

3700 CATTLE CO

APRIL 16, 2026

Nevada, MO | 6PM CDT

Welcome and thank you for your interest in the First Annual 3/0 Cattle Company Angus Production Sale. This sale represents more than a set of cattle — it represents years of shared vision, hard work, and a commitment to building Angus genetics that are practical, reliable, and profitable for commercial cattlemen and seedstock producers alike.

3/0 Cattle Company was founded by Wes Ogle, Justin Ogle, Brad Ogle, and Tyler Parrack, along with each of our families, with a simple goal:

“to raise cattle that we would be proud to own, use, and stand behind. Every decision we make — from genetics to management — is guided by real-world performance, sound structure, maternal strength, and long-term durability.”

Behind the scenes, none of this would be possible without Chris Holcomb, our herdsman, who manages the cattle day in and day out. His attention to detail, stockmanship, and commitment to excellence ensure these cattle are prepared to perform when they leave our place and go to work for you.

The cattle offered in this inaugural sale are the result of disciplined selection and intentional breeding. These are cattle built to calve easy, grow efficiently, maintain condition, and add value in a wide range of production environments. We believe they represent the direction Angus cattle must continue to move — functional, honest, and economically relevant.

Whether you are a longtime Angus breeder or new to our program, we invite you to study the offering, ask questions, and visit with us. We value relationships as much as results, and we stand behind every animal in this sale.

Thank you for taking the time to be part of our first annual sale. We look forward to earning your trust and doing business with you for years to come.

Sincerely,
Wes Ogle, Justin Ogle
Brad Ogle, Tyler Parrack

Welcome to the First Annual 3/O Cattle Co Sale!

What a great time to be in the cattle business and great people to do business with. I challenge you to get to know the crew here at 3/O. The old saying "It Takes a Village" is so true anywhere we go, business or family. In this case, both! This is a hard working group of Men who greatly enjoy the cattle business and crop production. And, they are fun to do business with. They truly care about your success and hope you are able to make the purchases you desire from this offering and go be profitable with them.

It has been fun to watch them transition over the last two years and make great improvements in the cow herd, management, etc. This offering is put together by strategic planning, blood, sweat and tears as many of you have done over the years. I'm confident there are some great genetics in this offering that can go to work and be an asset to any producer.

As always, feel free to reach out to me or any of the gang at 3/O for any assistance with the offering. Feel free to stop in anytime and take a look at the offering. The cattle market is strong and there is a great demand for high-quality Angus Genetics, and they have an offering ready for the taking.

Thanks,

Zach Moffitt

Rita 403 is a full sister to the \$250,000 3/O Eden 404 selected by Grimmus Cattle in the 2024 National Finals Sale in Vegas.

The True Balance calves have been incredibly attractive across the country. They express a very eye-appealing muscle pattern, neat front, and move very smoothly. This mating to Rita 403 should offer added power, muscle and bone, with explosive numerics for Production, Maternal, and End-Product Merit, wrapped in a front-pasture package.

Rita 403 is the #14 WW, #22 CW, #4 Marbling, #9 SG, #7 SB, and #15 SC non-parent daughter of Symmetry in the breed. This mating should create great Pedigree, EPD, and Phenotype Value for your Program!

Heifer Pregnancy Due 9.6.26

What an incredible opportunity for some ELITE Genetics! Blackcap Empress 3433 is a standout daughter of ORigen sire, RSA True Balance 1311. Currently, she is the #1 SC dam sired by True Balance. She was the \$54,000 value selection of 3/O in the 2024 National Finals Sale in Vegas, and in 2025 a pregnancy was sold out of GAR Wallace and 3433 for \$22,000 selected by Cigar City Cattle in FL. 3433 puts together an exceptional combination of Production Traits, Maternal Traits, Management and Carcass Value. She is in the top 1% for CW, Marb, Dairy Indexes, \$F, \$G, \$B and \$C. She has the maternal genetics to earn her a top 5% SM with top 10% \$Wean Value. This calf, RSA 3/O Ambitious 522 (AAA 21332484) is an example of the genetic potential 3433 can produce.

This pregnancy to 4 Son Breakaway is sure to be a genomic and phenotypic standout. Endless opportunities here—don't miss out!

Due 10.18.26

This pregnancy by the highly sought after GAR Wallace should offer exceptional genetic merit for management and carcass traits. It is a very complementary mating for production values, maternal values, and predicts very profitable economic indexes. The donor Early Bird X611 was the one-time donor of Double Barrel Angus in TN and the \$35,000 selection of 3/O Cattle and Lenz Angus. This calf should have a very attractive physical appearance as well, so don't let her slide by—put her on the short list!

This Ambitious daughter out of X611 has a lot of upside genetically and physically. She is a very sleek-fronted, feminine daughter of the highly-valued Ambitious. She possesses top 5% Growth value and Radg, with great Fertility value. She has solid maternal value as well, checking the boxes for HP, CEM, Milk, with above average Teat and Uddr EPDs. She also offers an elite combination of CW, Marb, and RE. When you study all of the value she possesses, you can see why she is above average for SM, 15% for SW, and top 1% for SF, SG, SB and SC!

She is #16 for Marbling, #20 for SG & SC and #12 for SB among all non-parent Ambitious Daughters, which is a total of 1,214 to date.

Ranks in the top 1% for SB, SF, SG, CW, MARB and SC; top 2% for \$AXH; top 3% for \$AXJ; top 4% for YW; top 5% for WW and RADG; top 10% for YH; top 15% for MH, MW and SC; top 20% for SW and Claw; top 25% for HP and RE.

This is unique Captain daughter. They have been proven to have plenty of capacity and muscle, and she expresses that. You can really appreciate this EPD profile. Top 10% CED and BW to a top 5% or better WW and YW. She offers great fertility and maternal value. This mating to True Balance should improve her Teat and Udder values while also complementing HS EPD. When you study the combination of Doc, Claw, and Angle, you can like her even more. She does not sacrifice any carcass quality at all! The earning potential this female has is incredible—if you are selling bulls or females, she offers a genetic package that moves the needle rapidly. She has 27 Traits and Indexes in the top 35% of the breed or better!

She is the only Captain daughter in the breed with her combination of CED, BW, WW and YW! She is the only Captain daughter in the breed with her combination of \$M, \$W, \$F, \$G, \$B and \$C!

Sticking with the Evergreen Family here, 518 has been a really neat calf since the day she was born. She has the presence and style you expect from a True Balance daughter. She is 1 of 11 non-parent daughters in the breed sired by True Balance for her combination of \$M & \$C. Her dam is a stylish Winchester daughter that has moved into the donor pen, who possesses solid udder quality, rib shape, hip design and wrapped in a feminine package. She has an incredible combination of Production, Maternal, Management and Carcass Traits. She is in the top 5% of the breed or \$M, \$W, \$F, \$G, \$B and \$C! She offers 24 Traits and Indexes in the top 35% of the breed or better.

She is the only non-parent daughter of True Balance who possesses her combination of CED, BW, WW, and YW! She is the only non-parent daughter of True Balance for her combination of \$M, \$W, \$F, \$G, \$B and \$C!

Donor Potential here!

These Grid Maker sisters will be a solid option for your breeding program. They are out of the dam of the \$300,000 3/O Mahomes, HR Evergreen 9169, who has been an incredible producer in the program and her daughters are carrying the torch. When you study the EPD profile on Lots 6A and 6B, they will be hard to split the difference on. They both offer great value for Production, Maternal, Management and Carcass Traits. If you are on the hunt for Multi-Trait Excellence, they both do it!

6A has 27 EPDs and Indexes in the top 35% of the breed or better.

6B has 30 EPDs and Indexes in the top 35% of the breed or better. Two very Elite Sisters for Genetic Excellence!

They both offer an incredible combination of CED, BW, WW, YW with great fertility and Milk. Lot 6B has outrageously good Management Value, and they both possess Premium Carcass Values!

Pick of the Heifer Calves after Genomic Enhanced EPDs
These heifers are due 10.18.26, and 3/O Cattle is going to let you pick your choice of all of them. What an incredible genetic opportunity, a Wallace heifer out of one of 3/O's front-pasture donors. Blackcap 7K14 produced a daughter by FF Rito Ambitious that was a highlight in the 2025 Fall Harvest Online Sale, and was selected by JB Farms in Clarksburg, WV for \$29,000. 7K14 stems from the Multi-Million Dollar Producer VAR Blackcap 9319. This mating to Wallace will have a ton of Pedigree, Phenotype, and EPD Value. Hook in and don't miss out on the pick of the heifer crop!

Blackcap 504 is an Ambitious daughter with a ton of genetic value. She is a thick-made daughter of 7K14 with plenty of muscle and shape. Her full sister was the \$29,000 selection of JB Farms in WV during the 2025 Fall Harvest Online Sale. Study her profile, and you will appreciate her combination of WW, YW, Radg and Fertility. From a Maternal perspective, you will appreciate her combination of HP, Teat, Uddr, and FL. She offers balanced management traits along with a lethal combination of End-Product Merit. She possesses a very respectable \$M and \$W, with top 5% or better for \$F, \$G, \$B and \$C!

Ranks in the top 1% for \$B, \$G, FAT, \$C and \$AXJ; top 2% for \$AXH; top 3% for MARB and WW; top 4% for MH and YW; top 5% for \$F; top 10% for CW, MW, RE, YH and RADG; top 15% for UDDER, TEAT and Angle; top 25% for \$C.

3/O Blackcap 502 is the \$29,000 selection of JB Farms in the 2025 Fall Harvest sale, full sister to Lot 7B - Blackcap 504, and maternal sister to Lot 7C - Blackcap 530.

This is a very unique daughter of the \$105,000 2/3 interest BYRD Fault Free. She has the muscle shape and design you come to expect from Fault Free. They are stout, attractive, and full of genetic merit. When you sort her for specific traits, she is very respectable ranking #13 for WW, #9 for YW, #17 for Radg, #9 for SC, #9 for Marb, #4 for \$G, #12 for \$B, and #19 for \$C. She offers plenty of style, pedigree, and genetic value to be an asset to any program.

When you sort her combination of SC, HP, & CEM among non-parent daughter of Fault Free, she is the only one with that combination.

When you sort her for her combination of WW, YW, Radg, & \$C, she is 1 of 2 for her combination of those traits.

When you sort her for her combination of \$G, \$B, and \$C, she is 1 of 2 that qualify for the sort.

Ranks in the top 1% for \$G, MH, MW, WW, YW and RADG; top 2% for \$B, FAT, YH and \$C; top 3% for CEM, MARB and \$AXJ; top 5% for CW, SC, Angle and \$AXH; top 10% for \$F and RE; top 15% for HP and PAP; top 20% for \$W; top 25% for DOC.

These two sisters offer a powerful set of growth and carcass traits and backed up by one of the most influential Cow Families in the Angus Breed of recent years, SuperMama 6276! The full siblings to the dam of these heifers have grossed \$823,500 in progeny sales just on full siblings alone, not to mention embryos, pregnancies and other progeny that are direct sons and daughters of 6276. SuperMama 6276 is a Multi-Million Dollar Producer, who produces efficient cattle with great muscle shape and design along with very attractive numeric profiles. When you study this 524 heifer, you will find she possesses 17 traits and indexes in the top 10% of the breed or better, checking the boxes for Growth, HP, CEM, Carcass Merit and Highly-Profitable Indexes!

Ranks in the top 1% for \$B, \$F, CEM, CW and \$C; top 2% for YW and \$AXH; top 3% for \$G, MH, WW, YH and \$AXH; top 5% for MW and RE; top 10% for MARB and RADG; top 25% for FAT and HP.

This heifer offers a big pedigree punch. She is a daughter of BYRD Rita Prov 0237-2B44 who is a full sister to the over Million Dollar Valued FF Rito Hustler and FF Rito Ambitious, as well as the \$250,000 values selection of Circle F Farms in the 2024 National Finals Sale. The dam of 2B44 is RMRK Rita 0237, who was the \$230,000 valued selection of The 909 Ranch and Bullington Cattle in the 2023 Byrd Cattle Sale. Rita 0237 also produced a Congress daughter that was the \$60,000 selection of Smith Valley and an Identified daughter that was the \$45,000 selection of Double Barrel Angus in the 2025 Byrd Offering. This Majority daughter checks the boxes for Production, Teat, Uddr, Management and Carcass Values. She is loaded with genetic value by pedigree and numerically.

Ranks in the top 2% for \$B, DOC and \$C; top 3% for \$F; top 4% for \$G, MARB and Angle; top 5% for CW and YW; top 10% for MH, WW, UDDER and RADG; top 15% for MW and \$AXH; top 20% for \$W, YH and \$AXJ; top 25% for TEAT.

AI'd to GAR Diligent, Due 10.26.26

Pasture exposed to RH True Balance 4052 - 20984168, Bull turned out 1.22.26, pulled on 3.9.26

Ranks in the top 1% for \$G, CED, CEM, MARB and \$AXH; top 2% for \$B and \$C; top 3% for \$AXJ; top 5% for PAP; top 15% for BW and RE; top 20% for HP; top 25% for DMI and FL.

GAR Diligent

This super calving ease, efficient daughter of Fireball has been working in the donor pen. Exciting news—she's bred to the \$370,000 GAR Diligent for an October Calf. She has produced some really nice Symmetry daughters who will sell at Lots 10A and 10B. She has incredible marks for Marbling, RE, \$G, \$B and \$C with top 30% \$M. This calf by Diligent could really be a genomic gem.

Pick of the Heifer Calves

Another great opportunity for not only a pregnancy but the pick of all the heifers from this mating. This Captain daughter has a bold rib shape, powerful hip and big top with added bone. Sired by the popular Wilks Crick, they complement each other very well. She balances out his CED and BW, while he has the potential to improve her management traits. They both offer a strong set of growth traits with premium end-product value and excellent economic value for Indexes. Can't go wrong here!

Selling Five Straws as Lots 14A - 14E

EXAR Anticipation was the \$400,000 selection of Edisto Pines and Circle F Farms in the 2025 Express Ranches Big Event Sale. He is a direct son of the \$430,000 valued Forever Lady 9204, who was the half-interest selection of 4 Sons in the 2025 Byrd Cattle Sale. She is also the dam of RSA True Balance, whose progeny have been topping sales all across the nation for over a year now. There has been nearly a 1/2 Million Dollars in Anticipation Semen already sold. If you don't have any, now is the time to get it.

Selling Two Straws of Semen as Lots 15A and 15B

Here is an opportunity to grab some Wilks Crick semen. The Crick semen has been in high demand as he is out of one of the most prolific producers of the Angus Breed. Rita 1034 continues to make highly-marketable bulls such as Wilks Warrior, Wilks Promise Keeper, DBA Lincoln, Wilks Avid, and Wilks Achiever. She is a \$3 Million producer with a lot of production left ahead. Don't miss this chance for genetics that move the needle forward!

Two Units of Semen Selling as Lots 16A and 16B

Grid Maker has great pedigree power being a maternal brother to GAR Home Town, EXAR Tomahawk, and more. His semen has not been released to the masses and has demanded great value at auction. He is a calving ease sire with great growth and end-product merit, siring calves that have neat front-end appearance and bold rib capacity. Two units available—don't miss out!

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PRODUCTION EPDS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BEPD), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WEPD), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YEPD), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPDS

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

MANAGEMENT EPDS

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire's progeny to have lower PAP scores thus a lower chance of

contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

Hair Shed EPD (HS), is expressed in units of hair shed score, with a lower EPD being more favorable indicating a sire should produce progeny who shed their winter coat earlier in the spring. Selection for this trait should improve the genetic potential for a sire's progeny to shed off earlier increasing the environmental adaptability of cattle living in heat stressed areas and producers grazing endophyte-infected (hot) fescue.

CARCASS EPDS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

Group/progeny (C Grp/ Pg and U Grp/Pg) reflects the number of contemporary groups and the number of carcass and ultrasound progeny included in the analysis.

\$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of

their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
