

Spring Production Sale
APRIL 27TH

GLENCOE, OK | 6:30 PM CST

CCI
.LIVE **LiveONLINE™**

Welcome to the Sale!

Dear Cattle Friends,

It is with great pleasure that we welcome you to our Spring Production Sale. The T/R Cattle crew, alongside our valued friends, has worked tirelessly to assemble an offering we are truly proud to stand behind. This event represents years of thoughtful planning and steady progress, reflected in a set of cattle that showcases the very best of our program.

This year's sale presents a unique opportunity to invest in top-tier genetics, backed by pedigrees rich with proven influence. The offering includes full and maternal siblings to past high sellers, as well as cattle tied to some of the most impactful genetics in the industry. We are excited to host a live event featuring an exceptional lineup of bulls, bred females, pairs, open heifers, and elite genetic opportunities.

At T/R, our commitment remains steadfast: to raise and market cattle that embody functionality, longevity, and strong maternal traits. Each breed represented brings something distinctive, and we believe the depth and quality throughout this sale speak for themselves.

We would also like to extend our sincere appreciation to the dedicated crew at T/R—those who are with us day in and day out, as well as those who step in whenever needed. Your hard work, loyalty, and friendship are the backbone of our operation. A special thank-you goes to Spencer Hovde for his outstanding work on the catalog, and to Melissa Grimmel-Shakke for capturing these cattle as well.

The cattle are available for viewing anytime here in Glencoe, and we encourage you to stop by. A full listing can be found on CCI.live.

Please join us at T/R Ranch on Monday, April 27th at 6:30 p.m. for an evening of dinner, refreshments, good company, and great cattle. We look forward to visiting with you.

With gratitude,

Trent, Leslie, and Kase Ray

Sale Information

FERTILITY GUARANTEE

Females sell per the standard guarantee of their respective breed association. All females sell as sound breeders with guarantee of pregnancy OR embryo. We cannot guarantee heifers to breed that we feel have been fed to the point of obesity and will hold the feeder responsible for any reproductive problems. The seller reserves the right to take possession of any heifer that has difficulty conceiving and prove her a breeder before any sale credits are issued.

TERMS & CONDITIONS

All lots sell in accordance with the suggested terms & conditions per their respective breed. For updated EPD information please view the animal's online registration paper via the breed association website. Announcements made from the sale block or listed on the update sheet take precedence over any written material in this sale catalog. All funds are to be paid to T/R Cattle Company in U.S. currency. No cattle will be transferred or released without full payment. All sales are final.

Sellers reserve the right to two (2) flushes of six (6) viable embryos each flush at seller's expense and buyer's convenience unless otherwise stated on sale day terms

FROZEN LOTS

The embryos being offered on this sale are all grade 7:1 and 6:1. If there are any grade 2 embryos, they are guaranteed alike. All embryos selling are IVF Direct Thaw. Furthermore, the embryos selling have been collected by Trans Ova Genetics, Hoofstock Genetics or Vytelle. Unless it is otherwise stated, the seller will guarantee (1) 60-day pregnancy if:

- 1) Transfers must take place in one calendar year of the sale date
- 2) Transfers are performed by a licensed embryologist
- 3) If you do not establish at least one 60-day pregnancy you will be given additional embryo(s) from the seller of the same mating or (if there are not anymore embryos from that mating) a suitable replacement will be provided by the seller
- 4) Buyer has 21 days of purchase date to ship their inventory out. If buyer does not get their inventory in said time, seller will keep inventory.
- 5) The buyer must follow Trans Ova & Vytelle thawing and implant instructions.

LIABILITY

T/R Cattle Company as well as other affiliated sale personnel assume no liability for injury, accident, or damage to any person or their property and are not to be held liable, financially or otherwise.

HOW MUCH CAN YOU AFFORD TO PAY FOR A BULL?

The current slaughter bull market is one of the strongest we've ever seen, with many bulls bringing \$4,500 or more. That makes this an exceptional time to invest in a new herd sire.

A long-standing rule in the cattle industry is that a good bull should be worth at least five steer calves. In today's market, that value is even more compelling—often allowing a bull to pay for himself within the first year. If you retain daughters, his genetic impact continues to return value for years, influencing your herd for decades.

Value breakdown

Weaned calves

- $\$2,500 \times 5 = \$12,500$ value per bull

Yearlings

- $\$3,000 \times 5 = \$15,000$ value per bull

Fat cattle

- $\$3,500 \times 5 = \$17,500$ value per bull

Real-world investment example

- Average new bull cost: \$15,000
- Salvage value of old bull: \$4,500
- Net cost of a new herd sire: \$10,500

Spread over a 5-year working life, that equals about: \$2,100 per year.

For roughly \$2,100 annually, you can put a proven new herd sire to work—improving genetics, adding pounds to every calf crop, and strengthening your bottom line year after year.

TATTOO: 115M

These two studs are full brothers to an American Classic daughter that commanded a \$61,000 valuation in the winter of 2024, further validating the strength and consistency of this cow family.

Lot 1 is a dark red, shorter-marked, ring-eyed bull designed to work for a wide range of cattlemen, offering balance, eye appeal, and the versatility to fit into nearly any program.

Lot 2, on the other hand, will appeal to those focused on the Texas Hereford steer market, combining the look, build, and presence demanded in that segment.

Their donor dam, 401A, is dark red with excellent pigment and remained impressive until she passed just a few months back at 13 years of age, continuing to prove her value year after year. A former \$65,000 sale feature herself, she is the dam of Bell Ringer, who commanded \$100,000, and Eisenhower, who sold for \$23,000.

Polled Hereford

REG: 44744817

DOB: 4/13/24

TATTOO: 113M

A powerful cross combining Red Kingdom and 903, this bull offers exceptional shape and genuine muscle. Rugged and burly in his design, he still maintains a moderate birth weight of just 84 pounds, making him a practical, low-input option without sacrificing performance. He is the kind of bull you will want to build around, with daughters that should remain productive for years to come.

His dam, 903, is highlighted by a near-perfect udder and exemplifies the kind of maternal strength this pedigree is known for. The maternal side runs deep, as his granddam, B002, has been a standout donor in the Jensen program, consistently transmitting power, consistency, and maternal excellence.

REG: 44744822

DOB: 4/21/24

TATTOO: 121M

One of two paternal brothers sired by Red Kingdom that went to work behind the powerful set of bred females selling in this offering. This bull was hand-selected for his low birth weight in the 70-pound range and his true, practical functionality. He is the kind that cattlemen gravitate toward—built right, easy doing, and loaded with consistency and quality. This bull brings added confidence through his maternal side, as his dam is great uttered, beautifully constructed, and backed by a proven cow family tracing to some of the very best genetics ever produced at Holden Herefords. This is a no-holes kind of herd sire prospect with the look, lineage, and reliability to make a lasting impact.

Scurred Hereford

REG: 44744818

DOB: 4/24/24

TATTOO: 112M

A punchy, stout-hipped, rugged Hired Gun son that brings power where it counts. He offers plenty of length and stretch to add pounds to a calf crop, yet started small with a light 62-pound birth weight, making him an ideal combination of calving ease and performance. This bull is built with substance and shape, carrying the kind of look and dimension that stands out in a pen or pasture. His dam is an impressive, ring-eyed, short-marked female that ties power and eye appeal together in one complete, functional package.

We think an awful lot of this bull. He was taken out just once and came home with a banner from the 2026 Cattlemen's Congress. He is also a maternal brother to the 2024 National Junior Hereford Expo Reserve Champion Horned Female.

We are big believers in strong cow families, and if you aren't familiar with 4064 or the Diana cow family, take note—this cow doesn't miss. Here is a big-footed, well-built bull that carries the added extras of his sire, blended into a proven, high-caliber cow family. Great feet, tight udders behind him, and a balanced, eye-appealing phenotype throughout.

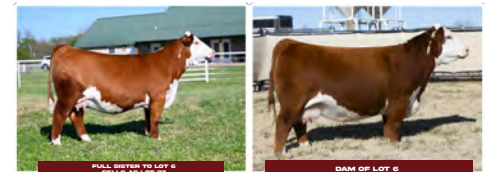

Dive in.

We realize there are a ton of Marksman sons out there, but the fact is—they are awesome. Both were sent back off an embryo purchase and are backed by two of our best donors. Having tight, clean sheaths, massive testicles, and great skulls only enhances how well they complement their sire. Both absolutely pressed the scales down with their yearling weights.

Lot 7 is so neat and square off both ends of his skeleton while remaining incredibly complete in every way. Not only that, he is built with a level of balance, structure, and presence that makes him hard to miss when you see him in motion. It's worth noting he is out of the great 1810 donor, a daughter of Mirror Image. A full sister to this bull commanded \$34,500 a few years ago in our online sale.

Lot 8 is the growthier, higher-tying bull that is massive-forearmed, harder-muscled, and as wide and square as you can make a March yearling bull calf. When we are talking about influential cow families, there is no doubt his mother, G47, is stacked with them. A full brother sold last spring for \$15,000 for half possession, and two sisters combined have brought \$74,500 for half embryo interest. This bull was also shown and brought home a banner from the 2026 Fort Worth Stock Show & Rodeo.

SIRE

You will travel a lot of miles to find a Simmental bull that is bred and built like this. It is worth noting that his mother is flat incredible and deserves to have a herd built around her. This bull was a division winner at both the 2026 Cattleman's Congress and the Fort Worth Stock Show & Rodeo. Stout, big-footed, and square-made—he offers a level of structural integrity that ties into his look and presence. So sound, incredibly smooth, and hard to miss, he brings an attention-grabbing profile that sets him apart.

Big-time pair. Big-time pedigree and backed by a very special cow family. We committed to offering all of the bred females developed in our West Texas program, and I can say—when Leslie and I talked through this sale, this one made for a tough conversation.

Picture day was hot, and the pairs had just calved within a week of the big day—but I will admit, without a doubt, this cow is one of the best that's ever walked in Glencoe. And her heifer calf? Even more impressive. If she were selling this here fall, she would be one of the true highlights of the sale. I still don't think I can say enough good about this female. She is incredibly versatile and can be used across several breeds with confidence. Big-time donor potential here, with an outstanding Maine-Angus heifer calf at side. We hope whoever buys this beautiful pair enjoys them as much as we have.

DAM OF LOT 11

We are offering two very special Classen daughters—sired by one of the best bulls the Angus breed has ever seen—with greatness built into their DNA. Their grandam, 2114, is a direct daughter of the great 615, making her a sister to 419. 419 captured the Open Angus Show at NAILE in 2015 and went on to win both the Junior and Open Angus Shows at NWSS in 2016 for Leslie Rogers and family.

The quality of this cow family is undeniable. They are as loose-structured and flexible as you could want, yet travel on a stout foot with more than enough dimension and substance. When you ask them to stop, they give you a look that will stop you in your tracks every time. In the past, sisters have commanded \$25,000 & \$49,500 for half embryo interest. Very special cattle out of the great E78 donor.

**SELLS WITH A MADE MAN HEIFER CALF AT SIDE.
CALF REGISTERS AS A MAINE-ANGUS. 72LB BW.**

DAM OF LOT 12

I absolutely love this female. A few years back, when I traveled out to California, I made a stop at Dal Porto's. As I was walking through the open heifers, I noticed—over the fence—a dense-skulled, big-legged, sleek-necked bred female. She was a touch on the thin side at the time, but incredibly well made. Her rib shape was spot on, and the combination of her structural base, power, and rawness was hard to find in this breed. Come to find out, they had just pulled her out of their replacement group to offer in the sale. I checked back later to study her pedigree, and from that point on, I was all in. I was so drawn to and intrigued by her dam that I drove back to Dal Porto's twice just to see her again. When you're raising cattle that need to excel both in and out of the show ring, this is the kind you build around—a maternal, dense-bodied female that moves on a square, correct skeleton. What truly sets her apart is the way her knees track square to her toes, all while being loaded with genuine power. This is the only 9481 daughter we will ever have to offer, as we lost her mother far too soon.

If you like great cow families, study up. As you look through the Angus section, you will see several derived from the Proven Queen cow lineage. This heifer's dam is sired by Blue Chip and is a maternal sister to our E78 donor. This cow is one of my favorites to walk the pastures at Glencoe. I'll tell you right up front—she has the right pieces to be capable of raising something good each time, the kind that keeps you in business year after year. Her mother's udder is impeccable, and she consistently raises one of our biggest calves each year. If you are familiar with the PVF Proven Queen cow family and the great 615 donor, then I think that's all that needs to be said.

Proven Queen 111M is a stunning daughter of Natural Law back to Insight. Her pedigree is time-tested and highly prolific, and her dam is truly something special in our pastures. Added value comes deep in the pedigree—EXAR Blue Chip 1877B traces back to the legendary FCF SCC PV Proven Queen 615, making her a maternal sister to the 2015 NAILE and 2016 NWSS Grand Champion, PVF Proven Queen 419. 419 has been recognized as one of the most elite Angus females to ever grace the tan bark, and her influence continues to resonate through her descendants. The maternal grandam of J123 is PVF Proven Queen 2114, a full sister to FCF Proven Queen 022, the 2011 Illinois State Fair Junior Show Supreme Champion. Power in this bloodline would be a drastic understatement.

CALF REGISTERS AS A MAINE-ANGUS. 50LB BW.**

DAM OF LOT 17

A full sister to the 2024 Cattlemen's Congress Champion Angus Female. I'll keep it short on this one—she is good, and you can see it. She is out of the great BCII Sandy 071 female, backed by BCII and Sennett genetics. Good feet, an awesome udder, and a bad to the bone calving ease bull calf at side, with longevity built into the blood. Big-time cow power here.

Red Angus

REG: 4992153
DOB: 5/12/24
TATTOO: 802M

We have been slowly building the Reds over the last few years, and when the opportunity came to offer this beautiful 113Z daughter, we couldn't say no. You'll spend a lifetime trying to find a heifer built and bred like this for your next Red Angus donor. John Wick and 113Z are no strangers to success, and the generating potential behind this female speaks for itself. She is soft middle, bold bodied, and very flexible at the ground. She hinges extremely well from her hip to her hock and moves with ease and flexibility throughout. A pair with all the basics, the extras, and the breeding to be a great one. She has an awesome heifer calf at side.

**SELLS WITH A STADIUM HEIFER CALF AT SIDE.
CALF REGISTERS AS A BALANCER. 41.8% GV. 62LB BW.**

A different breed and pedigree here. Franchise has been a mainstay sire, and we love this daughter out of him. 20J4 is a Man O' War x Zelda daughter we purchased from Teeter a few years back. 36M laid down the first time and spit out this beautiful heifer calf sired by the past Cheyenne and NWSS Champion, Stadium. This is a punchy-made, good-toed, bold-bodied female that makes a great cow. Her best days are still ahead of her in production.

The only second female ever to sell at T/R out of the famed "Vera" donor—raised here in Glencoe and now owned by the Tlach family. This horned heifer is one we originally planned to keep back to start Kase's bred-and-owned herd, but we felt she deserved the opportunity to be offered. Her udder is very nice—yes, it was a touch full and a she was a bit empty on picture day, as the calves hadn't been worked with the cows and it was an extremely warm day. Her sleek, fault-free build will draw plenty of attention. Georgia Kay is also prominent on the backside of this pedigree, further reinforcing her long-term value. There is no doubt in our minds that this female has a bright and productive future ahead.

You won't find many better than this female in the summer division. This is a big-time mating, and to top it off—just look at what she's bred to.

A full sister topped the 2024 October Female Sale, and maternal sisters have topped multiple sales. The pedigree is fresh, undeniably stacked, and the build is as consistent as the cow family behind it. These sisters are dense, have a great running gear, and are built to last a lifetime—the kind that consistently generate the good ones. When you study the cow families behind both the sire and the donor, it's easy to see why this mating worked so well. 4092 is a maternal sister to BR Belle 4082 ET, the dam of BR Belle Air. 4092 is also a full sister in blood to BR Anastasia, one of the most dominant females to ever come out of Barber Ranch.

This is a pretty intriguing bred for a lot of reasons. If you like JABR Hattie 131H donor, then jump in. She's backed by an elite pedigree and an impressive production record. This bred is a full sister to the 3rd Overall California Youth Expo Heifer and to the Maternal sibling to then 2025 Cattlemen's Congress Reserve Champion Maintainer Bull, SIL Trust Fund 4515M.

Hattie has firmly established her reputation through the success of her progeny, with daughters consistently topping the Silveria Bros. Passion for Success Sale year after year. Highlights include a \$42,000 high-selling Style daughter in their production sale and a Silveras Forbes 8088 daughter that was crowned Champion Division II at the 2024 American Royal.

Even prior to that, Hattie's daughters have commanded elite prices, selling for \$25,000, \$21,000, \$20,000, \$10,500, and \$10,000—further solidifying her as a consistent and reliable source of high-value offspring.

DAM OF LOT 38

When Cane Creek reached out about marketing a select group of 45C daughters, we knew immediately we wanted them in Glencoe. The impact of 45C on the industry is well documented—you could practically write a history book on her accomplishments.

Her influence runs deep through some of the most recognizable and highly respected sires of recent years, including Prominent, Standout, Benton, Substance, Miles Ahead, Inception, Exodus, and Chisum, along with an impressive roster of high-selling, highly productive females. This donor has firmly stamped her legacy on the breed, and these daughters are no exception. We are confident buyers will appreciate the quality represented in this cow family.

In fact, the first two sisters we offered caught the interest of many, and the final hammer price solidified it. The build, look, and genuine power are exactly what keep 45C progeny in constant demand. These cattle are long-spined and bold-ribbed with real muscle shape, yet still refined and maternal in their design. Backed by pure cow power, they exemplify the structural integrity, balance, and performance that have made 45C one of the most dependable donors in the business.

Yet even with that shared blueprint, each one brings her own presence—raw, eye-catching, and captivating in a way that demands attention.

DAM OF LOT 39

A true summer and the result of an embryo purchase that was sent back to Glencoe, this female is a maternal sister to the 2024 National Junior Hereford Expo Reserve Champion Horned Female and carries that same level of quality.

We are big believers in strong cow families, and if you aren't familiar with 4064 or the Diana cow family, take note—this cow doesn't miss. Her daughters consistently mature into exceptional, highly productive cows.

As expected from this mating, these females are fluid and loose-structured, with exceptional foot and bone—mirroring the strengths of their sisters. Their shape is correct, their rib cages are bold and expressive, and their maturity pattern is right where it needs to be.

For those who appreciate young females that look like calves but mature into powerful, productive cows, this heifer deserves serious attention. The quality on the hoof here is undeniable.

We are offering two high-end sisters to Gambler.

Lot 41 in particular is bold, punchy, and extremely dense.

Lot 42 is the smoother, flatter-made option with added length of body.

We partnered with TRM and Cane Creek on the \$30,000 pick of the Cane Creek carload bulls at the 2026 National Western Hereford Sale. His dam, CCCC Katie 258K ET, whose half interest sold in 2023 to Bowling Ranch, is a full sister to EXR Generator 0333, the high-selling Hereford bull of the 2022 Express Ranches bull sale.

His pedigree blends KJ 7603 Element 019L ET—the Reserve Champion Polled Bull at the 2024 NWSS as a calf before going on to be the \$95,000 high seller at Jensen's 2024 Spring Bull Sale—with Genesis, Revolution, 88X, and Sooner, backed by the influential Bailee, Gabrielle, and Notice Me cow families.

This heifer is a horned show pony equipped with more bells and whistles than you can imagine—big-time good. A standout from the moment she hit the ground, and the only calf we will ever offer out of a barn favorite from a few years back for Dunks.

She's big-haired, gorgeous-headed, and as complete as you can make one—big-toed and built right from the ground up. It's hard to imagine a more beautiful female moving across the show ring with that true donor-cow look. Even more impressive is how fluid she is while still carrying that much capacity and muscle shape.

She's the kind that stops you the moment she hits the ring during the Hereford Masters in Madison.

When Cane Creek reached out about marketing a select group of 45C daughters, we knew immediately we wanted them in Glencoe. The impact of 45C on the industry is well documented—you could practically write a history book on her accomplishments.

Her influence runs deep through some of the most recognizable and highly respected sires of recent years, including Prominent, Standout, Benton, Substance, Miles Ahead, Inception, Exodus, and Chisum, along with a powerful lineup of high-selling, highly productive females. This donor has firmly stamped her legacy on the breed, and these daughters are no exception.

A beautiful Sherman grand-daughter, this female is dark red, athletic, and extremely shapely, with a smooth, eye-appealing build and plenty of presence when she gets out and moves.

A very special lot—combining elite genotype and phenotype to create a true cornerstone donor for a wide variety of programs. The “freaks” come out when this cow is involved, and this one is a near-perfect blend of sire and dam. It’s a home run in our opinion. She traces back to the legendary Strawberry Wine and, in many ways, mirrors her iconic grandmother with a modern twist and a smooth, balanced build. Chubby-bodied, smooth-made, square-structured, and able to get out and flex with the best of them.

This is the kind that can elevate a program in a hurry.

I really liked Copper Candi when he sold as a calf, and frankly, I wish we would have continued bidding on him. He is one of the more underrated bulls in the breed, but I’m glad our good friends at Cane Creek were able to purchase him and use him on this cow’s mother. I enjoy evaluating raw calves, and this one is no exception. She is youthful and honest in every way. The truth is, she simply needs more time to develop, but her build, length of skeleton, and excellent structural base lead me to believe she will develop into a very good bred heifer.

¾ BROTHER - LOT 8

The Hired Gun sired embryos are ¾ siblings to the lot 8 bull and \$80,000 value marksman daughter that sold in the October 2026 Female sale, carrying the same elite genetics that have defined this powerful cow family. We're especially excited about their full sib brother, who will be headed to Congress this year — polled, clean sheathed, and exceptionally designed. He's a full brother to the horned bull T/R MRKS Diego 14L ET, one of the crowd favorites at Congress a few years back. Diego sold privately for \$15,000 for half interest, a testament to the quality and demand behind this lineage.

That same fall, a Marksman x G47 daughter brought \$34,500 for half interest, reinforcing the strength and market appeal of these genetics. These embryos represent a rare opportunity to own a truly different and elite type of Hereford — blending power, structure, and style.

¾ BROTHER SELLS AT LOT 8

The donor female behind these embryos is an extraordinary 4092 daughter, purchased by Brandon Pacheco and family at a \$60,000 valuation. Known as Shirley, she earned the titles of Reserve Supreme Champion at the 2020 California Youth Ag Expo, Champion Hereford (Ring B), and Reserve Champion Hereford (Ring A) at the 2020 Western Bonanza. Upon returning home, Shirley transitioned effortlessly into her role as a donor.

We don't yet have a mature photo of her, but this American Classic daughter exemplifies the power, look, and maternal strength we strive to produce. We are proud and excited to finally offer embryos out of this remarkable female — a cow whose influence is sure to be felt for generations.

FULL BROTHER SELLS AT LOT 7

A maternal sister sold for \$32,500 for no possession and half embryo interest in the October 2025 Sale for T/R. A full sister would be the popular Lot 14 Fall Born heifer from our April 2023 Sale, who sold to Jenkins/Hawes for \$32,000 for possession and half embryo interest. A fall American Classic sister to these embryos also brought \$10,000 for one-third embryo interest.

When we first laid eyes on 1810, we knew she was something special. She is arguably the best daughter ever produced by the great Mirror Image, and a full sister to 1816 as well. If you haven't seen her in person, be sure to check out her picture above — her look and presence speak for themselves. The pedigree is loaded, and her siblings are built as uniquely and powerfully as you could ever want.

The Marksman x 1810 mating has proven to be a true powerhouse combination — big time genetics with proven performance and eye appeal. 1810 is a direct daughter of Mirror Image and a full sib to 1816, 1813, Augustus, and El Captain, all of which have contributed significantly to this influential cow family.

MATERNAL SISTER SELLS AT LOT 22

Opportunities like this don't come often — these embryos are stacked with elite genetics, market demand, and the potential to make your investment back and then some.

FULL SISTER SELLS AT LOT 27

4064 doesn't have much left in the tank — take advantage! These embryos are full sibs to Lot 34 and come from a cow family with proven excellence. A maternal sibling to these embryos was Reserve Champion Horned Female at the 2024 NJHE.

Two full sisters to these embryos sold last fall for \$35,000 and \$22,000 for half embryo interest with no possession, while another maternal sibling sired by Red Kingdom sold for \$22,500 at the 2023 GKB and Barber Ranch Female Event and won her class at the 2024 NJHE.

The production potential here is immense — these embryos give you the chance to create your own donor cow from a line of proven champions. The Two-Time National Champion Female stems from three legendary donors: TCC MS Diana 01, TCC Miss Shelby 82, and Harley.

FULL SISTER SELLS AT LOT 39

4064 herself is a high-producing powerhouse. A recent daughter earned Reserve Champion Horned Hereford at the 2022 Fort Worth Livestock Show, Champion Horned Hereford at the 2022 Houston Livestock Show, Division IV Champion Horned at the 2022 JNHE, and Champion Horned at the 2022 Heart of Texas Show for Jarrett Worrell and family.

These embryos are from a line that has consistently commanded top dollars: \$30,000 and \$45,000 in 2017, \$36,000 valuation in 2021, \$13,500 in 2022, and \$24,000 for an Aventus daughter in 2023. 4064B is considered one of the best cows to ever step foot on our ranch, and this family offers elite, proven genetics stacked with successful cow.

FULL SISTER TO LOT 65 EMBRYOS

Siblings are absolutely burning it up in the show ring. In the last year alone, they have captured titles including Champion Junior Polled Hereford Female at the 2025 Fort Worth Stock Show & Rodeo, Reserve Champion Polled at the 2025 San Antonio Stock Show & Rodeo, and Reserve Champion Junior Horned Hereford Female at the 2024 Fort Worth Stock Show & Rodeo. They've also earned multiple division championships across both junior and open shows at Fort Worth, along with banners from the Texas Junior Hereford Association, Junior National Hereford Expo, and the Ohio State Fair.

The success doesn't stop there—going back to 2023, three sibs claimed wins at the Texas State Horned Hereford Show, Texas HOT Fair, and multiple divisions at the Junior National Hereford Expo.

DAM OF LOT 37

The generating power behind this cow family is just as impressive. In 2022, a natural calf sired by American Classic sold at a \$50,000 valuation, prompting us to flush her back this direction. That same year, ET calves from this mating brought \$34,500 and \$20,750 for possession and half embryo interest. In 2023 and 2024, additional siblings commanded \$60,000 (no possession, one-third embryo interest) and \$75,000 for full possession. The track record here is a mile long. She herself was Reserve in her calf division at the 2019 NWSS and Champion Division IV Horned at the 2019 NJHE. Full siblings include 1810, 1813, 1816, Augustus, and El Capitan—names that need little introduction. Mirror Image has consistently put cattle in the backdrop, and this flush is no exception. 1813 won the Fort Worth Junior Show, and what Augustus and El Capitan have accomplished speaks for itself.

FULL SISTER SELLS AT LOT 40

70J is out of a full sister to the 2019 NWSS Reserve Grand Horned Female in the Open Show—power in the blood from the start.

She backed it up herself, going Reserve Division behind the Champion Polled Female at the 2021 Cattlemen's Congress. Red-eyed, big-footed, and loaded with look and presence, she is a stouter, more rugged-made version of her horned counterpart, all while maintaining a really good udder. The kind that blends power, function, and eye appeal—exactly what it takes to make a great one.

FULL SISTER SELLS AT LOT 29

Maternal sibs to the G47 donor—who also sells embryos as Lot 63—this is a pedigree that flat gets it done. A full sister (pictured below) commanded \$27,500 for half embryo interest in 2025 after bringing \$13,500 in the October 2024 sale. And that's just the start—G47 herself sold at a \$60,000 valuation and continues to prove why. In 2023, she produced a high-selling female at \$34,500 and did it again in 2025.

The cow power runs even deeper. In 2021, 4092 sold in our fall production sale for \$27,500, with two daughters selling that same day and more demand rolling in afterward. Even at seven years of age, we knew we had to have her back—and after a trip to Texas, she came home.

MATERNAL SISTER SELLS AT LOT 47

Study the lineage and it all makes sense. 4092 is a maternal sister to BR Belle 4082 ET, the dam of BR Belle Air, and she is also a full sister in blood to BR Anastasia—one of the most dominant females to ever come out of Barber Ranch.

BUCKLE IN—this is the kind of opportunity you don't want to miss.

FULL SISTER SELLS AT LOT 48

Full and maternal sisters have commanded attention and topped our sales year after year—this is a cow family that flat produces. Marksman on the great Z03... it doesn't get much better than that. Old faithful here just keeps getting better with age.

She is the dam of the \$60,000 high-selling open female (sired by 2296) at the 2022 National Hereford Night in OKC. Pictured as a 9-year-old in the summer of 2021, and we fell in love with her all over again. These matings should be red hot.

I first laid eyes on this donor at a Hereford dispersal in Dunlap, and she was the one that stood out. She went on to be named Reserve Grand Champion Bred-and-Owned Female at the 2013 NJHE for the Tucker family. To this day, she's usually the first one people ask about when they walk through the pasture—so much look and power in one package. Z03 is getting up there in age, and her time is limited—so take advantage of these genetics while you still can. We will only be offering a few more packages, as age is beginning to play a role in her production.

We can't stress it enough—the kind of cows her daughters turn into is what keeps you in business.

FULL SISTER SELLS AT LOT 50

MATERNAL SISTER SELLS AT LOT 50

MATERNAL SISTER SELLS AT LOT 50

A maternal sister to the first package brought \$31,500 for half embryo in the October 2025 sale for T/R. Another sib to these embryos commanded \$24,500 for half embryo interest in our May 2024 sale, and these embryos are also sibs to the 2023 HYFA heifer, who sold for \$30,000 for half embryo interest and no possession. A sister to these eggs (sired by Marksman) just produced a \$36,000 Black Hereford as a first calf heifer in the December 2025 T/R and Hensley Female Sale.

Her progeny are absolutely unreal — the kind that makes you stop and stare. The offspring are wild made, unique in their build, and flat-out elite. If there's ever been a mating capable of producing next-level cattle, this is it.

The donor cow behind this set is incredible in person — a true standout in the Hereford breed and one we believe could make a lasting impact across multiple breeds. It's hard to imagine a female more "out there" in terms of design, power, and presence. She's bold in her look, exceptional in her maternal quality, and her pedigree screams generating potential.

Prior to 2023, 8424 had averaged \$25,000 on every natural heifer calf ever sold — and she did it again recently with the full sib to these embryos. The average continues to climb in progeny sales. She stands as the most dominant offspring out of Strawberry Wine, and she continues to define what elite Hereford genetics should look like.

FULL SISTER SELLS AS LOT 41

We partnered with TRM and Cane Creek on the \$30,000 pick of the Cane Creek carload bulls at the 2026 National Western Hereford Sale. His dam, CCCC Katie 258K ET, whose half interest sold in 2023 to Bowling Ranch, is a full sister to EXR Generator 0333, the high-selling Hereford bull of the 2022 Express Ranches bull sale.

His pedigree blends KJ 7603 Element 019L ET—the Reserve Champion Polled Bull at the 2024 NWSS as a calf before going on to be the \$95,000 high seller at Jensen's 2024 Spring Bull Sale—with Genesis, Revolution, 88X, and Sooner, backed by the influential Bailee, Gabrielle, and Notice Me cow families.

FULL SISTER SELLS AT LOT 38

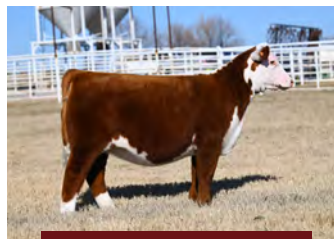

The impact of 45C on the industry is well documented—you could practically write a history book on her accomplishments. Her influence runs deep through some of the most recognizable and highly respected sires of recent years, including Prominent, Standout, Benton, Substance, Miles Ahead, Inception, Exodus, and Chisum, along with an impressive roster of high-selling, highly productive females. This donor has firmly stamped her legacy on the breed.

She commanded a hammer price of \$87,500 when she walked across the stage. She has sold multiple high sellers and she isn't slowing down. Grab these embryo's while you still can.

We are confident buyers will appreciate the quality represented in these embryo's. Backed by pure cow power, they exemplify the structural integrity, balance, and performance that have made 45C one of the most dependable donors in the business.
