GRIMMIUSBULLS.COM

SALE INFORMATION

This sale features our high-demand bulls where supply has not met the inquiries for availability. To make it a fair buying environment for our customers, we will be auctioning off the semen units on these sires listed in the following pages.

- Bidding will be PER UNIT/STRAW during the auction.
- Winning bidder will have the choice option on quantity they desire. The winning bidder can take any amount within the quantity available (unless otherwise noted).
- Purchase Price will be the winning bid amount x quantity selected. For example, if the winning bid was \$250.00 and the buyer selects five (5) units – the invoice will be for \$1,250.00 (\$250 x 5).

CCI.LIVE

HOW IT WORKS

- As a buyer, you DO NOT need to login to watch the sale but you must have a validated account to bid.

TO BID ONLINE go to www.CCI.live in your Chrome, Firefox, Safari or other modern browser:

1. Click on the sale schedule page.
 2. Click on the sale of interest.
 3. Click on Bid Online- Register and then Get Buyer Number
- After you are logged in, you must proceed to the sale page for your auction and click Bid Online - Register, then "Get Buyer Number." Some auctions require valid credit card number on file to obtain a buyer number to bid.
 - CCI.live will operate with ease on a modern cellular device, laptop, desktop or tablet.
 - A current browser is important and will always make your experience better.
 - Support line open during all sales. TEXT 405-400-9505

Selling TWO packages of three (3) IVF embryos

This mating represents a unique opportunity to combine one of the breed's most exciting young sires with one of the most elite genomic females to emerge. Lottery Pick has quickly established himself as a standout for combining elite growth, carcass merit, and maternal value, ranking among the breed's leaders for Marbling, \$G, \$B, and \$C.

The donor dam, GCC Donna 4582, is a true genomic outlier. She currently ranks as the #1 \$C daughter of Ellingson Badlands and combines an exceptionally rare blend of maternal, structural, and terminal traits. Her genomic profile places her among the elite females in the breed with Top 1% \$M, Top 4% \$C, Top 5% \$F, Top 10% Docility, Top 2% Claw Set, Top 1% Foot Angle, Top 10% Carcass Weight, and Top 15% Ribeye Area. Few females can simultaneously offer elite maternal efficiency, structural excellence, growth, and carcass merit while maintaining the balance and functionality found in 4582.

Adding further value to this pedigree, 4582 is backed by the legendary Coleman Donna family. Her dam, Coleman Donna 9309, is a full sister to the popular calving ease sire Coleman Night Watch. The Donna family has built its reputation through generations of fertile, productive, long-lasting females that excel in real-world ranch environments.

When elite genomics, proven cow families, structural integrity, maternal excellence, and end-product merit come together, the result is unlimited potential. This is a true next-generation genetic package designed to move a program forward for years to come.

Balanced Combination of Elite Performance and Quality Design.

WESSON is a true spread bull that offers calving-ease with a rapid growth pattern that includes top 10% breed ranks for WW and top 5% YW with downward pressure on mature size. He also features:

- \$C: 455 (Top 1%)
- Top 3% or better — Carcass Weight, Ribeye, and Calving-ease Maternal
- Top 5% or better — Marbling, Claw Set
- Top 10% — Foot Angle
- Top 15% — Calving-ease Direct and Residual Average Daily Gain

These traits also elevate WESSON into the top 10% for his \$Maternal Weaned Calf Value (\$M), and when combined with a breed average (\$EN), his daughters should be profitable with more quality pounds weaned and less input cost. In the flesh, this sire excels in phenotypic balance with distinct advantages in length, structural integrity, and internal dimension. He has an attractive pattern yet still maintains the masculine look of a herd bull.

Incredible output with ideal design and function.

BIGHORN will go down as one of the true highlights of the 2026 sale season. His attraction and interest were widespread across the industry as he offers high values to multiple channels of our industry. He features:

- \$C: 400 (Top 2%)
- Unmatched growth potential with top 1% rankings for WW, YW, RADG, and Carcass Weight
- Calving-Ease with top 25% CED and a negative BW rank in the top 25% as well
- Strong genetics for end product merit that includes a top 10% Ribeye rank, and when combined with his growth – he ranks in the top 5% for \$Beef Index.

Aside from his output potential, BIGHORN looks to elevate replacement quality in his daughters with:

- Top 10% — Calving-ease Maternal and a balanced Milk value.
- A balanced suite of EPD for the new maternal traits that include Teat (top 30%), Udder Structure (top 45%), and Functional Longevity (top 35%).
- Top 15% — Docility

Aside from his genetic strengths, BIGHORN is a true standout due to impressive individual qualities and pedigree. He weaned off at over 800 lbs. and had an adjusted yearling weight of 1,510 lbs. With all that power and performance, BIGHORN maintains an impressive skeleton with extra base width and accurate alignment that results in a massive, easy moving, level designed individual with a herd bull look.

The stoutest, most powerful Gardiner bull we have sourced yet.

STEEL DRIVER is a unique individual that had dominant performance at Gardiners where he charted a 125 IMF ratio and a 118 Ribeye ratio in a contemporary group of over 230 head. Even with a 104 scan weight ratio, his 17.9 ribeye measurement calculated to 1.42 square inches/cwt. On test he did 4.17 lbs./day to index 119 on his Gain Ratio. His resulting EPD profile includes:

- \$C: 449 (Top 1%)
- Top 4% or better — Carcass Weight, Marbling, and Ribeye
- Top 5% — Teat Length
- Top 10% — Calving-ease Direct
- Top 15% — Growth, Residual ADG, and Udder Suspension
- Top 25% — Docility, and Calving-ease Maternal

STEEL DRIVER is genetically designed for performance, but we really appreciate the phenotypic components with which he delivers that potential. He is a stout made, masculine, 6-frame bull that excels in length of body and squareness. He has great flex off both ends of his skeleton, covers his track, and maintains a wide base throughout his lower third.

The SG Salvation influence in the Gardiner program has been exciting to watch, and we feel STEEL DRIVER has surfaced to the top of that mating initiative.

The available full brother in blood to Wilks Avid, but with double-digit CED.

Here's a young prospect that can excel in many scenarios with balanced calving-ease, top end growth, and breed leading carcass merit. His genetic profile also favors replacement females with strong rankings across both foot and udder quality. His individual ranks include:

- \$C: 450 (Top 1%)
- Top 10% — Calving-ease Direct, Teat Length, Udder Structure, Carcass Weight
- Top 15% — Residual ADG, Ribeye, Heifer Pregnancy, Hairshed
- Top 20% — Growth, Foot Angle, Claw Shape

ACHIEVER is also a trait leader for Marbling with a [+2.05] EPD. His notable dam remains at the top of proven females in the breed for \$Combined Value and is rapid becoming one of the highest revenue generating females in the breed, not only for her inherit genetic levels – but also a high level of phenotypic power and quality in her offspring.

Absolute power with stacked maternal lines.

KEYNOTE is a true building block sire—designed to anchor a program with balance, integrity, and profit-driven performance. Backed by the proven Basin Keystone × Fair-N-Square × Blueprint combination and supported by the productive Gammer cow family, KEYNOTE traces back to the legendary Bon View Gammer 85, the dam of Bon View New Design 878 and Woodhill Foresight, further cementing the maternal depth and generational consistency behind this standout herd sire prospect.

KEYNOTE offers a balanced, real-world profile starting with Top 15% CED and a negative BW, making him an excellent option for added calving ease without sacrificing performance. He drives forward with Top 10% WW and YW and Top 30% RADG, delivering efficient, growth-oriented cattle that perform from pasture through finishing. His maternal strength is equally impressive, highlighted by Top 10% Milk, Top 10% Teat, and Top 10% Foot Angle with Top 25% Claw Set; ensuring functional, productive daughters with longevity built in. Add in elite disposition with Top 1% Docility, and you have cattle that are as manageable as they are productive.

On the carcass side, Keystone rises to the top with Top 1% REA, Top 10% CW, and strong marbling, translating into real grid value. His index profile solidifies his elite status—ranking Top 1% \$M and \$C, and Top 10% \$B, making him a true multi-purpose sire that drives profitability across every segment of the industry.

A performance outlier built with red meat composition.

This is the **initial semen release** on ANOINTED, one of the more impressive bulls we saw this spring that charted incredible performance at Connealy Angus. Outside of his growth with a 108 Weaning ratio and 108 Yearling ratio, he also had a 125 IMF ratio and followed up with a 40.87 cm adjusted scrotal measurement. When combined with his genomics, ANOINTED provides a balanced EPD profile for economically relevant traits that include:

- Top 10% — Weaning Weight
- Top 15% — Yearling Weight, Carcass Weight, Marbling, Docility and PAP
- Top 20% — Residual ADG, Scrotal, Claw Shape

His advantages in PAP and Hairshed make him suitable for many environments, and he also maintains a very efficient growth pattern with a strong RADG that also features a top 35% breed rank for DMI. His resulting indexes from this EPD profile elevate to the top 4% of the breed for Maternal Weaned Calf Index, top 10% for \$Beef, and consequently a top 4% rank for \$Combined Value. The dam of ANOINTED has a Nursing Ratio of 2/105 and her first calf sold into the Alta Genetics program. She is currently in the donor pen at Connealy Angus. ANOINTED excels in length of body, stoutness, and true muscle shape down his top and through all portions of his hip and stifle. He is built for the current market signals of added performance in a dense package of red meat yield, and his suite of management traits will deliver quality replacement females.

Elite Herd Bull Potential Held in Reserve for the Progressive Cattleman.

RESERVE was the lead bull in his pen and quickly became one of the most talked-about individuals in the history of the Zehnder Waage program. In terms of true herd sire potential, RESERVE checks all the boxes—combining elite performance, structural integrity, phenotypic quality, and breeding flexibility into one complete package. His added power and performance are further enhanced by an eye-catching look, exceptional balance, and the kind of structural correctness demanded by today's progressive cattle industry. He offers a uniquely balanced genetic profile with **nine traits ranking in the top one-third of the breed and eight traits in the top 15%**, reinforcing his ability to impact multiple economically important traits simultaneously. His pedigree provides valuable breeding flexibility—an increasingly important advantage within the Charolais breed today. Further validating the strength of this maternal line, a maternal sister was selected by Wright Charolais as a bred heifer through a past National Charolais Sale. Genetically, Reserve excels as a true curve-bending sire with **Top 8% CE and Top 30% BW**, while still delivering elite growth performance highlighted by **Top 15% WW and Top 3% YW**. His ability to combine calving ease with explosive growth makes him an elite option for both seedstock and commercial programs focused on maximizing efficiency and profitability. Maternal value is another standout feature, ranking **Top 2% Milk, MCE, and MTL**, supporting the development of productive, fertile daughters with longevity and udder quality. On the terminal side, Reserve continues to impress with **Top 2% Carcass Weight and Top 4% TSI**, validating his ability to generate feeder cattle with added pounds and industry-leading value. A true herd sire in every sense—Reserve combines power, phenotype, structural integrity, maternal excellence, and breeding flexibility into one elite Charolais package.

Massive Power. Legendary Potential.

HERCULES is the kind of bull that commands attention the moment he enters the pen. Combining the explosive growth and carcass merit of **LT Tank 3263 PLD ET** with the proven maternal excellence of the renowned **Carol cow family**, Hercules represents the powerful, performance-driven genetics that have made Lindskov's LT Ranch a leader within the Charolais breed. Hercules was a standout from an early age, posting an impressive **111 weaning ratio**, and **110 yearling ratio**, proving his ability to outperform his contemporaries at every stage of development. His performance continued through ultrasound evaluation where he posted an exceptional **158 IMF ratio**, demonstrating rare carcass quality for a bull that also offers elite growth and power. His genetic profile mirrors his individual performance, ranking **Top 7% WW and YW**, while maintaining a favorable calving profile. Hercules further distinguishes himself with **Top 3% Marbling**, **Top 1% Fat**, and a **Top 6% TSI**, placing him among the elite multi-trait Charolais bulls of his generation. What truly separates Hercules is the combination of power, structural integrity, and phenotype. He possesses the extra body, muscle shape, skeletal quality, and herd bull presence that cattlemen search for, while maintaining the balanced genetic profile needed to drive profitability in both seedstock and commercial operations. **Built like his namesake, Hercules combines power, performance, and profitability in a package capable of leaving a lasting mark on the Charolais breed.**
