

Annual Production Sale
APRIL 25, 2026

1 PM EDT | AT THE FARM IN KINGSTON, GA

Welcome to our 6th Annual Katie Colin Farm Production Sale.

This has been an outstanding year for our family and our program. While we've been blessed with growth at home welcoming our third grandchild and first grandson, Sterling, we've also continued to make meaningful progress in the quality of cattle we are producing. As we look back at last year's offering, it's clear just how much advancement has been made in a short time.

Our team has played a major role in that success. David Knighton has done an exceptional job preparing this set of cattle and continues to be an integral part of our operation. With the addition of Andy, DJ, and John, we have strengthened our day-to-day management, allowing us to stay focused on continuous improvement.

Our goal has always been simple: raise cattle that lead with phenotype and back it up with performance. We are committed to building cattle that not only look the part but deliver where it counts. Anyone can chase numbers but consistently producing cattle with the kind of presence, structure, and quality we demand takes discipline, and we refuse to compromise on that standard. We firmly believe you can have both, and this offering is proof of that.

This may be the most complete and consistent group we have offered to date. From top to bottom, these cattle represent the direction we are headed and the progress we've made and we couldn't be more excited to bring them to you.

The first calf crop of KC Madden has exceeded expectations. These calves are thick, powerful, and built the way we like them — big topped, high quality, and functional. We are proud to offer a select group from him. Likewise, EXAR Bona Fide's first calves are on the ground and making a strong statement early. One of his first daughters was named the 1st P&G Grand Champion Heifer at the National Western Stock Show, an early indicator of the kind of impact he is going to have.

As always, we stand firmly behind every animal that leaves our farm with a no-questions-asked guarantee. Our commitment is simple: we want you to be 100% satisfied and confident in your investment.

We invite you to join us on April 25 for what we believe will be our strongest offering yet. If you can't attend in person, the sale will be broadcast live on CCI.live so you can participate from anywhere.

We appreciate your interest and your trust in our program.

Sincerely,

Greg Bennett

David Knighton, Wife Jill, Children Dannah, Jameson, Daylynn & Jones

Andy Webb, Herdsman

EVENT SCHEDULE:

Friday, April 24

3:00 P.M. - Cattle on Display
6:00 P.M. - Dinner and Music
(please RSVP 678-410-4454)

Saturday, April 25

9 A.M. - Cattle on Display
11:30 A.M. - Lunch
1:00 P.M. - Sale

Cartersville Airport

17.5 miles

Richard B. Russell Regional Airport

20.5 miles

INSPECTION OF CATTLE:

Cattle will be displayed Friday afternoon and Saturday morning before sale, or anytime by contacting Greg Bennett at 770-560-2634 or Tyler Turnquist at 706-853-8195 or David Knighton at 601-906-2054.

HERD HEALTH:

Cattle will be accompanied with proper health certificates for immediate shipment. An updated breeding and calving report will be available sale day and announcements from the auction block will take precedence over all printed material.

TERMS AND CONDITIONS:

Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). All announcements from the auction block take precedence over printed materials.

TRUCKING:

Tom Snell (580) 374-4168 will be available sale day. Cattle may be loaded following the sale but can remain at the sale site until trucking arrangements can be made or pickup arranged. If you are unable to haul your own cattle, truckers known to be reliable will be on hand to assist you.

LIABILITY:

All persons attending the sale and related functions do so at their own risk. Katie Colin Farm and the sale management and staff assume no liability, legal or otherwise, for any accidents or injuries that may occur. The sale manager is only an agent for the seller and has no responsibilities other than that involved in conducting the sale.

SALE SETTLEMENT:

All cattle are to be settled for prior to load out unless prior arrangement has been made with Katie Colin Farm. Terms are cash or check.

CATTLE WILL SELL IN SALE BOOK ORDER

Selling 1/2 Interest with the Option to Double, retain flush if doubled.

The Number 1 \$C female in the breed sired by the ORigen sire KC Madden and a direct daughter of the \$125,000 Ruth 3007. This female blends the genetic strength of two influential Angus lines—combining the balanced performance, structural integrity, and eye appeal of Madden with the maternal excellence and fertility long associated with the Ruth cow family. Feminine, deep-bodied, and powerfully made, Ruth 6023 embodies the kind of cow that builds programs and leaves a lasting legacy through her consistent production and breed-leading pedigree. Sells with commercial recip.

Watch the Sale on CCI.live!

The best, the fastest and most comprehensive marketing & bidding tool!

How to Bid Online...

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.
 - After you are logged in, you must proceed to the sale page for any and every auction and click **"Get Buyer Number."** Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.
 - CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**
 - A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.
- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.
- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

Viewed around the world!

**SALE CATALOG, VIDEOS,
and LIVE BROADCAST...**

all at your fingertips from the sale page at www.CCI.live! Watch live sales weekly!

www.CCI.live

(405) 400-9505 Text or Call

KC Madden

AAA Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PRODUCTION EPDS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPDS

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Maternal Milk EPD (Milk), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

Teat Size EPD (Teat), expressed in units of teat size score, with a higher EPD indicating a sire will produce daughters with smaller teat size compared to that of other sires’ daughters.

Udder Suspension EPD (UDDR), expressed in units of udder suspension score, with a higher EPD indicating a sire will produce daughters with tighter udder suspension compared to that of other sires’ daughters.

Functional Longevity EPD (FL), expressed in number of calves, is a predictor of the number of calves a sire’s daughters are predicted to produce by 6 years of age compared to that of other sires’ daughters. A higher EPD is the more favorable direction indicating more calves produced on average.

Cow Energy Value (\$EN), expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

MANAGEMENT EPDS

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet. Selection for this trait aims to improve the genetic potential for a sire’s progeny to have lower PAP scores thus a lower chance of contracting high altitude disease increasing the environmental adaptability of cattle living in mountain areas.

CARCASS EPDS

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for post-weaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
