MILLER FARM, LLC:

5510 Rawley Pike, Rockingham, VA 22801-4817

TERMS AND CONDITIONS:

Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf)

Payment is required prior to release and transfer of cattle to purchaser, and is expected within 30 days of invoicing.

ANNOUNCEMENTS FROM THE BLOCK WILL TAKE PRECEDENCE OVER PRINTED MATERIAL.

**** There will be 1/3 semen and revenue sharing interest retained on all sale bulls. ****

PICKUP:

Take \$100/bull off of your purchase if you bring your trailer and pick up on sale day. If you are not able to pick up purchased animals after the sale, please notify sales management at checkout time, and arrangements can be made to accommodate your needs.

Miller Farm, LLC and Friends will keep all bulls until May 1st free of charge; after that date, there will be a daily feed charge of \$4.25/day. Please contact Craig or one of the owners to enroll.

**** Free Delivery on all lots selling for \$6,000 or more to the lower 48 states. ****

CATTLE LOADOUT:

Cattle will be available for loadout at the conclusion of the sale, following check out.

BULL GUARANTEE:

All bulls selling have passed a breeding soundness exam prior to the sale. Miller Farm, LLC and Friends guarantees all bulls selling against breeding injury, and to be sound breeders for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a problem arises, contact Craig Miller or Brennan Miller. The buyer will be provided a replacement bull or a credit towards a bull in next year's sale, less salvage value of the injured bull. Please notify us as soon as possible should injury or problem occur and prior to the injured bull being sold for salvage! No claims will be accepted after six months from the sale date.

LIABILITY:

All persons attending this sale do so at their own risk, legal or otherwise, for their safety or for the behavior of animals. The owners, sale management, and the sale staff assume no liability for property loss or any accident that may occur.

HEALTH:

All cattle will have the appropriate health papers for immediate shipping.

TRUCKING:

Steve Massie 931-993-9578

Please Contact Craig or Brennan for trucking needs.

**** Please bring your sale book to the sale ****

EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®.

Dear Cattle Producers,

Welcome Back to the Miller Farm, LLC & Friends Sale! Craig, Nancy, Brennan, and Laura do an outstanding job and are incredible people to work with. They are a team that is passionate about agriculture and the well-being and success of their customers. So buy with confidence!

The bulls and females are in great shape and ready to go to work. There is plenty of added growth in these bulls for those of you selling weaned calves and, for those of you selling pounds of beef in a retail setting, there is a tremendous amount of carcass quality that will impact a great eating experience for your customers. For those of you selling load lots, I would absolutely make sure the marketing agent and the buyers are aware of the growth and carcass traits the bull you buy possesses. Genetics Impact Marketability!

Take note of the consignors listed below. They are like-minded cattlemen, as well, and want to see you succeed. Please feel free to reach out to the Millers or the guest consignors with any questions you have about the offering.

Join us Friday, March 27, 2026 in Harrisonburg, Virginia, at the Rockingham County Fairgrounds for a great time of fellowship and Angus cattle. Dinner will start around 4:30 p.m. EDT and the sale will start at 6:00 p.m. EDT. We look forward to seeing you there. If you have any questions or need assistance, feel free to call me at 336-736-6340.

• 5P5 is an exciting, young bull with loads of genetic potential that will improve every calf crop drastically. He checks the boxes for Production, Maternal, Doc, and HS with Elite Carcass Figures. He is in the top 15% of the breed for Teat and Uddr EPD. Top 20% for \$M, 10% for \$W, and 1% for \$F, \$G, \$B and \$C! He is heifer safe with top 15% Growth Traits to add icing on the cake. If you are looking for a complete package bull, he's your man.

• 26 Traits and Indexes in the top 35% of the breed or better.

• Top 1% for HS, CW, Marb, RE, Dairy Indexes, \$F, \$G, \$B, \$C!

Ranks in the top 1% for \$B, \$F, \$G, \$C, CW, MARB, RE and \$C; top 10% for \$W; top 15% for WW and YW; top 20% for HP and \$M; top 25% for CEM and MILK.

• Much like his brother, this bull will not short change you for EPD Value. He is calving ease enough to use on heifers with top 25% Growth Traits. If you are selling weaned calves, pay attention to his Top 25% \$Wean Index. He has great marks for Maternal Figures with balanced Teat and Uddr EPDs. But when you study up for the Beef Business, you can't get passed his Elite Math for CW, Marb, and RE. If you like high quality beef, he will produce it and your customers will be happy!

Ranks in the top 1% for \$B, \$G, MARB and \$C; top 5% for CEM and RE; top 10% for \$F and CW; top 15% for Angle; top 20% for HP and WW; top 25% for \$W and YW.

- 5B1 is a great Heifer Bull Option with incredible spread from a +5 BW to a +153 YW EPD. Definitely a multi-trait excellence bull here. He covers the needs for Production, Maternal, and Carcass Values. He offers top 2% Marbling and RE Marks with great Indexes. He also has an attractive combination for Teat, Uddr, and FL. He possesses 22 Traits and Indexes in the top 35% of the breed or better!
- Ranks in the top 1% for \$G and \$C; top 2% for MARB and RE; top 3% for \$W; top 4% for \$B and \$M; top 5% for CEM; top 10% for CED, WW, YH and YW; top 15% for CW; top 25% for \$F.

This is a very consistent set of Flushmates which is what you hope to have when you flush your donors. The dam of this flush, 3SB2, is a very feminine Sunbeam daughter as were her flushmates. These 4 bulls offer plenty of Calving Ease, High Growth, Top 30% or better for \$M, and Excellent Carcass Quality. The Maternal Granddam, H805, was also a donor in our program who is now owned by Kari Turner in GA. Come pick and choose between these brothers; they will get calves on the ground with ease, grow like wild weeds, and put perfection on the dinner table. You may even want to keep the daughters.

Ranks in the top 2% for \$G; top 3% for MARB and \$C; top 4% for \$B and YW; top 5% for \$W, CEM and WW; top 10% for CW and YH; top 15% for \$F; top 20% for Angle; top 25% for \$M.

PEAK STAPLETON FLUSHMATES

MA 2H2 Home Town of 5654 - Dam of Lots 13A-13C

• Here is a set of Flush Mates that stem from a Female we sold too soon. 2H2 is the dam of this young men and she is a very attractive Home Town daughter who is continuing to make her mark. She was the selection of Chapman Cattle Company in our 2024 sale. She had a son who sold in the Brushy Mountain Sale in 2025 for \$9500. This set of brothers by 2H2 are just as nice. Sired by PEAK Stapleton who has been getting a lot of Buzz in the Industry.

• Here is a big, stout growth bull ready to cover a few extra females this spring. He is a flushmate to Lot 16B and Maternal Brother to Lot 15. These bulls have a pedigree full of balanced-trait cattle with improved numeric for End Product Merit. He nearly punches out a +2 for Marbling with Economic Values for \$M, \$W, \$F, \$G, \$B and \$C that indicate profit.

Ranks in the top 1% for MARB; top 2% for \$B, \$G, Angle and \$C; top 5% for \$F; top 10% for MILK; top 15% for CW and Claw; top 25% for YW.

Miller Farm, LLC & Rocking W Angus

- Selling the Pick of Lot 30A or 30B, Miller Farm will retain the one not chosen.
- What a way to lead the Female Division than the pick of two pregnancies sired by two of the Hottest Bulls in the Angus Breed. Grand Slam has taken the country by storm with semen sales being in high demand for the Home Run Son out of the Great Sunbeam 332 who is currently owned by Circle F Farms in GA. He is a super calving-ease bull with great Growth Traits, Top 3% for \$M and an incredible combination of Carcass Values. These pregnancies are out of the Greater Good Donor, B481 who reads a pretty remarkable EPD profile herself. She possesses a great combination of Production, Maternal, Management and Carcass Values that will be a great complement to the mating of Grand Slam.

Miller Farm, LLC & Rocking W Angus

- Selling the Pick of Lot 30A or 30B, Miller Farm will retain the one not chosen.
- Lot 30B is the pregnancy sired by G A R Diligent who was the Lot 1 Bull in the Early Bird Sale at GAR. He is a super sound Stapleton son out of the same great female that produced Grand Slam, Sunbeam 332. He has a neat muscle pattern, is super flexible and moves like a cat. This mating to the B481 donor will be super attractive and have an explosive EPD profile. I don't know how you will pick between the two, but you won't go wrong!

Lorson Angus

Due 9.16.26 to G A R Wallace with a bull calf

• This Stapleton daughter stems from the 0243 female that has produced some nice females for the Lorson Angus Crew. She is a balanced-trait female with added value for Growth, Doc, and Carcass Value. Her \$Values indicate profit for \$W, \$F, \$G, \$B and \$C. She has been bred to G A R Wallace for a fall calf. Wallace semen has been on short supply and there is a lot of excitement about the genetic potential of his progeny, so don't let this one slip.

Ranks in the top 3% for \$F; top 10% for \$B, CW, MILK and \$C; top 15% for \$G, CEM, DOC and MARB; top 20% for \$W, CED and RE.

Miller Farm, LLC

Due approximately 8.17.26 to MA 4FS1 Fireside of W242 with a heifer calf

4S4 is a full sister to Lots 13A, 13B, and 13C. This 2H2 donor really gets the job done. She was the selection of Chapman Cattle Co. in our 2024 sale and is doing a great job for them. Stapleton worked well with 2H2. This female has added value for Growth, Maternal, and Carcass Traits. She is bred for a fall calf to our Fireside son for a heifer that should be well received.

Ranks in the top 4% for \$C; top 10% for \$B, \$F, \$G, \$W, CEM, MARB and RE; top 15% for CW, WW and YW; top 20% for \$M; top 25% for DOC and MILK.

Miller Farm, LLC

Due 8.14.26 to EXAR Bona Fide with a bull calf.

• Here is a female out of one of our past donors, H805. This Apex pulls together multi-trait excellence with added value for production, maternal, and carcass quality. She is bred to the full brother to Validity, EXAR Bona Fide, whose first calves have been very striking phenotypically and possess quality EPD value.

Ranks in the top 2% for HP and MILK; top 4% for \$W; top 10% for \$G, CED and RE; top 15% for DOC, MARB, \$M and \$C; top 20% for \$B, BW and YW; top 25% for WW.

Miller Farm, LLC

Due 8.14.26 to EXAR Bona Fide with a heifer calf.

• This is an attractive Apex daughter. We have come to expect that with the Apex Sire Group. She possesses great value for Calving Ease, Growth, and Carcass Quality. She is bred to Origen Standout, EXAR Bona Fide, who is owned by Katie Colin Farm in GA. This calf should be very attractive and increase genomic value.

Ranks in the top 1% for RE; top 4% for \$B and \$G; top 10% for \$F and \$C; top 15% for CEM and MARB; top 20% for CED, CW, SC and YW; top 25% for BW and MILK.

Miller Farm, LLC

Due 8.14.26 to G A R Home Run with a bull calf.

2148 is a balanced-trait daughter of Ellingson Homestead out of a Substance daughter. You know what dependable cattle the McCall Family produce so buy with confidence here. She is bred for more maternal value than what her EPDs read, and should be a great asset to the herd. Her bull calf due in the Fall by Home Run should be a cherry on top.

Ranks in the top 3% for HP; top 20% for YH.

This Kindred daughter has a super clean EPD Profile. She has a solid combination of Production Traits and a Maternal Value that earns her a top 20% \$M. Study her management EPDs, with Doc, Claw, Angle, and HS all being in the top 35% or better, and she does not slack up on Carcass Value either. \$M, \$W, \$F, \$G, \$B and \$C are all top 20% or better!

Ranks in the top 10% for \$W, CEM and \$C; top 15% for \$B, \$G, MARB, WW and Claw; top 20% for \$F, YW, \$M and Angle; top 25% for CW and RE.

B554 is a Heat Seeker daughter and, as you would expect, she has a lot of EPD power. Big Growth Figures, Fertility, Over 100 for \$M and a really neat combination of Management EPDs. She has plenty of End Product Merit to go around as well. And study that pedigree; you will see Prophet A222 in the third generation.

Ranks in the top 1% for \$M and \$C; top 2% for Angle; top 3% for \$B and \$G; top 5% for \$F, HP and MARB; top 10% for WW and YW; top 15% for \$W, CW and Claw; top 20% for RE and YH.

Miller Farm, LLC

Bull calf born 1.29.26 Reg# 21497703

- K018 is a donor from the Miller Program. Study her sons at Lots 15-16B, and you will see there is plenty of value here. She offers a pretty clean EPD profile that is nearly free of any holes. She offers great Production Value, Maternal Advantage, a Solid Foot EPD and HS, with increased Carcass Value on CW, Marb and RE. Top 30% for \$M, 20% \$W and 4% or better for \$F, \$G, \$B and \$C. To sweeten it up, she comes with a bull calf born 1/29/26 by B&B Preeminent.

Ranks in the top 2% for \$B and \$C; top 3% for \$G and MARB; top 4% for \$F; top 10% for CW, RE, Claw and Angle; top 15% for YW; top 20% for \$W, MILK, WW and YH.

EPD DEFINITIONS

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PRODUCTION EPDS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPDS

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

MANAGEMENT EPDS

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and

appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS EPDS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Feedlot Value (\$F), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying

objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

Grid Value (\$G), an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
