TERMS & CONDITIONS

SUPPLEMENTAL INFORMATION

A supplement sheet will be available sale day with up-to-date performance information on the bulls. This sheet and any announcements from the block will take precedence over the printed material in the sale book. Please grab a sheet when you grab your buyer's number.

BUYERS UNABLE TO ATTEND THE SALE

Your sight-unseen purchase is guaranteed.

You may contact Bob Rylaarsdam to assist you in purchasing a bull. You may have confidence in your bid and a full money back guarantee upon delivery.

PICK-UP DISCOUNT

We are offering a \$100 discount off the selling price if you take possession of your bull directly after the auction or the next day.

DISCLAIMER

The Lewiston Livestock Market and the Camas Prairie Angus Ranch assume no liability for accidents or injury that may occur. Attend the sale at your own risk.

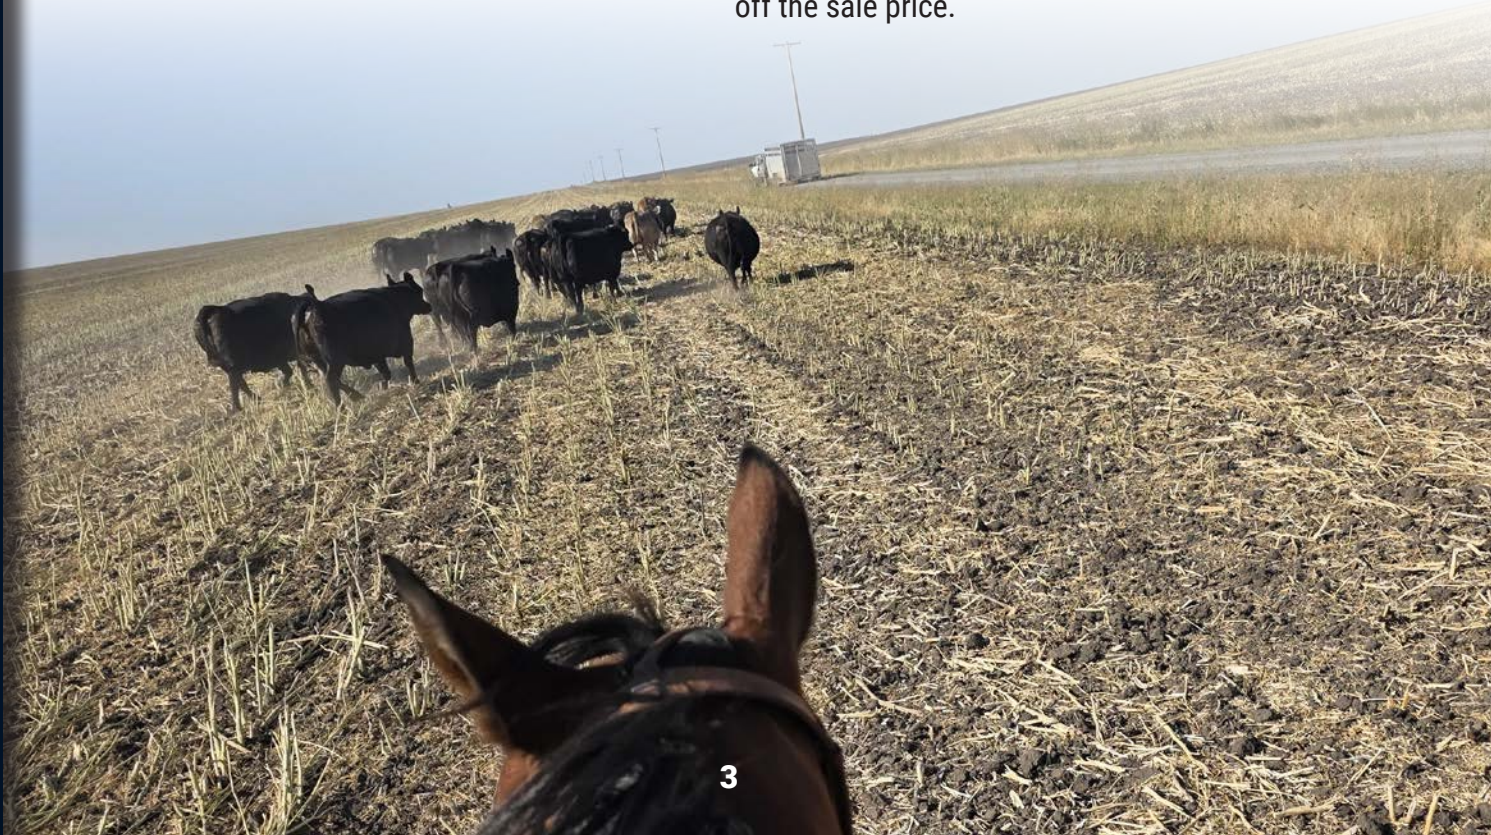

CAMAS PRAIRIE ANGUS RANCH SALE GUARANTEE

We offer a complete, full first breeding season guarantee. The first breeding season is defined as the first 90 days following turn out. All bulls have passed a semen test within 30 days of the sale. For bulls, if the bull becomes injured or is infertile, we will exchange the bull with a suitable replacement if one is unavailable.

Salvage value will be deducted from purchase price, (figured at \$2,000) and then the remaining balance split between buyer and seller, with buyer given credit towards purchase of another animal or a replacement if available. We will retain the salvage value.

DELIVERY

We offer free delivery up to 250 miles on all bulls. For delivery over 250 miles you will be charged the amount in excess of 250 miles at the rate of \$0.50 per mile round trip. Delivery will begin March 15, 2025. It is required that bulls being delivered have insurance which is available at the sale. If you can pick up the bull at the sale yard, \$100 will be taken off the sale price.

BULL DEVELOPMENT

THESE BULLS HAVE RECEIVED THE FOLLOWING VACCINATION PROTOCOL:

Birth: MultiMin

Branding: Nasalgen # PMH, Vision 7/ Somnus, Vira Shield 6, MultiMin

Weaning: Vision 8/Somnus, Vira Shield 6/VL5, MultiMin, Pour On

Yearling: Vision 8/Somnus, Vira Shield 6/VI5, Pour On

Performance Plus Vac Program:

Camas Prairie Angus & Advanced Angus is working closely with Cyon Livestock Solutions to customize a vaccination program that not only maximizes the efficiency and production of the cow herds, but more importantly develops these bulls with an end goal of providing a sound breeding tool that will transition to multiple environments without acclimation. We are continuing to change our vaccination program as we learn about better vaccines and ways to meet our goals.

Fall Bulls Development:

Cows calve on Dryland fall pastures & wheat stubble or Cover Crop in Grangeville, ID. They are then moved to our Lewiston, ID winter ranch, where the cows are bred for the next year's calves.

At turnout time (roughly March 25th), they go back to grass with their mothers at the Lewiston & Asotin Ranches until approximately June 10th. They are then weaned and developed at our Asotin facility until the end of August, when they were moved to Connell, WA and put on cover crop for a month and a half, then moved into the Bare Bones Livestock facility to develop further.

CPAR

CAMAS PRAIRIE ANGUS RANCH
again!

It is with great pleasure that we are once again able to offer you another one of our bull crops. This is our 40th annual sale, and we think we have the best set of bulls to offer ever!

I said it last year, and am glad to say it again this year, What an EXCITING time to be in the beef business with all sorts of record prices being attained

We will be slowing down a bit after this sale, and turning more duties and decisions over to my partners, Miles Hatter & David Orr. I will still be involved with helping mentor these fine fellows, and probably be running some equipment from time to time.

Once again we have some great ET herdbull prospects out of two of our great donor cows. Lots 1 thru 5. Check them out!

We also again have bulls from Advanced Angus, Miles & Nina Hatter, they have come a long way with their cattle in a very short time! Don't overlook the quality bulls they have to offer.

Also we have again a few select bulls from our cousins, Double Ace Angus, The Roosma family are also doing a great job with their cattle getting better every year as well.

Talk to us about the Legacy Beef enterprise that has been going great in it's rookie year. You will hear more exciting news when they get the Grangeville facility up and running!

We are still hoping to get a facility, to gather and feed customer's calves, set up before next fall. Ask us about that too.

We are of course still investing in new herdsires and Donor cows. Be sure to watch for upcoming news about them!

Mark March 1st on your calendar to be in Lewiston, ID. Come enjoy a tri-tip lunch put on by Jon Davis of Cyon Livestock and the consignors, as well as looking at some great bulls and have a great time!

Thanks everyone for letting us enjoy the last 40 years selling the commercial man bulls. And the last 48 years we have been in the Angus breed!

Bob & Ruby Rylaarsdam

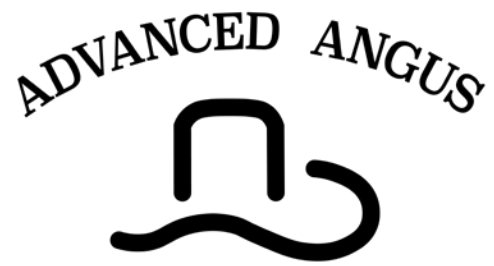

At Double Ace Angus we are inspired by Paul Harvey's speech "So God Made A Farmer." We believe in the men and women who represent the caretakers Paul Harvey talks about in his speech. At Double Ace Angus we strive to produce the best genetics we can. The goal for our business is to become better cattle producers by striving to improve our cattle. Double Ace Angus was started in 2016 by myself, Carl Roosma, and my brother Daniel Roosma. A lot of our cattle herd come from the Washington Evergreen Angus sale in Moses Lake and from CPAR. We at Double Ace Angus would like to first thank the buyers for coming to the CPAR bull sale and considering our bulls. We would also like to thank Bob and Ruby Rylaarsdam for all their help and letting us join their Angus family. We would also like to thank the Hatter Family for welcoming us to the sale as well. If you have any questions about the bulls, feel free to give me a call, Carl Roosma at 360-922-2244.

Thank you,

Double Ace Angus

Advanced Angus, we are a small, family run operation that focuses on progressive beef industry genetics. Our cattle are selected for superior confirmation, maternal instincts, and docile nature. We select cattle with exceptional growth traits while maintaining good carcass merit. All of our stock comes from genetic lines known for thriving in different environments and herdsman techniques. The blood-

lines you will find at Advanced Angus are sourced nationwide to ensure genetic diversity, as well as from some of the best, most consistent cow families.

In the last year we have been fortunate to open Legacy Beef with our partners. This now means that we can provide a stronger opportunity to market our customers' calves. We feel that through networking with Western Video and Legacy Beef, our customers will be able to have a superior experience with profitability put back on your doorstep. The animals you raise will be back nurturing our communities.

My wife, Nina, and I are very honored to be helping Bob and Ruby Rylaarsdam with the management of the Camas Prairie Angus Ranch. This has always been a dream of ours as we look forward to increasing the profitability for our customers. We are confident in the bulls we are offering this year and continue to make progress in our genetic program to make the best cattle we can in the future.

We would like to thank Camas Prairie Angus for involving us in their offerings. We wish all our cattle producing families a productive and fruitful year!

Miles, Nina, & Wyatt Hatter
(208) 697-3521

Looking to the Future...

Dear Friends and Fellow Beef Producers,

Welcome to the 40th Camas Prairie Angus Ranch Production Sale!

While reflecting on Bob Rylaarsdam's 40-year journey in the Angus business, one word stood out: resilient. Four decades ago, the outlook for the Beef Industry was bleak. Product quality was inconsistent, consumer demand was declining, and the supply chain struggled with volatile commodity prices and unreliable market access. In an effort to compete with chicken and pork, the industry embraced the "War on Fat," pushing cattle genetics toward leanness at the expense of eating quality.

The results were sobering. The National Beef Quality Audits of 1991 and 1995 revealed that one in four steaks delivered an unsatisfactory eating experience. Beef Industry icon Harlan Ritchie of Michigan State University underscored the urgency in his paper Five Years to Meltdown, warning that if beef continued losing market share at its current pace, it would become an irrelevant protein within five years.

Survival required adaptation. Bob—along with countless other dedicated producers—responded by seeking better answers and better cattle. That collective commitment to improvement has transformed our industry. Today, beef is not just competitive, it is the protein of choice, the protein of celebration!

Because of the challenges we faced, we now have powerful, data-driven tools from the American Angus Association to identify high-value genetics. We benefit from grid-based marketing systems nationwide and value-added programs that return meaningful premiums to cow-calf producers.

Resilience built this progress—and it continues to shape our future.

As we look ahead, that future transitions into **Legacy Angus**, carrying forward the foundation Bob established while sharpening our focus on what drives true economic value. Our mission remains to provide seedstock that excel in the traits that matter most.

In the Angus seedstock environment, it is easy to become overly focused on a single trait or to chase characteristics that are difficult to measure and slow to improve. Lasting advancement comes from disciplined selection for highly heritable, economically relevant traits. When we identify and multiply cattle that are "Genetic Giants" in these areas, they elevate the entire population and continue our mission to Make Beef Better!

We believe in balanced selection—applying equal pressure to calving ease, early growth, muscle, appropriate size and stature, maternal function, and carcass quality. Cattle that combine these strengths provide you, our customer, with a built-in genetic hedge. Regardless of your marketing endpoint, you will own cattle with flexibility, adaptability, and measurable value.

Today's industry messaging often encourages producers to choose between "maternal" or "terminal" genetics, as if progress in one area requires compromise in another. In a value-based marketing system, that false choice limits opportunity. The better path is to select genetics that produce the most valuable cattle—animals that thrive and reproduce in your environment while delivering the high-quality beef consumers demand.

Even at record-high prices, consumers continue to vote with their hard-earned dollars for beef as their protein of choice. Cattle backed by measurable, economically relevant genetics maintain value as they move through the supply chain, create this opportunity from pasture to plate.

Legacy Angus is our commitment to that philosophy—continuing to produce cattle that thrive in your environment, strengthen the profitability of your operation, and safeguard the long-term relevance of the product we are proud to produce.

Thank you for your consideration in our offering

ICONS

We have added some icons to help you quickly find bulls who fit the most common specific needs.

**CALVING EASE**

Bulls with this icon are bulls we would be willing to use on our first-calf heifers. He would have to have a fairly low actual birth weight and a fairly high calving ease direct.

**MATERNAL**

Bulls with this icon are backed by good maternal cows and should produce excellent daughters.

**EMBRYO TRANSFER**

Indicates a bull from one of our donor cows, Basin Camilla 4942 or SJS Blackcap Lady 1802. Both dams are known for their strong maternal traits.

PRODUCTION EPDS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPDS

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

\$VALUE INDEXES

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post weaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post weaning and carcass value compared to progeny of other sires.

CARCASS EPDS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.

LEGACYBEEF

Camas Prairie Angus Ranch & Advanced Angus would like to introduce you to the newest & latest venture.

In an effort to gain some extra profitability for our customers' calf crop, we are forming a partnership with Western Video & Legacy Beef.

We are proud to introduce you to Legacy Beef, the dream of Miles Hatter, who along with Derek Nuxoll, Clay Groom, & Larry Hatter made this venture come to fruition. It started with Legacy Beef purchasing the Four Friends processing facility in Clarkston, WA.

Their goal all along has been to help out the local ranchers to obtain a premium for their animals sold through this venture.

The Legacy Beef family is partnering with Western Video, to gather calves, wean them for at least 45 days, and make sure they get three rounds of vaccines in them. Put them together in semi load lots to market them. Legacy Beef will be purchasing cattle sired by our elite genetics, feeding them to finish, and then processing them and selling the end product through local grocery stores and restaurants; thus, aligning this venture to go from conception through to plate, with our local cattle feeding our local population!

If you are interested in knowing more about this exciting venture, contact Miles Hatter at (208) 697-3521, or anyone involved in the Legacy Beef family.

If you would like to talk to someone from Western Video, call one of us and we will put you in contact with a representative closest to you.

Representatives:

Bill Marek, Whitebird, ID (208) 989-9438 - Jared Patterson, Middleton, ID (208) 312-2386

Rod Wesselman, Moses Lake, WA (509) 750-2185 - Bryce & Kellie Palmer, Walla Walla, WA (509) 876-0777
