## Welcome

This winter has tested cattlemen across the country. Bitter cold, frozen waterers, and long nights in the calving barn are reminders of the commitment it takes to care for livestock. It's work few truly understand, but those who do share a deep respect for the people who live it every day.

With that in mind, we would like to invite you to join us on **April 4th for The Bull Sale here in The Valley**. Whether you are longtime customers or considering our programs for the first time, we appreciate your interest and the opportunity to be part of your breeding program.

At **Paint Valley Farms, Byland Farms, and Beckler Shorthorns**, our goal is simple: to produce **practical Shorthorn bulls that work in real-world conditions**. The bulls in this offering represent generations of disciplined selection focused on calving ease, structural soundness, maternal strength, and performance that adds value to commercial cowherds.

It has been rewarding to see these genetics go to work in operations across the country. Nothing means more to us than hearing from customers who tell us the bulls they purchased are leaving productive daughters and calves that perform.

Each bull is **genomically tested, parent verified, and backed by a complete set of performance data**. All bulls sell with a **first-year breeding guarantee**, and we offer **free delivery to regional locations throughout the continental United States and to Canadian ports of entry**.

Thank you for taking the time to study the offering. If we can assist you in any way, please don't hesitate to reach out.

We look forward to welcoming you to **The Valley on April 4th**.

*Sincerely,*

*Lee Miller, Dr. Jeff Byers, Jon Byers, Greg Beckler*

As breeders, we know the challenge of building cattle that excel in both phenotype and genotype. Verdict is proof it can be done. He will sire calves that come easy and then grow, all while maintaining structural integrity and style. This is a bull to build a herd around.

*Consigned by PVF Farms LLC*

He is long and smooth, this bull checks a lot of boxes, combining calving ease with plenty of performance. His dam carries as much volume in her center body as any in The Valley. He will leave daughters that thrive on forage and while raising a heavy calf.

*Consigned by PVF Farms LLC*

Lot 4 with his dam, JSF MINA STAR 185H

## 05

For a bull with this much calving ease, he is impressively stout with depth through his quarter. His beautiful dam maintains a near-perfect udder. He deserves strong consideration as a homo polled, roan heifer bull. He resembles his sire in build.

*Consigned by PVF Farms LLC*

## 06

One of my favorite bulls all year. Moderate in his build with strong performance and muscle that carries deep into his lower quarter. He combines maternal power with calving ease that matures into muscle. His herd bull presence is backed by a proven 10-year-old dam.

*Consigned by PVF Farms LLC*

## 07

Homo polled with big testicles, breed-leading calving ease, and plenty of muscle. His dam has put bulls at the top of this sale before, including the Lot 1 bull selected two years ago by Mac Magee.

This full brother to 1872 is the last son ever offered from one of the best cows to walk our pastures. With 1872 semen unavailable on the open market, this bull offers rare access to that influence. Moderate, easy fleshing, and square built—imagine the daughters he will leave behind.

*Consigned by PVF Farms LLC*

# 11

A slightly bigger Palermo son out of an ideal young cow with a tidy udder. Knowing the quality of the Flash and Palermo daughters, you can imagine the kind of productive, long-lasting females this bull will sire.

This bull has been at the top of the list for many who have been through the offering this winter. He is square and long-bodied, standing on a big foot. He is backed by an older dam that repeatedly places sons in the sale.

*Consigned by PVF Farms LLC*

# 17

This bull has been posing and strutting his stuff all the days of his life. He is smooth and muscular while still offering plenty of calving ease. His 8-year-old dam is one of our favorites, with an udder anyone would be proud of.

*Consigned by PVF Farms LLC*

Platinum is one of the very best bulls we have raised. Long-fronted, excellent structure. Great shape. Docile. He is a full brother to Byland Ultimate 4EL47 that sold near the top in last year's sale to Double G Shorthorns in Oklahoma. He ranks in the top 2% for \$BMI; Top 3% for \$CPI; Top 5% for \$F; and Top 20% for \$CEZ. We know it is difficult to find bulls with this look and composition, plus all the \$Values and EPDs, and also actual performance along with calving ease.

Frontier 30N is from the debut set of Gilman's Outback 32L sons and an example of the high quality that he passes on. He is deep bodied, correct, and has plenty of shape and power. His ratio of 111 for weaning and 105 for yearling show what he can do from a growth perspective. 30N has a very nice, balanced set of EPDs that make him a useful herd sire for many operations.

Beckler Countdown 52N is a really cool roan herd sire prospect. This Outback son has a neat look with added shape and muscle. If you're looking for a bigger framed, high performance bull to use, he certainly fits the bill. 52N was one of our heaviest yearling weight bulls. On paper, this bull checks nearly every box, as well as being homozygous polled. There's a lot to like about Countdown.

# 66

Lincoln is a bull that mashes the scales down in a more moderately framed package. He is deep and massive. His dam came to our herd from the Jungels program and has done a nice job in Ohio. He should add some pounds to his calves while maintaining a moderate frame in the replacement females you keep from him.

*Consigned by Beckler Farms LLC*

# 67

This guy is an attention getter with his power and quality. 9N is a maternal brother to Beckler Red Rock, a herd sire we used for calving ease and maternal quality. A full brother to 9N went to Burks Beef in Michigan. He's a high calving ease bull with leading \$BMI and \$CPI. You should love the daughters he leaves behind in your herd.

# 68

6N is a nice bull with added length and plenty of shape and mass. The dam of 6N is a Flash daughter, whose first son went to Daniel Shirk in Pennsylvania. He brings loads of genetic quality to the table when you study his EPD profile. His rankings are high for a bunch of traits!

*Consigned by Beckler Farms LLC*

**69**

Advanced is a part of the small class of Beckler Razor 38L sons that all have some gas in the tank. He's soft middled with added growth. His dam is a hard working Lauer lined female. She's raised 6 calves, never missed, and posted an average weaning ratio of 111 on those 6 head. He should be on your short list if you are looking for a power bull with added frame.

Moderate and maternal are the best descriptors of Gateway 48N. His pedigree combines Swagger with a McCoy daughter out of the famous Byland Ellen cow family. His dam has already raised a pair of bulls that went to work for customers in Ohio. He should be a leading candidate for siring a top notch set of replacement heifers.

*Consigned by Beckler Farms LLC*

## OVERVIEW OF EPDS

**Calving Ease Direct (CED):** The CED is listed as a percentage of unassisted born out of heifers. A higher CED EPD predicts a sire that will have a higher percentage of unassisted calves.

**Birth Weight (BW):** Compares the differences in the weight of calves at birth. It is measured in pounds, and cattle with higher BW are predicted to produce heavier calves.

**Weaning Weight (WW):** The WW is expressed in pounds and predicts differences in weaning weight of a sire's calves at weaning. Bulls with higher WW predict heavier calves across the scale at weaning.

**Yearling Weight (YW):** Just like WW, only at the next stage of life. The YW is expressed in pounds. Higher YW are likely to produce bigger, heavier yearlings.

**Milk (MK):** The hardest trait to measure, since we don't measure milk production in beef cows. The MK is measured in pounds of calf weaning weight due to his mother's milking ability. A higher MK predicts that a bull will sire daughters who raise heavier calves due to their milk production.

**Total Maternal (TM):** Total Maternal EPD is a simple formula.  $TM = MK \text{ EPD} + \frac{1}{2} WW \text{ EPD}$ . It measures impact on calf weaning weight due to both milk production and the cow's genetics for growth. Bulls with a higher TM EPD should sire daughters with a bigger impact on their calves' weaning weight.

**Calving Ease Maternal (CEM):** Measures the ability of a bull's daughters to calves unassisted as two year olds. The higher the CEM, the easier calving should be when a bull's daughters have that first calf.

**Stayability (ST):** Cows who work longer make more money. The ST predicts the ability of a bull to sire cows that "stay around". The ST is shown as a percentage of how much more likely a bull's daughters will stay in your herd to the age of 6. A higher ST bull is more likely to have daughters stay around for a long time.

**Carcass Weight (CW):** The CW is all about pounds of beef on the rail. Higher CW means that a bull is more likely to sire feeders with heavier carcass weights.

**Yield Grade (YG):** The USDA Yield Grade scoring system is the unit of measurement for the YG. Yield Grade 1 are leaner, more retail product carcasses. Lower, more negative YG bulls are expected to sire calves that score better on the USDA Yield Grade scale.

**Ribeye Area (REA):** REA is measures the size of the muscle that gives us the ribeye in square inches. A higher REA indicates a bull is expected to produce larger a ribeye in their offspring.

**Marbling (MB):** The MB is in units of percentage of intramuscular fat within the ribeye. Higher MB bulls should sire higher marbling (and grading) feeder calves.

**Fat Thickness (FT):** Inches of back fat (in hundredths of an inch) is the unit of measurement for FT. More negative FT are indicative of a bull that should sire less back fat in his calves.

### INEXES

**Calving Ease Index (\$CEZ):** An index focused on identifying genetics that facilitate smoother calving when breeding first calf heifers. As the name suggests, the Calving Ease Index emphasizes calving ease, with a component built in to maintain mature cow size at acceptable levels.

**Balanced Merit Index (\$BMI):** BMI includes a component of maternal traits, but also calving ease, growth, and carcass characteristics. This index is designed with replacement heifers being retained from within the herd, while the steers from the calf crop are marketing on a quality-based carcass grid.

**Cow Productivity Index (\$CPI):** The Cow Productivity Index is the newest offering in the ASA genetic lineup as a tool focused on identifying the cattle that do the things we expect of a productive momma cow: calve unassisted, raise strong calves to weaning, keep mature size in check, and stay in the productive herd for years to come.

**Feedlot Index (\$F):** For the cattleman who sees value in retaining ownership of feeder cattle. Growth, performance and carcass quality drive \$Feedlot. Cattle bred to grow and grade excel in \$Feedlot.

## GENERAL SALE INFORMATION

**TERMS AND CONDITIONS:** Terms of the sale are cash or check and made payable to Aegerter Marketing Services, Inc., immediately following the sale and before cattle are removed from the premises. The animal becomes the property of the purchaser as soon as sold. Any death or injury thereafter falls upon the buyer.

**BILLED ACCOUNTS:** All billed accounts are due within 10 days following the date of the sale. At 10 days, a two percent service charge will be added to the unpaid balance and an additional two percent will be added every 30 days thereafter unless previous arrangements have been made with the seller.

**ABSENTEE BIDDING:** Online bidding is available via CCI live. Those with unreliable internet should consider calling a representative of the sale far enough in advance prior to sale day. They will be able to assist you at ringside on sale day.

**LIABILITY:** Neither the owners, employees, auctioneer, sale manager nor other affiliated personnel can be responsible for any accidents, but they will make every effort to provide for the safety and comfort of those attending.

**INSURANCE** will be available at the settlement desk upon conclusion of the sale.

**SEMEN INTEREST:** Seller retains a 25% semen interest on all bulls sold unless stated otherwise.

**BREEDING GUARANTEE:** All the bulls will pass a breeding soundness exam. The bulls are guaranteed to be fertile and reproductively sound. This guarantee does not cover injury or death. In the event of a problem, the buyer will have the option to select

a suitable replacement, if available, or take a sale credit at the next sale. Any potential claim must be made by Dec 31 of the year of the purchase.

**GENOMIC ENHANCED EPDS:** Every bull selling has been parent verified and has GE-EPDs. EPDs listed in the catalog are the most current at the time of printing.

**GENETIC CONDITIONS:** All animals selling will be free of any known Genetic Conditions as recognized by the American Shorthorn Association unless stated otherwise. All potential carriers will be tested with updates available on sale day.

**HEALTH:** All the bulls will be accompanied by proper health certificate for shipping and have had a complete vaccination program.

**DELIVERY:** We offer free delivery to regional locations throughout the continental United States and to Canadian ports of entry. Every effort will be made to deliver the bulls within three weeks of the sale.

**ALL THE BULLS SELLING HAVE BEEN**

**FREE DELIVERY IN THE US**

*Announcements made from the auction block take precedence over all printed material in this catalog.*
