Brumfield Angus Farms
5049 Kaiser Rd, Sawyer, MI 49125
www.brumfieldangusfarms.com

I want to take a minute and express my gratitude to our past and future customers. To me, the ultimate reward is customer satisfaction. Simply put, the customer and the cattle are why we continue to put in long hours to produce a product we stand behind with complete confidence.

I also want to thank my team at Brumfield Angus. Dan, Derek, Mitch, and the rest of the crew are quite a devoted team, demonstrating daily commitment and dedication to raising exceptional Angus cattle.

We are excited to present an outstanding set of bulls to you on March 24th. A couple of quick notes, the lot 1 bull out of Lady 1848 is worth a ride over to check out. Phenomenal balance, structure and muscle with an awesome set of EPDs. The J025 sons are a very powerful set, lots 2-6. J025 makes elite bulls and heifers! The 1514 sons are a really good group of heifer bulls, lot 16 being my pick of them. 1985 has a nice group of heifer bulls represented in lots 19-21. The Donna 1731 son, lot 25 is a moderate, very well balanced heifer bull. The 5214 (Congress Dam) sons (Lots 44,45) are a stout set. There are too many to name but an all-around good set that we are proud of!

We want to share that over 53% of the offering qualifies as heifer bulls and 35 of the 47 (74%) bulls are out of some of our top Donor cows.

We have relied on our own bulls in my commercial Angus herd in Montana for close to 15 years now, achieving tremendous success in producing desirable high-carcass, high growth, early maturing, steers for repeat end result buyers. The same set of Brumfield Angus sires producing these steers also consistently sire outstanding extremely maternal replacement females for my commercial herd.

We encourage you to stop by the farm and see the bulls in person and visit with us. The entire BAF team and I are confident you will be impressed with this offering and that you will find an exceptional bull to fit your herd's needs.

We look forward to visiting with you on Sale Day! Please call with any questions.

- Jameson 4114 is a sensational growth, Marb., RE, \$W, \$B and \$C son of the powerful and proven multi-trait donor in the Hopson Angus program, Phoenix 9193 sired by the record-selling multi-trait headliner, Jameson.
- Phoenix 9193, the dam of Lot 10 is a tremendous proven donor from the top of the Hopson Angus donor program and she offers explosive growth, and an outstanding combination of Marb., REA, \$W, \$B and \$C. The dam of Lot 10 combines the foundation female sires in the Gardiner Angus program, Phoenix and Sunrise with a dam who blends the proven Marb. sire, Prophet and Predestined and records a WR 2@104 and a YR 1@100.

- Jordan 4723 is an outstanding growth, \$M, \$W, \$B and \$C combination son of the proven Double Barrel Angus and Linz Heritage sire Jordan and stems from the \$100,000 valued proven Brumfield power cow, Lady Stallion 9820.
- Lady Stallion 9820, the donor dam of Lot 11 was the half interest selection of Wall Street Cattle Company as the lead-off female of the first Brumfield The Investment sale. Lady Stallion 9820 is a direct daughter of the Sletten Ranch headliner, Lady Payweight 550-7550 sired by the \$150,000 valued Select Sires roster member, Iron Horse 025F.
- Maternal sisters to Lot 11 were highlights of the 2025 Brumfield Sale and include: Lady Stallion 5382, the \$8,500 selection of Jac's Ranch; and Lady 4019, the \$8,000 selection of Moran Farms.

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

PRODUCTION

Calving Ease Direct (CED), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI), expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

Yearling Height (YH), expressed in inches, is a predictor of a sire's ability to transmit yearling height compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting scrotal size compared to that of other sires.

MANAGEMENT

Claw Set (Claw), expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes compared to another sire.

Foot Angle (Angle), expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth compared to another sire.

Docility (DOC), expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Pulmonary Arterial Pressure (PAP), expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

Hair Shed (HS), expressed in units of hair shed score, with a lower EPD being more favorable. This indicates a sire should produce progeny who shed their winter coat earlier in the spring and has improved environmental adaptability in heat stressed areas and grazing endophyte-infected (hot) fescue.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), expressed in pounds of calf weaned, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters. In other words, it is the part of the calf's weaning weight attributes to milk and mothering ability.

Teat Size (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires' daughters.

Udder Suspension (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires' daughters.

Functional Longevity (FL), expressed in number of calves, is a predictor of the number of calves a sire's daughters are predicted to produce by 6 years of age compared to that of other sires' daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, expressed in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny pre-weaning performance from birth to weaning.

Energy Value (\$EN), expressed in dollar savings per cow per year with a larger value being more favorable. It assesses differences in cow energy requirements, due to maternal milk and mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle through the feedlot phase and sell on a carcass-weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

Welcome Angus Breeders,

The Second Annual Bull Sale at Brumfield Angus Farms will feature an elite set of breeding-age bulls for customers to purchase. This progressive program has built a breeding program that can add genetics to any operation and we hope you can join us Tuesday, March 24, 2026 in Sawyer, Michigan.

The lead bull, Brumfield Faithful 5374 is sired by one of the hottest young sires in the Angus breed, 44 Faithful 2764. His progeny continues to top sales across the United States, and this will be one of the first sons sold in the Midwest. Calving-ease, growth bulls will all be offered, giving purebred and commercial breeders a cross section of the breeding program at Brumfield Angus. These bulls are backed by some of the strongest donors in the breed, so buy with confidence from these great people.

The cattle business is strong. Feeder calves are at an all time high, but consistent proven genetics is what the industry is going to demand. Here at Brumfield, it is a unique opportunity to buy genetics unlike anyone in this part of the country.

Frank Brumfield, his family and manger Dan DeMeyer want to provide not only top Angus genetics, they want to build a relationship. It is important to build friendships and you couldn't buy from a better program than Brumfield Angus.

If you have any questions please feel free to contact us at Cotton and Associates, we would be glad to visit about the bulls.

Watch the Sale on CCI.live!

*The best, the fastest and most
comprehensive marketing & bidding tool!*

How to Bid Online...

- **As a buyer**, you DO NOT need to login to watch the sale but you must have a validated account to bid.

To BID ONLINE go to www.CCI.live in your Chrome, Firefox, Safari or other modern browser:

- 1) Click on the sale schedule page.
- 2) Click on the sale of interest.
- 3) Click on Bid Online- Register and then Get Buyer Number

- After you are logged in, you must proceed to the sale page for your auction and click Bid Online - Register, then **"Get Buyer Number."** Some auctions require valid credit card number on file to obtain a buyer number to bid.

- CCI.live will operate with ease on a modern **cellular device, laptop, desktop or tablet.**
- A **current browser** is important and will always make your experience better.

- **For successful bidding you must have good Internet service!** It is very important to be stationary if bidding. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen, it is real time, and refresh your browser if you feel like you have some lag.

- **Support line open during all sales. TEXT 405-400-9505** - Please alert the ranch for your hauling preferences.
