FALL BULL SALE

Wednesday • October 28, 2026 • 11 A.M.

2880 N 55 W • Idaho Falls, Idaho 83402

Welcome

Dear friends and neighbors,

We are excited to welcome you another year to the Genetic Edge Fall Bull Sale! We are grateful to the many ranches and ranchers who continue to choose to support our program as they seek quality genetics to bring value to their operations.

Over the years we have aimed to bring you bulls that will perform in your herds and increase profitability. We not only are striving to bring you high-quality animals that work on the ranch but also animals that will excel in the feedlots across the country so that your calves will demand a premium on sale day. Each year we continue to scour the county to identify the best cows in the angus breed and bring them to Idaho to create powerful bulls for your herds.

This year we are starting out the sale with 7 sons of Elba 9501 and featuring a handful more throughout the sale. Leading off is a powerful son of Commerce that provides calving ease and growth followed by a son of Congress. Both bulls feature low PAP scores and high $M. Other standouts are sons of our donor Rita 0028, lot 11 and 40. Both are stout and heavy muscled, offering a nice phenotype with added carcass potential. These are followed by dozens of other exceptional quality bulls whose dams and sires have established themselves with generations of superior performance.

Every bull in this offering has gone through a rigorous process to ensure soundness, structure and conformation.

And, as always, every bull is backed by the famous Riverbend Ranch Guarantee. Not only are they guaranteed against injury for the entire first season, your satisfaction with your bull is also absolutely guaranteed, regardless of whether you purchase one bull, or a dozen.

Feel free to reach out to anyone on the Riverbend team for any questions or information.

We hope to see you on sale day!

Sincerely,

Frank VanderSloot

PAP SCORING CHART

PAP	INTERPETATION
30-35	This score is considered excellent and highly reliable
36-39	This score is considered excellent for any animal over the age of 12 months. If the animal is less than 12 months of age, the score is still fairly reliable, but retesting before breeding is suggested
<41	Scores less than 41 are reliable measurements in all animals more than 12 months of age. It is recommended that yearling cattle have PAP measurements less than 41. The varaiation in scores 41 and above are inconsistent and difficult to predict in some cattle as they age. Any animal measuring 41 and greater should always be retested before use.
41-45	This range is accepable for older animals (ie more than 16 months of age). Animals less than 16 months should be retested to predict the future PAP score of the animal accurately.
45-48	This range is acceptable only for older animals that have been in high elevations for an extended period of time. Animals with this score are more susceptible to environmental stresses leading to HMD and should be considered at some risk. Elevation of test site and where the animal lives must be evaluated closely for those in this PAP score range.
>50	Animals that score in this range must always be considered high risk canidates for developing HMD, not only for themselves but also their offspring. Many animals that have scored in this range have died of HMD. An option of these animals is to move to lower elevations.

BULLS TESTED IN SUMMER 2026 IN DILLON, MT AT 5,200 FT
WHEN THEY WERE GREATER THAN 12 MONTHS OF AGE.
