- WINC Hollie has been a program highlight for the Windy Creek program. She is most famously known as the dam of both the \$147,500 WINC All Right 213K to Griswold Cattle & Maple Lane, along with the dam of the \$130,000 high selling stud this past March to KT Ranches of Canada.

- She herself was the high selling female this past fall to Griswold Cattle Company. It seems as though she is proving to produce elite herd bull prospects in an automatic fashion. She stems from the undeniable genetic powers of the Y302 donor that's influence will be felt for a long time to come in Spencer.

- There are legitimate opportunities to generate elite individuals, and investment opportunities with these two embryo matings from the Hollie donor, if you are ready to make a splash in the Simmental business then bid to win here.

- **NOTE:** As we sold full interest in WINC Hollie last fall, there is no way for us to access or recreate these embryos, and this is the end of her embryo inventory here at Windy Creek, so these embryos sell with no guarantee.

- *Semen and Embryos are stored at 605 Sires and are available for shipment once payment is made. Buyer will be responsible for all shipping.*

• Kappes Sadie T635 Y302 is most definitely a legendary and cornerstone type female for WINC. She has been the source of several of the most impressive breeding pieces to come out of Spencer, with multiple high selling sons, and daughters of significant influence.

• She has built the cowherd here, and there will be seldom opportunities to purchase her direct progeny going forward. She is set to have an everlasting influence with her incredible imprint on the Windy Creek Cattle Company breeding program, as her progeny always rise to the top.

• This trio of embryos matings are built with the maternal strength, and consistency that has built the program!

• Semen and Embryos are stored at 605 Sires and are available for shipment once payment is made. Buyer will be responsible for all shipping.

- Miss Werning 638D was the high selling bred heifer out of the 2018 Werning Cattle Production sale at \$45,000. It was sure a steep investment to begin with, but we thought she was one of the most incredible females we had laid our eyes on to that point and just knew that she had to relocate to our program, whatever it may take.
- That significant investment to begin with has evolved into one of our leading pieces of genetic power, as regardless of the mating we expose this W/C Executive Order 8543B daughter too, she has sourced us with leading herd sire prospects and jaw dropping females.
- Most notably she is the dam of the trending, WINC Matter Of Time 249K that has become a leading sire group over the past couple of years, with both sons and daughters of attraction. The ES Right Time FA110-4 mating will result in FULL SIBLINGS to this stud.
- **NOTE:** Unfortunately we lost 638D and this is the end of her embryo inventory, so these embryos sell with no guarantee.
- *Semen and Embryos are stored at 605 Sires and are available for shipment once payment is made. Buyer will be responsible for all shipping.*

- An offering from one of the unsung heroes of the Windy Creek program sells here! WINC Miss 614D is a donor that has been a long term, prolific female that represents the best of the best from the Remington Lock N Load 54U and ALC Treasure C50P mating.

- The 614D sons have proven to be very wise investments for stockmen that want to improve the growth and pay weight of their calf crop, without sacrificing maternal strengths. They have been in heavy demand, in 2024, Steve Strom selected WINC Dabo 329L for \$19,500, and several other loyal WINC bull buyers such as Brad Greenway, Jeff Huss, Balmore Farms LTD, and Eric Grocott also employ progeny of this powerhouse female.

- From a female standpoint they are the kind to build around. The 2025 Female Sale proved this as 12 direct daughters of 614D highlighted the offering, and every single one of those 614D daughters was homozygous polled and homozygous polled and loaded with quality, and included a \$12,000 female to Balamore Farms, and an \$11,500 female to TK Simmentals.

- There is a very limited supply left on KRJ Dakota Outlaw G974, so this is a very exclusive mating, on a sire that has become a very impressive source of real world quality, an influence we wish we could have had more of!

- Semen and Embryos are stored at 605 Sires and are available for shipment once payment is made. Buyer will be responsible for all shipping.

WINC MATTER OF TIME 249K
Sire of Lot 10 Embryos

- The WINC Miss 9106G donor has proven herself worthy through real world results, digging her heels with every calf crop and coming to the weaning pen with cattle that rise to the top of their contemporary groups.
- She is the dam of the Horizon View Farms purchase, and leading herd sire, WINC Law Breaker 376L, whose first sons were the highest selling sire group at their 2026 Bull Sale averaging \$11,444 on 9 sons. She is also the dam of the lead off bred heifer in the 2023 'Profit through Performance', WINC Ms Statement 175J that has become a cornerstone female for TK Simmental.
- The 9106G female is a full sister to the 2021 Lot 1 bull, WINC Surelock 0118H that was the \$14,500 purchase of Jeff Huss, and they stems back to a trident producer, WINC Miss 650D that has been a high-profile producer.
- Maternal sisters to 9106G have been kicking it out of the park producing the \$18,000 WINC Relevant 5168N that sold to Carter Moke, the \$11,000 WINC Stronghold 598N that sold to Jason Kinzey and the \$10,500 WINC Testament 4117M that was purchased by Brandon Riedel. This cow family flat gets it done every time they are asked.
- *Semen and Embryos are stored at 605 Sires and are available for shipment once payment is made. Buyer will be responsible for all shipping.*

LOT 11 - 40 semen packages - 5 units in package

- ECC CKCC Roosevelt 4903M is the \$100,000 high selling bull from the 2025 CK Cattle Production Sale, and stands at the front sire battery at Windy Creek Cattle Company. The only semen released to the public thus far has been through breeder packages that sold on the 2025 Windy Creek 'Profit through Performance'. This will be the only semen sold on the public market in 2026.
- The reports on his first progeny on the ground have us very excited for what is to come, as those breeders who invested initially are awfully excited about the crop of prospects for this coming year.
- 4903M not only combines, but excels in all that contributes to profitability in this business. He sports one of the most dynamic and well-rounded EPD profiles of any sire we have made investment in, and beyond that backs it up with a set of real world data points that prove his quality reaches well beyond the science. He too is homozygous polled and homozygous black.
- Regardless of what the paperwork says, he is certainly an incredibly built specimen, and comes with a muscle pattern like we have seldom seen before in a Purebred Simmental herd bull. He comes extra explosive in his muscle design, with worlds of shape and punch up high in his hindquarter, that continues all the way down through his stifle and lower third. His ribcage and back shape are ideal, coming with an unquestionable amount of roar shape and power. He is the kind that stops you in your tracks when you lay eyes on him.
- His dam is a maternal sister to an impressive list of proven legends and exciting prospects that are taking the business by storm. First off comes the ST sire of popularity that has experienced extended use throughout the industry known as OMF Epic E27. More recently, both the \$300,000 OMF Doc Lynn L92 and the \$70,000 OMF Ludacris L17 studs have surfaced and have the industry hyping with their rookie calf crops hitting the ground. Additional to this, she is a ¾ sister to OMF Kristy K88, the \$128,000 record setting bred heifer to sell for Oak Meadow Farms in 2024. Just to add another feather to her cap, the dam of Roosevelt 4903M is sired by the \$230,000 KCC1 Countertime 872H, a sire that continues to forge his path in the reality aspect of the business.
- Semen and Embryos are stored at 605 Sires and are available for shipment once payment is made. Buyer will be responsible for all shipping.
