

2026 PRODUCTION SALE

**19284 Marion Road
Fredonia, KY 42411**

**Saturday, March 14, 2026
1:00 PM CT**

Fellow Cattlemen,

Welcome to the Fifth Annual Bluegrass Gelbvieh Alliance Production Sale. We are proud to offer a powerful set of elite Gelbvieh and Balancer genetics designed to move your program forward.

The Gelbvieh breed continues to gain momentum in the beef industry because it delivers what commercial producers demand: moderate birth weights, strong growth performance, outstanding maternal and reproductive strength, quiet disposition, and excellent feed efficiency. These strengths translate into more pounds at weaning and more profit in your pocket—especially for producers retaining replacement heifers.

This year's bull offering is built with performance and practicality in mind. Birth weights average 79 pounds, with most bulls in the 70–80 lb. range. Several bulls are heifer acceptable, born unassisted out of heifers with modest birth weights.

Bull Breakdown:

- 26 Homozygous Polled
- 21 Homozygous Black
- 4 Heterozygous Black
- 2 Red
- 24 AI Sired
- 16 Balancer
- 11 High Percentage/Purebred
- 26 with GE EPDs and sire verified

Performance Averages:

- BW: 79
- WW: 716
- YW: 1191

These bulls were developed on a forage-based ration, not pushed with excess fat. They are sound, athletic, and ready for turnout—many mature enough to service multiple cows immediately.

Our female offering is equally impressive. These AI and ET bred females represent elite, future-focused genetics. Several possess donor potential and will positively impact your herd—and the breed—for years to come.

We have also added a select group of bred commercial heifers, qualified for CAIP and TAEP programs, providing additional value for progressive operations.

Videos of all sale lots are available on CCI. If you have questions or cannot attend the sale, please contact us prior to March 14 so we can assist with your participation.

We appreciate your interest and look forward to seeing you on sale day.

Sincerely,

Bluegrass Gelbvieh Alliance

Bluegrass Gelbvieh Alliance Production Sale

VIDEO AUCTION SALE PROCEDURE:

All animals selling will be penned at the sale facility.

The auction will be conducted inside the sale barn at S & S Gelbvieh. A video of each animal will be played on large screen displays as the respective animal sells. Cattle will not come into the sale ring.

Please arrive early to view the sale offering.

DIRECTIONS:

S & S Gelbvieh

19284 Marion Road • Fredonia, KY 42411

From 1-69 - Take Exit 79 at Princeton. Proceed on 91 North for 10 miles towards Fredonia. Sale facility is on the left.

From 1-24 - Take Exit 40 to Eddyville. Proceed to Fredonia (approximately 13 miles from Interstate 24). Take a right at the stop sign in Fredonia onto 91 South. Sale facility is about 2 miles on the right.

ACCOMODATIONS:

Hampton Inn • 62 Days Inn Drive, Kuttawa, KY • 270-388-5777

Days Inn • 139 Days Inn Drive, Kuttawa, KY • 270-388-5420

Load Out

After settlement the animals purchased will need to be removed from the facility on Saturday, March 14 by dark unless arrangements are made with sale management prior to the sale. Please let us know if delivery is needed or if a later pick up date is required when settlement is made immediately after the sale. We will try our best to accommodate your needs

Health

All cattle will be accompanied with health papers for shipment anywhere in the continental U.S.

Supplement Sheet

The supplement sheet and announcements from the auction block take precedence over the catalog.

Liability

All persons attending the sale do so at their own risk. The sellers assume no liability, legal or otherwise, for any accidents, theft or damages occurring on or about the premises (sale facility).

Trucking

Transportation for the cattle can be arranged after the sale.

- **We will do our absolute best to meet your transportation needs in a cost-effective manner.**
- Free delivery in the state of Kentucky on purchases of \$10,000 or more.
- Purchases of \$15,000 or more - first 300 miles from Fredonia are free. If possible, please contact sale management before the sale if you plan to have your purchases delivered. We will have trucks going to southern Illinois, southern Indiana, west Tennessee, east Missouri, and Northeast Arkansas.

Terms & Conditions

All cattle will be sold at auction under the standard terms and conditions recommended by the American Gelbvieh Association. Terms of the sale are cash or check at the conclusion of the sale unless prior arrangements are made.

Bull Guarantee

• Insurance on the sale bulls may be purchased by the new owners on sale day. If you would like insurance on a bull you purchased at the BGA sale, please let the seller know. We will help direct you to the insurance agent so you can insure your new bull purchase. If a bull develops a problem in the first 4 months after purchase that is not covered by insurance, please contact the seller as soon as possible to discuss the issue. If it is agreed that a replacement bull is warranted, then a replacement bull of equal or greater value (if available) will be provided. If a replacement bull is not available, then credit toward one bull will be given in the following year's sale, less salvage value of the bull to be replaced.

* Replacement bulls are not covered by this guarantee.

Sight Unseen Guarantee

All purchases made by internet bidding or on order with the Bluegrass Gelbvieh Alliance are 100% satisfaction guaranteed upon delivery. This determination must be made at the time of delivery.

Trailer Parking Address in case of bad weather is:

600 US 641 • Fredonia, KY 42411

A shuttle will run between the "bad weather" trailer parking and the sale facility.

(Approximately 1.7 miles from the sale facility)

Contact 270-556-4259 on sale day for shuttle needs.

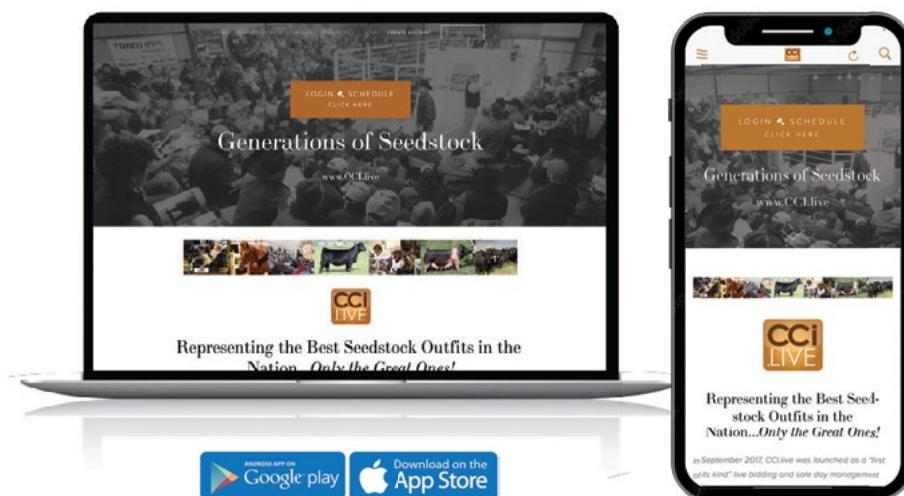

Watch the Sale on CCI.live!

*The best, the fastest and most
comprehensive marketing & bidding tool!*

How to Bid Online...

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
 - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
 - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

Viewed around the world!

WAM JCMC Kill Shot 421M, the performance bull of the decade. Kill Shot is ranked the #2 bull in the Balancer registry for weaning weight and ranks in the top 1% for yearling weight. He is also a maternal powerhouse, falling in the top 1% for Total Maternal and 15% in the Maternal Profit Index (MPI). He completes the package in carcass performance, placing in the top 1% for Carcass Weight and top 5% in the Feeder Profit Index (FPI) and expected ribeye area (CREA). Take your shot - JCMC Kill Shot 421M - and enhance your herd's marketing potential with next-level maternal strength, growth, and carcass performance. **Owned by Jordan McIntosh.** Semen packages \$1000 for 20 units with the opportunity to purchase additional semen for \$35 per unit. Semen sales close March 14th. NO semen will be sold publicly until March 2028.

Here is a big stout homo black, homo polled bull that will add pounds. He is a ¾ brother to Kill Shot. He is super thick, big boned and long bodied, His dam WAM 138J goes back the Jenny 11U cow family. LBFM 11U was the dam of WAM Jenny 029H, the 2021 Breeder's Choice Gelbvieh Heifer Futurity champion. LBFM 11U was 17 years old when we finally sold her. There are very few cows that come around like her. Cows that can raise a big calf every time and stay sound in every way for 17 years.

Ms S & S Big Andy 335N is a black, homo polled Big Andy daughter that will provide a good deal of genetic opportunities for her new owner. She represents 10 generations of our program's breeding tracing back to RAC Ms Cajun 442J who was one of our first 7 cows purchased 44 years ago. Solid performance, pedigree, and EPD profile makes her an easy choice. Sells open and ready to breed.

Ms. Just In Time 133M is a striking black Balancer heifer who combines powerhouse maternal traits with a truly gentle, "baby doll" disposition that makes her a pleasure to handle. She ranks in the top 2% for CED and BW, ensuring calving ease, while her top 1-20% rankings for CEM, STAY, HP, and TM indicate a productive, long-lasting female with strong maternal instincts. She also offers solid performance with all three of the index values ranked at or above 20% of the breed averages. AI bred to KARR Rumpfelts Mr. Black Jack ET (AMGV 1517622) on 12/03/2025 and pasture exposed to LRSF Glacier K136 (AMGV 1538620) since 12/18/2025, she is confirmed bred to the AI date.

EGL Lass E3200 is one of the most impressive females in the breed. She is homozygous black and homozygous polled and represents everything you want in a cow. Powerful yet feminine, she combines outstanding structure with a beautiful udder and correctness from every angle. Simply put, she is a flawless female. On paper, she backs it up—ranking in the top 4% for Weaning Weight, top 3% for Yearling Weight, and top 3% for Carcass Weight. A truly elite cow that excels in both phenotype and performance. Manifesto J104 is homozygous black and homozygous polled, with the power and muscle you expect from a true performance bull. His calves are hitting the ground with added growth and continue to excel through weaning and beyond. A purebred Gelbvieh, J104 ranks in the top 1% for Weaning Weight and Yearling Weight, top 5% for Carcass Weight, and top 15% for Marbling. He combines elite growth, carcass merit, and consistency—making him a bull that delivers real-world results. This elite mating brings together two of the most powerful genetics in the breed, setting the stage for a truly phenomenal and influential individual.

JRI 9J351 is homo black and homo polled and she raised good ones. 9J351 was one of our top picks out of the Judd Ranch 2022 sale. She is backed generations of trusted genetics that had such an impact for Judd Ranch. She is doing a great job raising her calf WAM 546M, a We The People daughter. This will be one of the first We The People daughters to sell. She sale bred to our newest herd sire LAR Manziel. We were not looking for a bull last year to buy but when you find a bull that will fit your breeding program you buy him. The All American combo has worked very well at Lost River Ranch. What made us buy Manziel was the material strength of his pedigree. His grand dam, HILLE C181, is a proven donor and his dam, LRSF K131, is also a donor. After seeing the cows in person it was evident why they are donors. Pasture exposed from 12-2-25 to 2-20-26 to LRSF Manziel M44.

EPD DEFINITIONS

MATERNAL TRAITS

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

Milk (Milk): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

GROWTH TRAITS

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

CARCASS TRAITS

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (CREA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MARB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (CFAT): Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

INDEXES

Indexes are tools that allow producers to select for several EPDs at once, making selections more efficient than selecting on one trait at a time. Indexes weigh traits based on their importance to a producer's bottom line by using a trait's economic and genetic value. Indexes are a good way to put selection emphasis on traits that are economically relevant.

Maternal Profit Index (MPI): In this production scenario, Gelbvieh bulls are mated to Angus-based cows with surplus calves marketed at weaning, with replacement heifers retained from the calf crop. EPDs weighted in this index are Calving Ease Direct (CED) and Maternal (CEM), Weaning Weight (WW), Milk (MILK), Mature Weight (MWT), Dry Matter Intake (DMI), Stayability (STAY), and Heifer Pregnancy (HP). Mature weight is the primary driver and represents the significant cost of maintenance energy requirement in the cow-calf sector. Weaning Weight and Milk (expressed in pounds of calf weaning weight) represent the principal revenue stream. Stayability helps account for differences in replacement costs in the system and the effect of heifer retention on revenue streams. This index should be used by commercial cattlemen whose production scenario includes the traditional marketing of calves at weaning and replacement retention from the herd.

Feeder Profit Index™ (FPI™): Envisioned as a completely terminal index, FPI assumes all calves are marketed as finished beef carcasses priced on a value-based grid. Thus, it shouldn't be used in production scenarios where replacements are kept from these matings. The new FPI formulation more precisely weights Economically Relevant Traits (ERTs) available for selection, including the key carcass traits of Carcass Weight (CW), Ribeye Area (REA), and Dry Matter Intake (DMI) that were not included in the original formulation. The new FPI also weights Fat Thickness (CFAT), post-weaning Average Daily Gain (ADG), and Calving Ease Direct (CED). Carcass value determined by carcass weight, quality, and yield grade influencing traits accounts for approximately 75% of the index as principal revenue drivers. Dry Matter Intake (DMI) captures differences in expected costs to the terminal carcass endpoint.
