at Allen Brothers Cattle, we would like to welcome you to our annual Angus and SimAngus Spring Bull and Female Sale to be held on Tuesday, March 3rd at 1:00 PM. We truly appreciate your interest in our program and your continued support. Like most of you, our sole income revolves around our cattle. We truly believe that our genetics will make you more profitable. We have tested our genetics from conception all the way to the rail in our large commercial sector of our cowherd and they have outperformed anything out there.

The cattle business continues to offer excitement and opportunity. We remain optimistic about the future of the beef industry. Our goal has always been to raise cattle that work for real-world commercial producers—cattle that are sound, fertile, efficient, and profitable. We focus on balanced genetics, structural integrity, and performance that will hold up in large, rugged environments. Extremes in any one trait will inevitably have negative financial side effects. Balance and optimum levels in each trait will lead to profitable cattle. We are glad you have put your trust in us to breed those optimums into your calfcrop as you invest in our genetics.

This year's offering is one we are especially proud of. It's fun for us to see progress each year and watch each calf crop become more consistent and higher quality. The bulls selling represent years of careful selection and disciplined management. They have been developed in large pens where they get plenty of exercise, and are performance tested on a high roughage ration designed to promote longevity and durability rather than excess condition. These bulls are athletic, big-hipped, sound-footed, and backed by cow families that have proven themselves year after year. Every year we have customers report back to us that our bulls hold up as well as anything they have ever ran.

Our genetics are selected with the commercial customer in mind—calving ease where it matters, growth and power where it pays, and maternal strength that builds a better cowherd. We stand behind the cattle we sell and believe they will add value whether you are selling calves at weaning or retaining ownership through the feedlot.

We are excited to have you all appraise this power packed offering. We invite you to view the bulls/females at the ranch prior to sale day and encourage you to contact us or our sale staff with any questions. If you cannot attend in person, you will be able to watch or bid online at CCI.live. Justin (541-962-5154) and Logan (541-519-0668) will also be available on sale day to take orders along with the sale staff. You can buy as an absentee bidder with confidence; we'll treat you the way we would want to be treated.

Thank you for considering Allen Brothers Cattle as a source of herd sires or the future of your cowherd. Whether you are a longtime customer or joining us for the first time, we look forward to visiting with you, earning your trust, and welcoming you on sale day!

We hope to see you March 3rd.

ABC Daybreak 5794—We always say that a bull will sire females that look like their mother. The dam of Daybreak is phenotypically flawless. Coleman Donna 9365 was our \$50,000 half interest purchase at Colemans 2023 fall dispersal. We admired her for being massive bodied, perfect uddered and standing on great feet. She maintains a BR of 91, WR of 102 and YR of 106. Our patriot daughters have been so impressive that we have made multiple ET matings to make more of those daughters. Patriot is as good of an udder improver as we have seen and his daughters in production have a birth ratio of 97 and a nursing ratio of 103. Go look at his full sister, which will lead off the female heifer division and you will know exactly why we love Daybreak so much!

ABC Emblynette 0222 - Dam of Lots 4 and 5

ABC Backbone 5261—ABC Backbone 5261 has been a stud since he was on his mother this past summer. He possesses all of the traits that we look for in an ideal angus. From a young age, Backbone has had a big crest, authentic Angus breed character, possessing thickness from front to back and a bulging hindquarter. A top replacement heifer this year is out of a full sister to Backbone and she has a world class udder. His stellar genomic testing ranks him in the top 6% of the breed for birth weight as well as top 17% for WW. Expect his daughters to have phenomenal udders and huge calves at side.

ABC Wildfire 5103—Seeing is believing and you need to come to Oregon to see this bull to believe. We have never raised an Angus bull with more raw muscle, top and hip than ABC Wildfire 5103! He is out of a full sister to Backcountry only adding to the consistency of his gene pool. She has been a very good producer weaning off her first two calves at a WR of 107. If you have ever seen the mature video of his sire Blairs External Law, you will have seen what this bull will mature into. Wildfire is a carbon copy of External Law, possessing the kind of raw power and presence that is so hard to find in an Angus bull.

ABC Ridgeline 5421 – ABC Ridgeline 5421 is a stud from every angle. His sire was an awesome full brother to Backcountry who was at the unfortunate end of a tractor accident when he got backed over late one night while bedding the bulls. His injuries will make Ridgeline the one and only calf that he sired, but what a good one he is! His dam, ABC Emblynette 0222 is a consistent producer that is a no brainer when deciding who to flush. She has a WR of 108/4 and sold an \$11,500 son who was a crowd favorite in our 2025 sale.

Nutrition Program

Overview

Welcome to the Allen Brothers Cattle Angus and SimAngus Bull Sale. I think you will agree that the Allen family has produced another excellent set of bulls for your consideration. As their consulting nutritionist, I strive to develop optimal nutrition and management programs to express the genetic potential of the Allen Brothers Cattle seedstock while giving special attention to safeguarding soundness and reproductive longevity.

Nutritional Philosophy

The nutritional treatment of breeding stock from conception to first breeding can have a profound effect on their lifetime potential. In fact, nutritional influences on future health and productivity have been traced as far back as early embryonic development; a concept termed "fetal programming." Therefore, we focus not only on the nutrient requirements of the cow throughout her production cycle, but also on the nutritional factors that affect gene expression of economically important traits in the developing calf. From conception to turnout, we strive to express the genetic potential of the cattle without compromising structural soundness and breeding performance.

Bull Development

We believe in the concept of developing bulls, not finishing them. Therefore, we focus on providing optimum energy and protein levels to achieve desired lean gain growth targets. To this end, the Allen Brothers Cattle bulls were developed on a high-roughage, moderate-energy, high-protein diet. Particular attention was given to proper vitamin and mineral supplementation to promote reproductive development and longevity. We think that you will agree that our nutritional philosophy has produced an exceptional set of fertile bulls that are ready to go to work for you. Buy with confidence!

Miss Yardley E86 - Maternal Great Granddam of Lot 16

a cowherd based on commercial principles

Dear Northwest Cattlemen,

I am again excited, honored and privileged to help bring you the 4th Annual offering of the Allen Brothers Cattle Sale of an extremely powerful set of bulls. You will not find many programs in America with the consistency of cattle that are loaded with quality, muscle, fleshing ability, maternal performance and longevity.

Justin and Logan and their families have maintained the emphasis on the cowherd and have seen first hand the dividends that brings with the implementation of those traits on the their large commercial program. The cattle that are sold every July on Western Vidoe Market are always a sale feature and bring a premium as feeder cattle and replacements alike.

They have assembled an impressive donor battery and herd sire lineup in both breeds of their registered program. They continually scout the country looking for the best A.I. and flush sires as well to use to keep breeding the kind of cattle that will keep you in business for the long haul. The newest acquisition, SAV Turning Point 5136, will be on display sale day and they are excited to be taking semen orders on one of the exciting young bulls to sell this spring.

This year we will be offering a superior set of yearling heifers, in addition to the bulls. I have been through them when they were on their mothers last fall and again in January and they are flat awesome! What might be most exciting is the proven donor cow they are sharing with you, the lot 101 female, SAV Emblynette 9338! She is one to pay attention to! She is as proven of a producer as they have on the ranch. She is fertile, soft made, super easy fleshing, moderate and sports a gorgeous udder with plenty of milk. Her calves have a BW ratio of 96 to 107 at weaning. She has raised 5 AI calves in a row and just dropped her sixth one in January. Take a look to move your program in the right direction.

The registered and commercial cattle at Allen Bros. are run just like most Northwest commercial operations. Fertility and production are a must for each female to earn her spot to stay in the program year in and year out. They have an extremely disciplined approach to beef production and it shows when you lay your eyes on what these two young and aggressive cattlemen are putting out for the public.

We are going to broadcast on CCI.Live in partnership with Western Video Market. The videos will also be available there. If you can not make it in person you can log on and bid and buy with confidence. The customer service is exemplary and you are guaranteed to be satisfied upon delivery. If you have any questions do not hesitate to reach out to me I would be happy to talk with you about this great program that has created quite a following in the Northwest and beyond.

When you see the most successful people in any business, they all share one common theme - they all do every step of the process 100%. They never cut corners and are passionate about their work.

ABC Kenetrek 5280 – Introducing ABC Kenetrek 5280. His pathfinder dam, SAV Emblynette 9338 has never let us down. Year after year she gets bred 1st straw AI and generates high sellers and top replacement heifers. Her heifer calf in last year's sale sold for a whopping \$20,000! Legend is been the most consistent sire that we have used to add frame, stretch, muscle and payweight. Legend is the largest yearling weight bull we have ever raised at 1595 pounds. As a sire group, that performance has carried through with his first calf crop averaging 104 at weaning. Kenetrek has an ideal Angus skull, huge crest and is ripped with muscle. His dam is selling as lot 101, which we are selling solely as a marketing tool. The only reason we are willing to part with her is because she has been a great embryo producer and we have multiple daughters working in our herd.

ABC First Light 5017 – If there was an overall favorite in our Angus division, First Light is at the top of the list. He is loaded with performance, thickness, charisma, structural correctness and he has phenomenal feet. This is the kind of bull that will make mouthwatering females, but has enough size and performance to make heavyweight bulls or steers as well. In our mind, he is ideal in his frame size to cover all aspects of beef production. First Light leads our Angus division as the valedictorian of the performance class, weaning off at 818 pounds! Commercial cattle still sell by the pound and do the math at \$4/lb. He is sure to have a lot of friends on sale day.

Lots 25-29 Renovation x 9076 – This has undoubtedly been the hardest flush of bulls/heifers to evaluate for quality that we have ever had born here. There is the least amount of variation from the first to the last that we have seen. It is still up for debate which of them is the best. We saw the production of Brooking Rose 9076 and knew that we needed to purchase a flush. Renovation needs no introduction to what he has done as far as making mouthwatering females that excel for body type, fleshing ability and beautiful udders. The heifer mates to these bulls are at the top of the replacement pen with an undeniable Rose look and femininity. If someone is wanting to make show heifers, or put a killer look into their calves, these are the bulls for you. They have nice keen heads, tie into their shoulder high, have absolutely no curl to their feet and an undeniable presence. Don't miss out on a rare opportunity to inject the prepotent Rose 9076 blood into your next calf crop.

ABC Landman 5007 – Landman is a perfect example of why we want more Patriot females in our herd. He weaned off at a ground pounding 799 pounds out of a 1st calf heifer. It is rare to find a heifer safe option that doesn't sacrifice pounds at weaning. Landman is long spined, attractive, sound and very complete. Badlands has been a people popular bull working well throughout the nation, with countless sale toppers.

ABC Crossfire 5361 – ABC Crossfire 5361 is a no-holes, sleep at night calving ease bull with breed leading marbling predictions in his dna testing, structural soundness and perfect feet. He is the kind of bull to use on hundreds of commercial heifers. His dam has entered our donor arsenal because of her massive body type, stellar udder, foot quality and early production.

ALLEN APEX N261 Apex is without a doubt one of the very best we have ever offered. He is a great representation of our program and the type and kind we strive to produce. You will be hard pressed to find another bull with as much true muscle shape in a phenotypically flawless package. APEX is sure to make a powerful positive impact on any program. The dam of APEX, ALLEN G375, is a 9th consecutive generational ET donor. It is extremely difficult to make a cow with as much body, bone, and substance as G375 without sacrificing her elegant extended front end. She is a member of the greatest flush we have ever produced in our SimAngus division. The consistency and quality of those half blood females in that flush is unmatched.

ALLEN Atlas N19 A favorite of many visitors to the ranch and for good reason. Atlas is an extremely heavy muscled, stout boned bull with plenty of eye appeal. Atlas has as much bone as any bull we have raised. He's the kind that will fix frail made Angus cows in one generation. We only kept one herd bull this year and he's out of the Granddam of Atlas. E170 breeds early every year, raises the best calves and has never caused us any problems.

ALLEN Alpha N25 Alpha might be the stoutest bull we have ever raised. He is strong topped and big butted, but you need to get in behind him to truly appreciate the pin width and power of this bull. These are the kind of bulls that create a genetic explosion when crossed on a set of Angus cows. This bull should go to a seedstock producer, but if not he will sire some scale crushing steers. Commercial cattle still sell by the pound and he will do the job as well as any. Alpha stems from a great maternal line of cows.

ALLEN Latitude N241 Latitude is a bull that will be sure to catch your eye for his unique markings, but the more you study him he's more than just a pretty face. Allen Latitude N241 blends proven performance with maternal excellence. Sired by our proven herdsire E330, this bull offers early growth, a sound structure, balance, all while maintaining a moderate mature size. His dam SAV Madame Pride 0661 adds elite maternal strength from one of the breed's most respected cow families. A full sister leads off the SimAngus heifer division as the best composite female to have ever left our herd.

ALLEN Patriot M9 - Maternal Brother to Lot 76.

more balance, less extremes

At Allen Brothers Cattle we believe in taking a well-rounded approach to breeding exceptional cattle. Through our experience as cattle producers, we've seen how **MORE BALANCE** and **LESS EXTREMES** builds a consistent, quality herd. It all starts with a **GREAT COW**. We have done our part in seeking out the most **reliable** and **efficient** cow families in the business that have stood the **test of time**. We prioritize traits that make commercial cattlemen profitable such as; **reproductive efficiency, longevity, foot structure, udder quality, fleshing ability and real-world performance.**

83 ALLEN **BOND** N8

3/8 SM 5/8 AN | BD. 1/19/25 | ASA#. 4639823 | Tattoo. N8

ALLEN BOND N8: A true curve-bending bull with calving ease at the forefront. ALLEN BOND N8 ranks in the top 10% for CE and top 15% for BW, making him a strong option for heifer-friendly use without sacrificing quality. Sired by Brooking Bond 1245, N8 combines proven maternal genetics with a balanced, athletic build. He ties in high out of the top of his shoulder and has the right kind of head for calving out a set of heifers.

Where do we even start with this female. There are a lot of things that get us excited about a great cow, but the proof is in the pudding. When a cow consistently produces an early AI calf, causes zero problems, goes unnoticed and weans a huge calf every fall we pay attention. The proven pathfinder, SAV Emblynnette 9338 is fertile, big bodied, easy fleshing, feminine, and has a gorgeous udder. She has raised 5 AI calves in a row for us with the 6th on the ground now. Her calves have an average BW ratio of 96 and 107 at weaning. The Legend heifer calf on her side is a full sister to ABC Kenetrek 5280 and she has a killer look as a young calf. This kind of female isn't offered up for sale very often, so don't miss this opportunity. 9338 has averaged 9 embryos per IVF aspiration. She is being offered strictly as a sale attraction! Selling 1/2 embryo interest.

We have held nothing back here, offering up one of the very best. It may sound like a broken record at this point, but Patriot is making great cows that breed back and wean huge calves. As the saying goes, "if it doesn't sting a bit, you aren't selling the right ones." ABC Donna 5793 is a complete smoke show and full sister to the Lot 1 bull in this sale, ABC Daybreak 5794. We have admired her all summer alongside her recip mother and daydreamed about watching this one become a cow. She is extremely powerful, yet complete in her makeup. 5793 is soft made, expressing massive rib shape, level topline and very attractive in her front 1/3. Coleman Donna 9365 was our \$50,000 half interest purchase at Coleman's 2023' fall dispersal. We admired her for being massive bodied, perfect uddered and standing on great feet. She maintains a BR of 91, WR of 102 and YR of 106. You will travel the country trying to find the herd-building, future donor type, but that's exactly what we expect out of lot 102! We reserve the right to one successful IVF aspiration at our expense and the buyer's convenience.

Lot 103

Coleman Donna 9365 - Dam of Lot 103

Coleman Below Zero 2106 - Sire of Lot 103

Much like the Patriot half sister, we are fully aware that this is a female that should not be leaving Oregon. She embodies everything we try to produce at ABC. She is extremely soft made, sound to the ground, good on the move with a gorgeous front end. We are very pleased with our first calf crop out of 9365 and look forward to creating an arsenal of daughters here. The Donna cow family has worked well across the country and is known for producing easy fleshing, problem free cattle that do their job year in and year out. Buy with confidence. ABC retains the right to one successful IVF aspiration at our expense and the buyer's convenience.

Lot 104

Coleman Donna 3202 - Maternal Granddam of Lot 104

Lot 104: We will guarantee that ABC Donna 5408 will have a pile of friends on sale day. She is quiet natured, extremely big bodied and loaded with style. The great cows make daughters that are carbon copies of themselves. That is exactly what we've got here. Allen Donna 9327 is ultra-feminine, perfect uddered, great footed and a proven producer. She records a BW ratio of 97 and a WR of 107 all while maintaining a calving interval of 356 days. 5408 is one that we are absolutely sick about parting with, but excited to see what she does for the new owner. This is the kind that is destined to make a future donor. ABC retains the right to one successful IVF aspiration at our expense and the buyer's convenience.

When we selected females to feature in this sale, we knew that a few Renovation daughters would get everyone's attention. SAV Madame Pride 0661 is a full sister to Patriot. She has an udder that is as good as it gets with plenty of milk. The reference photo is her as a 2 year old when she started making a bag to have her first calf. 5921 is a very complete female. She has a very nice front end, massive body, sound structure and ranks high in multiple traits on her genomic profile.

This flush of 9076 to Renovation really worked. If you saw the consistency of flushmates from the first to the last, there is very little variation. 9076 puts a front end on both heifers and bulls that is unmatched. ABC Rose 5822 is long necked, clean fronted, has a cute little head and looks to be a futuristic producer. Renovation has made his own name for making neat uddered females with an unmatched body type and overall look.

In our opinion, N242 is without a doubt the best SimAngus heifer that we have ever offered for sale. When you see her on the move you will fall in love. She is the perfect blend of thickness from front to back, femininity and style. Her dam, SAV Madame Pride 0661 is a full sister to our popular herdsire SAV Patriot 0942. We keep going back to Patriot to make more daughters because they have been so productive. Every year it seems like our biggest calves weaned are off of Patriot daughters. We expect the same level of productivity out of N242.

Our favorite 2 year old that freshened this year is a full sister to N15. She is huge bodied, perfect uddered and has a great calf at side. This is a prime example of us trying to offer up some of our most consistent matings to the public. N15 started off light with a 76 pound birth weight and boasted a WR of 104.

N6 is a high performing heifer with massive rib shape and an elegant front end. She mashed the scales at weaning with a weaning ratio of 108. She is in the Top 15% WW EPD and the top 10% for YW EPD.

Allen Brothers Cattle
48748 McCarty Bridge Road
North Powder, OR 97867

Directions to Allen Brothers Cattle

Join us at our new sale facility at the ranch. Located 5 miles from I-84, between Boise, ID and Pendleton, OR.

From North Powder (Exit 285)

Head South on Highway 30 toward Haines for 2.3 miles.

Turn left on McCarty Bridge Road at the potato cellars and continue for about one mile.

Turn right at the first cattle guard on your right. This is our driveway. Continue for one mile until you see a Y in the road.

Stay to the left at the Y and you will see the big white sale barn.
