Welcome

We would like to welcome you to our 14th Annual Registered Angus Production Sale at our ranch west of Hereford, TX. This has been a family tradition which Scott and Moriah graciously host every year at their headquarters. We are very excited about this year's offering and eager to see them go to work in your herd.

- We hope you can attend in person and be treated to Scott's famous prime rib dinner prior to the sale. (It is worth the drive).
- If you can't attend in person you can still bid online with CCI.Live or you can call one of our contacts who can help you participate on the lots of interest. Please call prior to sale to have a bid card issued to the contact you wish to use. We are willing to help whichever way you are comfortable doing business.
- The cattle are not physically run through a sale ring on sale day but are sold by video from the sale block. The cattle are available for viewing on site the day before, morning of, or during the sale. This method is less stressful on the cattle and personnel.
- We will have a video of each registered lot that will be available online prior to the sale and will play during the sale of each lot.
- The cattle that sell are born and raised on one of our ranches and developed with our high roughage protocol.
- All registered cattle have been DNA tested to improve the accuracy of their genetic merit reflected in the EPDs and to confirm that the parentage of each animal is correct.
- We strive to produce problem-free cattle that will perform well and be profitable for our customers.
- Our calves are not creep fed. We believe we can get a better cow production evaluation in our environment running on native grass without feeding the calves before weaning.
- Actual birth weights, weaning weights, and yearling weights are reported to the AAA and ratios are figured within each contemporary group. When there are several contemporary groups represented in a sale like this one the actual weights should not be compared. This is why we just give you the individual ratios of each animal and the EPDs that are calculated from this data.
- We are stringent on culling our herd of poor performance that does not meet our specs. Bull calves are culled on excessive birth weights, structure, docility, feet, poor performance, and fertility. Females are also culled on these criteria as well as udder structure and calving interval. On average, we cull 15% of calves born each year. Therefore, the last few bulls of the sale are not our culls. Our philosophy is to try to minimize problems before you purchase the animals.

We strive to be of help where we can and stand behind your purchases with your complete satisfaction in mind. We look forward to having the opportunity to help you with your cattle program.

We hope you can join us,

Steve & Ginger Olson
Scott & Moriah Pohlman

14TH ANNUAL PRODUCTION SALE MARCH 26, 2026

THURSDAY • 1 PM (CST)
AT THE RANCH, WEST OF HEREFORD, TX

Sale Schedule

WEDNESDAY, MARCH 25

All day – Cattle available for viewing

THURSDAY, MARCH 26

8:00 am – Cattle available for viewing

11:30 am – Smoked Prime Rib Dinner

1:00 pm (CST) – Auction begins

Settlement must be made prior to load out.
Dr. Dale Schueler will be available to provide
Health Papers and complete any additional test
for out-of-state shipment after the sale.

AUCTIONEER

Doak Lambert 972-839-6485
TX Lincense #7950

SALE DAY CONTACTS

Steve Olson 806-676-3556
Scott Pohlman 806-346-3322
Sy Olson 806-672-6297
Matt Caldwell 913-755-1105

Radale Tiner, AAA Regional Manager 979-492-2663
Michael Bennett, *New Mexico Stockman* 575-703-3999

HOTEL INFORMATION

Holiday Inn Express 806-364-3322
1400 West 1st, Hereford
Best Western/Red Carpet Inn 806-364-0540
830 West 1st, Hereford

AUCTION

- The cattle are not run through a sale ring, but are sold by video from the sale block.
- Cattle will be sold in sale book order.
- Buyer can bid one of 3 ways:

1. In Person
2. By Phone with one of our Sale Day Contacts
Please call prior to sale to have a bid card issued to the contact you wish to use.
3. Online with CCI.Live

HEALTH

All Calves

Birth – tag, weigh, Inforce 3
Branding – Vision 7way, Pyramid 5, Bovine Endovac
Pre weaning – Pyramid 5 + Presponse, Vision 7way, Bovine Endovac, Wart Vaccine
Post weaning – Pyramid 5 + Presponse, Bovine Endovac, Vetrimec Pour On, Wart Vaccine
December 2025 – Poured with Clean Up for Lice
January 2026 – Poured with Clean Up for Lice

Bulls

Breeding soundness exam prior to sale
Fall bulls tested for Trich prior to sale

BULL DEVELOPMENT

Developed on high roughage diets without added grains, which promotes easy keepers and also reduces foot problems. Post-weaning the calves are run on wheat pasture in winter supplemented with dry hay and silage.

BREEDING GUARANTEE

We guarantee all bulls sold are fertile to the best of our knowledge, having passed a Breeding Soundness Exam performed by Hereford Vet Clinic, 806-364-1331. We know unexpected problems can arise after you receive your purchase and ask that you call us when that happens. We guarantee all bulls against breeding injury and to be sound breeders for the first breeding season, which is 90 days following the first turnout of the bulls. We will provide you with a satisfactory replacement, if available, or issue you credit equal to the bull's purchase price minus the salvage value received for that bull. This is not a mortality guarantee. We will not replace a dead animal if it is killed or dies for any reason after delivery. All females are guaranteed to be breeders. Sometimes a bred female will slip a calf early for different reasons. If that happens, contact us and we will work with you for credit in the future. If you have difficulty getting an open heifer bred let us know so we can help in breeding her or replacing her. Communication is key to success with a purchase.

ANNOUNCEMENTS

Announcements made from the block take precedence over information in the sale book.

DELIVERY

Free delivery will be provided within 300 miles. Arrangements need to be made at time of settlement on sale day. Expect deliveries to be made by April 15.

AM EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®.

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

Why we don't publish actual Birth and Weaning Weights

- ✓ **A Contemporary group** – is a group of animals of same sex, same age (90 day window), and managed all the same.
- ✓ **The Ratio** within a contemporary group is used to compute EPDs.
Example: In the OLC Herd of 2025
- ✓ **Group A:** Fall bull calves out of mature cows average 5 lbs. less at birth and 100 lbs. less at yearling than winter calves.
- ✓ **Group B:** Winter bull calves out of first calf heifers averaged 12 lbs. less at birth than bull calves out of mature cows.
- ✓ **Thus:** Actual Weights should only be compared within a contemporary group which is a ratio with 100 being the average of that group and 105 being 5% heavier, etc.

DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

Raising quality registered Angus cattle takes **COMMITMENT**. As your genetic supplier, we are **DEDICATED** to not only improve today's genetics, but also prepare for the future of the Angus breed. We believe a commitment to improvement starts with the female. Commit to the female — commit to MaternalPlus®.

Contact Customer Service at 816-383-5100 or angus@angus.org for more information.

THE INDUSTRY STANDARD
NOW HAS HIGHER STANDARDS.

Next Generation Genetic Testing
For Best Generation Angus.

Never satisfied. That's the true trait of any Angus breeder. Same with us. Angus GS™ is not resting on past accomplishments. There's more work to be done. With the addition of 22,000 SNPs, Angus GS becomes the unmatched Angus specific genomic profiler. It provides greater power for traits including calving ease, birth weight, marbling, heifer pregnancy and more. Realize your operation's full potential.

Visit angus.org/AG/AngusGS for the next generation, and only, genomic test of its kind.

FOR ANGUS. BY ANGUS.
