*Ranch*

Welcome to our 28th Annual Bull and Female Sale. We are looking forward to March 17th. Seeing old friends and creating new ones is really what this business is all about...Angus cattle just provide us the medium in which to do that. We are extremely proud of this offering of bulls and females. We feel the bulls are a sound, functional set that have not been over developed. They are raised and grown right here on the ranch with limited inputs and longevity in mind. As you thumb through the pages of this catalog, you will not find many extremes when it comes to the EPD profiles of the bulls. Crazy numbers are relatively easy to produce, it can be accomplished quickly with a couple phone calls and plugging in the semen. On the flip side, a problem free, sound, functional, profitable cow herd takes a lifetime to construct. We focus on optimum levels of all the economically important traits. This balanced trait selection allows us and you, our customers, to stay out of the ditches with a consistent product.

There is an immense amount of data at our fingertips through the American Angus Association. We have included indexes and EPDs that we feel are the most accurate and economically important to the commercial producer. There are, however, other useful EPDs such as feet scores, hair shed, PAP, teat, udder, and functional longevity EPDs that are available through the AAA. We will happily retrieve you any additional information that is important to you and your program when selecting your next herd sire.

We are in uncharted territory as a beef industry. The cow-calf producer is in the driver's seat when it comes to market share and profitability. Demand for quality beef is at an all-time high. The consumer has clearly spoken...they want high quality beef on their plate. It is our job as producers to make sure we are producing a high quality product while maintaining a profitable, efficient mama cow here at the ranch. We feel this is where "optimum genetics" fits into the equation perfectly.

A highlight of this year's sale is the opportunity to acquire the mother of Hinksons Honor Roll. Honor Roll was the record-setting, leadoff bull in the 2024 sale now with Musgrave Angus and Genex. He is gaining popularity throughout the country and his dam, Lot 108, is a special female. Both the registered and commercial females selling are proven producers that we feel will be profitable for their new owners.

If you can't join us in person for the sale, please feel free to join us via CCI.live. The bulls and females will be penned here at the ranch the day before the sale for your inspection. The cattle will not go through the ring live. We are happy to show you the cattle at any time, or answer any questions you may have. Thank you for your consideration of our program.

*- Frank and Trey*

# Annual Production Sale

# MARCH 17, 2026

1:00 PM CST - COTTONWOOD FALLS, KS

**BULLS · DONORS · EMBRYOS · SPRING PAIRS · COMMERCIAL FALL BRED HEIFERS**

## AUCTIONEER

Col. Jerry Lehmann • Lake Ozark, Missouri  
(573)-474-7230 or (573) 999-4759

## LIVESTOCK PUBLICATION REPS.

Jeff Mafi - American Angus Association  
(816) 344-4266

Guy Peverley - Stock Exchange  
H (785) 456-9911 • C (785) 456-4390

Steven Russell - Kansas Stockman  
(785) 458-2650

## ASSOCIATION REPRESENTATIVES

Stephanie Dickerson - President Kansas Angus Assn.  
Anne Lampe - Secretary Kansas Angus Assn.

## TERMS AND CONDITIONS

The cattle sell under the suggested terms and conditions recommended by the American Angus Assn. All persons who attend this sale do so at their own risk, legal or otherwise. Cattle sell in catalog order.

## HERD HEALTH

Tested BVD - PI free. All bulls selling have been tested negative. All bulls have been vaccinated twice since weaning with IBR, PI3, BVD, BRV - Modified Live, 7-Way, Pinkeye, Ivomec Pour-on. All bulls have been examined for breeding soundness and semen evaluated by Dr. Scott Gordon, DVM. All bulls sell with health certificates for immediate shipment.

## BIDS

Feel confident to use our sight unseen purchase agreement. We guarantee that the bulls will be as described, and to your liking, or you don't own them. Buyers unable to attend the sale may send their bids to any sale staff or livestock publication representative. If you give us a bid on cattle you can rest assured we will attempt to purchase the animal for under or at your specified bid!

## GUARANTEE

All bulls are guaranteed to be breeders. All bulls selling are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided; or if the buyer prefers, credit will be given toward a bull at the following year's sale, less salvage value of the injured bull. Salvage value will be valued at \$3,000 and Hinkson Angus will provide credit on any amount over that. The buyer will receive whatever the actual salvage value is. Notification must be given to us prior to selling the injured bull. We do not guarantee against death for any reason. Insurance is available to purchase in case of mortality.

## LUNCH

Lunch will be served starting at 11:30AM.

## SPECIAL THANKS

To Garret Osgood, Troy Higgs and Holton Nelson for all they do to help us!

## CALVING EASE BULLS

\*\*\* Lowest birth weight potential. Ranking in the top 5% of the breed for CED and BW EPD.

\*\* Acceptable birth weights with CED and BW EPD in the top 10% of the breed.

\* Bulls considered to be easy-calving yet could sire calves that could be few pounds larger at birth. Will still rank top 15%-20% for CED and BW EPD.

## INSURANCE

Insurance will be available at the purchaser's option.

## LOCATION OF SALE

Sale will be held at the ranch 12 miles SE of Cottonwood Falls, KS. From Bazaar off Hwy. 177 go 5 miles SE on Sharps Creek Road.

## UPDATED INFORMATION

Genomic EPDs on all Bulls  
Yearling weights, feed test gain, scrotal measurements, and ultrasound carcass data will be provided. Ultrasound data taken by Mike Lindell of Park City, Kansas. Videos of all the bulls will be available on our website by March 10. EPDs as of 2/13/26. Thanks to Hoffman Cattle Services for clipping the bulls!

## TRUCKING

We urge you to bring your trailer and take your bull home sale day. \$50.00 off each bull that is picked up sale day or within a week of the sale. Hinkson Ranch will be happy to assist with delivery. Free delivery in Kansas and surrounding states. We will begin delivering bulls two days after the sale. Although we are very limited on feed, we can keep your bull for a short time. Any bulls still at our place after April 17 (one month from sale date) will incur a feed and care charge. We suggest you insure bulls if you want us to keep them or deliver them as shipment or an extended stay at the ranch is at the buyer's risk.

## DISCOUNTS

3% off 4 - 7 head. 5% off 8 head or more. Discounts on bulls only.

**ANGUS MEDIA** EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

# American Angus Association Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## PRODUCTION EPDS

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## MATERNAL EPDS

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Cow Energy Value (\$EN)**, expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## MANAGEMENT EPDS

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

## CARCASS EPDS

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**Group/progeny (C Grp/ Pg and U Grp/ Pg)** reflects the number of contemporary groups and the number of carcass and ultrasound progeny included in the analysis.

## \$VALUE INDEXES

**\$Value indexes**, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Weaned Calf Value (\$M)**, an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females

in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**Weaned Calf Value (\$W)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

**Feedlot Value (\$F)**, an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

**Combined Value (\$C)**, an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

• Solid bull both in person and on paper. No extremes yet, no holes. Use him on heifers or cows, either one.

### COMMITTED TO DATA COLLECTION

The Data Driven Herd program recognizes American Angus Association® members committed to the collection and submission of data on multiple traits to AHIR® to help better characterize phenotypes in both their herd and the Angus breed.

Participating herds collect a minimum of 8 to 12 traits of their choosing on a corresponding percentage of their herd and submit the data annually to AHIR to earn Bronze, Silver or Gold level recognition.

• One of the last 7221 Payweight sons to sell...he's a sleep-all-night heifer bull. Complete package with Top 1% CED and Birth. Top 15% for \$Maternal and \$Energy. Plus he scanned above 100 ratio for IMF and Ribeye.

# CHAROLAIS FALL BULLS

This is a very solid, uniform set of Charolais bulls. We are only selling 14 hd., but the quality of these bulls is deep. Highlighted by several sons of Affinity, Tank, and Maneuver. Remember, don't compare the Charolais EPDs to the Angus EPDs. Below is the average EPDs for non parent Charolais bulls for your reference. We again represent these bulls to be total terminal sires and not to be used on virgin heifers. The Charolais bulls have been on the same ration as the Angus bulls and have been handled in the same manner.

• An opportunity that doesn't come around very often right here. We are selling Hinksons Erica T19 9240 in her entirety. Her second calf is the 2024 Hinkson record setter Hinksons Honor Roll, now a top herd sire for the Musgrave Family in Illinois and a headliner for Genex. Honor Roll has gained popularity across the country and this female is where it started. This Capitalist 316 daughter is long, deep and stands on a very sound foot. She is dog gentle and will be an exciting breeding piece wherever she lands. It was not an easy decision to part with her, but we are excited to see the impact she will have for the new owner. Selling 100%. Has been flushed 3 times for an average of 7 embryos. Due 5-2-26 to Musgrave Impact.

### PARENTAL AVG EPD

Average EPDs between the listed sire and dam. These values are not calculated through the weekly genetic evaluation. The actual EPDs for individual progeny are likely to vary from the expected values listed.

Cow Commercial

## 80 FALL COMMERCIAL BRED HEIFERS

Top quality set of fall commercial bred heifers. Heifers were purchased locally with the majority of the heifers being straight black, Angus based heifers with 20-30% being black baldy heifers. The heifers have been sorted for type, kind and disposition. This kind of quality fall bred heifer is hard to find so help yourself here on a fancy set of bred heifers.

- Exposed to Hinkson Bulls from 11/29/25 to 2/20/26. Bulls were selected for low birth weight and high CED and all have genomically enhanced EPDs.
- Will have 3 rounds of shots including Preg Guard 10 before breeding and Scour Guard 4KC at preg check. Will be poured with Dectomax.
- Heifers will sell in groups of 5 based on breeding status, type and kind. The winning bid will have the option on the next 10 head.

# DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

## DEDICATED TO DATA.

We devote extra time to collect maternal traits beyond those required to target greater performance and predictability. Our goal is to not only improve today's genetics, but also prepare for the future of the Angus breed.

## COMMITTED TO IMPROVEMENT.

Raising quality registered Angus cattle takes commitment and as your genetic supplier, we take that commitment seriously. That is why we believe a commitment to improvement starts with the female.

Commit to the female — commit to MaternalPlus®.

Contact Customer Service at 816-383-5100 or [angus@angus.org](mailto:angus@angus.org) for more information.

## Driving the science of better breeding

**There's little room for error in the cattle business.** You need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI®) provides it through genomically-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
  - more accurate selection
  - easier identification of genetic outliers
  - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same level of accuracy as if they have recorded 7-33 progeny, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at [www.angus.org](http://www.angus.org).

### How do you know if EPDs are genomically-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by Neogen or the HD50K® by Zoetis.

[Angus.org/AGI](http://Angus.org/AGI)

## TARGETING THE BRAND™

There is more data than ever available on today's sire prospects. As commercial producers try to balance numerous traits in sire selection, help your customers easily find bulls with added carcass value. The Targeting the Brand™ logo does the math, simplifying the selection process.

Any registered Angus bull with a minimum marbling EPD (Marb) of +0.65 and an Angus Grid Value Index (\$G) of +55.0 or higher qualifies for the Targeting the Brand.

## MASTERGAIN® RANGE MINERALS

Value that goes onto your bottom line.

Predictable, consistent 4 oz per head daily consumption rate.

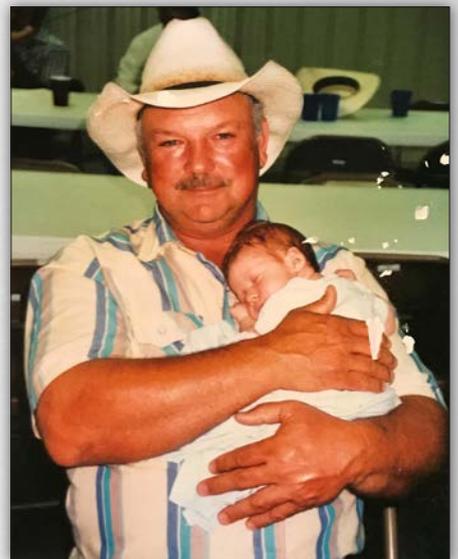

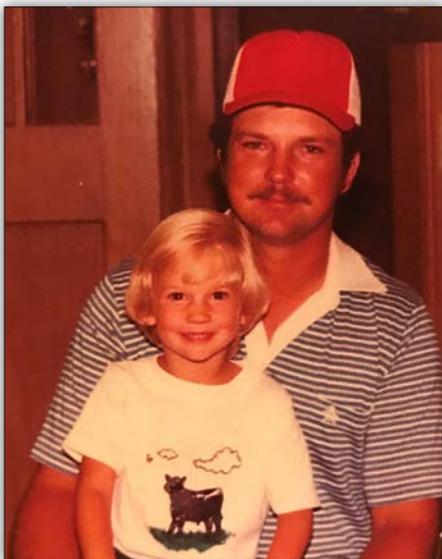

- Supplies vitamins to ensure needs are met for proper function of metabolic, reproduction, and immune system.
- Free-choice mineral available in loose or tub forms.
