

The background of the entire image is a dark blue, semi-transparent overlay of a basketball arena. In the center, a basketball hoop and backboard are visible. Two Simmental cows are positioned in the foreground, facing each other. The cow on the left is black with a white blaze on its face, while the cow on the right is solid black. The overall scene is dimly lit, with the arena lights providing a subtle glow.

TRUCKING

Buyers needing assistance with trucking may work through the seller and consultants for possible arrangements, or the sales' professional trucking with Dick Coleman, 765-461-0954 or Craig Kaisand 641-891-9666. If necessary, cattle may be housed at the sale site for up to 10 days following the sale prior to pick-up.

LIABILITY

All persons who attend the sale will do so at their own risk and neither owners nor consignors assumes any responsibility, legal or otherwise, for damages, illnesses, accidents or theft. All cattle are at the purchaser's risk as soon as sold. Assistance will be given in loading and shipping of cattle, but no risk is assumed by anyone associated with the sale.

SALE TERMS

Buyers and Consignors at the Illini Elite Sale agree to the American Simmental Association Suggested Sale Terms as posted at www.simmental.org. Buyers purchasing bred females have up to two weeks after the sale date to preg check any females of concern.

OTHER

Bulls have been Genetically Enhanced for the benefit of both the buyer and the seller. Bulls selling will have completed a passing BSE Exam and buyers will receive their associated form. Corrections and announcements on day of sale will take precedence over printed catalog or information online.

LIVE BIDDING

Bid online and watch the sale live, CCI.live Call/Text, 405-400-9505 • schedule@cci.live

CATTLE VIDEOS

All cattle videos may be viewed by going to www.illinielitesale.com and CCI.LIVE

Catalog designed by

WELCOME!

On behalf of Rincker Simmentals and the Illini Elite Consignors we would like to welcome you to the Illini Elite Spring Bull and Female Sale. It has been a sincere privilege for our family to be a part of this sale in both consigning cattle and also hosting. And it is without question that the Illini Elite consignors continue to find ways to make the genetic offering relevant and of the highest quality. There is no better time to be Simmental Breeders as we continue to feel excitement for the real progress being made with the broad acceptance of our breed's cattle both in seedstock as well as commercial operations. We know that nationally prices being offered for commercial cattle in the market place and by private treaty has made it difficult to retain some of what would have been replacement heifers and that combined with the high demand for beef puts every cattleman in a historic and positive position when marketing. Without question, the time is right to offer what we believe to be an industry-wide accepted set of quality cattle and genetics.

We are especially proud of the efforts these past few months from our consignors to be able to produce and develop the exciting set of genetics found in these good 2026 Illini Elite cattle. As you get the chance to look at the bull battery offered you should note that 100% of the bulls have been genetically enhanced for the benefit of buyer predictability. We believe that you need to have the information to make the right decision for your sire selection. The bred division of females will be preceded by one of our Elite Donors, BAR QH HAZ BEAUTIFUL H747, multiple pregnancies, and tremendous embryo matings from some of the breed's great dams including Sandeen Donna 1944, HILB/WWS Miss Dalaya L905, HS Girl Talk G45B that again are "cutting edge genetics" and can provide their new owner with high end and competitive offspring. And different from our norm, we have opted to sell several recipis with calves already at their side! We are also offering First Calf heifers with calves at their side and a few bred heifers either calving soon or in the early Fall. Additionally if you prefer to buy cattle in groups, 2 pen of 5 cows and pairs are being offered. And lastly in the late Summer and Fall heifer calves, you will find current genetics in heifers that phenotypically are built right and most certainly will compete! Preparing for and selecting heifers for County and State Fairs as well as the 2026 AJSA Classic heifers is still ongoing so realize that these heifer calves are simply stellar!

Our sincere congratulations to all of our past customers and the successes you are having with purchases from Illini Elite. We would also mention that we don't do this alone and want to thank Evan McDonald for his daily involvement in the operation of the herd and farm and the Show Barn work by Lake Land College students assisting when and where needed. I also want to thank Adam Swigart for his picture and video work, Dr. Annette Morrow, Shelby Veterinary Service for her assistance with herd health and Dr. Wes Keller for his reproductive and embryology diligence. Additionally I want to thank our Sale Consultants, our Auctioneer, and our Ringmen for providing their time and effort to communicate with all of you regarding this set of cattle. Find their contact numbers on the next page and most certainly use their expertise. And lastly I want to thank our catalog designers Emily Brinkman and Tasha Barbour, Generation 6 Marketing, for their work in developing effective ads and this great catalog.

We sincerely invite you to join us March 13th to see this offering and if you cannot be in attendance, we encourage you to go to CCI.LIVE! Be a part of the history of the Illini Elite Sale!

Respectfully,

Curt, Pam, Brent, Cari, Jace, and Raelynn Rincker

UNDERSTANDING AND USING EXPECTED PROGENY DIFFERENCES – EPDS

The following information is from www.simmental.org under Breeder Resources

The most effective tool available for comparing the genetic merit of a single trait between individuals is expected progeny differences (EPD). These values are estimates of the genetic potential that parents will pass on to progeny.

An EPD uses all available information tied to the genetics of a trait including an animal's own performance data, performance data on relatives, genomics, and progeny data. It's important to remember that EPDs continue to get more accurate and are subject to change as more information is reported.

In using EPDs, the difference between two sires' EPD represent the unit difference expected in the average performance of their progeny. For example, if sires A and B have EPD of +20 and +10, a 10-unit difference would be expected in the average of their progeny. The key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPD, sire A's progeny would be expected to weigh on average 10 pounds heavier at weaning compared to sire B's progeny. If the trait was calving ease, sire A would be expected to sire 10 percent more unassisted births in first-calf heifers on average compared to sire B.

CALVING EASE DIRECT (CE) - Reported as the difference in probability of calves being born unassisted out of first-calf heifers. Higher values are more favorable.

BIRTH WEIGHT (BW) - Reported as the difference in pounds of calf birth weight. Desirable values are dependent upon management goals, however if selecting for reduced calving difficulty the appropriate EPD to use is CE.

WEANING WEIGHT (WW) - Reported as the difference in pounds of progeny weaning weight. Higher values are more favorable.

YEARLING WEIGHT (YW) - Reported as the difference in pounds of progeny yearling weight. Higher values are more favorable.

MILK (MLK) - Reported as the difference in maternal pounds of weaning weight from an individual's daughters due to milk.

CALVING EASE MATERNAL (MCE) - Reported as the difference in probability of daughters calving unassisted as first-calf heifers. Higher values are more favorable.

MATERNAL WEANING WEIGHT (MWW) - Reported as the pounds of weaning weight expressed in daughters' progeny due to the milk production of the daughter and the direct genetic effect for weaning growth. Higher values are more favorable.

STAYABILITY (STAY) - Reported as the difference in probability of a sire's daughters staying in the herd until 6 years of age, given that they calved as a 2-year-old. Higher values are more favorable.

DOCILITY (DOC) - Reported as the difference in yearling-age progeny temperament, represented as a difference in probability that progeny will be scored as a 1, rather than a 2-6 on the docility scale. The docility scale subjectively orders individuals on temperament from docile disposition (1) to extremely aggressive (6). Higher values are more favorable.

YIELD GRADE (YG) - Reported as the difference in progeny USDA Yield Grade score units (1–5). Lower values represent leaner carcasses with more saleable beef. Only economically relevant if producers retain ownership or are driven by terminal performance.

MARBLING SCORE (MARB) - Reported as the difference in progeny carcass marbling score. Higher values are more favorable.

Economic selection index, also referred to as \$ Indexes, blend EPDs for economically relevant traits (ERTs) and the economics associated with cattle production into a single value. Through well-conceived and rigorous computations, \$ indexes estimate an animal's overall impact on your bottom line.

ALL-PURPOSE INDEX (\$API) - Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold on a grid (carcass grade and yield). Use if you are planning on retaining females. A higher value is more favorable.

TERMINAL INDEX (\$TI) - Evaluates sires for use on mature Angus cows with all offspring put on feed and sold on a grid (grade and yield). Use in a straight terminal breeding program. A higher value is more favorable.

WHAT WILL A GOOD BULL COST ME?

*Written by W. Travis Meteer, Univ. of IL Extension Beef Cattle Specialist
Published in Illinois Beef Magazine, January/February 2025 Issue*

A popular question this time of year is “What will a good bull cost me?.” My go-to answer is usually... “How much revenue loss would you have from a pasture full of open cows?” After all, we often de-value the role of the bull. We forget that he is a crucial part of the equation to making our product.

Now, the question is a good one to ask. Especially after watching calf prices climb seemingly all of 2024 and the prices paid for bred heifers at year-end, it is only logical to wonder what a good bull will cost this spring.

Old rules of thumb are good to reflect on. For instance, “2 times the value of a fat steer” or “4 to 5 times the value of a feeder calf” are both common measures used by old timers to determine the value of a bull. So, I tested these figures with historical prices from the Illinois Performance Tested Bull Sale and prices paid for feeders and fats from National Agricultural Statistics Service (NASS). As it turns out, using values from 2004 to 2024 (last 21 years) the average bull price was 4.2 times the value of a feeder calf and 2.2 times the value of a fat steer. Looks like those old rules of thumb work pretty well.

Using these multipliers, we can speculate to the average price of bulls this coming sale season. Looking at recent market reports, 5 weight feeder calves are bringing \$3.25 or more. Thus, value of a 5-weight feeder calf is conservatively \$1,625. History tells us 4.2 times that value will get us close to the average. Thus $4.2 \times \$1,625 = \$6,825$ for an average bull price.

At the time of writing this article, a current price for fat steers weighing 1450 lb. is \$1.92. Therefore, the math tells us a fat steer values out at nearly \$2,784. The previously stated multiplier of 2.2 times the value of a fat steer would yield an average bull price of just over \$6,125. Thus, we have a calculated range of \$6,125 to \$6,825 for the average bull price.

That said, there will be many bulls that bring in excess of those figures. So, what factors contribute to bulls bringing more than the average? Are they worth the extra money? For simplicity, let's say a bull breeds 25 cows per year for 4 years resulting in 100 calves over his lifespan. With these conservative assumptions, even a small improvement in a

valuable trait can greatly increase a bull's value.

For instance, Calving Ease (CE) EPD is defined as the difference in percentage of unassisted births. So, let's say you purchase a bull that is 5 points better in his CE than the breed average for current sires. For both Angus and Simmental that would mean purchasing a bull in the top 10 % of the breed for that trait... not an unrealistic buy. The 5 point improvement should translate to 5% more unassisted births. In the real world, it's fair to say half of assisted births don't make it. Thus, a 5% improvement in CED could easily translate to 2.5% more calves. Out of 100 calves sired over a lifetime, that's 2.5 more calves. The added value from improved CE would be just over \$4,000 (2.5 more calves x 500 lbs. x \$3.25/lb.).

The most common example for added value of a bull is improved EPDs for weaning weight (WW). Let's say you purchase a bull with a WW EPD of 74 (breed average for Angus is 64). That's 10 additional pounds at weaning per calf. If the bull sires 100 calves in a lifetime and a pound is worth \$3.25, then the result is \$3,250 more income over his lifetime when compared to the average of current sires. Don't only look at output traits. If you plan to retain daughters as replacements, maternal traits need to be considered. Traits such as heifer pregnancy, calving ease maternal, sustainability or sustained cow fertility, cow energy requirements, and others can add long-term value to the cowherd.

When selecting your next herd sire, identify the traits that can add dollars to your operation. Don't sacrifice functionality, structural soundness, docility, and other traits that can affect longevity. View purchasing a bull as an investment and treat it as such. Investing in a good bull that can improve profitable traits in your herd can allow your farm to be more competitive no matter the market dynamic. Bottomline, bulls are a significant contributor to profit or loss in your cattle herd. They have an impact now and for years to come if you are retaining replacement females. Look for traits that hold value in your market. Find a bull that can inject those traits. The “expense” of a bull can be a great investment in the future of your cattle herd.

ELITE BULLS

Heterozygous Black, Homozygous Polled-Hands down RS Network will be one of the best looking bulls of the Spring Bull Sale Season! 274N is a powerful shaped, wide built, attractive and balanced baldy sire. Stemming back to both Onyx and Miss Beautiful, you know there's some cow power behind this guy. His rapid gain matches up to his high WW, YW, and Carcass Weight EPD's, all 3 ranking Top 4 and 10 percentile ranking respectively. His Top 10 percentile rank for RE will not surprise you when you get a load of this stellar bull's top shape. His BW leads to his most favoraable use on mature cows. You might want to collect some semen on this bull!

Sire of Lot 1

LOT 1

Homozygous Black, Homozygous Polled-It's gradifying to produce bulls like 714N. This bull is extremely dense and packed full of shape and substance putting his EPD's in the top 5 percentile of the breed for Ribeye area and Yield Grade! RS Nonstop is one of our elite young bulls and comes with tremendous top shape, more than adequate rib shape and his extra stretch lets him bare down on the scales projecting plenty of grow in his first and subsequent calf crops.

ELITE BULLS

Red, Homozygous Polled-We don't normally raise a lot of red cattle but when they are as good as RS Nobel, no problem! This is an incredibly well designed bull with all of his natural dimension, his powerfull width at his chest floor, and his wide and true stance. He's particularly good in his joints when he goes and gives you that look of longevity. His numbers keep him centered but his Dry Matter Intake EPD (Feed Efficiency) is in the top 15 percent of the breed. Out of the Miss Hoya Profit donor!

Sire of Lot 3

LOT 3

Homozygous Black, Homozygous Polled-Out of the tremendous numbered Homestead sire stemming from Keller Broken Heart and now the Ruby Cattle Company, I could not be more pleased with all that 28N offers his next owner. He's rock solid no matter how you want to measure him with so many breed leading EPDS especially his top 5 % ranking in WW, MCE, and both \$ Indexes not to mention his top 10% for YW and MWW, and top 15% for CE, BW, Docility, and REA! This will be a very impactful herd bull for years to come when you blend his genetic strength with actual performance and the added payweight he will generate.

ELITE BULLS

Homozygous Black, Homozygous Polled- This bull has a little more white on him but wow this Remedy son is a good one! Out of the impeccable HILB Price of Starin donor it's no wonder this guy's a stud! Perhaps our deepest centered bull of the group, really appropriate in his rib and top shape, lays his shoulder right, and particularly sound in his hock and pastern. Top 25% in his ADG and CW EPD and top 30% for his YW EPD, combined with his added weight, he'll generate gain and growth in his offspring!

Sire of Lot 5

LOT 5

Homozygous Black, Homozygous Polled- One of the favorite looking bulls by many of the Bull Center visitors, 3369N is chalked full of quarter and top shape. His SO Remedy dam was retained as a donor so look forward to her duplication of good cattle like RS Northstar. Most of his numbers land in the middle including his acceptable BW and CE but I believe long term this is a potential herdsire that will add moderation of frame, quality, and shape. Really nice herdbull here!

ELITE BULLS

Homozygous Black, Homozygous Polled-Rarely will you find Calving Ease and Low BW bulls in this good of a balanced and complete package but here you go! The Copacetic donor owned jointly with Emily Ivey-Johnson and Rincker Simmental continues to make them nice with 2 maternal sisters among the top females in the fall sale. This is a really solid bull by Remnant with enough shape and the RE EPD to back it up, and no doubt the Calving Ease has support from his proper shoulder shape and width. Put him on your heifers or your cows, he'll make them both better!

Sire of Lot 7

LOT 7

Homozygous Black, Homozygous Polled-Really pleased with the calves by Remedy's son Remnant and 8387N is an prijme example of those good cattle. This is a big long bodied bull with ample shape of quarter and still maintaining some give in his hock when he goes. He ranks in the Simmy breed's top 2 percent for the new Dollar Gain EPD.

ELITE BULLS

Heterozygous Black, Homozygous Polled- This Relentless son of our Miss Princess "Hairietta" donor is a little bigger skeleton, but very attractive young herdsire. This is an agile made sound going bull built with the right angles. 150N's actual performance is exceeding his EPD profile for growth. I am pleased with his REA, BF, and YG all hovering in the top 20 percentile for the breed not to mention his top 1% for Dry Matter Intake (Feed Efficiency)!

LOT 9

Homozygous Black, Homozygous Polled- Just a powerfully made, wide built young bull with so much genetic strength behind him! His High Road donor dam from Irvine Ranch has been stellar in her first 2 years and mated with KBHR Homestead in a big way! His 2 dollar indexes may best sum it up averaging top 4 percentile ranking! His marbling EPD sits at 4 as well so no going back, this bull will make cattle that are moderate, have high marbling, and will generate an economic difference whether retaining offspring or feeding them out.

ELITE BULLS

Homozygous Black, Homozygous Polled- This young sire is by the popular Coping With Destiny bull and certainly has his quality and look. The youngest bull in the offering he comes by the Hilbrand cow Price of Starin that has made both elite females and bulls for us in past sales. He's catching up to the big bulls in the Bull Center but gives up nothing in in quality. He's shapely made with some give to his hock. His numbers for WW, YW, Marb, and 2 Dollar Indexes find him mid range.

Sire of Lot 11

LOT 11

Heterozygous Black, Homozygous Polled- When you put Built to Love A021 and Quantum Leap behind any cattle, good things are bound to happen as it did here with RS Narrator. Such a good solid young sire that kept all of his numbers solidly between the lines. This good made, nice loined, good hipped bull hits me as one that can be around for a while with so much softness to his hocks and knees. I like this bull's young cow and think that he will remain special.

Homozygous Black, Homozygous Polled-Here is a very nice, sound made, bull with some quarter and top shape. 602N is problem free to look at and also in his structure with so much give in his pasterns. This is a low birth, high Calving Ease sire in the top 25% of the breed. His daughters will transmit that same calving ease with Maternal CE also in the top 15 percentile. ASA has 2 new EPD's with Dry Matter Intake and \$Gain where again 602N excels at Top 1 and 5 Percentile!

ELITE DONOR

LOT 14

RS Nostalgia 074N
Remnant Daughter from 2025 IL Elite Sale

Homozygous Black, Heterozygous Polled-Beautiful H747 is an impressive donor that continues to succeed each year. By Angus sire Conley No Limit who gained popularity with his outlier pedigree and quality of his offspring, was the right mating here to the Bramlet Beautiful dam providing this powerful quality donor with extension of top and frontend, great substance and foot shape, and style and balance to make the good ones. To this point we performed a conventional flush to Ignition with 11 embryos in that flush. Her last natural calf was by Remnant and one of the "elite" heifers in last fall's sale, RS Nostalgia 074N, now owned by Lauren Newby. This donor will be calving prior to March 13 to RS/BR Legend and he makes them good too! Here's a chance to hook into and be part of the lineage of the famous Bramlets Beautiful A317 family!

HILB Price of Starin H381C has become such a rockstar at our farm in just her first couple of production years. Purchased from Hilbrands Cattle Company this amazing female by two time Denver Champion Purebred bull SC Pay the Price and out of a Bush's Unbelievable dam gave this beautiful dam the right design to move our cattle forward. Only flushed a few times Price of Starin has produced top herdbulls by Tecumseh in our Fall 23 and Spring 24 Sales and daughters by Double Up, Remedy, Profit, and Tecumseh in our last two Fall Illini Elite Sales.

These cattle are finding their way into great homes including the Ashorn family in Texas where RS Monroe has been winning, Moore Land and Cattle have her first ever natural calf, Foxcreek's Riley Tarr showed a daughter last summer, Yates Farms have one of her stout impressive Tecumseh Sons, Joe Koch, IN bought a baldy son RS Limitless as a choice bull lot in the 23 Fall Illini Elite Sale, RS Maximus that went to Chamber Cattle Co in Iowa, and a herdsire we retained RS Legend 516L who is the breeding sire to one of our later cow pens selling. This is a chance to buy a genetic offering on a great cow. This mating resulted in a bull calf to multiple National Champion Sire and 23-24 Show Bull of the Year TJSC Coping With Destiny 9K bred by Jones/Rogers/Grimm, so buying here gives you an great young herdsire in the making and an awesome Angus Cow nursing this little stud.

What a great donor this matron has been for our family. I am saying it more and more, "if it hurts to sell some of your cattle, then you know you are making a good offering for the sale". So feel assured, selling this heifer calf along side her good recip momma is one of those. TL Miss Mercy was purchased from Tree Lane Farms a few years ago and by their KDP Hoya Blue Steel Force donor and she herself has been a phenomenal donor for the Schlipf family with over 50 registered offspring to date. And the history continues with TL Miss Mercy 37's granddam, the Richie/Johnson donor K-Ler/RC Miss Hoya Saxa (AKA Madonna) with over 160- registered cattle as her progeny including national champions. Mercy is by W/C Relentless that gives her so much extension, look and presence. This cow is big bodied, huge boned, big topped, and ultra sound. Always making good cattle and always having cattle that go on to be successful for their new owners. I might add that this cow has a fantastic disposition and I have not yet had a single progeny that was difficult to handle out of Mercy. She raised a Lover Boy that competed in Florida with Buck Mountain Cattle, and last fall sold heifers into Ohio and the Moran family in Northern Illinois not to mention the top selling Illini Elite Heifer, RS Mirage, a SO Remedy purebred, and sold to the Ogle Family. I cannot wait to hear back from this pair buyer on her mating to HPF Quantum Leap who had back to back AJSA National Champions in 2023 and 2024! This heifer calf is right in the thick of our top heifer calves in this year's calf crop. The Recip is a very nice 6 year old registered Simmental cow and right now recip's themselves are hard to buy under \$4000. This is an exciting mating possibility for the new owner!

During the Fall of 2024 we were able to purchase this good dam out of the Irvine Ranch Bull and Female sale. I remembered John Irvine's comment in his footnote that "this female could just be the start of something special" and we are just beginning to see that! She will have 2 of the higher indexing Simmy bulls at this year's IPT Expo Bull Sale as well as the 2 high indexing bulls in this sale. They are not only high indexing leaders but cattle that are comfortable to look at with their added volume, skeletal size, shot of extra shape, all done with soundness of structure. This has been an exciting purchase for us and look forward to her continuing to add performance and genetic strength to our great breed. In this the 2026 Illini Elite Spring Sale, we are offering 2 of her direct daughters in lots 27 and 42 as well as this lot 18A, a KBHR Homestead H016 February heifer calf.

ELITE GENETIC FEATURES

Really neat heifer calf pregnancy here out of one of our former donors Sandeen Donna 4136. She did an incredible job for us providing excellent calves from this mating and others. We sold full sib embryos to this mating in multiple sales. Now, another really cool part to this offering, the recip cow we put this embryo in is an incredible heifer being a HRCC Hondo x FSCI Gemstone daughter. This heifer's dam was a direct daughter of Ferguson Show Cattle Gemstone donor who needs no introduction.

LOT 19

WHF Andie is one one of the most Prolific Donors in recent years in the Simmental Breed. Her Daughter Summer is the most reconizeable, with the list ever growing. Most recently a full sib to this pregnancy was 13th overall Bred and Owned female at the 2025 Junior nationals for Kali Beshears. The Heifer Pregnancy is due on 3-23-26 and we decided to keep her home and calve her out for her next owner. Trucking is buyers responsibility and we will try assist buyer in any way we can.

ELITE GENETIC FEATURES

Winslow's Ruby Red - Donor Dam of Lot 21

Revelation 2K
Sire of Lot 21

WOW, what a package! Josh Winslow's Ruby donor and hottest new Sire Revelation 2K! Ruby is a direct Daughter to Lola which is the main matriarch of the Full Circle Donor pen. Revelation is making a name for himself as his calves are hitting the ground and will be leading the way to Purple. There's a bonus on this one as Heifer Pregnancy is in a young Reg Simmy cow that can stand by herself. If your looking for a future Donor don't let this pregnancy pass you buy!

I am so lucky that Parks Show Cattle let me partner on Ginger Snap. I have always liked good red cattle. But to make a female that is this stout and sound put together with extreme look doesn't make Ginger Snap good, it makes her GREAT! This is a heifer calf pregnancy by Ginger Snap and one of the hottest bulls in the Simmental breed Next Level. The first two Ginger Snap calves that sold at auction averaged 10K included one of which has been doing a lot of winning in Michigan for the Morrison/Dow families. We have fall 2025 calves on the ground by this exact mating and they are exceptional females. As an added bonus you are getting a registered ASA #3094749: halter broke recip who herself has raised 2 natural calf daughters that have sold in previous Illini elite sales for 4500 and 5000.

Offering 3 IVF Unsexed embryos out of Hilbrand's Donor HS Girl Talk that is a direct daughter of the infamous Phyllis 423 cow. A full sibling to these embryos just sold in the Royal Classic for \$8750 and was realistically under priced at that value. We would expect the resulting offspring from these embryos to be big footed, big boned, big barreled, and ready to dominate on the tan bark. Guaranteeing one pregnancy if work is done by a certified embryologist.

Lot 25

ELITE FIRST CALF HEIFER PAIRS

Black, Polled-No doubt OMF Epic is making a impact in our breed with his functional look and strong acceptable numbers on paper and this female fits that mold as well. This is a quality first calf heifer with both look and body and she tops that off with her consistent and problem free data following her. This is a sound made female with ample set to her hocks and comes with a January bull calf at her side by THSF Lover Boy.

LOT 26

Homozygous Black, Homozygous Polled- This is an Irvine Ranch bred female all the way and we all know how astute John Irvine is to matings that fit his elite program of curve bending EPD's, feed efficiency, and carcass merit. This is a special female with top 10 percentile dollar indexes, high docility, and stayability also in the top 10%. She's sound , easy to look at, and sensibly sized. Her KBHR Bold Ruler January bull has similar eliteness with \$ indexes top 3%. Wow!

ELITE FIRST CALF HEIFER PAIRS

Black, Polled-An extremely good half-blood female directly by the elite sire W/C Bankroll and on the maternal side stemming back to SAV Bismarck. That is covering both sides of your pedigree! This SimAngus female is going to make a big time contributor and it is only up to the new owner to help her lead the way. She is sound made and without a doubt shapely, balanced, and stylish. Comes with a really nice coupon at her side, a very attractive January bull calf by Allied Genetics Sire, KBHR Honor!

Service Sire of Lot 28

LOT 28

Black, Polled-Still another high quality OMF Epic daughter and you all see the picture and know what I am talking about. This moderate designed female has completeness with her added rib and top shape and yet so sound at the ground. Her BW EPD is in the top 30 percentile of the breed with WW, MWW, ADG, and both dollar indexes hanging at 30 percentile as well. Her LCDR Anthem heifer at her side is special as well and likely will show but she too is loaded with curve bending numbers!

ELITE FIRST CALF HEIFER PAIRS

This heifer goes back to our Dura Sara donor that won denver in 2016 and should be staying . This girl has the show look , pedigree and personality to be front pasture material for any program. We bred her to Double Up and I am looking forward to seeing this mating, I think it will be one with a great future. Bull calf at side with a birth weight of 76lbs. Retaining the right to one flush at buyers convenience and sellers expense.

LOT 30

The visitors and judging teams really appreciated this dense made wide tracking female by the King of purebred EPD's, CLRS Guardian. This is one of the wider based females I have had born here and when you add her sweep to her rib combined with her added boldness of rib and width of base, well that is saying something! she did not stick A.I. to Bold Ruler but settled to one of our young herd-sires by SO Remedy. This is a very nice heifer out of a great cow family. This is an extremely good numbered female that can move your program in a positive direction.

ELITE BRED HEIFERS

Here's a heifer that should be staying, but Curt wanted some good one's. She is out of our AI bull DBJR Cobra which goes back to Time to Shine donor and Quantum Leap. She has all the right peices, pedigree, the look and she is bred with sexed heifer semen by Copperhead. This should be an incredible mating.

LOT 32

Homozygous Black, Homozygous Polled-A high quality first calf heifer by a CLRS Guardian son that phenotypically gives you fleshing ability and moderation in frame size, tremendous shape of top and rib, trueness in her upper to lower rib shape, and more than adequate reach when she goes. Her offspring should excell in their growth with her WW and YW EPD's in top 20 percentile of the breed. She is due late May to our SO Remedy herdsire, RS Motivate 369M.

AI'd to ADV COMPASS L3574 (ASA# 4212198) on 11-24-25.

Homozygous Black, Homozygous Polled-Really nice 3/4 Sim calving in early September. Marty Ropp found this female's dam at a J-C Simmental sale and she has been a mainstay here with Sale topping bulls and females multiple times. Terms that quickly describe RS Mattie would be wide based, soft centered, and good in her joints. She is bred for a mid November calf to River Creeks bull ADV Compass L3574 (4212198) so expect some big numbers and quality in her first calf! No Bull Exposure. Ultrasound called it a Heifer Calf!!

Selling 3 conventional #1 embryos guaranteeing 1 pregnancy or more if performed by a certified embryologist.

Selling embryos by Lazy H Forever Lady and PVF Marvel. Without question the Forever Lady Dam by Dameron First Class has put herself in an enviable spot with her highly sought after Angus genetics and the flexibility to produce great SimAngus offspring. Select Sires PVF Marvel also needs no introduction stemming from both the PVF Missie and Insight lineages culminating in numerous national showring champions. Selling 3 conventional #1 embryos guaranteeing 1 pregnancy or more if performed by a certified embryologist.

ELITE FALL BRED HEIFERS

Red feather is sired by JR Indian Outlaw who was the high selling bull in this very sale in 2025 going to Bartlow Farms, Va. This female has the depth of body and boldness of rib as her great sire as well as having a near perfect hip and hind leg set. We AI'd her to our new herd sire OHL Moonwalk 2217M on 11/3/25. Moon Walk was a high seller from Wayne and Barb Ohlrich's Commercial Man's Bull sale. Expect an early fall red baldy calf. No bull exposure and she is halter broke!

Service Sire of Lot 36

LOT 36

A wonderful S.A.M. ET daughter out of Cherry Bomb a former high seller of Dwyer's Next Generation Foundation Female Sale. This female is long and extended with plenty of look and is exceptional in terms of structure. Bred up for an early fall calf to the hot calving ease sire WHF/JS/CCS Woodford J001 on 11/14/25. No bull exposure.

Rose is a favorite among our purebreds. She will be the last daughter to sell from STCC Ms Burning Steel, who stems back to the Burn Baby Burn R35 cow family that has produced national winners and sellers for many breeders. This heifer is stylish and soft bellied with the sound build this family is known for. Lots to love about this young heifer!

39A IVS/JJ/B&K TWO LOVE 112D EMBRYOS

Selling 3 Sexed Heifer IVF Embryos - Guaranteeing 1 Pregnancy

PB SM / Sire: STCC TECUMSEH 058J Dam: IVS/JJ/B&K TWO LOVE 112D

Two Love 112D has proven to be a very consistent donor for us. She was the high selling open heifer out of the 2017 National Western Simmental Sale. Her dam is a full sister to HPF Quantum Leap and Lover Boy, both Denver Champion Bulls further strengthening her pedigree. Two Love is out of the famous RGRS SRG Two Step 20Z EZ. It is hard to find a more elegant fronted purebred in the breed that still has the body and athletic ability that Two Love does. We are super excited about this mating to STCC Tecumseh 058J and the potential this mating brings. Selling 3 sexed heifer ivf embryos- guaranteeing 1 pregnancy if work is done by a certified embryologist.

ELITE OPEN HEIFERS

Black, Polled-Here is chance to get into a good cow family and have one that will show! We purchased the Lazy H Forever Lady dam a few years ago and she continues to produce some of our "elites" every year. The dam is good bodied and good fronted and so is 319N. By the Tecumseh son RS Legend this gal is sure to continue on the right track. Nice made, has balance and symetry, and is easy to work with.

Dam of Lot 40

LOT 40

Black, Polled-Just an attractive looking stylish heifer calf in this late Summer female. I think she has all of the parts to get and to remain good with so much length and cleanness, her more than adequate bone, and her sound structure. RS Legend makes his cattle sleek and attractive and when this gal gets her fill she could be tough to get around.

ELITE OPEN HEIFERS

Homozygous Black, Homozygous Polled-A direct daughter of the Irvine Ranch donor dam MS Vienna. Her late Summer heifer came with quite a bit of extension to her top and her front end gathering herself up with a long correct stride. She has a great deal of genetic strength on paper from dam's side so most certainly this female shown or not will contribute through her performance data and the matings chosen going forward.

Dam of Lots 42 and 43

LOT 42

Homozygous Black, Homozygous Polled-Only in a sale of this caliber would you let your best ones go but that is what you have here. I can't imagine that this heifer would not thrive in a PTP (Progress Through Performance) Show with the kind of look she can give you and her great set of numbers she presents! This attractive baldy is long spined, square hipped, and soft in her hock and pastern. The LCDR Anthem sire is continuing to generate interest at Cattle Visions for just those reasons, producing good looking cattle that push the needle on performance! She pulls off the cow around March 1 and can't wait to see what this Vienna becomes!

Just an outstanding On The Run fall heifer. This one is big legged and yet sound. You love her long top and square hip and no doubt her balance and completeness. This is a really good female and will most certainly compete!

Heterozygous Black, Homozygous Polled-Offering this outstanding Red Jewell cow I purchased from Dennis Moore and no doubt she's young and good and needs to stay here but she has this really good heifer calf that we are offering at her side so the cow is being offered as well. This Ruby Currency cow is problem free and is certainly one that can advance any program. She calved a little late and we had some fresh embryos going in Fall calvers and naturally she stuck!

Black, Polled-Such a complete young female in this Red Jewell lineage by RS Legend. This fall born heifer is built right with a quality look at her stance with great angles, cleanness of lines and no doubt some early body and depth that will serve her well in the ring or in the cowherd. Most certainly RS Nichole is stout enough in her build and yet she's clean in her joints and soft in her hock, knee, and pastern. Nice little younger heifer that is breaking well and getting herself together.

ELITE COW-CALF PAIRS

This is a really nice fall pair! Good size, good udders, and raising a really nice heifer calf at her side. These are the cows that are hard to part with but we always want to bring good cattle to the sale. *AI 11/22/25 to On The Run (4325400) Bull Exp to 2K, 4034042 from 12/15/25-1/25/26*

LOT 46

A purebred direct daughter out of the immortal Red Jewel female that comes with an unrivaled reputation for producing ultra complete and functional cattle as evidenced by a cow card that currently boasts 310 registrations. This Loaded Up daughter offers mass, power, and look in a moderate framed package that maintains excellent flex at the ground. Our friends at Hilltop Simmentals sold a full sibling in their production sale a couple of years ago for \$17,500. J101 is a phenomenal mother and has an outstanding young bull calf at her side, out of the Rainfall bull, that is sure to impress the most discriminating evaluator.

Confirmed bred, due approximately 3/15/26.

Lot 48A: Sells with a calf at side. Information available sale day.

These two cows are out of one of our all time favorite donors at our place S089 Lady. We sold a few show heifers out of her; all the rest went back in the herd to be cows and man they make nice cows. We have over twenty cows out of this donor still in our herd. These two are great mothers and great makers. Can't ask more than that.

This is a nice young cow out of Lover Boy, who doesn't love their Lover Boy cows. They just always get the job done. She has nice udders, good size, and very docile cow. We had a baby lose her mom last year and was able to get this cow to raise both of them. That is how good of a cow she is.

Red Baldy ALERT!! She is BIG, she is NICE, and she will be NOTICED!! The Optimizer cows just get it done year in and year out at Hillstown Farms. If I could go back in time, I would have made a few more hundred of them to put in our herd! Love Them!

ELITE BRED COWS

Lacy is a difficult one to let go. She has a great pedigree as she is an ET daughter out of our good friend Jr. Prochnow's donor HPF Daisy Mae. Beautiful young cow coming with her 2nd calf. The ONLY reason she is offered up for sale is she fell outside of our calving window and we wanted to bring a really good one down to the Sale. She is confirmed pregnant to the Hot Bull Woodford and due 04-13-26. Woodford calves have been excelling across the country. Lacy is my son Marcus's cow who has baby #2 coming in April so he needs some diaper money! (LOL) You don't have to wait long for what we think will be a really cool calf!

LOT 53

K205 is a sound made, moderate framed, red female that will be an asset to any program. You will love her puppy dog temperament, sensible design, level top, and picture-perfect udder. Vet called her safe for an early fall calf to the Bold Move bull from Griswold's.

COMMERCIAL RECIPS

Lots 57-61: We make every attempt to keep our recips in calf so they run with many of our purebred cattle where we also have cleanup in the pastures. These 5 females come from the heart of our recips bred to our herdsire RS/BR Legend 516L (ASA 4233841) with halfblood calves coming and likely all here by sale day. These cattle originated in Nebraska coming here via Clear Creek Farms 2, INC with a predominant Angus and partial Polled Hereford bloodlines. They are great mothers, disposition has been good, and calve unassisted. These recips are black cows between 5 and 7 years of age, are in good shape with sound feet and mouths. Good recips are hard to find making this a special and rare offering!
